This study was designed to explore the effects of vestibular stimulation on the developmental behavior, respiratory functioning, weight and length gains, and morbidity and mortality rates of premature infants. A total of 20 infants participated in this study in 4 groups of 5 infants each. Group A infants were placed in a motorized hammock within their incubators and were rocked gently for 30 minutes, three times a day. Group B infants were placed in the same type of hammock but were free to remain still or initiate motion themselves by any slight bodily movement. Group C infants were placed in a stationary hammock to control for variables such as extra handling and the fetal position assumed when in the hammock. Group D was the control group in which the infants received traditional nursing care. The findings indicated that the in-

fants in Group A had higher pH levels and greater linear growth than the infants in any of the other groups and that the Group B infants showed the greatest weight gain. These data are interpreted as suggesting that the development of integrating biological behaviors of the small premature infant may be influenced by a specific motion pattern. (JMB)

**Adoption: Three Alternatives. A Comparative Study of Three Alternative Forms of Adoptive Placement.**

Chicago Child Care Society, Ill.

Spons Agency—Elizabeth McCormick Foundation, Chicago, Ill.

Pub Date 73

Note—26p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Adjustment Problems, \*Adopted Children, \*Adoption, Comparative Analysis, Evaluation Methods, Infancy, Interviews, Longitudinal Studies, Motor Development, \*Negro Youth, \*One Parent Family, Participant Characteristics, \*Program Descriptions, Reliability, Social Development

Identifiers—\*Transracial Adoption

This descriptive report covers the first phase of a 20-year longitudinal study of black children adopted under 3 years of age by black couples, white couples, and single persons. The sample of three groups of approximately equal size was selected from the adoptive placements of two private child welfare agencies between June 1970 and June 1972. The longitudinal study will be an assessment of the family's capacity to form close relationships and handle stress. The material presented in the first phase report was gathered from case records and interviews before, immediately after and two months after placement. Descriptions of the applicants, the children they adopted, and their early adjustment as a family are included. Interesting differences among the experimental groups are revealed in this report. For the most part, the children in the study have had few problems and seem to be developing well. Children and families with problems are described. Statistics on interview-item reliability are given. (ED)

Descriptors—\*Adolescents, Bibliographies, Child Development, Childrearing, Cultural Differences, Day Care Services, Dialects, Family Planning, Infants, \*Parent Education, \*Parenthood Education, Resource Materials, \*Secondary Education, \*Teaching Guides, Teaching Methods

Identifiers—\*Consortium on Early Childbearing and Childrearing

This teacher's guide is part of the parenting curriculum package developed by the Consortium on Early Childbearing and Childrearing (CECC) and is meant to be used in conjunction with parenting curriculum materials (published in 1974) designed for use with school-age parents. Supplemental information presented in the guide is subdivided into three parts. The child development section provides information on the physical, social, emotional and cognitive development of infants during their first, second and third years, and offers a discussion of alternative methods of day care. Bibliographies on child development, language acquisition, and poetry for children are included. The section on teacher resource materials includes suggested teaching methods, sample lesson plans, tests and worksheets, suggested role-playing situations, and sources for audio-visual aids and free materials.

the appendices, approximately one-third of the slide, provide further information for the teacher in theories of child development and language acquisition, adolescence and adolescent pregnancy, and cultural differences within the U.S. (non-English language, food customs, and bibliography). An annotated bibliography on adolescent sexuality and family planning is also included. (D)

**Identifiers—**\*Field Dependence  
This study was designed to examine the family interaction differentiating the families of field dependent and field independent children. A total of 300 white, middle class, kindergarten children were tested with the Portable Rod and Frame Test and the Children's Embedded Figures Test and were classified as field dependent or field independent based on their scores on these tests. From this sample, 18 extremely field dependent children (9 boys and 9 girls) and 20 extremely field independent children (10 boys and 10 girls) were selected for this study. Observations of these 38 children interacting with their parents were made in the home setting around dinner time and in a series of 6 laboratory tasks designed to elicit power and autonomy behaviors. The results indicated that families of field independent children were characterized by less structured family power relations which varied in expressions of autonomy and power from situation to situation. Families of field dependent children seemed to have a more sharply defined set of family roles and more stability in the power structure. Further, it was found that for field independent families, the same sex parent was the dominant figure, while for field dependent families, the opposite sex parent was dominant. (JMB)

**The Organization of Verbal and Spatial Materials Presented Tachistoscopically: A Developmental Study.**

Pub Date Apr 75

Note—14p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Adults, Age Differences, \*Cognitive Development, \*Cognitive Processes, \*Elementary Education, Memory, \*Perceptual Development, Recall (Psychological), Tachistoscopes, Visual Perception, Visual Stimuli

**Identifiers—**Spatial Stimuli  
The purpose of this study was to investigate the development of organizational processes for both verbal and spatial stimulus materials within an information processing framework. Children in grades 2 and 4 and adults were tested for their ability to report letter strings reflecting various orders of approximation to English and various patterns reflecting different types of symmetry. Patterns were presented tachistoscopically; four exposure durations (50, 100, 150 and 200 msec), followed by a patterned mask. Results indicated that subjects in all three age groups showed greater ability to extract information from the iconic store if materials were structured. Moreover, subjects increased in the ability to extract information from verbal materials as they grew older. No age-related change in extraction efficiency was noted for the spatial materials

when age-related differences in absolute short-term memory capacity were controlled. (Author/ED)

**Models of Learning Disability: Their Relevance to Remediation.**

Pub Date 75

Note—9p.

Available from—Hospital for Sick Children, Neurology Department, Toronto, Ontario, Canada

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Clinical Diagnosis, Cognitive Development, \*Educational Diagnosis, \*Elementary Education, Hyperactivity, Individual Instruction, \*Learning Disabilities, Medical Treatment, Minimally Brain Injured, \*Models, Remedial Instruction

A scheme of classification is suggested for physicians faced with various prescriptions for remediation of children with learning disabilities. Three models of the causes of learning disability are suggested: (1) the difference model which stresses normal variability in the pattern of development of mental abilities; (2) the deficit model which assumes a limited malfunction of the brain; and (3) the delay model which suggests transitory immaturity or lag in development as the cause for learning disability. Process-oriented and goal-oriented strategies of management are delineated. Remedial methods are classified according to their implicit model of etiology and their adherence to the process- or goal-oriented approach. An atheoretical, goal-oriented approach which works with the existing pattern of the child's abilities and seeks to tailor individualized instruction to the specific gap in academic understanding and knowledge is advocated. **Descriptors—**Academic Achievement, Classroom Arrangement, \*Classroom Environment, Classroom Research, Disadvantaged Youth, \*Early Childhood Education, Interaction Process Analysis, Preschool Children, \*Student Behavior, Student Characteristics, \*Student Teacher Relationship, \*Teacher Behavior, Teacher Characteristics, Teaching Methods

**Identifiers—**Project Head Start

The effect of classroom environment on Head Start, preschool and primary grade children is examined in this study which organizes the results of a number of selected studies. The research strategies employed in these studies included observations in specified programs (in-class or by video-tape), tightly-controlled classroom experimentation combined with observations and observations under uncontrolled and naturally varying classroom conditions. Research concentrated on the examination of four areas: (1) the relationship between prescribed treatments and classroom behavior; (2) the relationship between teacher behavior and children's classroom behavior; (3) the relationship between teacher behavior and relatively permanent characteristics of children; and (4) the relationship between children's classroom behavior and relatively permanent characteristics of children. Results of the studies of disadvantaged children indicate that didactic small-group instruction, regardless of which mode was used, was associated with restriction of the range of child behaviors. Methodological considerations for future research are explored. (Author/ED)

**Descriptors—**Curriculum Planning, \*Elementary Education, \*Faculty Advisors, Inservice Teacher Education, Interaction Process Analysis, \*Open Education, Parent School Relation-

ship, \*Program Descriptions, Program Planning, \*Resource Staff Role, Student Evaluation, Teacher Administrator Relationship, Teacher Evaluation

**Identifiers—**(Weber (Lillian), \*Teacher Advisor Role

The multi-faceted role of the advisor in an open education setting is defined in this paper. Background information on the development of the open corridor approach to elementary education (created in America by Lillian Weber), the subsequent emergence of the teacher support position of advisor and the resulting advisor training program is provided. The advisor has a variety of duties in her role as a non-partisan, non-threatening aide to participating teachers, in which she must develop a relationship with teachers which encourages their learning and development within the open corridor model. In this capacity, the advisor: (1) assists with planning, scheduling, and room arrangement; (2) leads weekly discussion groups with teachers on curriculum, organization, and children; (3) helps teachers observe and evaluate individual children; (4) maintains a liaison between teachers and the administrative staff, and between specialists and teachers; and (5) interprets the program to parents and suggests ways in which parents can participate. **Development of Cognitive Mapping Capacities.**

Pub Date Apr 75

Note—10p.; Pages 7 through 10 (drawings of slides) have been filmed from best available copy; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Age Differences, Behavior Patterns, \*Cognitive Development, \*Cognitive Processes, \*Early Childhood Education, Haptic Perception, \*Kinesthetic Perception, Learning Processes, Maps, \*Space Orientation

The development of children's capacity to induce spatial relations between locations in a space was investigated in this study. The sample consisted of 60 children, 20 in each of three age groups: 3-4, 5-6, and 7-8 years of age. The children were trained to move one hand from a home base to each of three target positions. The positions were learned solely through motoric experience since the children could not see the targets. Once they had learned to find these three positions, the children were tested on their ability to move one hand directly from one target to another without going back to the home base. Each child's accuracy was recorded on a large sheet of paper (map) placed beneath the targets. Measures used in the analyses were the absolute accuracy for each position judgment in training and testing, relative accuracy for each test judgment, and angles formed by lines connecting test judgments. Results indicated a significant improvement in accuracy with age on all four measures, although some 3-year-olds were quite proficient in constructing maps on the experimental space. It is suggested that the induction of spatial relations may be a general characteristic of spatial behavior. (Author/ED)

**Remarks on the Possible Economic Significance of Early Childhood Educational Technology.**

Pub Date May 73

Note—26p.; Paper presented at the meeting of the American Orthopsychiatric Association (New York, New York, May 29-June 1, 1973)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**Achievement Gains, Disadvantaged Youth, Economic Factors, Economic Research, \*Educational Economics, \*Educational Technology, Low Achievers, Prereading Experience, \*Preschool Education, Reading Ability, \*Reading Achievement, Reading Skills, Remedial Programs, Teaching Machines

**Identifiers—**\*Edison Responsive Environment

This pilot study investigated the projected long-term economic effects of using the Edison Responsive Environment (ERE) machine in teaching 3- and 4-year-old preschool children. The ERE can be programmed in a variety of ways (to talk, play games, read aloud, show pictures and take dictation). The program developed for this study had four phases: (1) child learned

alphabet; (2) child learned that letters form words; (3) child learned to read what he or machine typed; and (4) child developed personal stories using his own voice and drawings (for slides). Data collected between 1967 and 1972, on deprived and non-deprived preschoolers, exposed or not exposed to ERE, indicated the effectiveness of this technological approach to the development of prereading skills, considered basic to continued success in school. Statistics based on the concept of the economic dollar value of potential lifetime earnings (which fluctuate according to the level of schooling completed by an individual) indicated that the potential use of ERE technology as a preschool remedial technique for disadvantaged children is economically significant, even when the costs of purchasing and using ERE equipment are considered in the analysis. Identifiers—\*Metamemory

This paper explores the concept of metamemory, generally defined as the individual's knowledge of and awareness of memory. The concept of metamemory is compared to three other categories of memory and a model of what the growing child could conceivably acquire in the domain of metamemory is presented. Brief reviews of existing research relations between metamemory and other psychological phenomena, with special reference to strategic memory behavior. Finally, some propositions about how metamemory might be acquired are offered. (Author/ED)

Characteristics of U.S. Rural Areas with Noncommuting Population. Committee Print, 92nd Congress, 2nd Session, June 30, 1972.

Economic Research Service (DOA), Washington, D.C. Economic Development Div.

Spons Agency—Congress of the U.S., Washington, D.C. Senate Committee on Agriculture and Forestry.

Pub Date 30 Jun 72

Note—84p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—Age, \*Community Characteristics, Comparative Analysis, Employment, \*Federal Programs, Geographic Regions, Housing, Income, Needs, \*Population Trends, \*Rural Areas, Rural Urban Differences, Tables (Data), \*Transportation

Identifiers—\*Noncommuter Counties

Utilizing U.S. Census and other government data, the characteristics of rural areas with noncommuting populations were identified in terms of: (1) Population Trends (1970 regional population distribution, 1960-70 population change, 1970 age distribution of U.S. population, 1960-70 growth and decline of towns); (2) Income and Employment (1959-67 per capita income, narrowing the gap, differences in per capita income by geographic divisions, per capita personal income by geographic divisions, and 1959-69 nonfarm employment growth by geographic divisions); (3) Housing (status of occupied housing units, tenure differences, and regional comparisons); and (4) Government Services: State

and Local Government Expenditures and Revenue and Distribution of Federal Program Funds. Urban counties were identified as those having a population of 25,000 or 10,000 nonfarm jobs as of 1970, commuter counties as those with a 10 percent commuting population, and the remaining counties (12 percent) as noncommuter counties. Findings indicated: (1) the most pressing needs of noncommuter areas were more adequate income, better housing, and acceptable public services; (2) local governments were increasingly depending upon State and Federal assistance; and (3) Federal programs were not proportionately reaching noncommuter counties, particularly in education, training, housing, and welfare. Identifiers—BIA, Bureau of Indian Affairs, Combination Schools, Federal Schools, \*Presidential Secretarial Educ Objective 1975, Tribal Private Schools Contract Schools

In response to the Presidential/Secretarial Educational Objective of 1975 which called for a statement from American Indian communities relative to their educational management preferences, the Office of Indian Education Programs (OIEP) established a program for gathering and disseminating educational management options to Indian people. A seven program series was developed by OIEP which included the following: (1) Introduction to the Series: Management Decisions in Indian Education; (2) Selecting Educational Goals and Assessing Educational Needs; (3) The Federal School; (4) The Public School; (5) The Tribal-Private School; (6) The Combination School; and (7) Another Look: It's Your Move (a review of all options). While 78 schools participated in the FY 1975 project, there has been a reluctance to officially determine community preferences as some people see the right to no decision as inherent in the definition of self-determination. Other Indian people are simply generally suspicious of any government program, believing the only real option to be that of the contract school which is perceived as just another avenue toward termination. Employing a more gradual approach to the transition period and allowing for an Indian definition of self-determination, the OIEP has extended the Objective through FY 1976 and has added 30 more schools to the project. Descriptors—\*Community Involvement, \*Curriculum, Educational Facilities, Faculty Recruitment, \*Financial Support, Organization, Problems, \*Rural Schools, \*Small Schools, Sociocultural Patterns, Student Teacher Relationship

Since small school problems are magnified in rural areas and since small rural schools have suf-

fered, consequently, from the consolidation syndrome, it is important to acknowledge the fact that due to geographical limitations some rural areas cannot consolidate and others simply prefer the small school environment. It should also be recognized that there are both strengths and weaknesses inherent in the small rural school. Weaknesses attributable to small rural schools include: (1) poor organizational structures; (2) difficulties in the recruitment and retention of quality personnel; (3) inadequate facilities; (4) curriculum deficiencies; (5) inadequate financial support. Strengths attributable to the small rural school include: (1) an homogeneous sociocultural background; (2) the potential for close-knit educational organization; (3) close student/teacher relationships; (4) community involvement; and (5) a classroom environment conducive to innovative techniques. While the problems of finance must be met at the local, State, and Federal levels, solutions to many of the problems of the small rural school can probably best be found by coupling inherent strengths with innovative educational practices which encompass use of: the intermediate unit; the shared services concept; media and technology; mobile units; and in-service programs. The Religious Socialization of Mexican-Americans: A Functional Analysis of Catholic Education.

Pub Date May 70

Note—150p.; MA of Sociology Thesis, University of Texas at El Paso

Available from—Inter-Library Loan, University of Texas at El Paso, El Paso, Texas 79999

Document Not Available from EDRS

Descriptors—\*Anglo Americans, Behavior Standards, \*Catholic Schools, Comparative Analysis, Ethical Instruction, Ethical Values, Group Norms, High School Graduates, Master's Theses, \*Mexican Americans, \*Public Schools, \*Religious Education, Sex (Characteristics) Socialization

Identifiers—\*Texas (El Paso)

The effect of Catholic schooling on the religious behavior of Mexican American and Anglo American graduates of 3 Catholic high schools in El Paso, Texas was compared with the religious behavior of Catholic Mexican American and Anglo American public high school graduates. Focus was on the following types of religious orientations: (1) doctrinal orthodoxy—an orientation stressing intellectual assent to prescribed doctrines of the Roman Catholic Church; (2) devotionism—an orientation emphasizing the importance of private prayer or personal communion with God; (3) socio-ethical orthodoxy—an orientation stressing acceptance of the conduct norms prescribed by the Roman Catholic Church; and (4) ritualistic practices such as Mass attendance, reception of Holy Communion, and frequency of Confession. Parental religiousness, sex, and ethnic background were used as independent variables to determine whether they conditioned or otherwise affected the impact of Catholic education on one or both of the ethnic groups. Questionnaires were received from 76 public and 127 Catholic high school graduates. Among the findings were: (1) Catholic education had a more consistent, positive impact on Mexican Americans regardless of sex; and (2) Catholic school Mexican Americans scored higher on the symbolically important, formal ritual practices of Mass, Communion, and Confession. (NQ)

Ethnic Stereotypes: A Semantic Differential Analysis of Mexican-American and Anglo-American Names.

Pub Date Dec 72

Note—41p.; MA Thesis, University of Texas at El Paso

Available from—Inter-Library Loan, University of Texas at El Paso, El Paso, Texas 79999

Document Not Available from EDRS

Descriptors—\*Anglo Americans, \*College Students, Ethnic Groups, \*Ethnic Stereotypes, Females, Males, Masters Theses, \*Mexican Americans, \*Semantic Differential

Identifiers—\*Names, Texas (El Paso)

Forty Mexican American and Anglo American university students were asked to rate 5 common Anglo American and 5 common Mexican Amer-

ican female names on a semantic differential. Divided into 4 groups based on sex and ethnic background, respondents were between 18 and 25 years of age and all claimed El Paso (Texas) as their primary residence for the past 10 years. None of the respondents had a first name similar to the names being rated. Utilizing a semantic differential for measurement, respondents rated 26 concepts on 9 subscales—5 Anglo American and 5 Mexican American female names, 5 automobile names, 5 political figures, and 6 dimension concepts. Mexican American names used were Velia, Juanita, Elena, Delia, and Estela; Anglo American names were Catherine, Pamela, Cheryl, Joyce, and Beverly. Two-tailed Mann-Whitney U tests indicated Anglo Americans rated Anglo American names significantly more favorably on the Potency and Activity dimensions than did Mexican Americans. Mexican Americans rated Mexican American names significantly more favorably on the Evaluative dimension than did Anglo Americans. Each ethnic group tended to perceive names common to its respective culture closer to Good, Strong, and Active than the names common to the other culture. No support was found for the notion that a minority group accepts and applies to itself the stereotypes of the dominant society. (Author/NQ)

The Effect of Industrialization on Anglo and Spanish Surname Populations in Sixteen Southwestern SMSA's.

Pub Date May 72

Note—116p.; MA Thesis, University of Texas at El Paso

Available from—Inter-Library Loan, University of Texas at El Paso, El Paso, Texas 79999

Document Not Available from EDRS

Descriptors—Academic Achievement, \*Anglo Americans, Demography, Employment, Income, \*Industrialization, Masters Theses, \*Metropolitan Areas, \*Socioeconomic Influences, \*Spanish Culture, Urbanization  
Identifiers—Spanish Surname, \*United States (Southwest)

The effect of industrialization on Anglo and Spanish surname populations in 16 Southwestern Standard Metropolitan Statistical Areas (SMSA's) was examined by (1) classifying cities on the basis of industrialization as the salient feature of urban metropolitan areas, (2) measuring the socioeconomic characteristics of corresponding populations, and (3) showing the relationship between industrialization and differences in socioeconomic levels of the 2 groups. Utilizing 4 components of industrialization (industrial diversification, organization efficiency, organizational size, and urbanization), data were obtained from selected 1960 census publications. Data analysis consisted of: presentation of the dissimilarity values index for each SMSA, computation of correlation coefficients to measure the relationship between each of the basic socioeconomic categories, exposition of socioeconomic dissimilarities under the influence of each industrialization indicator, and computation of correlation coefficients to measure the relationship between each variable. Some findings were: a marked discrepancy existed between the socioeconomic characteristics of Anglo and Spanish surname males; and the inverse relationship between industrialization and the relative degree of socioeconomic dissimilarity between Anglo and Spanish surname males were consistent for all variables. A Marginal Profession in Rural Areas: The Case of Rural Chiropractors.

Pub Date 21 Aug 75

Note—18p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 21-24, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Community, \*Comparative Analysis, Education, \*Geographic Location, Interpersonal Relationship, \*Patients (Persons), \*Rural Areas, \*Socioeconomic Background, Urban Areas

Identifiers—\*Chiropractors, Client Control, Localism, Missouri

In reference to the significance of a marginal profession, 44 Missouri chiropractors practicing in 20 rural counties (total enumeration) were compared with 39 randomly selected Kansas City

chiropractors to determine the following characteristics: (1) social background; (2) place history (at time of birth, start of school; termination of 8th grade, and termination of high school); (3) progress in entering the field (education); and (4) nature of the practicing chiropractor and his practice. Findings indicated that rural chiropractors were: (1) from white collar families with entrepreneurial tendencies; (2) pursuing this field out of a need to fulfill an entrepreneurial imperative, rather than a specific career calling; (3) practicing in areas comparable to their place of origin; and (4) trained in or adjacent to their state of origin. It was concluded that the concepts of localism and client control influenced this marginal profession, as competition with and isolation from colleagues renders the practitioner vulnerable to client control while localism furthers community acceptance. It was argued, therefore, that localism and client control were interrelated influences on the chiropractor practice. (JC)

Providing Opportunities: Report of the Fiscal 1974 Program for the Education of Children of Migratory Agricultural Workers in New York State.

New York State Education Dept., Albany. Bureau of Migrant Education.; State Univ. of New York, Albany.

Pub Date [74]

Note—39p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Annual Reports, Bilingual Education, Career Awareness, Computer Oriented Programs, \*Educational Opportunities, \*Educational Programs, Health, Inservice Education, Interstate Programs, \*Migrant Child Education, \*Outreach Programs, Parent Participation, Reading, Summer Programs, \*Supplementary Education, Tutorial Programs

Identifiers—\*New York

Goal of the New York State migrant education effort is to provide each eligible child supplemental educational programs which will best meet his assessed needs. Efforts are undertaken to: (1) improve skills in reading, mathematics, and bilingual education; (2) improve health and nutrition; (3) provide recreational activities; and (4) bolster positive self-concepts. Among services available to migrant children are tutorial instruction, summer schools, regular school supplemental programs, health education, bilingual education, career experiences for adolescents, and early childhood development programs. These educational programs are linked to the work of other state agencies which provide services to migrant children. During fiscal year 1973-74, emphasis was on identifying eligible children and on providing them priority educational programs. First priorities in meeting their educational needs were those of reading, mathematics, and bilingual education. Tutorial outreach programs, designed to meet the needs of small numbers of children scattered throughout many school districts, were expanded in order to involve identified migrant children in priority programs. Other activities during the year included a census project, career experiences, use of the Migrant Student Record Transfer System, in-service education, parental involvement, and interstate cooperation. Identifiers—\*Choctaw Adult Education Demonstration Project

The Choctaw Adult Education Project is described in this annual report by the Mississippi Band of Choctaw Indians. The report presents the

following: (1) Summary of Class Sites and Staffing; (2) Curriculum (basic literacy, health education, menu planning, budgeting, income tax preparation, food stamp program, nutrition, and the Tribal Constitution); (3) Field Trips (to Moundville, Alabama; the Jackson Zoo; shopping, fishing, and restaurants); (4) Graduation (13 General Educational Development, GED; 8 eight grade; and 29 driver education graduates); (5) Driver's Education (in 9 months, 75 people have been licensed and 20 have received driver's permits); (6) Publicity; (7) Dissemination (program and class reports printed in Choctaw Community News); (8) Evaluation (continued to include and informal, on-going evaluation of students and teachers and formal evaluation via Gray-Votaw Rogers nationally standardized test); (9) Paraprofessionals (emphasis on continued use and community involvement); (10) Summary of In-Service Workshops (on adult learners, food stamps, text evaluations, GED, reading, library book evaluations); (11) Conferences; and (12) Action on Recommendations (home-based instruction, improved transportation systems, physical facilities, summer scheduling, additional classes, a child care system, and evaluation). Descriptors—\*Cooperative Planning, \*Economic Development, Federal Government, Labor Market, Local Government, \*Manpower Utilization, Mobility, \*Regional Planning, \*Rural Areas, State Government, Tables (Data), Transportation, Urban Areas

Identifiers—A 95 Review Process, Comprehensive Employment and Training Act 1973, SMSA, Standard Metropolitan Statistical Areas

As Federal economic development and manpower policies have seldom been coordinated, this study presents a critical examination of the effects of these policies on nonmetropolitan areas and suggests ways in which policy might be better integrated in the framework of substate planning and development districts. Examining the problems of rural areas, the first 2 chapters describe the nature of the American urban system and its relationship to nonmetropolitan areas. Analyzing the theoretical and empirical aspects of growth center strategy, Chapter 3 discusses efforts to bring jobs to nonmetropolitan areas via regional development policies. Since problems of creating greater access to economic opportunity are closely bound up with the spatial organization of labor markets, the rationales behind various delineations of functional economic areas are analyzed in Chapter 4. Chapter 5 assesses the roles of substate regional planning and the A-95 review process in coordinating Federal, State, and local policies and programs in nonmetropolitan areas. Chapter 6 discusses the implications of the Comprehensive Employment Training Act of 1973 (CETA). Analyzing the differences in commuting patterns and welfare indicators, Chapters 7 and 8 examine transportation problems. Recent innovations in rural transportation, particularly in South Carolina, are examined in Chapter 8. Chapter 9 presents a summary and alternative approaches. (JC)

Maturation Changes in Selected Attitudes Toward Traditional Morality: A 24-Year Follow-Up Study.

Pub Date 75

Note—24p.; Paper presented at the 1975 Annual Meeting of the Rural Sociological Society (San Francisco, California)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Adolescents, Adoption (Ideas), Adults, \*Attitudes, Church Role, \*Longitudinal Studies, \*Moral Values, \*Rural Population, \*Social Change, Social Characteristics  
Identifiers—Pennsylvania, \*Traditional Morality

Changes in the attitudes of 1,950 initially rural Pennsylvania individuals toward selected aspects of traditional morality were examined by comparing the expressed opinions of persons surveyed in 1947, when adolescent, with their responses in 1971, when in their early forties. In both 1947 and 1971 the subjects were asked to respond to an identical series of 12 Likert-type attitude items designed to measure acceptance of selected aspects of traditional morality. While each of the items focused on some aspect of traditional behavior, 5 items referred to young people or youth activities (loafing uptown, staying out late, failure in school, spending money, and using makeup). The remaining 7 items referred to adult or ageless behavior (irregular church attendance, divorce, drinking, smoking, card playing, Sunday movies, and Sabbath labor). Findings indicated that: (1) in general, responses were more permissive with maturation, though there was less liberalization of attitudes toward the behavior of youth; (2) not all subjects became liberal with age; therefore, experience, rather than age per se, was the more probable explanation for attitude change; (3) of 9 social characteristics expected to influence change, the 1 most consistently associated with lack of attitude change was frequency of church attendance, though there was some positive relationship to place of residence, educational and income levels, and sex. **Identifiers**—\*United States (Midwest)

Part of the "Comprehensive National Survey of Migrant Programs" series, this directory was prepared for use by agencies working with migrant and seasonal farmworkers in the midwestern states of Alabama, Arkansas, Illinois, Indiana, Louisiana, Mississippi, and Oklahoma. Programs, services, and resources providing educational, health, legal, and job placement services to migrant farmworkers during their stay in these states are listed. Data were obtained from Federal, state, and local agencies in the various states. Special emphasis was placed on information and data current as of summer 1973. Information given for each state pertains to: (1) programs, (2) crops and work periods, (3) migrant population and wages by county, (4) labor camps, and (5) supplementary data, i.e., information sources and graphic data. The listings of organizations, programs, or agencies may contain some obsolete information due to their instability; being subject to change as new needs, priorities, and objectives appear; or as operating funds expire. An annotated bibliography of National Migrant Information Clearinghouse publications is appended. (NQ)

**Identifiers**—\*Teatro Chicano

In the area of the arts, the Mexican American has discovered a rich cultural heritage which gives him a strong sense of pride and a deep feeling of satisfaction. A new interest in the literature of Mexico and the Southwestern states of Texas, Arizona, New Mexico, Colorado, and California has started the Chicano people reading classic and modern works written in Spanish. The area of dramatic arts has developed a special kind of theater as a result of this movement of ethnic interest: Teatro Chicano. This "teatro" is, in essence, what its name suggests: half Mexican and half Anglo American. Teatro Chicano was created as a direct reply to both Mexican and American writers of dramatic literature. Its ultimate goal is to give the Mexican American in the United States a new, accurate, and proud picture of himself. This thesis provides a short history of the theater and its singular progress in modern times. The treatment of the Mexican American in the theatrical literature of Mexico and by American dramatists such as Maxwell Anderson and Tennessee Williams is reviewed. Excerpts from the plays of Celestino Gorostiza, J. Humberto Robles, Maxwell Anderson, Tennessee Williams, and Luis Valdez are given. (Author/NQ)

**Political Socialization: A Comparative Study of Different Ethnic School Children in Newark, New Jersey and El Paso, Texas.**

Pub Date Aug 73

Note—174p.; M.A. Thesis, University of Texas at El Paso

Available from—Inter-Library Loan, University of Texas at El Paso, El Paso, Texas 79999

**Document Not Available from EDRS**

**Descriptors**—Anglo Americans, Changing Attitudes, Comparative Analysis, Elementary School Students, \*Ethnic Groups, Latin American Culture, \*Learning Processes, Literature Reviews, Masters Theses, Mexican Americans, Negroes, \*Political Attitudes, \*Political Socialization, \*Student Attitudes

**Identifiers**—\*New Jersey (Newark), Texas (El Paso)

The hypothesis, "children of different ethnic groups possess different political attitudes", was tested to determine: (1) whether white ethnic groups had different political attitudes; (2) if so, to what degree; and (3) how they ranked compared to each other. To verify the hypothesis, the concept of political socialization was operationalized and quantified. Using structured questionnaires, respondents in El Paso, Texas and Newark, New Jersey were classified as Mexican Americans, Northeast or Southwest Anglos, blacks, Europeans, or Latin Americans. There were 665 respondents in El Paso and 461 in Newark from grades 3-8. Ten attitudinal categories were used to measure political attitudes—affect, citizenship, governmental action, national attachment, objective and subjective cognition, personal involvement, political and psychological efficacy, and perception of power. By controlling for grade level, data were analyzed to determine if the respondents' attitudes changed as they grew older. Some findings were: Mexican Americans had a more positive political attitude level than the Northeast Anglos and the blacks; Latin Americans ranked first in affect toward political items while the Mexican Americans ranked sixth; and the Mexican American's affect and national attachment level moved in a "negative" direction as he grew older. **A National Survey of Opinions on Country Life in America: The Unpublished Data from the Roosevelt Commission on Country Life (1908).**

Pub Date 22 Aug 75

Note—35p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 21-24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Comparative Analysis, \*Economic Opportunities, Farm Labor, Geographic Regions, \*Historiography, \*National Surveys, Occupations, Organization, \*Rural Areas, Social Change, \*Social Services

**Identifiers**—Quality of Life, \*Roosevelt Commission on Country Life

Utilizing unpublished data derived from the Roosevelt Commission on Country Life (1908), national summary reports of a 12-item question-

naire were examined and compared with the commission's published report. For purposes of analysis, the 12 questions were grouped as: (1) economic concerns, (2) farm labor, (3) services, (4) quality of life, and (5) organization for change and social purposes. Responses were tabulated by region (North Central, North Atlantic, Western, South Atlantic, and South Central) and by occupation (farmers, farmer's wives, post office employees, bankers and real estate dealers, etc.). Tabulation of responses revealed that the majority were unqualifiedly dissatisfied with (1) organization for improvement and social purposes, (2) organization to promote buying and selling, (3) supply of farm labor, and (4) educational training for farm life. The majority were unqualifiedly satisfied with conditions of: (1) farm homes, (2) farm labor, (3) sanitation, (4) communication, and (5) credit. Occupational and regional differences were evident, as teachers proved critical of farm life and the southern regions reflected a comparative disadvantage. While five claims made by the commission were supported, it was found that some of the commission's most important conclusions did not parallel the questionnaire and were not supported by the tabulated data. **Identifiers**—\*New York

Based on Edmund Brunner's three studies of 140 U.S. agricultural villages (1924, 1930, and 1936, 13 of Brunner's New York communities were examined in 1974 to determine in 1974 to determine changes in: (1) population between 1920 and 1970, (2) Dun and Bradstreet business listings between 1921 and 1970 (employment opportunities); (3) community boundaries between 1936 and 1974, (4) school district boundaries; (5) 85 community services and facilities; (6) 15 types of voluntary associations between 1960 and 1974, and (7) industries between 1964 and 1974. Examination was made of the Federal and State programs adopted or sought between 1960 and 1974 and of the factors relative to the differential use of Federal programs. Units of analysis included community, village government, school district, and individual. Data were obtained via personal interviews with key selected informants in each community and were supplemented by information derived from official Federal and State agency records and from interviews with county-level informants. While all centers were classified "rural" in 1920, 10 remained "rural" by census definition in 1974. The data indicated that growth and decline, stability and change, depended on the individual community, the time period, and community characteristics. While stability and growth were prevalent over decline, vitality was greatest in the noneconomic areas and differentiation had increased. (JC)

**Descriptors**—American Indians, \*Economic Development, Employment Opportunities, \*Evaluation, Federal Aid, \*Federal Programs, Industry, \*Interagency Coordination, Publicize, \*Reservations (Indian)

Reviewing 28 economic development projects on seven reservations, the General Accounting

Office (GAO) evaluated the effectiveness of Federal efforts to improve American Indian economic conditions, the problems encountered, and the opportunities to improve these efforts. Evaluation revealed a need for: (1) better promotional efforts (up-to-date promotional material; closer working arrangements among Federal, Tribal, and business representatives; and aggressive program administration) and (2) a single agency to direct and coordinate Indian economic development. GAO recommended that the Office of Management and Budget provide for an organizational framework clarifying Federal Indian economic development program and coordination responsibilities and work with heads of departments and agencies to develop: (1) improved procedures for project evaluation and monitoring (detailed guidelines, critical evaluation by the funding agency, clear documentation of the basis for financing, a monitoring plan, and a followup procedure) and (2) a systematic broad-scale promotional program. GAO also recommended that the Commissioner of Indian Affairs identify solutions to problems of excessive Indian labor turnover. Five Federal agencies generally agreed with GAO conclusions and, except for the Department of the Interior, supported GAO's recommendations. (JC)

Descriptors—\*Anglo Americans, Armed Forces, Attitudes, Community Influence, Cultural Differences, \*Females, Human Relations, Masters Theses, \*Mexican Americans, Perception, \*Social Influences, Social Organizations, \*Voluntary Agencies, Volunteers

Identifiers—\*Girls Service Organization, GSO, Texas (El Paso)

It has been difficult to recruit and retain active Girls Service Organization (GSO) members who serve as official hostesses for all Armed Services YMCA (Young Men's Christian Association) programs and activities in El Paso, Texas (a bicultural setting). This study tested the hypothesis that the perceptions of institutional pressures by the two ethnic groups within GSO (Anglo American and Mexican American) would vary because of differential images accorded these two major cultural groups in the community. During November 1970, 14 Anglo American, 14 Mexican American, and 2 marginal (neither completely Anglo nor fully Mexican American) GSO hostesses were given a questionnaire utilizing realistic situations pertaining to the "Y", its programs, and the hostess' role. The girls were either currently active or had been active at one time in the near past. Six collectivities were assessed in terms of the hostesses' perceptions: family, immediate peers, school, church, adult friends, and YMCA-client servicemen. The Student's "t" test was used to determine significant differences between the two groups. No significant ethnic differences were found regarding perceived positive institutional pressures from the larger community. The major conclusion was that when a girl became a hostess, ethnic differences were overridden by other social characteristics. (NQ)

Identifiers—\*Georgia (Alma), Model Cities Program

Designed to illustrate the revitalization process of a small rural community via use of the Model Cities Program, this case study of Alma-Bacon County, Georgia traces Alma-Bacon's: (1) historical background; (2) community development beginnings; (3) political development; (4) outstanding problems; and (5) development plans and accomplishments (manpower and economic development, education, health and social services, housing and physical environment, recreation, and culture). As the smallest and the only truly rural area in the Model Cities Program, Alma-Bacon's achievements during a 15 month period are cited (the project was begun in 1970 and is to continue for five years with about \$1.2 million a year). A 1972 survey cited the following activities as tied to Alma-Bacon's rural development program: (1) a major urban renewal project; (2) a \$1,960,384 grant to remove and replace substandard housing; (3) a 40-unit housing complex for the elderly; (4) a manpower and economic development program to develop or expand industry; (5) an industrial, agricultural, aircraft complex; (6) educational programs involving early childhood development, computer assisted learning system, individualized study, and vocational education; (7) a community services division; (8) recreational developments (a lake and a multipurpose recreation center); (9) a carpet factory; (10) a land drainage project; and (11) a million dollar waste disposal system. Descriptors—\*American Indians, Attendance, Budgets, \*Change Strategies, Curriculum,

\*Higher Education, \*Outreach Programs, Program Design, \*Program Evaluation, Research Identifiers—\*Indian Students University Program Services, ISUPS, University of Calgary

As the second report on ISUPS, this document evaluates the period of July 1973 to December 1974 and presents sections dealing with: (1) higher education and American Indian students; (2) recommendations based on first year operations; (3) second year operations; (4) development and research; (5) evaluation reports from the districts; (6) the budget; (7) literature pertinent to dropout rates; (8) the implications for ISUPS. The most significant program change cited is the development of "outreach campuses" which, by initiating locally tailored courses on the Indian reserves, should facilitate reduction in dropout rates, costs, and the number of on-campus students and also facilitate increases in inter-collegiate communication, coordination, and competition. Among the major program adaptations mentioned are: (1) more stringent selection criteria; (2) extension of the summer orientation program from 2 to 6 weeks; (3) compulsory attendance for tutorial sessions; (4) utilization of paid senior students as counseling liaisons between newer students and staff; (5) a title change to distinguish between ISUPS and university programs; (6) a proposed concurrent orientation period to extend throughout the semester; (7) the addition of 13 new native studies courses; (8) creation of the position of Academic Coordinator; and (9) a proposed "common core" of course work for outreach locations. **The Political Ideology of the Mexican-American in a Southwest City: El Paso, Texas.**

Pub Date Aug 70

Note—125p.; M.A. Thesis, University of Texas at El Paso

Available from—Inter-Library Loan, University of Texas at El Paso, El Paso, Texas 79999

Document Not Available from EDRS

Descriptors—Bureaucracy, Decision Making, Demography, \*Government (Administrative Body), Local Government, \*Males, Masters Theses, \*Mexican Americans, Personal Values, \*Political Attitudes, \*Political Socialization, Politics

Identifiers—\*Texas (El Paso)

The preliminary study examined the political ideology of the Mexican American in El Paso, Texas. Seventh grade students in five city public schools whose districts lie in the predominantly Mexican American sections of El Paso were asked to fill out a form stating their father's name, address, and citizenship. A randomized sample was then selected from each school. Utilizing a 91-item questionnaire, 50 male heads of family were asked about their: political orientation, cognition, and behavior; attitudes toward government and knowledge of local politics and Mexican American affairs. Written in English, the questionnaire was translated directly to Spanish for those requesting the interview be conducted in their native tongue. Among the findings were: (1) a low sense of political efficacy existed among the respondents; (2) a majority of the respondents had a favorable attitude toward the government's activities at all levels; (3) the respondents' general focus of attention did not revolve around political or governmental affairs; (4) at the state and local levels the respondents' concern centered on social and economic issues; and (5) a majority were unaware of the activities of Mexican American organizations, especially the political organizations. Descriptors—\*Comparative Analysis, Group Membership, Literature Reviews, Masters Theses, \*Mexican Americans, \*Organizational Climate, Organizations (Groups), \*Political Attitudes, Political Socialization, Responsibility, \*Youth Clubs

Identifiers—Alianza, Chicanos, MAPA, MAYA, Mexican American Political Association, Mexican American Youth Association, \*Texas (El Paso)

The study investigated the political ideology of three Chicano youth groups in El Paso, Texas: Mexican American Youth Association (MAYA), Mexican American Political Association (MAPA), and the Alianza. Purpose of the study was to identify and compare the political ideas and attitudes of the three organizations. Questionnaires were administered to a random sample selected from a list of names obtained from each organization. Eighty-four questionnaires were returned—30 from MAPA, 30 from MAYA, and 24 from the Alianza. The questionnaire was divided into four general sections: personal information, personality, political knowledge, and political ideology. Indices were computed to indicate overall tendencies along the following categories: democratic, fascist, and communist tendencies; degree of political socialization; recognition of institutional racism; regard for authority and freedom; regard of equality; political knowledge, activity, and responsibility; anomie; authoritarian personality; racial prejudice; political liberalism; and faith in people. Some of the findings were: (1) all three groups had in general very low faith in people; (2) MAYA was more authoritarian than the others; (3) all three groups had a definite view of society which was predictable and stable; (4) MAYA had more feelings of alienation and anomie; and (5) MAPA and the Alianza had more "hope" for the future while MAYA had less. A Measurement of Political Attitudes in Mexican American Civic Organizations.

Pub Date Aug 72

Note—96p.; M.A. Thesis, University of Texas at El Paso

Available from—Inter-Library Loan, University of Texas at El Paso, El Paso, Texas 79999

Document Not Available from EDRS

Descriptors—Citizen Participation, \*Community Organizations, Demography, Government (Administrative Body), Group Membership, History, Masters Theses, \*Mexican Americans, \*Middle Class, Organizations (Groups), \*Personal Values, \*Political Attitudes, Political Socialization, Social Action

Identifiers—\*Texas (El Paso)

During the spring of 1971, the political attitudes of middle-class Mexican Americans in the El Paso (Texas) area were surveyed. An 86-item questionnaire was administered to 187 people in six area Councils of the League of United Latin American Citizens (LULAC), four posts of the Veterans of Foreign Wars (VFW), and one area Council of the Knights of Columbus (KC). Administered during a regular business meeting, the questionnaires consisted of questions intended to: (1) provide demographic data about the individual respondents; (2) survey the respondents' attitudes toward democratic norms, political chauvinism, the political process, resistance to social change, political alienation, efficacy and cynicism, freedom of speech and religion, liberal-conservative tendencies, and anomie; and (3) measure the respondents' civic competence, political participation, and involvement. In every survey session, the interviewer was of the same ethnic and regional background as the totality of the organizational membership. Some findings were: (1) respondents revealed a high resistance to social change; (2) the sense of civic competence was considerably higher at the local level than in relation to state or national government; and (3) half of the LULAC group indicated strong anomie feelings, while a large percentage of both other groups were unsure of their social roles. A Model of a Program Plan and an Expanded Instructional Proposal for a Small Rural High School in Illinois That Will Provide an Accepted Program as Measured by Illinois State Guidelines.

Pub Date Jul 75

Note—126p.; Ed.D. Dissertation, Walden University. Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Curriculum Development, Doctoral Theses, Educational Objectives, \*High Schools, \*Instructional Design, Literature Reviews, \*Models, Organizational Theories, Personnel Management, \*Rural Areas, \*Small Schools, Student Needs

Identifiers—\*Illinois State Instructional Criteria

In an effort to develop an instructional model for a small, rural high school of 200 or less in compliance with the Illinois State Guidelines, the Guidelines were analyzed and small-school educational literature on models and operational instructional schemes were reviewed. The criteria employed in model development were: (1) Can flexibility be considered a feature?; (2) Can a staff of 12 or 13 teachers readily adapt to the concept?; (3) Is the cost reasonable for a small-school budget?; (4) Is there an authority in the field who considers the identified concept valid?; (5) Would this concept facilitate community instructional goals? Utilizing a format involving inventory of need, statement of need, performance objective, and implementation, the model was designed around the following stated student goals: (1) to develop a desire for learning now and in the future; (2) to develop skills in math, reading, writing, speaking, and listening; (3) to develop pride in work and a feeling of self-worth; (4) to develop character and self-respect; (5) to learn to get along with people with whom you work and live; (6) to learn how to respect and get along with people who think, dress, and act differently; (7) to learn how to examine and use information. Elements included in the model were: classroom learning conditions; teaching-learning schematics; organizational patterns; curriculum; and personnel assignment. (JC)

The Diffusion of Health Information: Medicine Hucksters Can Teach Us Something.

Pub Date Aug 75

Note—28p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, Calif., August 21-24, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Communication (Thought Transfer), Credibility, Diffusion, Health Needs, \*Information Dissemination, \*Medical Treatment, \*Mexicans, Role Perception, \*Rural Population, \*Salesmanship

Identifiers—\*Mexico

During 1974, the role and effectiveness of the Mexican medicine huckster were examined within the context of a specified information diffusion process. Seventy-five hucksters were observed at work in three states of Mexico (Oaxaca, Michoacan, and Mexico) and in the Federal District (Mexico City area). Twenty-five sales pitches were recorded and 100 (31 males and 69 females) clients were interviewed. Clients were members of the lower stratum of the Mexican social structure, characterized by low income, poor housing, and little education. Of the 100 respondents, 54 were over 45 years of age, 51 lived in rural areas, 49 resided in small towns, and 87 had resided in the same location for 11 years or more. Names and addresses of clients were obtained by promising to deliver free samples of medicine to the homes of people who made a purchase. Some findings were: although all the medicines bought by clients interviewed were medicinally worthless (as verified by hucksters themselves), 78 of the respondents reported that the medicines had been effective (11 believed them to be ineffective and 11 were undecided); 87 expressed confidence in the hucksters—57 because they told the truth, 6 because hucksters explained well, and 7 because the medicines were not expensive; and all gave the medicine huckster the highest composite ranking of 10 potential sources of health information. Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Oklahoma (Altus)

The purpose of the 1975 Migrant Summer School was to: (1) expand the migrant child's vocabulary, (2) improve his academic ability, (3) develop cultural enrichment, and (4) facilitate social adjustment. Specific objectives were: (1) developing reading skills to enable students to read easily materials on different levels, (2) developing writing skills for self expression, (3) acquiring an extended oral vocabulary in English to complement the student's basic home-acquired Spanish language, (4) learning basic math, (5) developing a positive attitude toward school by offering opportunities for each child to experience success, and (6) effecting an awareness of the importance of the Mexican American's cultural heritage. Of the 59 children in grades 1-6 enrolled in the program, 25 were current migrants and 34 were 5-year migrants (children whose parents have "settled" in a community within the last 5 years). The Altus Migrant Linguistic Laboratory Summer Program was coordinated with the program. Students attended the lab on a volunteer basis. Homeroom teachers gave a brief evaluation of the students with apparent academic difficulties and parents signed a slip giving their child permission to attend the lab. Health services and type A lunches were provided. Interest was kept at a peak through field trips. Overall the program was a success. (NQ)

Identifiers—\*Elementary Secondary Education Act Title I, ESEA Title I, Oklahoma

Based on the recognition that educationally deprived children can achieve at a "normal" rate when provided comprehensive, innovative program services by a competent staff, compensatory education under the 1965 Elementary and Secondary Education Act Title I (ESEA Title I) aims to increase the academic achievement of eligible project participants. Intent of Title I is to raise the achievement level of students from low-income families who are classified as educationally deprived. Title I, as amended, provides for grants to local educational agencies in a state. This report presents Title I regulations and guidelines for local educational agencies in Oklahoma. These are excerpted from the ESEA Title I, U.S. Office of Education Regulations, State law, other State Board of Education regulations, and through experience and acceptable practices in the implementation of this and other educational programs in Oklahoma. Topics covered are: eligibility of applicants; administration, control, accounting, and auditing school district expenditures; allocation of funds to local educational agencies; reallocation of funds; special grants; application for funds; county cooperative program; project description; construction of facilities; program evaluation; and school district reports. Copies of the record and report of district expenditures and the annual equipment inventory record are appended. (NQ)

**Identifiers**—\*Oklahoma

The national goal of migrant education is "to establish programs and projects which are designed to meet the special educational needs of migratory children of migratory agricultural workers or migratory fishermen and to coordinate these programs and projects with similar programs in other states". In Oklahoma, the major objectives for migrant programs are to: (1) identify every child who can be legally described as a "currently migratory child" or "formerly migratory child", involve him in a migrant program, and enter the proper information in the National Migrant Student Record Transfer System; (2) establish migrant programs where there are pockets of concentration of eligible children; and (3) improve migrant programs through continual updating of services, adding in-service and preservice training of migrant program staff, conducting student needs assessments, providing supportive services, evaluating programs, and involving others in planning for migrant program changes. Designed to assist local educational agency administrators in determining the feasibility of migrant education programs in their districts, this handbook contains information related to the planning, implementing, and evaluating of migrant education programs. Among the topics are: Parent Advisory Committees, staff development, community contact, resources, needs assessment, program priorities and objectives, and program needs. (NQ)

**Identifiers**—\*Pennsylvania

In order to identify some basic types of information concerning industrial development which might be useful to decision-makers at the local level, an opinion survey was conducted in five bordering nonmetropolitan Pennsylvania counties. A 13-item questionnaire was mailed to 222 local organizations, categorized by response rate as follows: (1) industrial development groups and chambers of commerce (60 percent); (2) banks (13 percent); (3) county boards of commissioners (40 percent); (4) borough councils (22 percent); (5) township boards of supervisors or planning commissions (23 percent). Questionnaire items included: (1) evaluating desires or needs; (2) estimating benefits and costs; (3) assisting existing industries; (4) establishing industrial development goals; (5) working with prospects; (6) financing; (7) inventory of area resources; (8) utilizing regional organizations; (9) coordinating group efforts; (10) success stories; (11) identifying new prospects; (12) identifying local leadership; and (13) establishing organizations. Major findings indicated that: (1) industrial development groups had the most interest in securing information; (2) banks were very uninterested in industrial development; (3) county commissioners and borough officials were not interested in industrial development; and (5) boroughs and townships were most interested in outside and interlocal cooperation and needs assessments. **Descriptors**—\*Administrator Background, Age, \*Consumer Education, \*County Programs, Education, \*Extension Agents, Historical Reviews, Needs, \*Nonprofessional Personnel, Professional Personnel, Program Development, Surveys

**Identifiers**—Consumerama, Four H Programs, \*Pennsylvania

In order to provide an historical perspective on the development of Consumerama (a 4-H program initiated in 1969 by the Pennsylvania Cooperative Extension Service), a 34-item questionnaire was developed and distributed to persons having prime responsibility for 4-H Consumerama activities in each of Pennsylvania's 67 counties. After securing a 100 percent response, questionnaires were sorted and analyzed by age, education, and administrative region. Eight expected findings were analyzed and compared with the responses. Findings indicated: (1) extension professionals served as the main teaching agent; (2) there was little difference in the number of persons in the 35 and younger and 36 and older age groupings; (3) time for preparation and time for working with the clubs were the most frequently cited reasons for not participating in Consumerama; (4) there was strong interest in attending Consumerama workshops and consumer education workshops; (5) extension staff members felt consumer education was important and were willing to teach it in some form in their county 4-H programs; and (6) time was a strong limitation in the development of many county Consumerama programs. Since only five counties used lay leaders and since time was the most limiting factor, it was suggested that lay leaders and intensive educational workshops be employed to meet Consumerama needs. Net Migration Turnaround in Pennsylvania Nonmetropolitan Minor Civil Divisions.

**Pub Date** Aug 75

**Note**—21p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, California, August 21-24, 1975)

**EDRS Price** MF-\$0.76 HC-\$1.58 Plus Postage

**Descriptors**—Agriculture, \*Demography, Distance, \*Ecological Factors, \*Hypothesis Testing, Industry, \*Migration Patterns, Military Organizations, Population Growth, \*Rural Areas, Urban Areas

**Identifiers**—Migration Turnaround, \*Pennsylvania

Examining 1,815 Pennsylvania rural boroughs and townships, seven variables were employed to determine the places where net migration had been outward 1940-60 and inward 1960-70 and where it had been inward 1960-70 and outward 1960-70. The demographic variables employed were: (1) total population of each selected nonmetropolitan area, (2) absolute changes in the size of the college or military population, (3) percentage of residents 15-24 years old, and (4) population per square mile. The ecological variables employed were: (1) highway accessibility, (2) functional differentiation in industry types, and (3) population potential. Local officials were surveyed via mail to determine if they agreed with the turnaround migration hypothesis (55 percent response). Findings indicated that most nonmetropolitan minor civil divisions had experienced out-migration between 1940 and 1970, though 10 percent had experienced net in-migration, and nearly 18 percent were termed net migration turnaround areas (three times as many of these places turned around to net in-migration between 1960 and 1970 than places which turned around to net out-migration). It was also found that on the average both types of migration turnaround had occurred about 20-25 miles from an urban center; that reductions in farming, industry, and military installations were evident in places having out-migration turnaround; and that net in-migration turnaround areas had residents employed in relatively specialized industries. **Descriptors**—\*American Indians, \*Career Education, Elementary Secondary Education, Parent Attitudes, \*Program Evaluation, Safety Education, Student Enrollment, \*Student Opinion, Surveys, \*Teacher Attitudes

**Identifiers**—\*Choctaw Mississippi Agency School System, Mississippi (Philadelphia)

Initiated in December of 1974, the Choctaw Agency Schools' Career Education Program was evaluated via personal interviews and opinionnaires distributed to students, parents, and teachers. The safety education program was also evaluated. The sample of 114 students derived from Choctaw Agency School System (5th, 7th, and 9th grades) responded as follows: (1) 87 percent knew of Career Education teacher; (2) 77 percent had understood their Career Education teachers; (3) 40 percent had talked to their parents about career interests, while 40 percent said they would talk to their parents; (4) more desired to attend college than desired to attend vocational school; (5) 35 percent and 23 percent attributed the decision to pursue a particular career to the advice of teachers and parents respectively; and (6) 79 percent were either undecided or didn't know what profession to pursue. The teacher survey indicated: (1) materials were available; (2) more resource people could be used; (3) the program was judged moderately effective. The three parents surveyed indicated limited knowledge of the program. It was recom-

mended that: (1) more resource people be used; (2) more field trips be employed; (3) there be more parent involvement; (4) a curriculum specialist be used to coordinate the regular academic program with that of career education; (5) a pre- and post-testing program be instituted to evaluate student learning. Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Kansas

Educational programs for migrant children in Kansas have been gradually increasing in quality and quantity since 1972. The Kansas State Department of Education has responded to the educational needs of migrant children by (1) establishing goals and objectives for instructional and supportive services; (2) acquiring increasing amounts of Title I, Elementary and Secondary Education Act (ESEA) funds; and (3) increasing the number of programs in the State. In 1972, \$518,951 was allocated for migrant programs, \$594,216 in 1973, and \$694,474 in 1974. The number of programs was increased from 11 in 1972 to 13 in 1974. These programs reported in-

creases in the cognitive and affective development of children and an increase in the number of children served. Increases were also reported in the number of bilingual teachers used and the quality of training provided all personnel. This report summarizes data obtained from the final reports submitted by the agencies operating Title I, ESEA migrant education programs in 1972, 1973, and 1974. Some topics covered are: number of participants by age, grade, and length of time in the program; grade placement; innovative projects used; objective measurement; teacher-developed tests; interrelationship with regular Title I programs and other programs; staff utilization and inservice training; community involvement; and instruction. Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Washington (Mesa)

Since there was little educational opportunity for those interstate secondary migrant students from Texas and California who worked in the fields throughout the day, the North Franklin School District Night School was begun in 1971. During that time, one teacher was hired full time through the Title I Migrant Program. For the next 2 years, the teacher tutored at the labor camp with the help of a teacher's aide. Due to the increase in student enrollment, more teachers were added to the staff in 1973. The project was also moved from the camp to Mesa Elementary School. At present, there are over 50 migrant students, 6 teachers, and 1 teacher's aide involved in the program. Project goals are to: (1) recruit secondary migrant students who have been attending high school in Texas, California, and/or other states; (2) enroll these students in the Mesa Night School; (3) obtain the students' previous high school schedules and develop corresponding schedules to continue their education; and (4) transfer the students' completed credits back to their original high schools on official North Franklin School District High School transcripts. Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Washington

The Washington State Migrant Education Program legally defines migratory children as interstate, intrastate, or formerly migratory. Program goals are intended to serve the legislative mandate that requires establishment of "...programs and projects to meet the special education needs of migratory children of migratory agricultural workers and to coordinate these programs and projects with similar programs in other states". Although local school districts are responsible for the education of migrant children, the Superintendent of Public Instruction administers the program. One of the most basic components of the program is the Migrant Stu-

dent Record Transfer System (MSRTS) which is designed to shorten the distance and abate the handicap of migration. During 1974-75, the Migrant Education Identification and Recruitment Program was implemented to: (1) acquaint migrant parents and the community at large about migrant education; (2) identify and enroll migrant students; and (3) place migrant students on the MSRTS. The recruitment team works closely with both the school and the migrant family—cooperating with local educational agencies and providing medical, legal, and social service information to the family in need. This bulletin provides an overview of the migrant education program during 1974-75 and introduces the staff members who service it. (NQ)

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Migrant Student Record Transfer System, MSRTS, Washington

The Migrant Student Record Transfer System (MSRTS) was designed to permit schools to share the accumulated understanding of many prior schools about the migrant child and his needs. This shared migrant student information frees a school to focus its energy on serving a child's needs instead of using it to identify those needs. If the MSRTS is to be of maximum benefit to migrant students and educators alike, the student data it gathers and disseminates must be current, accurate, complete, and promptly transmitted. Thus, the system's success depends on the effectiveness of each link in the data chain—the school, the terminal, and the data bank. This handbook is a guide for MSRTS personnel. It is intended to increase awareness of the migrant student and his need for a transfer record, and to outline the responsibility of each person employed in the system toward fulfilling that need. School districts served by the Sunnyside and Othello terminals in Washington are listed. (Author/NQ)

**The Possible Application of Socioeconomic Careers and Path Analysis Concepts to the Study of Factors Relevant to Physicians' Choice of Practice Location.**

Pub Date Aug 75

Note—28p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, Calif., August 21-24, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Conceptual Schemes, Critical Path Method, \*Geographic Distribution, Models, \*Physicians, Research Criteria, \*Research Methodology, \*Rural Areas, Socioeconomic Status, Statistical Analysis, Vocational Development

Identifiers—\*Socioeconomic Careers Model

In response to the current shortage of rural physicians and the difficulties encountered in studying this problem, this paper attempts to apply a specific multivariate technique (path analysis) and the socioeconomic careers model of Featherman and others to the study of the physician's choice of practice location. The socioeconomic careers model is utilized as a heuristic device along with suggestions for its modification to make it more useful in the case of the physician. The specific classes of variables employed by Duncan and Blau are described in detail (background, intervening, career contingencies, and outcome variables). Certain of the specific aspects of the physicians' socioeconomic career are discussed. Differences between the generalized model and that found useful for the physician are pointed out (emphasis is on the use of

many, rather than a few, variables). Consideration is given to discussion of path analysis as a type of multivariate analysis. The technique is then applied conceptually to the case of the physician's socioeconomic career. Specific variables are considered along with the conceptual difficulties they may present. Characteristics of actual recruits to medical careers are enumerated as indicative of how the model must be modified to be useful. (JC)

Identifiers—Research Reports

The intent of this study was to assess the content structure of college biology lectures and to determine the extent to which that structure differed in lectures by a given professor and among lectures of different professors. Content structure was based on the amount of contiguity and commonality of verbal elements between pairs of discourse units in verbal communications. Three professors who taught introductory biology courses were randomly selected from each of two universities in New York City, and six lectures by each were audio-taped. Coefficients which measured the amount of commonality and progression of verbal units and discourse units were calculated and used to compare lectures. The mean fundamental coefficients of structure for the lectures were compared using analysis of variance for repeated measures. The correlation between the mean number of new verbal elements per discourse and lecture was negative, while the mean activity of verbal elements and mean fundamental coefficient of structure was positively correlated. Data from this study were also compared with those available from related studies of biology lessons at the high school level. (Author/CP)

Descriptors—Classroom Techniques, Doctoral Theses, \*Educational Research, Elementary Education, \*Elementary School Science, Elementary School Teachers, Grade 5, \*Instruction, \*Questioning Techniques, Science Education

Identifiers—Research Reports

The purpose of this study was to describe the questioning strategies which fifth-grade teachers employed in their classroom discussions during the teaching of science. The areas of investigation included the initial questioning interchange made by the teacher and a classification of the question into a taxonomy, the forms of the student response elicited, and the teachers' reactions to the pupil responses. This study involved 19 fifth-grade teachers from northern Arkansas selected on the basis of their willingness and the willingness of their school to participate in the investigation. The data consisted of audio tapes of classroom discussions. The recordings were transcribed for classification of initial questioning interchange, cognitive level of question, form of student response and teachers' reaction to pupil response. Among the conclusions, the investigator found the teachers observed were prone to be

non-directive in question initiation, not designating who should respond almost half of the time, and students responded in a pattern which was teacher controlled. The report also contained several recommendations for future related studies. (Author/CP)

Identifiers—Piaget (Jean), Research Reports

The purpose of this study was to investigate the effects of systematic instruction in the concept of speed and simple proportions on the performance of concrete operational children in the third grade. A screening test was administered to select a population of children who could perform simple division and who were concrete operational in the conception of time, space, and speed. From the group attained, 51 were randomly selected and randomly assigned to 2 instructional treatment groups and a control group. The training and comparison treatment consisted of problems, questions, and demonstrations interwoven with training in the concept of speed and simple proportions. The comparison only treatment dealt only with problems, questions, and demonstrations. Both control and experimental groups were individually measured on retention, transfer, and transfer to two Piagetian tasks immediately after training and three weeks later. Among the findings were: the training and comparison treatment group scored significantly higher than the control group on immediate retention, but this difference fell below the significance level on the delayed retention measure. (Author/CP)

Identifiers—Research Reports

Investigated was the effect of a training program on teacher behavior. Videotaped classroom observations for selected teachers were taken prior to and after short term training on the Taxonomy of Image Provoking Behavior. Each videotape was analyzed and reliability established on each of four major observational instruments. No significant differences in teaching patterns for science and nonscience teachers were identified when considering gain scores. Student learning patterns measured showed no significant difference. The investigator concluded that short range image provoking training of the type used in this study had no significant effect on any of the four instruments of this study. (Author/CP)

Descriptors—Biological Sciences, \*Biology, \*Curriculum Development, Doctoral Theses, Educational Research, \*Instructional Materials, Learning Difficulties, Science Education, Secondary Education, \*Secondary School Science, \*Slow Learners

Identifiers—Research Reports

The purpose of this project was the establishment of materials suitable for slow learners in a life science program. The research focused on the development and testing of an eight-week study in life science and evolved through three phases: preparation, writing, and assembly of a student text and a teacher's handbook; preliminary testing during a pilot study; and comprehensive testing with five classes of homogeneously grouped slow learners. One class of homogeneously grouped slow learners was the population for the pilot study. A comprehensive testing program was used to determine student achievement with the use of pretests and posttests. Pretest-posttest data were compared and a significant difference was found to exist. Descriptors—\*Classification, Doctoral Theses, Educational Research, Instruction, \*Learning, \*Recall (Psychological), Science Education, Secondary Education, \*Secondary School Science, \*Thought Processes

Identifiers—Piaget (Jean), Research Reports

The purpose of this study was to use an information theoretic memory model to quantitatively investigate classification sorting and recall behaviors of various groups of students. The model provided theorems for the determination of information theoretic measures from which inferences concerning mental processing were made. The basic procedure involved a comparison of several sets of contrasting groups of students formed by the use of recognized psychological phenomena. Students were separated into groups of concrete and formal operational as defined by Piaget and further subdivided on the basis of sex. Data revealed that concrete operational children benefited most from conceptualization while formal operational students benefited most from a self-designed sorting task. The importance of this study may not lie as much in the originality of the findings as in the quantitative methods used. (Author/CP)

Descriptors—\*Achievement, \*Curriculum Development, Doctoral Theses, Educational Research, \*Instruction, \*Physical Sciences, Predictor Variables, Readiness (Mental), Reading, Science Education, Secondary Education, \*Secondary School Science, Structural Analysis

Identifiers—Research Reports

This study was designed as an experimental evaluation of the relative efficiency of designated instructional techniques for student attainment of selected cognitive skills. The sequence in which the student encountered the curriculum, the means by which the student received the information, and the reinforcement effect of an official

answer were three components which were permuted to form eight instructional schemes. The study involved 16 classes and each teacher instructed 2 experimental classes via different instructional schemes. Multiple regression analysis, correlation coefficients, and *t* tests were used to assure validity of findings. Among conclusions, the investigator found reading level to be a significant predictor of classroom performance, and laboratory activities to be a more effective instructional technique for developing reading comprehension and science objectives than lecture-demonstration techniques. This study was designed to develop, revise, and evaluate modules for individualized self-instruction in areas pertinent to the teaching performance of graduate assistants in microbiology. Six modules presenting competencies and skills of teaching were designed and developed. Eighteen teaching assistants were randomly assigned to one of two treatment groups. One group participated in seminar-workshop and worked through the modules, and the other group was involved in the seminar-workshop only. Statistically significant differences were found between the groups on cognitive achievement and some of the dimensions tested for the attitude toward teaching and the performance as laboratory teaching assistants. Descriptors—\*Computer Assisted Instruction, Doctoral Theses, Educational Research, Instruction, Laboratory Experiments, \*Physics, Science Education, Secondary Education, \*Secondary School Science, \*Simulation

Identifiers—Research Reports

The major problem of this study was to assess the effect of computer simulated experiments on the attainment of process skills and the acquisition of subject matter content in the high school physics laboratory. Over a 4-month period, 51 students from 2 physics classes were involved in 4 laboratory experiments and simulations. There was a random assignment of students to one of three treatment groups: laboratory, laboratory-computer, and computer. The process skills investigated were the ability to investigate relationships between laboratory variables (Data Manipulation Score), to reach conclusions (Experimental Conclusion Score), and to interpolate, design experiments, and reach conclusions (Process Tests). The data obtained were subjected to analysis of variance and covariance. Among results, it was found that a computer-related group had the highest mean Data Manipulation Score while laboratory-computer and laboratory groups had higher mean Process Test scores, although the differences were not significant. Identifiers—\*Louisiana, Research Reports

The purpose of this study was to investigate the posture of and practices associated with science supervision in the public high schools of the parish and city schools of Louisiana. Among objectives of the study were to identify science supervisory practices that experts in science education considered relevant to the improvement of science instruction and to ascertain the extent of employment of certain supervisory practices and techniques by supervisors. Participants for the study were selected by virtue of their position as supervisors of science instruction in 64 schools and 2 city systems in Louisiana. A survey instrument was designed and administered. Among findings, data showed that 53 of 54 respondents held Master's Degrees or higher, but that only 22 percent had undergraduate majors in science. The supervisory function viewed by respondents as most important was classroom visitation and supervision of instruction. (Author/CP)

Descriptors—\*Audiovisual Instruction, \*Classroom Techniques, Doctoral Theses, Educational Research, \*Instruction, Science Education, Science Teachers, Secondary Education, Secondary School Science, \*Teaching Procedures

Identifiers—Research Reports

A study was made to ascertain whether or not there was any noticeable consistency in a teacher's use of various instructional moves or techniques and if these behaviors had any noticeable effects on student attitude toward these techniques. Phase 1 of the study included the development of an Instructional Activities Instrument and its validation. In the second phase, data were collected from 38 classes representing 19 teachers and were analyzed with the BMD 05R Polynomial Regression Program. Forty-five separate tests were made comparing mean student perceptions with mean attitude scores. Thirteen of these tests showed significant linear relationships but no significant higher order equations were found. Seven tests were made comparing the teacher direct-indirectness score as computed from the instrument with student growth variables as measured by pre-posttest change scores on several instruments. Preliminary findings in this study suggest that future work may reveal certain instructional procedures which are fragile and rapidly lose favor with students if used frequently by the teacher, while other instructional techniques may be more durable. The use of film strips, discussion and debate, and films or movies offer to be more fragile than do the other instructional procedures. (Author/EB)

Identifiers—Research Reports

The objective of this research was to contrast the effects of two instructional techniques (programmed vs. conventional) used in beginning college biology courses. The experimental technique involved the use of programmed textbook units within the typical course syllabus. Ninety students were involved in the study. Four programmed texts were used. The investigator was both the senior author of the programs and the person responsible for the conventional, lecture-textbook-discussion instruction. Each programmed text took the place of two lectures for the experimental group. To minimize the Hawthorne effect, students in the two sections were used alternately as experimental and control groups. Tests and final examinations provided the necessary data, as well as tape-recorded discussions and written essays. Chi-square analysis indicated that superior test and discussion performance followed programmed vs. conventional instruction. Findings of superior test performance following programmed vs. conventional instruction are common in the literature, but the findings of this study were considered somewhat unusual because of the attempts made to control several factors asserted to contribute to programming effectiveness. The results of the study suggest that instructors may expect the benefits of improved test and discussion performance when using programmed texts. (Author/EB)

Descriptors—\*Achievement, College Students, \*Critical Thinking, Doctoral Theses, Educational Research, \*Higher Education, \*Intelligence, Models, Predictor Variables, Science Education, \*Undergraduate Study

Identifiers—Research Reports

The purpose of this study was to test the efficacy of a model of critical thinking ontogeny at the undergraduate levels in a four-year college. Critical thinking ability was considered relative to mental ability, academic performance, and academic preparation for college. Students (N=607) in many disciplinary areas took a battery of tests to determine critical thinking and mental abilities. Multivariate analysis was performed and analysis of variance was used to determine significant heterogeneity of variances among the categorical groups. Upper division undergraduates scored significantly higher in critical thinking ability, mental ability, and academic performance than did lower division undergraduates, while undergraduates did not significantly differ in academic preparation for college, indicating that differences in critical thinking scores were not primarily due to academic attrition. Descriptors—Doctoral Theses, Educational Research, Individual Characteristics, Individualized Instruction, \*Instruction, \*Learning, \*Physics, Predictor Variables, Science Education, Secondary Education, \*Secondary School Science, \*Student Characteristics

Identifiers—Research Reports

The purpose of this study was to explore the possibility of using a particular set of individual student characteristics to make decisions concerning the suitability of a particular learning method. The sample was 49 students enrolled in high school physics. Each student studied three

units of content, each under a different individualized learning method. The learning methods used were: linear programmed instruction (LPI), learning activity package (LAP), and student selected experiences (SSE). A Latin Square design was used to test for interaction between learning method and content. Achievement was measured by a test at the end of each unit. A pretest battery was used to determine student characteristics. Each student's profile was compared with composite profiles for the successful and unsuccessful learners using simple profile analysis. Findings showed no significant interactions between the learning methods and the content when achievement scores were used as the comparison criteria. The investigator concluded that although the techniques did not identify one best technique, the information gathered in a pretest program could be an aid in selecting the learning methods most suitable for a particular student. Descriptors—\*Attitudes, Doctoral Theses, Educational Research, Perception, \*Physics, \*Science Course Improvement Project, Science Education, Scientists, Secondary Education, \*Secondary School Science, \*Student Attitudes  
Identifiers—Research Reports

Reported is an exploratory investigation to identify predictors of the variance of measure of high school students' willingness to become involved in science and their perception of the scientist. The study was prompted by three factors: (1) declining high school physics enrollments; (2) research revealing high school students have negative attitudes toward science; and (3) the need for empirical information to provide guidance in selecting or designing curricula to foster positive attitudes toward science. An instrument was developed to measure Attitude toward Involvement with Science (AIS) and Perception of the Scientist (PS), plus over 40 potential predictor variables. Data were collected from a selected national sample of 373 American high school students. Science educators identified schools in their area representative of maximum ethnic, socioeconomic, and educational variability. A total of 12 students were selected at random from each of grades 10, 11, and 12 in each school. A correlation matrix, including all variables, was studied. Prediction models were developed by step-wise deletion multiple regression. Among other conclusions, the investigator found no evidence of course reputations promoting positive attitudes toward science, but students who took science courses had higher AIS and PS scores. Identifiers—\*Papua New Guinea, Research Reports

A main problem encountered by science and mathematics students at secondary and tertiary institutions throughout Papua New Guinea is that of dealing with ratio and proportion. The problem is most clearly defined in science, since

this is the area in which the quantitative manipulation of physical variables is most frequently carried out. An important functional relationship existing between variables is that of direct proportionality. A pilot investigation of the abilities underlying the understanding of proportionality and its effect on academic success was carried out with a group of university students. Paper and pencil tests on proportionality were modelled broadly along that of Lovell and Butterworth and were administered. The statistical technique used was factor analysis. The data indicated that (1) results in particular subjects at the university are fairly good predictors of other subject results at the university; (2) Form IV results have some worth as predictors of success in preliminary year at the university; (3) some proportionality test items are useful predictors of success at the university; and (4) there are some very interesting relations concerning the university English sub-scores structures, reading comprehension, and listening comprehension. EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Educational Research, \*Elementary Education, Elementary School Science, \*Environmental Influences, \*Instruction, Mathematics, \*Prediction, \*Ratios (Mathematics), Science Education

Identifiers—\*Papua New Guinea, Research Reports

There is much concern at present among those engaged in science education in Papua New Guinea over the difficulties which students have with basic concepts and manipulations in science and mathematics—especially with ratio and proportion. Papua New Guinean students may have difficulty in science because the basic assumption that the world is regular, which is so striking in Western man's environment, is less easy to make for someone from a natural environment. To test the hypothesis that students from a traditional environment show a lower expectation of regularity, a series of principal situations from each of which a pattern of events emerged were set up. The five situations or tests are explained in detail. The regularity tests were carried out using primary school children from three distinct populations: (1) coastal children who were familiar with an urban environment, (2) highlands children from a remote area, and (3) Australian children who were born and raised in a Western environment. The results indicated there were no significant overall differences between the three groups. (LS)

Descriptors—\*Cognitive Processes, \*Educational Research, Higher Education, Instruction, Mathematics, \*Mathematics Education, \*Science Education, \*Secondary Education, Secondary School Science

Identifiers—\*Papua New Guinea, Research Reports

Students in Papua New Guinea experience considerable difficulty in dealing with much of their work—especially in science and mathematics. The ability to achieve some acknowledged level of excellence is dependent upon cognitive factors. During 1972 a series of pilot studies were carried out in various secondary and tertiary institutions to investigate students' basic difficulties and to develop a set of testing procedures. These studies formed a basis for an investigation in 1973. A battery of "logic/quantitative" tests was administered to seven groups of high school and college students. The tests are described and analyzed in detail. A series of interviews were conducted with a substantial sub-sample of the groups that had taken the tests. A full analysis of

the results has not yet been carried out. One of the broad findings of the study has been that students in general perform a good deal better (given essentially the same task) in some contexts than in others. It is as important to build upon students' strengths as it is to take steps to remedy weaknesses. Individual students seem to have a preference for a particular context. A project planned for 1974 will investigate the extent to which students have "preferred modes" of information intake and consider the feasibility of presenting materials in alternative forms. (LS)

The Institute for Science Education (IPN) at the University of Kiel is a supraregional research Institute which conducts research, through multidisciplinary approaches, in the field of science education. The IPN carries on this research from the psychological and social aspects, develops science curriculum materials, and evaluates their effects in schools. Approximately 50 scientists, educationalists, science educators and psychologists work at the Institute. The IPN is divided organizationally into the following departments: Biology Education, Chemistry Education, Physics Education, Educational and Psychological Methodology, Educational Sciences, and Administration and General Services. Some of the IPN projects involve developing a biology curriculum, chemistry curriculum, and physics curriculum. Some other projects involve the following studies: (1) motivation in science instruction, (2) cognitive operations and learning processes in student instruction; and (3) ecology in schools. The permanent and long-term functions of IPN are highlighted. (LS)

This guide is a reprint of published and draft materials from the Federal Civil Defense Guide. This guide is intended to assist the student in planning, developing, implementing and operating a local, county, or state radiological defense (RADEF) system. The state and local radiological defense program objectives are to create an effective and operationally ready radiological monitoring, reporting and evaluating system required to provide accurate and timely information on the extent, intensity and duration of radiological fallout hazards that could result from a nuclear attack. The guide contains the following chapters: (1) RADEF fundamentals (knowledge concerning fallout); (2) RADEF plans and organizations; (3) Implementation of RADEF plans including emergency operating center functions; (4) Monitoring and survey procedures; (5) Radiological reporting procedures; (6) Application of meteorological data to RADEF; (7) Instrumentation, maintenance and calibration; (8) Radiological equipment available to states for civil defense purposes; (9) Handbook for radiological monitors; (10) Peacetime radiological incidents; (11) Fallout Directory; and (12) Decontamination and related countermeasures. **Identifiers**—Department of Defense, DOD

This textbook has been prepared under the direction of the Defense Civil Preparedness Agency (DCPA) Staff College for use as a student reference manual in radiological defense (RADEF) courses. It provides much of the basic technical information necessary for a proper understanding of radiological defense and summarizes RADEF planning and expected operations. This textbook is not intended to provide RADEF operational procedures or direction for the development of RADEF plans and organizations. Such guidance will be found in other DCPA publications. Among the chapters are: (1) an Introduction; (2) Basic Concepts of Nuclear Science; (3) Effects of Nuclear Weapons; (4) Nuclear Radiation Measurements; and (5) Radiological Monitoring Operations and Techniques. **Descriptors**—Educational Research, Higher Education, \*Instruction, \*Peer Teaching, Personality Development, Preservice Education, Rotation Plans, \*Science Education, \*Teacher Education, \*Team Teaching

**Identifiers**—Research Reports

This investigation encompassed the implementation and evaluation of Rotating Peer Supervision in a college level science teaching methods course. Rotating Peer Supervision is defined as a process whereby students teach other students and themselves about teaching through observation, analysis and evaluation of their own teaching, as well as that of their colleagues. It employed an adaptation of the clinical supervision sequence with videotaping of teaching presentations. The subjects were 74 college juniors with an elementary education major enrolled in three randomly selected sections of a teaching methods course. Two experimental sections followed the syllabus for the course and used Rotating Peer Supervision along with their 15-minute teaching presentations in class. Students in the control section followed the syllabus but did not use Rotating Peer Supervision. Two instruments were administered at the outset and conclusion of the course to measure the personality traits in question. The results showed: (1) no significant difference on the inner-direction construct of the two groups, and (2) a positive difference on the internal control construct of the two groups (indicating that the students involved in peer supervision became more internally controlled). During the academic year 1972-1973, an Introductory Interdisciplinary Course in Natural Sciences, Natural Sciences 101-102, was offered as a voluntary alternative to the traditional separate courses in physics, biology, and chemistry, for a group of 60 students. The method of selection of the students, the organization of the course, and the criteria used for evaluation of the course are fully described, together with conclusions and recommendations for future developments. The overall conclusion is that this course provided an exciting and valid alternative to the more conventional courses, and that it has provided an important stimulus to future planning of the natural sciences curriculum. This study was conducted to determine if the inclusion of a required objective attainment condition would increase student achievement when instruction was structured by a program that utilized student selected objectives. The following null hypothesis was formulated: no significant difference exists in the number of student selected objectives achieved between the mastery and non-mastery treatment groups. Each group consisted of 20 secondary school physics students. Criterion-referenced tests were administered to each student to determine if the selected objectives had been achieved. If a student in the mastery treatment group failed to reach the proficiency level of an objective, a related activity was substituted and assessed before going on to unit two. A student in the non-mastery treatment group was not permitted to undergo remediation and reassessment but proceeded to unit two. Analysis revealed that students of both treatments selected objectives with the same proficiency levels but different cognitive levels. (LS)

This twenty-fourth annual report of the National Science Foundation (NSF) describes the research project support activities, national and international programs, research applications, and science education studies for the fiscal year 1974. It also includes appendices and a statement by H. Guyford Stever, the director of NSF. Scientific research project support supports and strengthens fundamental research in all fields of science. Approximately 13,000 proposals were acted on in 1974. One of the activities under the direction of the National and International Programs Directorate was the establishment of an Office for Climate Dynamics. In 1974 the Research Applications Directorate completed the third year of operations of its RANN—Research Applied to National Needs—program. During this time RANN was pointed sharply toward national problems in energy, environment and productivity. The report lists the major objectives of the Foundation's fiscal year 1974 science education improvement activities. (LS)

Descriptors—\*Doctoral Programs, \*Educational Finance, \*Enrollment Trends, Financial Support, \*Graduate Study, Higher Education, Science Education, Science History, \*Surveys  
Identifiers—\*National Science Foundation, NSF

Along with the history and objectives of the Survey of Graduate Science Student Support and Postdoctorals (SGSSSP), the general trend for federal support for scientific research is presented. The first formal program designed specifically to support graduate students began in 1952. At its peak, in 1968, more than 50,000 graduate students received federal support. Presently, the trend for federal support has been away from fellowships, traineeships, and training grants, and toward increased support of research assistantships. Relating to the SGSSSP, the author notes that the Survey provides the only statistical time series of the sources of support of graduate students. The Survey distinguishes between types and sources of financial support, whether private or public. The SGSSSP dates back to 1967 and has had increased coverage of clinical and medical sciences since 1973. Starting in the fall of 1974, a quick response component was added which enabled limited data to be available by January 1975. Also presented are analytical uses of Survey data. (Author/CP)

Identifiers—National Science Foundation, NSF

The National Academy of Sciences at its 112th Annual Meeting on April 21, 1975, paid homage to the comparatively young National Science Foundation (NSF), in celebration of its 25th birthday. The planning that went into the symposium will become clear to the reader of these four papers, which are quite different in style and content but united by their central concern with the past and future of NSF. Detlev W. Bronk draws on the rich lode of his memory as he describes the Foundation's origins and aspirations. William A. Fowler describes by examples how the Foundation's investment in research has changed our understanding of Planet Earth, the gene, and the universe and is aiding the transfer of knowledge to an attack on environmental and social problems. Joseph B. Platt assays NSF's education programs in the light of recommendations in Dr. Vannevar Bush's report. Finally, H. Guyford Stever reflects on the directions that the Foundation may take in the years that lie ahead, during a time of growing awareness among scientists that they are also citizens and that their research often affects and is affected by individual and social values. The symposium was organized in an attempt to focus attention on self-paced methods in chemistry at all levels of undergraduate instruction. In this volume, 21 papers are presented in which the major intent of each is to individualize instruction. Several of the entries appear under the heading of the Keller Plan, a self-pacing instructional approach in which materials are divided into small units. Other computer-based instructional programs for all levels of undergraduate study are presented. Included in the volume are 17 additional self-paced instructional programs. (Editor/CP)

Identifiers—Teacher Reference Materials

This publication represents a comprehensive reference on environmental education for teachers of all academic levels. With graphic illustrations, this book draws an environmental education framework and presents practical means for overcoming barriers and designing successful programs. Contributions from over 40 teachers, professors, writers and agency professionals combine viewpoints of environmental educators with new perspectives from those outside the field. Each of the 41 articles presents a look at a discrete component of the environmental education process. Of special interest to teachers are sections on teacher education, K-12 program models and unit outlines, community and school resource centers, higher education and adult education. Other articles deal with environmental communication and perception, the history and promise of environmental education, and techniques for developing financial support for the field. Also included are comprehensive bibliographies, a detailed index, and a glossary of terms. (BT)

**Comparative Needs of Elementary and Secondary In-Service Teachers and College Pre-Service Students for Metric Education.**

Pub Date 75

Note—25p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Educational Needs, Elementary Secondary Education, Higher Education, Inservice Education, \*Mathematics Education, Measurement, \*Metric System, Preservice Education, \*Research, Surveys, \*Teacher Education

Identifiers—Research Reports

This paper reports on a survey of the need for inservice metric education and for greater emphasis upon metric education in mathematics methods courses in Nevada. The report is based upon data from two types of questionnaires. One questionnaire surveyed the need for metric workshops. The second questionnaire surveyed the present knowledge of the metric system. Both questionnaires were administered to a random sample of elementary, junior high, and high school teachers in Nevada and to elementary and secondary mathematics method students at the University of Nevada, Reno. The paper contains eight tables comparing the data from these two questionnaires. Each table is followed by separate conclusions. In general, it is concluded that there is a need for metric workshops for elementary teachers of Nevada and that more emphasis should be incorporated into elementary mathematics methods courses. Furthermore, it is recommended that a relevant comprehensive questionnaire be prepared and administered to secondary mathematics and science teachers in order to verify the need for further metric education. Descriptors—\*Attitudes, Beliefs, \*Doctoral Theses, \*Educational Research, \*Environment, Environmental Education, Evaluation, Grade 10, \*Knowledge Level, \*Secondary School Students, Surveys

Identifiers—\*Australia, Research Reports

To develop environmental education in Australia, a survey of tenth-grade students was undertaken. Thirty knowledge items and ten belief items were constructed. A panel of environmentalists and educators identified best responses for the knowledge items, and a common reference point, preservation of homo sapiens, for the belief items, so a composite attitude measure was obtainable. SMOG grading was employed to insure grade 10 readability. A total of 30 students, in 174 schools in 6 Australian states, comprised the sample population. On 10 of 20 items, 50 percent or more students selected the best alternative, with greatest knowledge in the area of population. Misunderstandings occurred in resource use, pollution, and radiation. In 6 of 9 belief items, 50 percent or more agreed with preservation of homo sapiens, supporting statements about individual rights. Catholic schools were less in favor of family planning; females supported this issue. Metropolitan students were more aware of pollution, and residential students of traffic accidents. A .28 correlation existed between knowledge and belief items—significant, considering sample size. Australian students appeared as knowledgeable as their American counterparts, but deficiencies and misunderstandings are evident. (BP)

**Descriptors—**\*Air Pollution Control, Bibliographies, \*Chemical Analysis, Environment, \*Environmental Research, Measurement Techniques, \*Metals, \*Research Methodology Identifiers—\*Asbestos

The purpose of this study is to evaluate existing manual methods for analyzing asbestos, beryllium, lead, cadmium, selenium, and mercury, and from this evaluation to provide the best and most practical set of analytical methods for measuring emissions of these elements from stationary sources. The work in this study was divided into two phases. Phase I was limited to surveying sources of information and summarizing the findings in terms of existing methods; totally new methods were not developed. However, in the case of asbestos and mercury, it was necessary to modify existing methods significantly, and some laboratory and field testing was performed during Phase I to develop these two methods. Phase II was concerned with the testing, evaluation, and modification of the methods of analysis developed during Phase I. Both laboratory and field tests were conducted during this phase of the work. (Author/BT)

Task analysis as a tool in the design of instruction is the subject of this paper. Some of the major historical approaches (associationist/behaviorist, gestalt, and Piagetian) are described using examples from mathematics. The usefulness of these approaches to instructional design is evaluated on the basis of four criteria: instructional relevance, psychological formulation, intractability, and recognition of stages of competence. A detailed discussion of rational and empirical information-processing analyses for instructional purposes follows. It includes descriptions of empirical studies carried out to validate and elucidate formal and informal task analyses of mathematical skills, such as addition and subtraction, and generalized "learning-to-learn" abilities. **Identifiers—**Research Reports

The four studies reported in this document deal with aspects of assessing students' performance on computational skills. The first study grew out of a need for an instrument to measure students' speed at recalling addition facts. This had seemed to be a very easy task, but it proved to be much more difficult than anticipated. The second study grew out of a need to develop a test of addition and subtraction which was both machine scorable and not multiple choice. The study reported here compares a new response format to two other response formats. The third study deals with the

question of item ordering on tests. The study concerns tests with items ordered from easiest to hardest, hardest to easiest, and randomly, and how item ordering interacts with student anxiety levels. The fourth study deals with three remedial methods of instruction for students at the second-grade level who were unable to perform two-digit addition with regrouping. One method used the mini-calculator as an aid, the second used a partial sums approach, and the third the traditional regrouping method. (Author/SD)

Identifiers—Research Reports

The purpose of this study was to determine whether a process model could be constructed using steps identified from flow charts which accounted for somewhat more variance in predicting the difficulty of two-digit multiplication problems than did a process model developed by Cromer. Cromer's data and variables were used as a starting point. Ten new variables were identified from multiplication and addition flow charts. Seven basic models, 4 reduced models, 10 factor models, 24 one-variable models, and a set of systematic restricted models were examined. Multiple regression analysis was used to predict difficulty. The overall results indicate that the flow chart variables do produce somewhat better models. This volume presents the first of two parts of this report and includes the problem statement and results. (Author/SD)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III

The purpose of this project was to relate mathematics studies to the students' natural enthusiasm for popular music and favorite performers. Learning modules rather than lesson plans were used as the teaching approach in the experimental music-mathematics classes. Stated objectives of the project were (1) to motivate students to learn to code and decode; (2) to develop a teaching and learning approach utilizing teachers, student assistants, and administrators; and (3) to develop tests and instructional modules for the use of secondary schools. Eighth-grade students in this project were taught one semester in a regular mathematics class and one semester in a music-mathematics class. Data for this study were collected from three major sources: (1) students (experimental and control group), (2) project staff, and (3) records available at the project office. This report contains the data and interpretations obtained from attitudinal and interest questionnaires, from observations and interviews, and from the pre- and post-test scores on standardized tests as well as teacher-made tests. The report concludes with 11 major recommendations. Among the recommendations are: the continuation of the project, improved criteria for the selection of control and experimental groups, further study of the instructional modules by the mathematics department of the school system, and the dissemination of these modules to other schools in the district. This booklet gives a brief history of the metric system up to the present time. A detailed explanation of the international system of units (SI units) for length, area, volume, mass, temperature, and time is included. Also included are five check-up tests with answers for the measures of length, area, volume, and weight, as well as tables of all metric prefixes and of practical units for commerce and trade. A third section contains general guidelines for teaching the metric system with specific directions for spelling, punctuation, and use of metric symbols. The fourth section contains classroom activities, lists of recommended materials, and instructions for student-made learning aids. (JBW)

This publication contains the substance of all papers submitted at the fall 1974 Association of Teachers of Mathematics in New England (ATMNE) conference. As the title indicates, the focus of the publication is directed toward mathematical applications. The 25 papers cover topics ranging from applications at the elementary school level to those involving college level mathematics. Subjects of the papers include: function concepts in intermediate grades; mathematical modeling for election decisions; mathematics applications to music, art, grocery store arithmetic, vocational-technical school, economics, communications, ecology, and traffic flow; research and applications; Euclidean geometry; audio-tutorial instruction; computing pi; tangrams; UIJSCM materials; the Developing Mathematical Processes program; and computer approximations. Some of the articles include bibliographies and/or references. (JBW)

Identifiers—National Science Foundation, NSF

The objectives of this study are: (1) to provide information on the current employment and education and training characteristics of computer occupations, (2) to explore the impact of advancing computer technology on computer manpower and education, and (3) to project computer occupational requirements and their implications for training. Findings are based on field visits by Bureau of Labor Statistics staff to major computer manufacturers and firms, study of published reports and trade and technical publications, and interviews with government and industry experts. Some of the major findings of the study are: (1) employment in computer occupations is expected to grow more slowly over the 1970-80 period than during the past decade, and the distribution of workers among computer jobs is expected to change; (2) hardware prices have decreased and are expected to continue to fall over the next decade; and (3) increasing sophistication and complexity of computer personnel functions will require workers with more and better training than in the past. In this NASA publication, the technology behind the art of high-altitude surveying is explained in language understood by high school students. The principles behind ground-based surveys are first explained, then several diagrams are utilized in the explanation of photographic surveys. Additional information is provided concerning the use of stereo photography and the importance of lighting. Throughout the publication, examples of photographic surveying appear along with explanations of the uses of the photographs. Included in the work is an extensive bibliography and information for those interested in obtaining SKYLAB survey photographs. (CP)

Identifiers—New York

This booklet presents a step-wise sequence for incorporating environmental objectives into any instructional program. The process involves determination of awareness, selection of the environmental problem, identifying subject area units, writing environmental objectives, specifying skills, naming concepts and content, developing unit instructional procedures, and developing questions and activities. The roles of others outside the classroom in managing and initiating environmental instruction are discussed with emphasis on department heads, superintendents, peer teachers, and regional or state curriculum personnel. Sample evaluation forms, such as a student questionnaire and a teacher response sheet, are included in the booklet. (MR)

**How Outstanding Teachers View Themselves as Persons.**

Pub Date Nov 75

Note—10p.; Paper presented at the annual meeting of the North Carolina Science Teachers Association (Charlotte, North Carolina, November 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Educational Research, Personality, \*Professional Recognition, Science Education, Self Concept, \*Self Esteem, \*Self Evaluation, Teacher Attitudes, \*Teacher Characteristics

Identifiers—Research Reports

This paper reported on a study made by the North Carolina Department of Public Instruction in which outstanding teachers evaluated themselves on a variety of personal traits. Participants in the program were 43 recipients of outstanding biology teaching awards from the National Association of Biology Teachers. The teachers were asked to self-administer the Gough Adjective Checklist, a collection of 300 adjectives which could be applied as descriptions of one's self. As a result of research studies using the checklist, the test authors had developed 24 separate scales containing groups of related objectives. The scale purported to measure such personality traits as self confidence, personal adjustment, self control and dominance. Teacher responses on eleven scales were high enough to satisfy chi-square levels of significance of .01. In order of decreasing values, these were/ achievement, endurance, order, intracception, dominance, nurturance, defensiveness, personal adjustment, favorable, self confidence, and self control. This publication was prepared for elementary teachers and other local personnel responsible for providing, maintaining and using living organisms to enhance elementary science programs. The manual contains a foreword, general information, and an appendix. It gives information concerning equipment and supplies, establishing and maintaining an aquarium, and culturing techniques. Techniques are given for culturing the following organisms: guppies and aquatic plants, land snails, chlamydomonas, daphnia, isopods, crickets, mealworm beetles, fruit flies, and wingless pea aphids. The techniques have been researched and developed in the Life Science Center of the Department of Science Education at East Carolina University and have been tried by preservice elementary teachers taking courses in science education. **A Report on an Instrument for Observing Classroom Science Behavior in the Elementary School.**

Pub Date 75

Note—14p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Educational Research, Elementary School Science, Higher Education, Instruction, Preservice Education, Science Education, \*Student Behavior, \*Teacher Behavior, \*Teacher Education

Identifiers—Research Reports

The Instrument for Observing Classroom Science Behavior (IOCSB) describes and measures the frequency of classroom science behavior at the elementary school level. It was developed to study the relationship of science attitudes of preservice elementary teachers to subsequent performance in science teaching. During their student teaching period, 38 preservice elementary teachers were observed twice using the IOCSB. Two college teachers, experienced in elementary school science education, encoded teacher behavior as well as pupil behavior. The IOCSB is a six category instrument containing 33 sub-categories that are behaviorally defined and contain examples of what is intended by each behavior. This paper lists the behavioral categories, definitions, and examples used in the instrument. Behavioral item selection was based on several sources. The relevance of each behavior was rated by judges with categories 1-5 judged relevant and category 6 judged irrelevant. Reliability was estimated by obtaining measures of interobserver agreement between the investigator and the observers; an average of 76 percent was reached. The frequencies of relevant behaviors

are compared to those of irrelevant behaviors for both teacher behaviors and student behaviors. Data analysis suggests the instrument be used in the areas of science curriculum development and evaluation in the elementary school and in associated research. (LS)

This bi-annual publication appears as the result of efforts of the science and education sectors of the United Nations Educational, Scientific, and Cultural Organization (UNESCO), the UNESCO Regional Office of Science and Technology for Africa, and the UNESCO Regional Office for Education in Africa. The newsletter provides a forum for the interchange of views, ideas, and information on science and technology education, at all levels, among those working in Africa. Among topics in this issue are reports on the UNESCO Seminar on the Improvement of Science Education in Africa, Nairobi, Kenya, August 1975; the African Regional Seminar for Advanced Training in Systematic Curriculum Development and Evaluation, Greenhill, Ghana, July-August 1975; and a Seminar on the Teaching of Sciences in Primary Schools Using the Environment. An information service available to science educators in Africa and books available from UNESCO are also discussed. (Editor/CP)

Planning, Elementary Secondary Education, Evaluation, \*Instruction, \*Mathematics Education, \*Reports  
**Identifiers**—Conference Board of the Mathematical Sciences, NACOME, \*National Advisory Committee on Math Education

By appointment of the Conference Board of the Mathematical Sciences, a committee was established to investigate the status of mathematical education at the pre-college levels. Drawing on the data gathered and published by the National Assessment of Educational Progress, the National Center for Educational Statistics' survey of course offerings and enrollments at public secondary schools, and the American Institutes for Research's survey concerning computing activities in secondary education, as well as the committee's own studies of statewide objective and testing programs and of elementary school curricula and instruction, the report addresses a broad spectrum of issues. Chapters of the report are devoted to a summary and analysis of the curricular reforms during 1955-1975, identification and discussion of current curricular emphases, analysis of alternative instructional situations and patterns, discussion of teacher education, and statement of recommendations for policy changes as well as for research and development. Two overriding policy recommendations advocate the avoidance of dichotomizing mathematics (e.g., "old" vs. "new") and the commitment to quality mathematical education for all. Suggestions concerning curriculum, teacher education, evaluation, and research are presented in detail. (SD)

**Descriptors**—Doctoral Theses, Educational Research, \*Health Education, Instructional Programs, \*Program Development, \*Program Evaluation, Secondary Education, \*Secondary School Science, Sex Education, \*Venereal Diseases

**Identifiers**—Research Reports

The purpose of this practicum was to develop, implement, and evaluate an educational program to combat venereal disease. The objectives of the program were: (1) to increase public awareness of the problem of venereal disease, (2) to alert parents and students to the dangers of venereal disease, (3) to enable students to make rational judgments about their own conduct in terms of their knowledge of venereal disease, and (4) to provide assistance for those who had contracted venereal disease and who needed medical attention. The educational aspect of the program included community meetings for parents, a publicity campaign by newspaper and radio, free literature, and instruction in the public high school. Biology teachers, social studies teachers, and the school nurse participated in the instructional activities. A total of 468 students and 110 parents completed evaluation forms. In addition, the evaluations of teachers and the program chairman are included in this report. (Author/CP)

This newsletter presents excerpts from articles appearing in European journals; some articles are printed in French, although the majority appear in English. The first part of the newsletter, devoted to issues of common concern to European nations, includes a discussion of results of a survey in which students described their ideas of Europe in the year 2000, and a report of a project concerning long-term forecasting. In the second part of the newsletter, reports of educational developments in eleven nation members of the Council of Europe are presented. Topics discussed in English include changes in higher education programs in Denmark, West Germany, Portugal, and the United Kingdom. Education of special groups in West Germany, Ireland, Netherlands, Norway, and the United Kingdom is described. An article from West Germany concerns educational finance, and articles from Sweden deal with working conditions in the schools, foreign language programs, and educational broadcasting. (SD)

This study examines programs for improving science teaching in the schools of Argentina, Brazil, Lebanon, the Philippines, and Turkey. Appearing in two parts, the first contains five case histories—descriptive and uninterpreted accounts of the events as they have unfolded over time in the programs. The second part of the study compares, analyzes, and interprets the experiences of these programs in a search for the lessons they provide on innovating in science education and on meeting the technical assistance needs that arise in that innovating. Concerned with the freedom to teach and learn, this document offers guideline procedures for avoiding censorship disputes and for dealing with controversies which surround these issues. The experience and advice of several superintendents, principals, librarians, teachers, and curriculum workers who have recently been involved in textbook censorship controversies are brought together. Their opinions and suggestions are offered to focus attention on community and school circumstances before a problem develops. The key to avoiding major disputes is the establishment and use of a formal, definitive, written procedure for the evaluation and selection of materials. A sample procedure policy is provided which emphasizes comprehensive objectives, direct board responsibility, strong curriculum-based selection criteria, high level professional review procedures, an advisory committee appointed by the board or superintendent that includes students and parents, and a specific outline of policy and action on challenged materials. Should a complaint arise, suggestions for dealing with it include moving the controversy to the school board level in order to avoid any parent-teacher-principal conflict, and defending the professional selection process rather than the individual piece of instructional material. **Descriptors**—Authoritarianism, \*Behavior Problems, Classroom Environment, \*Conflict, \*Conflict Resolution, Parent Role, Research Projects, Secondary Education, Socially Deviant Behavior, Student Teachers, \*Teacher Education, Teacher Role

The general purposes of this study were to determine what constitutes conflict situations in a suburban high school and how these situations are viewed by parents, teachers, and students. The high school used in this study was one of four high schools within a large school district located in the northwest corner of Cook County, Illinois. The research study consisted of nonparticipatory behavior observations and administration of statistical instruments. The questionnaires consisted of identifying information (the independent variables) and posing questions about conflict, conflict situations, and conflict-solving mechanisms (the dependent variables). The major conclusions drawn from both the behavior observation and the questionnaires were that conflict was caused by four distinctive types of behavior: cutting classes, using drugs, smoking cigarettes, and drinking alcoholic beverages. Teachers and parents accepted the authoritarian role given them. However, it was found that some parents would not use this role in certain situations, yet they expected the school to enforce the rules against these behaviors and sought stringent rules against them. The author suggests that efforts to understand and deal with conflict must take place when teachers are preparing for their new roles. (Author/JR)

**Identifiers**—Presidency, \*Watergate

In the wake of Watergate, this paper purports the need for a new approach to teaching about the American presidency. Traditionally, American government textbooks focus on institutional descriptions and constitutional arrangements of the presidency. This textbook approach to the presidency describes and values a chief executive who is generally benevolent, omnipotent, omniscient, and highly moral. The formal aspect is emphasized to the exclusion of any discussion about behavioral and policy aspects of the office. Recent research in student attitudes towards the presidency after Watergate indicates a significant loss of trust and affect in the president's honesty, trustworthiness, dedication to job, and responsiveness to people. What is needed now is for teachers and curricula developers to reconsider the president in four basic conceptual ways: (1) as an institution in the context of a more dynamic and conflict ridden political system than has been suggested thus far; (2) as a role of some historical and symbolic importance to our political culture; (3) as a unique personality occupying the role at any given time; and (4) as a political actor who has specific strengths and weaknesses in his role performance and who has successes and failures in his policy efforts. Recommendations for immediate and long-range changes in California intermediate and secondary schools are presented. These recommendations chart ways to make schools more effective, more enjoyable, and more conducive to a continued interest in learning. Specifically, some of the recommendations call for such reforms as (1) recognizing and accepting each learner as the principal client of the school; (2) relying on demonstrated proficiency in learning activities, instead of depending on "seat time," as the basis for awarding credit to learners; (3) offering a system of learning options in terms of time, place, programs, and formats to give learners a wide choice of ways to achieve their learning goals; (4) allowing credit and noncredit "furloughs" that allow learners to leave and reenter the school system; (5) emphasizing mastery of essential skills by all learners, particularly the skills of reading, writing, and computation; (6) instructional emphasis on social concepts that reflect present and future needs and concerns; (7) providing extensive opportunities for career exploration, awareness, and preparation; (8) developing personal values, responsibilities, and decision-making skills; (9) eliminating average daily attendance as the basis for state funding; and (10) involving learners, parents, staff, and others in the decision-making process at the local and school system level, including involvement in the selection and review of staff. In an effort to assess teacher preparation for political education, elementary and junior high school teachers in the metropolitan Atlanta area were surveyed to determine their backgrounds and professional needs for political/civic education. Three hundred and one teachers of fifth, sixth, and seventh grades responded to the questionnaire. The study revealed minimal academic preparation in political science, with the overwhelming majority of the teachers reporting American government as the single course in their college education. A full 20 percent of the teachers reported that they had no undergraduate training in political science. As means of improving their professional competencies, the majority of teachers expressed a definite preference for more practical, on-the-job improvement programs as opposed to graduate and summer studies. The teachers indicated that they most desired brief, flexible curriculum materials that deal with political aspects of current social issues. Few called for the usual hardback social studies textbook. As for teaching aids, the middle grade teachers expressed the most interest in guidelines to classroom activities that would provide students with opportunities to participate in group decision making and problem solving. *Niemeyer, Roger***The Michigan Career Education Infusion Model and Social Studies Instruction in Select Michigan Schools.**

Pub Date Nov 75

Note—18p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Career Awareness, \*Career Education, Career Planning, Course Descriptions, \*Educational Objectives, Models, \*Program Descriptions, Secondary Education, \*Social Studies, \*Teaching Methods

The Michigan program for teaching career education through social studies is described. This program provides career preparation through the necessary academic or vocational training and career development through the acquisition of self-awareness knowledge, career awareness knowledge, career decision-making skills, and career planning and placement. The primary delivery system for career development is the social studies instructional program. The major technique used is known as the infusion process. In this process career development objectives are incorporated into existing instructional materials and classes. The premise is that instruction designed to help students achieve specific learning objectives can result in additional or secondary learning. The Michigan Department of Education has developed an inservice program and various materials to help the teachers effectively use the infusion process. Also included are a lengthy list of career development goals and objectives, a sample career education worksheet for developing specific learning objectives, and three sample social studies activities that have infused a career development component. Pub Date Aug 75

Note—12p.; Paper presented at the Annual Meeting of the American Psychological Association (Chicago, Illinois, August 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Achievement, Behavioral Science Research, \*Classroom Environment, Elementary Education, \*Low Achievement Factors, Power Structure, Role Conflict, School Environment, \*Sex Differences, Sex Role, Sex Stereotypes, Socialization, Social Psychology, Student Attitudes, \*Student Role, \*Student Teacher Relationship, Teacher Influence

The relationship of socialization, sex differences, and achievement in elementary school is examined in this research. Data were collected from an all black, lower-class, elementary school and a racially mixed, middle-class, elementary school. Results indicate that sex-related student differences follow a general pattern regardless of which school the students attended. Fifth grade boys perceive themselves as more independent and peer-oriented while girls are more dependent on family and teacher feedback and approval. Boys describe themselves as more self-satisfied, aggressive, dominant, work-oriented, and interested in getting along with peers. However, certain attributes which the majority of boys value are counterproductive for academic achievement. The boy who depends on an aggressive work orientation and endurance to cope with the demands of school is among the lowest achievers. These aggressive achievement motives come into conflict with student role expectations in relation to the authority figure of the teacher. As a socializing institution the school is successful in lessons of self-abnegation, dependency, deference, and passivity and thereby reflects the bias of the wider society. (Author/DE)

*Hemmer, William B.***The Role of Value Systems in Shaping the Human Environment.**

Pub Date Nov 75

Note—15p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Changing Attitudes, Church Role, \*Cultural Factors, Educational Responsibility, Environment, \*Environmental Influences, \*Fu-

tures (of Society), Global Approach, Institutional Role, Middle Class Values, Personal Values, Social Change, Social Values, \*Values, World Problems

The paper purports the need to restore the human environment by changing the present consumer-oriented value system toward a value system encompassing a global approach. Since human actions stem from cultural attitudes and values, before the human environment can be improved there must be basic change in the underlying cultural causes of the unsatisfactory conditions. Some of these cultural values include both Eastern and Western attitudes about family size, the concept of individual independence rather than interdependence, and the widespread faith that science and technology could find solutions to the problems of our deteriorating environment. There must be some fundamental changes in our way of living and in our values and beliefs in order to restore the human environment to a healthy and balanced condition. Our value system tends to equate social acceptance and status with the possession of goods. Many observers feel societies must provide other ways for people to gain status. The logical method for changing present cultural values is through our existing religious and educational institutions. The objectives of both should be developing within each person a sense of being a part of a world ecosystem. Since political parties reflect rather than lead public opinion, basic change must come from public understanding and acceptance of new rules and values necessary for the survival of the world. (Author/DE)

*Hepburn, Mary A.***Education for Policy Decisions on Our Continental Environment.**

Pub Date Oct 75

Note—16p.; Paper presented at the Annual Meeting of the National Council for Geographic Education (Toronto, Ontario, October 16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Conservation (Environment), \*Course Descriptions, \*Curriculum Development, Decision Making, Ecology, \*Environmental Education, Environmental Influences, \*Global Approach, Interdisciplinary Approach, \*Policy Formation, Political Issues, Public Policy, Secondary Education, World Problems

The basic model of a secondary-level interdisciplinary environmental education curriculum development project being developed by the University of Georgia is described. International environmental problems require citizens to act politically either by direct participation or through the indirect but often powerful force of public opinion. Hence, environmental education must be education for political decision making. The four basic components of the model curriculum are: (1) knowledge of the scientific foundations of environmental problems, (2) insights into the trade-offs of various natural and social advantages and disadvantages involved in making environmental choices, (3) sensitivity to the public political climate within and among nations in regard to environmental issues, and (4) practice and skill in applying these other proficiencies to making thoughtful environmental decisions on public policy. Each component area is more fully described by drawing examples from some transnational problem areas of the Canadian-American environment. Course requirements and activities using the model are also described. (Author/DE)

Descriptors—\*Curriculum Evaluation, Developmental Psychology, Educational Problems, Elementary Secondary Education, \*Inquiry Training, \*Political Socialization, Program Evaluation, Social Problems, Social Responsibility, Social Sciences, \*Social Studies, Student Development, Teaching Procedures, Teaching Techniques, \*Values

Identifiers—American Political Behavior, Holt Secondary Social Studies Curriculum, Investigating Mans World

Three curriculum materials which draw upon the social disciplines are examined to understand the manner in which individual responsibility and authority are defined. The three include American Political Behavior, Holt Secondary Social Studies Curriculum, and Investigating Man's World. Curriculum content in each is found to contain dispositions which make social relationships seem unamenable to individual control. The discipline-centered curriculum focuses upon a knowledge that moves students away from the particular and local. The "scientific structural" nature of the knowledge serves the latent function of socializing students into a knowledge which discourages connections with everyday realities. This detachment from social relationships can make those relationships less amenable to individual control and gives more power and legitimacy to those experts who interpret reality. The scientific concepts are by their nature secondary abstractions which move people away from face-to-face contacts, value dilemmas, and conflict situations. Further development of social science discipline curriculum must take into consideration these latent value orientations. (Author/DE)

*Wolf, Lois C.***Democratic Group Process in Early Childhood Curriculum.**

Pub Date 26 Nov 75

Note—13p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Child Development, \*Childhood Attitudes, Decision Making, \*Democratic Values, \*Early Childhood Education, Early Experience, Group Dynamics, \*Political Socialization, Teaching Techniques, Values

This paper examines ways in which early childhood education can provide the vital foundation for lifelong attitudes and values toward the democratic process. One goal of early childhood education is to empower the social bonding which brings collaborative relationships to their full potential and gives the child a sense of connectedness to others. In every program there are two levels of curriculum—that which is implicit, the level of life itself, our daily actions; and that which is explicit and planned with conscious goals. In many cases democratic principles are better experienced at the implicit level through the modeling of teachers in their interaction with their young students. Viewing learning and growth as developmental processes, the teacher can practice shared decision making and consensual group governance on levels appropriate to the child's state of development. For example, if the children make plans for a birthday party, they can experience, even at four years of age, joint planning, airing of diverse thoughts, and movement toward consensual resolution under the guidance of a teacher. *Ward, J. K.***Beyond Moral Reasoning and Values Analysis: Toward Affective Social Education.**

Pub Date Nov 75

Note—16p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Affective Behavior, Affective Objectives, Cognitive Development, \*Educational Change, Educational Improvement, Educational Objectives, Educational Trends, Elementary Secondary Education, \*Emotional Development, Humanistic Education, \*Moral Development, \*Social Studies, Student Attitudes, \*Values

The need for investigating, developing, and implementing affective social studies education programs in the classroom is stressed in this paper. Some issues are raised about moral reasoning and values analysis and their relationship to what may be termed affective social studies education. Educators currently place a heavy emphasis on the cognitive approach to values education and moral development in the classroom. However, facing a rapidly changing society, student alienation, and political dissatisfaction with many of the cognitive approaches, educators must develop instructional strategies and methodologies appropriate for affective social education. They need to engage in political effort and provide public support for so-

cial studies educators teaching affective social studies across the country. There is a need for pre- and inservice training programs that at least equal the training in cognitive education. If teachers are in need of practical experience in teaching concepts, conducting inquiry, or presenting a global perspective, they also need practice in identifying and handling emotions and feelings. Social education needs to become symbolic of an incorporative of what appears to be our individual and collective struggle for social being and meaning. Otherwise, we risk the danger of continuing to create people brilliant on the intellectual side but severely lacking on the emotional side. (Author/DE)

Descriptors—\*Academic Achievement, Behavioral Science Research, \*Group Status, High Achievers, High School Students, Low Achievement Factors, Low Achievers, Peer Acceptance, Peer Relationship, Secondary Education, \*Self Concept, \*Sex Role, \*Sex Stereotypes, Student Attitudes

Scholastic achievements of high school students and the impact which these achievements have on adolescents' feelings of personal worth are examined. Nine hundred and thirty-four subjects from nine Iowa secondary schools participated in the study. The hypothesis that in high academic achievers more positive self-concept scores are found among older males and younger females, thus reflecting the age level when academic accomplishments were given the highest peer approval, was partially disproven. The predicted age-related decline in the impact of academic achievement on female self-concept failed to result. As an upperclassman, the achieving male appears to have a more positive self-concept than the achieving underclassman. This combination of results indicates that if a group were to be chosen as being limited by some form of stereotype, it should be the male underclassmen rather than the female upperclassmen. Descriptors—Audiences, Auditory Perception, Behavioral Science Research, \*Creative Expression, Music, \*Musical Composition, \*Music Appreciation, \*Music Education, Music Theory, Perceptual Development, \*Sensory Training

Research in the development of musical perception is described. It is crucial to students' experience that they learn to bring to the surface those "invisible" ideas inherent in music development such as clapping a rhythm or singing a tune. In this way they learn to bridge the gap between intuitive knowledge and the representation of this knowledge which can lead to greater musical appreciation. One such exercise requires students to arrange a given set of musical blocks into a whole tune. This immediately involves students in active listening, searching for coherence, and thinking about a melody as interrelated parts of a particular whole. A second exercise requires varying melodic rhythms to be represented in their relation to the underlying pulse of the tune. A representation is sufficiently powerful when students can intuit musical events and relations in a way which they can generalize and transfer to other musical situations. Such representations give the listener a means for actually perceiving aspects of a composition that were previously inaccessible. (Author/DE)

*Humphreys, Les*  
Interdisciplinarity: A Selected Bibliography for Users.

Pub Date 75

Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Bibliographies, Concept Formation, Intellectual Disciplines, \*Interdisciplinary Approach, \*Learning Theories, Methods, Social Sciences, Thematic Approach, Theoretical Criticism, Unified Studies Programs

This bibliography is based on the author's thinking and experience with implementing the unified education concepts through the team-taught Unified Studies Program at Boston State College, 1972-75. The purposes of the bibliography are to test a new approach to user-oriented bibliographical notes, provide information about how to find information concerning interdisciplinarity, and reshape the use of certain words (interdisciplinary, crossdisciplinary, multidisciplinary, transdisciplinary, and undisciplinary). A user-oriented compendium, the bibliography is laid out developmentally—(1) getting ready to think about interdisciplinarity, (2) thinking about interdisciplinarity, and (3) implementing interdisciplinarity. It is personal, historical, and selective and focuses on theoretical and practical obstacles to interdisciplinarity. Several sources are included in each of the three sections and are briefly discussed in relation to the obstacles. (Author/ND)

Descriptors—\*Annotated Bibliographies, Bibliographies, City Improvement, City Planning, \*City Problems, \*Films, Ghettos, Higher Education, Instructional Films, Secondary Education, Social Problems, \*Social Sciences, Sociology, \*Urban Studies

Over 100 available 16mm films are listed in this annotated bibliography on urban studies. The listings are classified under new towns and new cities; film series on general urban problems; cinematic and artistic impressions of cities; ghetto problems, slums, and skid rows; and general urban planning, urban renewal, housing and neighborhood redevelopment, and regional planning. Only classifications and items within classifications that seem explicitly to have some social science content are included in the listings. Therefore, films dealing primarily with physical planning and design and with certain urban problems, such as transportation, are not included. The films were produced after 1960. The list, not confined to American urban studies, includes selected English-language films of other countries. Citations are listed alphabetically by title within each section and include price, date, length of time, and director and producer (when available). (Author/JR)

Descriptors—Architecture, \*Bibliographies, Economics, Education, Environmental Education, Housing, Interdisciplinary Approach, \*Library Acquisition, Politics, Resource Guides, Social Problems, \*Social Sciences, Transportation, Urban Studies

This is the first of a series of 20 bibliographies providing information on a variety of topics. One hundred and forty-two listings comprise the bibliography on the topics of architecture and design, economics, education, energy, environment, housing, land use, landscape, planning, politics and government, recreation, social conditions, transportation, and urban concepts. The

bulk of the documents are commercially published books and reports dated 1974-75, although a few 1973 sources are listed. In most cases, the citations are alphabetized by author or organization within each section and include the title, date, price and name of publisher. A list of publishers' addresses, an author index, and a title index conclude the document. (JR)

Global Perspectives Handbook. [Draft.]

Social Studies Development Center, Bloomington, Ind.

Pub Date [75]

Note—43p.; For a related document, see SO 008 738

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Class Activities, Cultural Awareness, \*Curriculum Guides, Elementary Secondary Education, Foreign Relations, \*Global Approach, Group Unity, Interdisciplinary Approach, Resource Guides, Simulation, Social Studies, \*Teaching Guides, World Affairs, World Problems

This handbook contains eight classroom activities designed to increase global awareness of students. For example, one activity about increasing global interdependence involves an analysis by students of their community to determine the extent to which it is related to the activities of foreign people and foreign-made products. Objectives and procedures are given for each activity. Charts, discussion topics, and masters for student handouts accompany some of the activities. Also included in the description of some of the activities are sources—materials, films, and books—related to the topic for the teacher's reference. The activities are versatile and can be used at any grade level. The handbook concludes with ideas for teacher-developed activities. (Author/ND)

Descriptors—Comparative Education, \*Developing Nations, \*Educational Development, Educational Innovation, \*Educational Planning, Educational Policy, Elementary Secondary Education, Evaluation, Organizational Change, School Organization, Training

Identifiers—\*Asia

Eleven country reports and five special articles, contributed by educators who have been associated with the planning of education in their countries, are presented. In analyzing their experiences, educators not only pinpoint organizational and procedural shortcomings from which educational planning has suffered in Asia, but also highlight what has been attempted to remedy the situation. The countries reported on are India, Indonesia, Japan, Khmer Republic, Republic of Korea, Malaysia, Nepal, Pakistan, Sri Lanka, Thailand, and Republic of Viet Nam. Some of the basic emerging issues such as change and innovation, evaluation, training, and institutional and regional planning are discussed in the special articles. The document concludes with a bibliography. (Author/ND)

Identifiers—\*Bicentennial

Commemorating the nation's Bicentennial, this publication provides essays from two distinguished American historians entitled "The American Dream Among Nations—What Promise? What Fulfillment?" and "From Independence to Interdependence." The first essay, written by Richard B. Morris, describes how the American Dream was shaped by and in reaction to our European origins. It then examines the following questions: How have America and the American Dream affected other nations? Has America lived up to or betrayed the promise of the dream? To what extent is the dream still relevant today? To the extent that it is, how can America embody this dream in the conduct of its foreign relations? The second essay, written by Henry F. Graff, depicts the major periods in the historical evolution from independence to interdependence, describ-

ing how the American rise to superpower status affected our relationships with other nations. The implications of our increasing interdependence on the role we are playing in the world today and our future role are emphasized. Possible discussion questions and further references are also included. (Author/DE)

Composed of educators, administrators, and laypeople, this task force proposed three general areas of recommendations for the reform of secondary education. First, citizens and parents must become more involved in the activities and decision making of high schools. Second, educating students for responsibility must become a primary function of the school itself. Third, alternative programs to the traditional secondary education must be expanded and evaluated. Chapter titles of the book include (1) Reform through Community Involvement: The Third Force, (2) School Personnel and Their Response to Citizen Concerns, (3) Seven Approaches to Community Involvement, (4) The Effect of Collective Bargaining on the Reform of Secondary Education, (5) Identifying Student Responsibilities, (6) Educating for Responsibility through the High School Curriculum, (7) Alternative Programs as Educational Options, (8) Work/Study Programs as Educational Alternatives, (9) Youth Service Programs as Educational Alternatives, (10) Planning Processes for Alternative Programs, and (11) Recommendations. **Working with Value and Moral Teaching Strategies.**

Pub Date Nov 75

Note—73p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Content Analysis, \*Curriculum Evaluation, Educational Research, Elementary Secondary Education, \*Ethical Instruction, \*Evaluation Methods, Moral Issues, \*Teaching Procedures, \*Values

Four models for interpreting values education strategies are provided. Six examples form curriculum projects are analyzed in light of three of these conceptual models. The first model categorizes values approaches by whether they describe, analyze, or advocate a particular value position. The second model categorizes values approaches by whether they appeal to psychological or logical precepts. The third model categorizes values approaches by whether they manifest a valuate-objective orientation or a valuate-subjective orientation. A fourth model attempts to synthesize the three other models in order to correct deficiencies in all of them. This disclosure approach suggests a new philosophical synthesis among such concepts as subjective, descriptive, psychological, and logical. It posits that values cannot be adequately explained anymore than the process of cultural function can, without a careful consideration of the individual and collective human being. Because of the metaphoric nature of language, the explanatory form of the narrative is useful to provide some form of concept definition for effective communication. Examples of the application of each model are provided. (Author/DE)

Descriptors—Class Activities, Colonial History (United States), Community Programs, Community Resources, Curriculum Planning, \*Educational Programs, Elementary Secondary Education, Relevance (Education), \*Resource Guides, Revolutionary War (United States), \*School Community Programs, School Community Relationship, \*United States History Identifiers—\*Bicentennial, New York

As a guide for administrators, teachers, and students during the bicentennial year, the handbook suggests themes and ideas intended to stimulate further thinking about the Bicentennial. The Heritage, Festival, and Horizons themes established by the American Revolution Bicentennial Administration are described to provide direction for schools and communities in developing programs of particular significance to their students and citizens. The booklet offers question-and-answer sections on organizing a school Bicentennial program; use of the Bicentennial themes in the classroom; some Bicentennial school program ideas; community, state, and national resources; and sources of funding. Throughout the handbook, many examples of classroom and community projects are given with accompanying descriptions and photographs. Although written for New York schools and communities, the handbook's ideas are also useful for others. (ND)

Descriptors—Decision Making, Democratic Values, \*Moral Development, Moral Issues, \*Moral Values, Political Attitudes, \*Political Issues, Secondary Education, Social Science Research, \*Student Attitudes, \*Values Identifiers—\*Watergate

Research examining students' moral attitudes toward Watergate is described. Three hundred and seventy-eight junior high and high school students from both metropolitan public and private schools in a mid-Southern state participated in the survey. Students judged the degree of rightness and wrongness of six motivations for the break-in. The results indicate that all age groups strongly disapproved of the Watergate break-in, regardless of the hypothesized motivation. However, respondents were more willing to offer some approval of the break-in if the men were helping their country or showing loyalty to the President. The older students were consistently less approving under any condition than the younger group. Younger students had greater difficulty in deciding on the various dilemmas. Personal profit, personal power, winning the election, and Presidential approval were consistently rejected as justification for the break-in by all age groups. The higher the social class of the students, the more likely they were to disapprove under all conditions. (Author/DE)

This report contains data and descriptive analyses of social and economic characteristics of students from nursery schools through higher education. The figures are based on the Current Population Survey conducted in October 1974 by the Bureau of Census. Recent changes in college enrollments are analyzed in the text part of the report. Changes in school enrollment patterns for students attending nursery school through college by socioeconomic characteristics such as age, race, sex, Spanish origin, marital status, dependent family members, metropolitan residence, and level of income are presented in 24 statistical tables. Descriptive analysis in the text is based on the following tables of statistical data: (1) school enrollment rates for persons 3 to 34 years old, by age and sex: October 1974 and October 1950; (2) characteristics of college students 25 to 34 years old: October 1974; (3) characteristics of students 35 years old and over: October 1974; (4) college enrollment of the population 16 to 34 years old, by year of school, sex, and race: October 1974; (5) college enrollment of the 1971 freshman class: October 1971 to October 1974; (6) college enrollment of persons 16 to 34 years old, by race and age: October 1974 and October 1970; and (7) college enrollment rates for dependent family members 18 to 24 years old, by family income: October 1974 and October 1970. **The Use of Descriptive Studies in Simulation Game Research.**

Pub Date Nov 75

Note—9p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Educational Games, \*Educational Research, Elementary Secondary Education, Problem Solving, \*Research Methodology, \*Research Utilization, \*Simulation, Social Science Research, Use Studies

Although considered by most scholars as minor research, descriptive studies can make important contributions toward the development of simulation game research. Descriptive research studies are often simply case studies of the experiences of persons who have field tested, observed, or participated in a simulation game exercise. This kind of research contributes significantly as rich sources of testable hypotheses and potential ex-

planatory variables. Secondly, descriptive studies may identify user problems that help avoid certain common errors in use, choice, or timing of simulation games. Thirdly, they may prove useful in identifying or devising new evaluation methods. Finally, since many descriptive studies are written by researchers in specific academic fields, they may identify common discipline problems, help to clarify requisite skills and devise educational outcomes, and raise questions about sequencing of activities within courses. **The Bicentennial and the Analysis of Public Issues.**

Pub Date Nov 75

Note—7p.; Paper presented at the Annual Meeting of the Alabama State Council for the Social Studies (Tuscaloosa, Alabama, November 1, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Conflict Resolution, \*Decision Making, \*History Instruction, Political Issues, Public Policy, Secondary Education, \*Teaching Techniques, \*United States History, \*Values  
Identifiers—\*American Issues Forum, Bicentennial

Consideration is given to making the discussion of issues provided by the American Issues Forum most meaningful for students and applicable to their decision making about issues outside of the classroom. The Bicentennial and the American Issues Forum provide an excellent opportunity to help students develop a better understanding of our society's roots, values, and of the role and inevitability of conflict. A meaningful treatment of the issues raised by the founding of the nation and by the consideration of public policy since then must take into account the nature of values in a democratic society. Basic values of our society conflict with one another because contradictory values lie dormant within each of us. A classic dilemma is equality versus freedom: complete freedom leads to inequalities, and to achieve complete equality the freedom of some must be restricted. The issues in the Forum can be seen as the history of the continuing struggle over the appropriate mix of values in our nation's policies. The discussion of these issues can provide powerful insights for understanding the present and for deciding about the future. To deal adequately with issues in the past, students will need some of the inquiry skills of historians. Decisions about issues must be made in terms of frames of reference present at that time, not in terms of those of today, in order to provide a basis for understanding why certain decisions were made and how interpretations change. Identifiers—Egypt

A discrepancy-based evaluation model for international education, developed for a program revolving around a seminar held in Egypt in 1974, is presented. Based on Malcom M. Provas' model, it considered the special problems for a six-week educational seminar in a non-Western culture, and it questioned what type of individuals can best develop and utilize curriculum resources from another culture. The major problem was that the participants' attitudes and goals conflicted with the project's goals. A questionnaire was formulated and administered several times during the program; a free-response instrument was felt best suited for the evaluation model. It measured attitude by asking for completion of sentences such as "Egyptian people are..." and ranking responses as positive, neutral, or negative. Also, participant profiles were acquired that measured locus of control, needs achievement, and cognitive development. Results showed that the evaluation model did not answer the question for which it was designed, possibly because the model was not correctly developed for projecting that information or the question was inappropriate. It was concluded that an international program should be altered to fit participants rather than selecting "ideal" participants for a predesigned program. (ND)

Identifiers—\*Kansas

This paper reports the scope of minicourse offerings in Kansas secondary social studies classes. The more course options provided students, the greater the humanistic potential of the school program. During the 1974-75 school year, the vast majority of Kansas high schools continued to offer traditional one- or two-semester long courses. United States history and government are the two most frequently offered social studies subjects. The only other social studies subject area offered in a majority of Kansas high schools is psychology. However, there is an unmistakable trend toward shorter, more varied course offerings as over 29 percent of Kansas high schools are now offering minicourses in the social studies. As in traditional length courses, United States history and government are the two most popular areas for minicourses. The American Civil War is the most popular subject for American history minicourses, while courses on recent American history, the West, and the colonial period are also being offered in a majority of schools. A specific minicourse in state and local government is the most consistently offered course in government. (Author/DE)

**Teachers Beware: Elementary Social Studies Textbooks Are Getting Harder to Read.**

Pub Date Nov 75

Note—19p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (Atlanta, Georgia, November 26-29, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Educational Problems, Educational Research, Elementary Education, \*Readability, Reading Difficulty, \*Reading Level, \*Reading Research, \*Social Studies, \*Textbook Evaluation, Textbooks

An evaluation of elementary social studies textbooks indicates that eight factors are making

textbooks harder to read. These factors are: (1) the reading level of the book and/or the range of reading levels within it; (2) long sentences and/or too many concepts within a sentence or paragraph; (3) the use of vague terms, technical vocabulary, and words that have several definitions; (4) too much content and/or textbook is too long; (5) new concepts in familiar material; (6) new content material which is unfamiliar to the teacher or student, especially content from anthropology, economics, political science, and sociology; (7) the need for materials or activities that are not covered in the textbook; and (8) the use of primary source material. Although there are various factors that make some of the newer textbooks harder to read, reading level is not as much of a problem as it used to be. A comparison of textbooks published before and after 1972 indicates that the average reading level and range of reading levels within the textbooks is decreasing. Results of readability tests for various commercially published texts are included. (Author/DE)

**How to Develop a Learning Package Curriculum.**

Spons Agency—Kansas State Dept. of Education, Topeka.

Pub Date 75

Note—36p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*American Government (Course), \*Concept Teaching, Course Organization, \*Curriculum Development, Curriculum Planning, Individualized Instruction, Instructional Programs, Secondary Education, Small Group Instruction, \*Social Studies, Teaching Guides, \*United States History  
Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, \*Kansas (Hillsboro)

The American History-Government program at Hillsboro High School, Hillsboro, Kansas consists of a learning package curriculum. Students must take six of eight nine-week learning packages—American, foreign policy, conflict, change, modern politics, decision making, Constitution, and civil rights. The rationale for this package organization is that the topical approach allows for in-depth study, group work, and individual projects. A learning package has three parts—basic, small group, and individual levels—that students can opt to take. Steps for building a learning package are described. They are: decide the time, decide the topic, gather materials, decide on basic materials, decide on small group materials, decide on the individual materials, assign grade point values, determine the cost, produce the learning package, and modifying the learning package. The American Revolution, foreign policy, and Constitution learning packages are given as exemplary nine-week courses. This guide concludes with article and book report forms, small group guides, evaluation form, bibliography, and a list of small group materials. (ND)

Foulks, Edward F.

**Revitalization and Social Change: Contributions from Psychiatric Epidemiology.**

Pub Date 75

Note—14p.; Paper presented at the Annual Meeting of the American Anthropological Association (San Francisco, California, December 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Behavior Patterns, \*Change Agents, Culture Conflict, Literature Reviews, \*Mental Illness, Psychology, \*Schizophrenia, \*Social Change, Social Influences, \*Social Psychology, Social Science Research, Sociocultural Patterns

The relationship between schizophrenia and social change is examined through a review of recent medical research in genetics, biology, and epidemiology. Those mental traits that today in our society characterize the schizophrenic, in a previous era or in another society may have provided a mechanism for cultural change during the periods of stress when traditional methods of coping with the environment proved unadaptive. In many cases, prophets, shamans, and seers experience the same estrangement and disorganization of the self as does the schizophrenic in our society. This perspective views schizophrenia in our society as an evolutionary anachronism which in a previous society may have been organized early in youth and shaped into a socially useful

form. Cultural change has in recent human history become a dominating ethos and is accordingly valued for its own sake. The particular psychological functions of these sensitive individuals are therefore no longer used to transcend traditional points of view. (Author/DE)

A Content Analysis of the Treatment of Black Americans on Television.  
Pub Date [75]

Note—18p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Bias, \*Commercial Television, Cultural Images, Ethnic Groups, Ethnic Stereotypes, Negro Attitudes, Negro Culture, Negro Role, \*Negro Stereotypes, \*Programming (Broadcast), \*Racial Discrimination, Scripts, Television Research, Television Viewing

The relationship between the racial composition of television casts and their portrayal of Black Americans is examined. Observations of six selected television programs over several weeks indicated that the portrayal of Black in integrated and all-Black programs communicates different images about Black Americans. The results indicate that Black characters in all-Black television casts display a significantly greater number of stereotypic Black characteristics, more personal and family problems, and tend to have low social status. Black characters in integrated television casts display a significantly greater number of socially valued characteristics, community problems, and high social status symbols. The study raises questions on the effects of these two types of portrayals on children's racial attitudes and self-concepts. The all-Black programs which contain negative elements that are traditionally associated with Black Americans may reinforce or instill stereotypic images of Blacks in the viewer. The programs with integrated casts may reinforce the notion that Black people are highly assimilated, upward mobile members of society. (Author/DE)

One of two publications resulting from the National Seminar on the Diffusion of New Instructional Materials and Practices held at the Wingspread Conference Center in Racine, Wisconsin, in June 1973, this workbook is addressed to those who need help in creating and implementing educational diffusion plans. It contains a structured series of questions, and suggestions on how to get information to answer them. They are designed to help the innovator diagnose the nature of the idea or product to be introduced, own capabilities as a change agent, and potential areas for change in a school system. The potential areas for change could be the roles played by people, occasions for introducing changes, and kinds and channels of communications. The last part of the workbook suggests how all the information generated by the questions can be put together in a coherent action plan. An evaluation scheme and an extensive list of resources conclude the workbook. (Author/ND)

Descriptors—Administrator Guides, Change Agents, \*Change Strategies, \*Chief Administrators, \*Diffusion, Educational Change, \*Educational Innovation, Elementary Secondary Education, Generalization, Innovation, Methods, Social Sciences, Symposia

This document is one of two publications that resulted from the National Seminar on the Diffusion of New Instructional Materials and Practices held at the Wingspread Conference Center in Racine, Wisconsin in June 1973. It is written for and recommends diffusion methods to those who control the resources that are used to diffuse and implement educational innovation—school building and district administrators and policy makers, persons in state department of education, and officials in federal agencies supporting education. The paper consists of a set of 24 generalizations about dissemination of innovation and examples of how these generalizations can be applied. They are grouped into four categories: educational products, adopting systems, processes of development, and dissemination. For instance one generalization about adopting systems is "School districts and schools that place a high value on evaluation are more likely to adopt new products." In most cases examples of a generalization are cited for each level of policy making—building, district, state, and national. (Author/ND)

Cavanagh, Peter R. Landa, Jean  
A Biomechanical Analysis of the Karate Chop.  
Pub Date 23 May 75

Note—9p.; Paper presented at the Annual Meeting of the American College of Sports Medicine (22nd, New Orleans, Louisiana, May 23, 1975). Not available in hard copy due to poor reproducibility

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Athletics, Physical Activities, \*Physical Education, Psychomotor Skills, Skill Analysis

Identifiers—\*Karate

Although the sport of karate has been somewhat neglected by scientists, the following two isolated biomechanical studies exist in literature: (1) tracings of a karate chop in two planes were presented, but no data was given concerning the rates of movement of the limb segments, and (2) pre- and postimpact phenomena of five subjects were studied, and hand velocities and forces at impact were reported. This study attempts to provide additional data for the biomechanical analysis of the karate chop. An initial subjective analysis of five subjects using film taken at 200 frames per second identified three fundamentally different patterns of movement. Films were also taken to analyze the kinetic aspects of the study; they show the various components contributing to the accelerometer output. The various unknowns can also be calculated from film giving an interesting comparison of direct and indirect methods of estimating acceleration. The study uses the technique of accelerometry to illustrate the differences in using preferred and nonpreferred hands to break boards. The accelerometer recorded considerable differences during this experiment, and this technique may prove to be a useful teaching device which can provide immediate feedback. The study incorporates electromyographic results with kinematic and kinetic data to provide further insight into the movement to be obtained. Although the study is primarily concerned with preimpact phenomena, it also makes very approximate estimates of the forces existing at impact. (BD)

Identifiers—\*Death Education

This monograph on death education defines death education, discusses the need for it, and suggests ways of teaching it. Death education is defined as the process by which one explores man's relationship with life. The basic philosophy underlying death education is that through the study of death students will gain an appreciation for life which will be reflected in their behavior, and that by understanding death, they can try to prevent needless death for themselves and others. The monograph lists points which should be taken into consideration when planning a unit or course in death education and suicide prevention, and presents questions that teachers of such courses should be able to answer in defense of death education. Sample topics, behavioral objectives, and questions pertaining to death education for advanced high school students are also presented, along with sample assignments from a college level death education course. A bibliography of suggested class readings is included. Appended are suggestions for school personnel for helping bereaved students. A selected annotated bibliography of ERIC documents on death education concludes the monograph. (DDO)

The First Five Years Activities Under Public Act 761 and Public Act 230—Review and Recommendations. A Report.

New England Program in Teacher Education,  
Durham, N.H.

Pub Date 1 Nov 73

Note—91p.; A Report to the Connecticut Joint Teacher Education Committee of the State Board of Education and the Commission for Higher Education

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*College School Cooperation, College Supervisors, \*Educational Change, \*Higher Education, \*Interinstitutional Cooperation, Schools of Education, Student Teaching, \*Teacher Education Identifiers—\*Connecticut

With the creation of Public Act 761 in 1967, the State of Connecticut became one of the first states to encourage a program of collaboration and parity between schools and colleges in teacher education activities. The law took advantage of the one point in teacher education where theory and practice meet: the clinical experience of supervised practice teaching. This report analyzes, retrospectively, the various projects and activities generated by Public Act 761 and the subsequent Public Act 230. These projects and activities include a Joint Teacher Education Committee, advisory committees, pilot projects, and conferences. In addition to background sections on each of these activities, the report contains a summary of Public Act 761 and abstracts of the pilot projects funded under this law. The study highlights (1) some strategies implicit in developing cooperation to the level of collaboration between colleges and schools, (2) some of the changes fostered in the practice and the environment for the student teaching experience, and (3) the support needed to maintain the directions developed. Appendixes include the names of the evaluation team and the advisory committee for teacher education pilot projects; maps of the state, with the distribution of institutions and school systems that submitted proposals; and copies of questionnaires and key questions used in the evaluation study. Descriptors—\*Career Planning, College Students, Education Majors, Elementary School Teachers, \*Graduate Surveys, \*Higher Education, \*Job Placement, Secondary School Teachers

This report is a descriptive analysis of prospective and working teachers, using data collected from college students in 1967, when they were freshmen, and in 1971. Only those completing their baccalaureate degrees by 1971 were included in this study, and focus was on those interested in teaching in elementary and secondary schools. The purpose of the study was to see what changes there have been over the years since the last national data were collected on what kind of students either choose and stay with or reject a teaching career. The report is presented in the following three parts: (1) Success in Obtaining Early Teaching Jobs by Selected Personal and Institutional Characteristics; (2) Career Plans of New Teachers; and (3) Change or Stability in Education Career Goals from 1967 to 1971, by Selected Personal and Institutional Characteristics. Personal characteristics include background, academic achievement, and career and attitudinal items. Institutional characteristics include level and control size, region, and selectivity of freshmen institutions. Extensive supportive tables, a technical appendix, and an appendix showing the original and followup questionnaires are included. (CD)

Descriptors—\*Decision Making, Educational Innovation, \*Elementary Education, \*Instructional Improvement, \*Multiunit Schools, Principals, Research and Instruction Units, \*Teacher Administrator Relationship, Team Teaching

The purpose of this study was to examine the relationships of the Instructional Improvement Committee's (IIC) involvement in decision making, the representation of teachers on the IIC, and the effectiveness of the Instruction and Research (I&R) Unit in Individually Guided Education/Multiunit Elementary (IGE/MUS-E) schools. The theoretical base for the study was the model of administration as a social process which states that one's need-dispositions and role expectations ideally converge to produce effective behavior. The IIC was examined as an organizational structure which allows for the inclusion of people in the planning of work goals and in the administration of tasks which affect them to benefit the school. The three major variables (extent of involvement in decision making, representation, and effectiveness) were examined; in addition, six situational variables were identified as being factors which might account for some variation in the dependent variable, effectiveness. Seven hypotheses were developed to test the relationship of extent of involvement in decision making and representation to effectiveness of the I&R unit as perceived by unit teachers and unit leaders. Ancillary questions were posed to compare these perceptions and to examine the relationships of the institutional variables to I&R unit effectiveness. Two instruments were developed to measure the three main variables; data were collected from 48 randomly selected I&R units in IGE/MUS-E schools in 12 states. Nine major conclusions were drawn from the collected data. (BD)

Saving Educational Dollars through Quality Objectives.

Note—115p.

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—\*Accountability, \*Achievement Rating, Behavioral Objectives, \*Performance Based Education, \*Performance Criteria, \*Teacher Evaluation, Teachers, Test Results, Writing Skills

This document is a collection of working papers written to meet the specific needs of teachers who are starting to think about and write performance objectives. It emphasizes qualitative objectives as opposed to quantitative classroom goals. The author describes quality objectives as marked by their clarity, accessibility, accountability, and ability to be evaluated by laypersons. The author devotes a section to each of these characteristics and concludes with statements on the relevance of quality performance objectives to the graduate student, the college president, and the educational researcher. Verbal Correlates of Instructional Effectiveness with Kindergarten Children.

Pub Date Apr 75

Note—61p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., April 1975)

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Child Language, Children, Communication Skills, Kindergarten Children, \*Language Styles, Language Usage, Listening, \*Preschool Teachers, \*Primary Education, \*Verbal Communication, \*Verbal Tests

This was an attempt to conduct a micro-investigation of teachers' verbal instruction. It was based on the assumption that there must be, within broad categories such as "explaining,"

both better and worse ways of using language to represent reality and/or to direct student behaviors. The subjects in the study were 20 experienced kindergarten teachers, 20 elementary student teachers, 20 secondary student teachers, and 120 children aged four and one-half to six. The teachers made tapes telling children how to do eight tasks ranging from drawing and tracing figures to moving furniture around the room. Characteristics of each message were counted regarding number of words used, number of utterances, number of communication units, and time in seconds from first to last word. Two children attempted the task for each recorded message. They were scored as either accomplishing the task correctly, partially correctly, or not at all. It was found that in instructing young children one must include instructions that show exactly what the limits are for the response (what should not be done, as well as what should be done), one must use unambiguous, specific words wherever possible, and one should clearly separate each idea into a separate thought. To Coordinate Existing Resources to Meet the Needs of Students at the Primary Level.

Pub Date 13 Aug 75

Note—357p.; Practicum submitted in partial fulfillment of the requirements for the degree of Doctor of Education (Nova University); Pages 313 and 328-330 are of marginal reproducibility

EDRS Price MF-\$0.76 HC-\$18.40 Plus Postage

Descriptors—Case Studies (Education), Cooperative Planning, Grade 3, Mathematics, Organizational Development, \*Primary Education, Reading, \*Team Teaching, \*Team Training, Teamwork, \*Underachievers

This practicum was designed to develop an intervention prescriptive team model which would utilize the resources of the primary level to improve student achievement. Specifically, the intervention prescriptive team model sought to improve the achievement of third grade underachievers and serious underachievers in reading and mathematics. The intervention program was developed at the primary grade levels (1-3) through a restructuring of the use of pupil personnel, reading specialists, the building principal, and the classroom teacher in a diagnostic-prescriptive team model. The demonstrated achievement over expectancy of both underachievers and serious underachievers in reading suggests that the intervention program with its tasks orientation, problem-solving approach, and system of monitoring should be expanded to the intermediate grades (4-6) and be given serious study as a model for instruction strategies for all students and not just for underachievers. (This report contains descriptions of the practicum procedures, several case studies, and evaluation of the practicum, and recommendations.) (Author/BD)

The Herbert Marcus Elementary School Model for Classroom Management Provided by Alternatives in Discipline.

Pub Date 9 Aug 75

Note—233p.; Paper submitted in partial fulfillment of the requirements for the degree of Doctor of Education (Nova University)

EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage

Descriptors—Academic Achievement, Classroom Management, Classroom Observation Techniques, Communication Skills, \*Discipline, \*Discipline Problems, \*Elementary Education, \*Inservice Teacher Education, \*Racial Discrimination, Student Teacher Relationship

This study was designed to see whether a model program utilizing alternative disciplinary actions as a means to improve the discipline problems at Herbert Marcus Elementary School would be successful in (1) reducing the number of student misbehaviors, (2) providing more appropriate learning situations for the needs of individual students, and (3) reducing the apparently racially-biased disproportion of disciplinary actions against minority students. Staff development sessions were held for over a year with the assistance of the principal and visiting professionals who taught teachers methods of identifying student problems and averting potential discipline problems. Faculty answered

questionnaires before and after the program, rating themselves on a variety of skills indicative of classroom control. The Fink Interaction Analysis System was used to chart teacher behavior in the classroom in terms of number of positive and negative behaviors related to interacting with students. Analysis of the data indicated that the program was effective in improving teacher competencies, while at the same time student academic achievement improved as disciplinary behavior decreased. (Appendixes are attached which include the teacher questionnaires, Fink Observation Sheet samples, and statements concerning the philosophy and guidelines of the school. Two bibliographies are also included.) (CD)

**Descriptors**—Bilingual Education, Credentials, Cultural Awareness, Cultural Education, Cultural Interrelationships, \*Cultural Pluralism, \*Teacher Programs, \*Teaching Models

**Identifiers**—\*Multicultural Education

The Institute for Cultural Pluralism, a resource facility in multicultural education in the School of Education at San Diego State University, has been assigned to develop the Bilingual/Cross-Cultural Specialist Credential (BCCSC) Program plan. The basis of the BCCSC Program is the Community, Home, Cultural Awareness, and Language Training (CHCALT) model. The CHCALT model is based on nine features, which are considered essential to any multicultural education program. Incorporating these nine elements as the major goals of the program, the CHCALT teacher training model is divided into the following four basic components: (1) philosophy of education for the culturally and linguistically different, (2) sociocultural awareness, (3) oral language and assessment techniques, and (4) diagnostic and prescriptive strategies. These components make up the four phases used in the implementation of the CHCALT training model. (The four phases of the CHCALT teacher training model are discussed in detail. The appendix presents diagrams of the CHCALT model.) (BD)

**Nutrient Requirements in Adolescence.**

National Institutes of Health (DHEW), Bethesda, Md.

Report No.—DHEW-NIH-76-771

Pub Date 75

Note—17p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Adolescence, Adolescents, Eating Habits, Health Education, \*Nutrition, Nutrition Instruction

**Identifiers**—\*Adolescent Nutritional Requirements

It is important to understand the nutrient requirements and the significance of nutrition both in pubescence and adolescence. The pubescent growth spurt is characterized by an increase in body size and a change in proportion of different tissues. Both of these factors are of great nutritional importance, since there is reason to believe that the growth spurt is sensitive to nutrient deprivation, although our knowledge of the requirements of adolescents for various nutrients is incomplete. The Food and Nutrition Board of the U.S. Academy of Sciences has published successive issues of its "Recommended Dietary Allowances (RDA)." "The Ten-State Nutrition Survey (1968-70)," which measured food intake of lower income families in the United States, shows deficits among adolescents when compared with the RDA. The dietary inadequacies of adolescents may sometimes be accentuated by situations causing extra demands for nutrients, such as pregnancy, injuries, and involvement in sports. Excessive intake of nutrients also occurs during adolescence; one of the most common conditions due to an imbalance between food intake and expenditure is obesity. Excessive intake of dietary fat, notably saturated fat, has been associated with elevated blood cholesterol levels. Studies have indicated that the onset of both atherosclerosis and obesity may well occur during childhood, and that the most appropriate time to apply preventative measures and to provide nutritional education is during adolescence. **Title IX—Its Impact.**

Pub Date 1 Nov 75

Note—12p.; Speech presented at the Central Regional Intramural Conference (1st, Minneapolis, Minnesota, November 1, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Athletics, Coeducation, \*Federal Legislation, \*Intramural Athletic Programs, \*Nondiscriminatory Education, \*Sex Discrimination, \*Womens Athletics

Fear, judgements, and violence have characterized discrimination throughout history. In sex discrimination, both sexes have a responsibility to fight discriminatory attitudes. Women should retain their distinctly feminine characteristics while at the same time being provided the same opportunities as men of equal ability. Title IX of the Education Amendments of 1972 forbids discrimination on the basis of sex in education programs or activities which receive federal funds. This is especially applicable to intramurals. Identical programs and totally coeducational teams are not required as long as comparable opportunities to participate in sports programs exist. Institutions have until July 21, 1976 to evaluate their athletic programs and implement the principles of nondiscrimination by sex. Equal opportunity includes everything from equipment to coaching to publicity. The most important aspect of a responsible intramurals program is to be sensitive to what the particular students at an institution at a particular time want and are interested in. In intramurals men and women must learn to cooperate in each other's best interests. (CD)

**Descriptors**—\*Behavior Patterns, \*Biochemistry, \*Human Body, \*Metabolism, \*Psychological Patterns, Psychophysiology

**Identifiers**—\*Biorhythm

Biorhythm comes from the Greek words for life and regulated beat. The science of biorhythm is concerned with the rhythmic cycles of physical, emotional, and intellectual life. These cycles have lengths of 23, 28, and 33 days respectively. During the first half of each cycle, energy is high. During the low period, second phase abilities, feelings, and competence decline. The worst periods are critical or zero days when the cycle changes from high to low or vice versa. During

this period, the body seems to be in a state of flux and thus has a considerable degree of instability. A biorhythm chart can be calculated from one's birthdate. (CD)

**The Humanistic Duo: The Park/Recreation Professional and the Computer. (Computer-Can I Use It?).**

Pub Date 3 Oct 73

Note—50p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Computer Oriented Programs, \*Computer Science, \*Electronic Data Processing, Leisure Time, Management Systems, Parks, Recreation, \*Recreational Programs, Social Recreation Programs, Telecommunication

This paper states that there are two fundamental reasons for the comparative absence of computer use for parks and recreation at the present time. These are (1) lack of clear cut cost justification and (2) reluctance on the part of recreation professionals to accept their role as managers and, consequently, to utilize modern management tools. The paper attempts to describe the most effective use of the computer and telecommunication technologies for the leisure service provider. It seeks to make the part and recreation professional recognize that the ultimate effective use of the technology will be in the hands of those professionals who combine a basic understanding of their own profession with that of the technology itself. The paper contains a primer on computers for the recreation/park professional. A section on the primary applications of computer technology to recreation and parks is followed by examples of specific application to these areas. More detailed examples are appended. (Author/DDO)

**Descriptors**—\*American Indian Culture, \*American Indians, Art Education, Art Expression, \*Arts Centers, \*Biculturalism, Creative Art, \*Cultural Awareness, Disadvantaged Youth

The task of setting up and administering educational programs for the American Indian has been fraught with seemingly insurmountable problems and inbuilt frustrations for both the Indian population and the Federal Government. Many programs are now under way to increase Indian control of Indian affairs, including their own educational institutions. The Institute of American Indian Arts makes special curriculum provisions geared to the special needs of Indian youth in an attempt to turn the potential disadvantage of the cultural transition to advantage and to stimulate extensions of American Indian expressions in the arts. The underlying philosophy of the program is that unique cultural tradition can be honored and can be used creatively as the springboard to a meaningful contemporary life. The institute plans its programs around the special needs of the individual and attempts continuously to expand its understanding of student problems as they emanate from Indian cultural origins. The school offers an accredited high school program with emphasis on the arts, and a college level program as preparation for college and technical schools and employment in arts-related vocations. The age range of the student body is from 15 to 27. This method of dealing with Indian minority problems seems to hold promise of being an effective education approach for dealing with the needs of other minority groups. (BD)

**The Effect of a Teacher's Sex on Career Development.**

Toronto Board of Education (Ontario). Research Dept.

Pub Date Sep 75

Note—82p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—Employment Opportunities, Employment Qualifications, \*Equal Opportunities (Jobs), Occupational Surveys, \*Promotion (Occupational), Questionnaires, \*Sex Discrimination, Teacher Qualifications, \*Women Teachers

A survey was conducted of a sample of 1,163 male and female teachers, consultants, and administrators of a large, urban school system. Data was collected about their formal qualifications, job performance, the extent to which they had been encouraged to apply for promotion, the number of applications they had made, and the positions they had held. The data was analyzed using a series of stepwise multiple regression analyses. Results indicated that there were both independent and cumulative effects for sex at each stage of a teacher's career. Woman teachers, first of all, had less formal qualifications in terms of years of experience and earned degrees and certificates. But even women with equivalent qualifications to men performed at a lower level. Likewise, lower qualifications and job performance resulted in women receiving less encouragement to apply for promotion, but even well qualified women were less likely to receive encouragement than men of equivalent standing. The same was true for number of applications, and for promotion itself, with both cumulative and independent effects for sex being present. Data on the few women who were in positions of responsibility showed that they were older, less likely to be married, and held lower level positions than men in positions of responsibility, even though their job performance and level of encouragement was the same. (The teacher questionnaire, descriptions of the career development concepts presented, and tables are included in the appendixes.) (Author/BD)

**The Relationship Between Exposure to Recreational Noise and Temporary Threshold Shifts in Women.**

Note—12p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Acoustical Environment, Analysis of Variance, \*Auditory Tests, \*Environmental Influences, Females, \*Hearing Loss, Recreation

An investigation was conducted to identify the effects of exposure to selected entertainment environments on hearing threshold levels. Twenty-five normal hearing females were randomly assigned to one of the following five taped noise conditions: (1) a discotheque band, (2) a motor speedway, (3) a hotel dance band, (4) an amusement park, and (5) a control recording of low-level exposure. Pure-tone air conduction threshold levels were measured binaurally at 12 frequencies in three trials prior to exposure, 2 minutes after exposure, and 30 minutes after exposure. Temporary threshold shifts and recovery patterns of the five exposure conditions were compared by analysis of variance with repeated measures. The main effects of frequency and trials were significant ( $p$  less than .05). The findings indicated that exposure to selected entertainment noise created significant temporary hearing losses at certain frequencies; no losses were observed, however, which met damage-risk criteria. Note—15p.; Paper presented at the Annual Meeting of the American Psychological Association (Chicago, Illinois, September 1975)

Available from—Dr. Meredith D. Gall, University of Oregon, College of Education, Eugene, Oregon 97403 (No price quoted)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Cognitive Ability, \*Cognitive Tests, Discussion (Teaching Technique), Incidental Learning, Intentional Learning, \*Questioning Techniques, \*Retention, \*Rote Learning, \*Teaching Techniques, Test Results

This was a study to see whether students learn specific material better in classes which emphasize recitation on fact questions or recitation which involves the students in higher cognitive reasoning and interpreting skills. A series of 10 one-hour ecology lessons were taught by specially trained teachers; the same curriculum materials were presented to four treatment groups. In one treatment group, teachers asked questions divided into 25 percent higher cognitive questions (HCQ's) and 75 percent fact questions. Group 2 asked 50 percent of each kind of question. Group 3 used 75 percent HCQ's and 25 percent fact questions. Group 4 used no recitation, but involved the students in art activities on ecological themes. Students were examined before and after the course with tests that included multiple-choice, essay, and oral questions. Results are not to be generalized too broadly because recitation groups were unusually small (6 students) and teachers were taught to present rigid recitation plans. Results showed however, that the students in the 25 percent HCQ sample did slightly better on fact questions and about as well on reasoning questions as students in other groups. This indicated that having students recite facts may prompt their learning more effectively than has been supposed recently. The 50 percent HCQ sample did relatively poorly on facts, but out-performed the other groups on cognitive questions. The art group did not excel in either kind of test. (CD)

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors**—\*Educational Accountability, Feedback, \*Incentive Systems, Performance, \*Rewards, Self Reward, Teacher Behavior, Teacher Motivation

This study examined (1) the rewards and incentive systems currently used in schools, (2) the relationship between the existing reward system and both the excellence of the school and the behavior of teachers and administrators in searching for alternatives, and (3) the possibility of defining a rewards system for teachers which would elicit greater pupil achievement. Results suggest that teachers in both high achieving and low achieving schools would be most highly motivated by a system which encourages the conscious application of a variety of intrinsic rewards. Situations which foster a sense of achievement and which lead to increased self-confidence were found to be useful, especially if self-assigned rather than externally-assigned. School administrators can help teachers analyze their teaching effectiveness as a means of generating these intrinsic rewards by using the techniques of clinical

supervision. The study indicates that certain extrinsic rewards are also very important. Some of these take the form of job security and monetary arrangements; others relate to various feedback arrangements which provide the teacher with normative and neutral data describing the administrator's perceptions of his/her teaching effectiveness. **Sources of Information About New Social Studies and Science Programs Used by Washington Elementary School Principals.**

Washington State Univ., Pullman. Coll. of Education.

Pub Date Nov 75

Note—45p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Elementary Education, \*Elementary School Science, \*Information Sources, Merchandising, \*Principals, Questionnaires, \*Sales Workers, \*Social Studies, Textbooks

This study was designed to determine if the conclusion of Ruff and Orlich that textbook salesperson were the primary source of information about elementary social studies for Washington elementary principals would be substantiated through replication. In addition, the investigation sought information on several pertinent variables not available in the original instrument (e.g., size of school district and participation in national workshops). Questionnaires were mailed to 301 elementary school principals in the state of Washington. The instruments were used to obtain information regarding the best sources of information for social studies, as well as for elementary school science. Results indicated that (1) publishers were still the single most frequently mentioned "best source" of information; (2) curriculum coordinators and other district resources were important sources of information in larger school districts; (3) conferences and workshops were identified as important informational sources by respondents who attended them; and (4) generally, the larger the school district, the smaller the number of trips reported taken by the respondent, and vice versa. (The cover letter to principals, the survey instrument used, questionnaire formats, and suggested instruments for both social studies and science information are appended.) (PB)

**Descriptors**—Employment Interviews, Job Application, \*Methods, Teacher Employment, Teacher Qualifications, \*Teacher Recruitment, \*Teacher Selection

This study reviews current literature relating to methods of selection and recruitment of teachers and describes some of the more innovative techniques suggested by practicing administrators and recruiting agencies. Emphasis is given to the importance of establishing sound criteria and workable techniques of teacher selection, together with methods for allowing dialogues between interviewer and applicant. Among the criteria and requirements given for teacher selection are (1) adaptation to the particular and peculiar needs of the community, (2) an adequate and appropriate salary schedule, and (3) the personal factors relating to the applicants themselves. Various guidelines or techniques which may be developed and used in recruiting programs are listed, as is information on college placement offices and procedures for the collection of data. There are also discussions on the interview, innovative methods for teacher selection, technology and teacher selection, techniques for the applicant, and errors in the selection process. Appended are pointers for recruiters, suggestions for developing a salary schedule, a position analysis outline, suggested questions to guide interviewers and applicants during an interview, five interview techniques for teacher selection, and a guide for applicants for teaching positions. **The Multicultural Approach to Designing an Effective Program of Professional Laboratory Experiences.**

Pub Date 7 Nov 75

Note—19p.; Paper presented at the Southeastern Regional Association of Teacher Educators Meeting (Orlando, Florida, November 7, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Cross Cultural Training, \*Cultural Differences, \*Cultural Pluralism, \*Field Experience Programs, \*Intercultural Programs, \*Laboratory Training, \*Preservice Education, \*Teacher Education, \*Teaching Experience

This paper proposes the restructuring of preservice professional laboratory programs in order to make these preservice experiences meaningful for prospective teachers of students whose racial, social, religious, and cultural backgrounds differ from the mainstream. Professional laboratory experiences are defined as learning activities in which the prospective teacher is able to observe teachers and pupils at work, perceive teaching acts or events with understanding, and become directly involved in carrying out the process of teaching. It is stated that a multicultural professional laboratory program provides an ideal opportunity for directing prospective teachers toward the development of self-analysis and self-improvement as teachers and as students, thereby promoting discovery of their strengths as teachers and revealing how to capitalize on them in the process of learning how to function and adjust in a culturally diverse society. The competencies necessary for effectively teaching students of different cultures are listed, as are the basic assumptions underlying a multicultural approach to professional laboratory experiences, the characteristics of a multicultural professional laboratory program, factors to be taken into consideration when designing such a program, and concepts and strategies for program implementation. Descriptors—Elementary Education, Junior High Schools, Mathematics Instruction, Parent Participation, Parents, Reading Instruction, \*Tutorial Programs, \*Tutoring, \*Tutors, \*Volunteers, \*Volunteer Training

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, Ohio (Cleveland)

The general objective of Project Utilize was to help educators learn effective utilization of volunteer support. Volunteers were recruited from the school community. Nine volunteer and teacher training sessions were held. The volunteers, principals, and teachers were involved in viewing the training of volunteers on videotape. Pupils referred to this project were those who exhibited inadequate coping levels in reading and mathematics. The ratio of pupils to volunteers was dependent on the number of parent volunteers available in the school area. A Communications Council was formed to provide liaison between the project and the community-at-large. A Committee of the Whole, made up of teachers, principals, and volunteers, provided interaction at school parent meetings. Considerable improvement in the mastery of certain language arts and mathematics skills was demonstrated by 79.3 per cent of the pupils. The principals, teachers, and parents were generally enthusiastic about the project's success with pupils. Although 1974-75 was the final funding year of the project, it was felt that efforts must continue to provide effective use of volunteer skills to pupils who need tutoring in reading and mathematics skills. (Appended are 15 forms and questionnaires.) (RC)

The goal of this research project was to design a personality test which would help select, guide, and place prospective teachers into situations where they would be happiest and most effective. A Developmental Self and Child Concept Scales (DSCCS) test was developed and administered to 81 women attending a graduate teacher training program. In the fall, the subjects had to answer questions about themselves as a child and themselves at that time. In the spring, they answered questions about their actual teaching experiences. Their advisors rated them on the same questions. Some of the results were as follows: (1) teachers' preference for active, aggressive, outgoing children, or shy, passive, withdrawn children was linked to which way they were as children themselves; (2) teachers who had had more secure, happy childhoods preferred outgoing children; (3) teachers who preferred gifted children viewed themselves as more gifted as children but also as more troubled; (4) teachers judged poor/fair seemed to have had the least resources to draw on in identifying with children or with positive adult role models; (5) "Myself as a Child" impressions were better indicators of teaching ability than "Myself Now;" and (6) individuals' and advisors' assessment of competence were similar. Descriptors—Educational Research, \*Employment Statistics, Foreign Countries, Personnel Data, \*Statistical Analysis, Statistical Data, Teacher Characteristics, \*Teachers

Identifiers—\*West Germany

The purpose of this study was to analyze the available statistics concerning teachers in schools of general education in the Federal Republic of Germany. An analysis of the demographic structure of the pool of full-time teachers showed that in 1971 30 percent of the teachers were under age 30, and 50 percent were under age 35. It was expected that distribution in the teacher pool by age, sex, and social origin would correlate roughly with those factors over the whole population. However, marked differences were found in teacher density by age group. This was attributed to differences in preparation required for different types of schools. An analysis of net changes in the teacher pool from 1966 to 1970 was also undertaken. It showed that manpower replacement needs are currently low, but because of insufficient data it was difficult to predict future trends in this area. This analysis also indicated that teachers often do not teach subjects for which they have been trained. (Data on working conditions and salaries of teachers are presented and discussed in this report, and numerous tables are included.) (PB)

Teacher Education, Program Evaluation, School Districts, \*Staff Improvement, Teacher Associations, \*Teacher Improvement, Teacher Role

This report on inservice education begins with an overview of the need for staff development programs. The districts contributing to this report offered their goals and objectives, their approaches to evaluation, and the new roles they see their teachers and administrative staff playing in education today. Chapter 1 contains a statement of the problem—how best to promote instructional staff development. In chapter 2, four school districts present examples of goals and objectives that will ensure a comprehensive and people-oriented program of staff development. The focus in chapter 3 is on the two levels of need that staff development programs are meeting. These needs are (1) teacher needs, and (2) organization needs. Examples of how several districts are meeting these needs are given. Program evaluation is the topic of chapter 4. Several different approaches to evaluation that school districts are using are discussed in this chapter. In chapter 5 the various roles of those involved in inservice education are defined, and again examples of programs are cited. Chapter 6 discusses the special needs of urban inservice programs, using the Dallas Independent School District as an example. A paradigm for studying teacher development is detailed in chapter 7. Finally, chapter 8 contains a summary of what is being done in the field of staff development. (RC)

Descriptors—Behavioral Objectives, \*Educational Accountability, \*Evaluation Criteria, Evaluation Methods, Performance Contracts, \*Performance Criteria, \*State Legislation, \*Teacher Evaluation, Teachers

The concept of accountability, or fixing responsibility for outcomes in education, is not new. As far back as 1912, administrators were responding enthusiastically to the idea of assessing teacher performance by objective criteria. Currently, the focus of the accountability movement is on evaluation. An evaluation procedure that would assist in the teaching-learning process as well as produce some measure of a teacher's effectiveness must include a clear definition of responsibilities, specific objectives, and assessment of results by these objectives. An evaluation system should be compatible with the mutual job expectations of both administrators and teachers. The individual being evaluated and the evaluator(s) should agree on performance objectives, work for their accomplishment, and jointly assess the results. Prevailing negative attitudes concerning education and, particularly, the effectiveness of our educational system have prompted education accountability and evaluation mandates. These legislative actions are attempts to mandate quality, and their success depends on the willingness of the educational community to monitor itself and to attempt to improve the quality of the teaching-learning situation. Descriptors—Academic Achievement, \*Admission Criteria, Performance Based Teacher Education, Student Evaluation, \*Teacher Education, Teacher Qualifications

This study (1) describes student selection and retention procedures currently used by North Central Association colleges and universities which are accredited by the National Council for the Accreditation of Teacher Education, and (2) determines student selection and retention procedures which administrators of teacher education programs at the same institutions sug-

gested should be employed. A questionnaire designed to gather information concerning the criteria used for student selection and retention was developed. A random sample of 100 institutions, 98 of which responded, was selected from the above mentioned population. Analysis of the findings reveal that multiple selection and retention criteria are preferable to any single criterion; periodic checkpoints for review of student progress should exist; scholastic aptitude is the most widely applied criterion; few applicants are denied entry into teacher education programs; early identification of unsuitable teacher candidates is necessary; and a need exists for an introductory course in education to properly orient prospective teachers to the profession. **Existentialism and Open Education: Divorce American Style.**

Pub Date 31 Oct 75

Note—25p.; Paper presented at the National Conference of the American Educational Studies Association (San Francisco, California, October 31, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Comparative Analysis, \*Existentialism, Individualism, Individualized Programs, \*Open Education, Philosophy, Student Centered Curriculum, Teacher Role

This paper attempts to provide an insight into a possible relationship between open education and existentialism. The first section of this paper broadly defines the concept of open education as a search for a more meaningful approach to learning. This section then defines open education more specifically through the use of the following six learning assumptions: (1) motivation, (2) conditions for learning, (3) social learning, (4) intellectual development, (5) evaluation, and (6) assumptions about knowledge. There follows a discussion of the philosophical basis of open education and how it can eventually be related to existentialism. The second section of the paper details, at some length, the intellectual importance of another paper which presents the argument that, in order for existentialism to be applied to education, what is initially required is the redefining or reinterpretation of the notion of education. This section also attempts to answer the question of whether or not existentialism can be applied to education. Section 3 examines how the open classroom teacher views his/her professional role based on the six previously listed learning assumptions. It also discusses how this new teacher role is based on themes peculiar to an existential interpretation. (BD)

This document examines the need for health education and presents suggestions for implementing and/or improving health education programs. Chapter 1 states that the school has an obligation to emphasize positive health practices in cases where the home has been deficient in encouraging the child to practice sound health habits. This chapter also describes assessment instruments for grades 8-11 which concentrate on the individual's willingness to consistently exhibit positive health habits. Chapter 2 first examines the fact that although there is an abundance of health textbooks and materials, students still do not practice good health habits. Research concerning the formation of health habits through school programs is then presented and discussed. The first part of chapter 3 presents suggestions for improving health education curriculum. Inservice teacher education and student surveys to determine what is deemed relevant by students are discussed as major tasks in upgrading the health education curriculum. Suggested methods of gathering information from students as to what they consider important to learn are presented,

along with a sample student questionnaire. The second part of chapter 3 describes on-going programs in drug abuse education. A scope and sequence chart to aid teachers in establishing the starting point and periods of greatest concentration in specific areas of instruction, and suggested pupil-teacher activities are appended. Identifiers—\*Multicultural Education

This document is a compilation of activities for a multiethnic approach to teaching. It begins with points to consider when creating a multiethnic atmosphere in the classroom. Next are suggestions for the learning environment. One of the suggestions is to display items as a source of stimulation for conversation and writing, such as photo-of-the-week, quote-of-the-week, or a bulletin board of poems by American poets of various ethnic backgrounds. Examples of these are included. A list of simulations and games and their sources is then presented. Five activities are then described along with the purpose for the activity and teaching hints. For example, the purpose of one of the activities is to help the student appreciate music as a form of communication which reflects people's feelings and generates concerns of the times. The activity involves listening to various types of music on a particular theme and analyzing the content. Lists of sources of free and inexpensive materials, journals, and newspapers that can be obtained, and do's and don'ts for teachers in multicultural settings are then listed. An article on identifying racism in school books completes this document. (RC)

Descriptors—\*Cultural Education, Cultural Pluralism, \*Intercultural Programs, \*Performance Based Teacher Education, \*Teacher Education  
Identifiers—\*Multicultural Education

Performance based teacher education (PBTE) and multicultural education are emerging as viable and compatible strategies for preparing school personnel. The American Association of Colleges for Teacher Education (AACTE) has provided national leadership in the study and encouragement of PBTE and multicultural education. AACTE faces many problems as it contemplates the future of multicultural or intercultural education. First there is the problem of encouraging people to view diversity as a positive factor in society. Also, there are too many people who refuse to accept, to admit, and/or to include the nature of cultural differences as a way of life. Another problem in implementing such a program is eliminating the present narrow view regarding multicultural education. The concerns of

multicultural education are of growing importance to America's society at large, and they should be treated as such. The very nature of PBTE lends itself to enhancing goals of multicultural education. The capabilities of PBTE and multicultural education must be synthesized in a comprehensive program which is applicable both individually and collectively to our multicultural youth. To begin incorporating the ideals and ideas of intercultural education would not only give new (and much needed) direction to American education, but would also enhance America's future. (RC)

**Attitudes of Prospective Teachers Toward the Culturally Different.**

Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Bias, Cultural Pluralism, \*Disadvantaged Youth, Education Courses, Ethnic Groups, \*Higher Education, Minority Groups, \*Practicums, Preservice Education, \*Social Discrimination, Student Attitudes, \*Teacher Education

This study examined whether or not prospective elementary school teachers can become more positively oriented toward culturally different children after taking teacher education courses that focus on teaching these children. Two groups were taught two courses dealing with disadvantaged youngsters. Group A took the course during the summer and did not have any interaction with such children. Group B took the courses during two consecutive fall and winter quarters and worked with culturally different children. Students were administered questionnaires which dealt with their feelings about minority people both before and after the courses. Conclusions were that students taught courses about minorities without having real-life experience with them became more prejudiced. Students who worked with minority people became less prejudiced in general. Results indicated that practicum experiences of student teachers should include interaction with children not of the dominant culture if the teachers are to avoid looking down on them or expecting them to fail. This is particularly important because children often live up or down to the expectations of their teachers. (CD)

This report is divided into three parts. The first part is the opening address. It argues for the importance of constructive leisure as a human need. The essay suggests that recreation educators need to learn from such humanistic psychologists as Abraham Maslow, who have studied what man needs to achieve self-actualization. The second part of the report is divided into the topic statements of the discussion groups at the conference. These include concerns about higher standards of preparation in recreation programs, more progressive instruction, strengthening the professional image of recreation educators, helping students find jobs, and defining the content of training for two-year paraprofessional students and four-year degree candidates. Finally, the recommendations that each discussion group arrived at concerning recreation education are presented. (CD)

Degradation: A Case Study Calling for Ethnic Education.

Pub Date [74]

Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Attitudes, Cultural Images, \*Discriminatory Attitudes (Social), \*Ethnic Groups, \*Ethnic Stereotypes, Ethnic Studies, Immigrants, \*Italian Americans, Literature, \*Minority Groups

Many credible sources refer to the various immigrant groups in a derogatory manner. Negative citations can be categorized in numerous ways. They might arise as a result of the geographic origin of the ethnic group; attraction to a particular occupation class; peculiarity of custom; religious or political affiliation; rate of delinquency, crime, or illiteracy; or physical appearance. The subtleties of degradation can take form in the seemingly innocuous omission or casual treatment of the origin of persons of distinguished achievement. Within the parameters encompassing the extremes of subtle and flagrantly obvious discrimination there exist numerous forms of ethnic degradation which might be categorized as (1) occupation class stereotyping; (2) stereotyping by perceived "natural" inclination; (3) stereotyping in terms of illiteracy, crime, or delinquency; and (4) stereotyping by using a generally derogatory characterization. Steps are now being taken to alleviate future degradation and also to provide members of certain ethnic minorities with the justice of a well-deserved positive ethnic identity and heritage on which to look back. The time has come for educators to utilize the diverse cultural backgrounds of their students as a vehicle to enrich American society because of, not in spite of, their ethnic heritage. (Examples of derogatory statements in literature toward Italians and Italian-Americans are given.) (RC)

Descriptors—\*Acculturation, American History, Cultural Differences, \*Cultural Pluralism, \*Elementary Secondary Education, Ethnic Groups, \*Immigrants, \*Social Discrimination, Teacher Education

Identifiers—\*Multicultural Education

Assimilation of immigrants into the dominant culture of America helped to solidify a people, but at the same time the stimulation and opportunities for growth and change coming from a mixture of different people with different skills, values, and approaches to life were lost. Immigrants, particularly those from Eastern Europe, have been disparaged by ethnocentric writers. Children whose backgrounds are disparaged or ignored in public schools will feel badly about themselves, and children who have not been taught to appreciate and understand other peoples and cultures will grow up to be less adaptive and flexible adults. Early childhood may be the most promising time to teach children about

other cultures, both domestic and international. Learning a second language can be particularly helpful in fostering cross-cultural appreciation. Teachers themselves should have multicultural training so that they can sensitively and comprehensively offer an instructional program that encourages appropriate attitudes as well as teaches facts. Identifiers—Teacher Corps

This paper describes the use of student teacher interns who lived and taught on a Hopi Indian reservation. People in the Hopi community housed these teachers and cooperated with them in the classroom and in formulating educational material that would be relevant to their local culture. One Teacher Corps team developed a whole Hopi unit in social studies. Teaching teams were led by a Hopi who coordinated educational and administrative tasks and helped the interns and the community communicate with each other. The author sees such model programs as useful in supplementing institutional teacher training for bicultural situations. (CD)

Identifiers—\*Multicultural Education  
This is a report on two courses, one undergraduate and one graduate, which taught education majors, through films, discussions, book reviews, field trips, and community work, how to become master teachers skilled in reaching culturally different children. The report examines the purposes and content of the courses and concludes that they were successful. Student-written course evaluations are included which praise the course and the instructors. Racial balance among the students and participation of people dedicated to teaching were seen to create a productive situation. Outlines of the schedule of classes, reading lists, and subjects covered in each class session are included. The authors feel that students who are culturally different must be seen as having educational disadvantages as great as those with physical and emotional problems, and that it is important for educators to grasp the essentials of good teaching when dealing with the culturally different, as has been with the emotionally and physically disadvantaged. Descriptors—Acculturation, \*Bias, \*Bilingual Education, \*Cultural Pluralism, Culture Free Tests, Discriminatory Attitudes (Social), Ethnic Groups, \*Intelligence Tests, \*Test Bias

There has recently been an increasing awareness that the United States is a culturally diverse nation. Many people have seen this diversity as a

divisive force and have therefore adhered to the melting pot theory. Everyone comes out of a melting pot the same. Consequently, (1) intelligence tests have been devised that are only relevant to the experiences of nonminority children; (2) schools have refused to offer bilingual education to Chinese, Mexican, and other children whose first language is not English; (3) courts have only recently considered offering bilingual translation of court proceedings; and (4) teacher training has rarely included anything that would focus a potential teacher's attention on the needs of culturally different children. In fact, many white teachers come to teaching with unfortunate prejudices against nonwhite children, as was shown by a study in which white female undergraduates consistently gave less praise, encouragement, or attention to black junior high students regardless of whether they had been told these students were gifted or nongifted. Intelligence tests are particularly susceptible to cultural bias; furthermore, they are limited in their ability to assess a child's real potential. The Dove Counter Balance Intelligence Test was created to help psychologists and others think about and design tests that recognize varieties of cultural experience and the different usages of language among different ethnic groups. (An example of this test is included.) (CD)

Cautions When Working with the Culturally Different Child.

Pub Date Nov 73

Note—27p.; Paper presented at the Teacher Corps Associates Conference (Madison, Wisconsin, November 1-2, 1973)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Biculturalism, \*Bilingual Education, Bilingualism, Bilingual Students, Cultural Background, Cultural Differences, \*Cultural Education, Cultural Factors, \*Cultural Pluralism, Minority Groups, \*Spanish Speaking

Everyone in the United States has a cultural heritage which varies from the present mainstream culture of this country and yet, the majority of Americans have lost ties with their cultural background. This has occurred because of both the melting pot theory and the educational system that has developed under a philosophy. There has been a serious attempt made in our schools to fit everyone into one cultural mold. This cannot and should not be done. Bicultural programs are needed, particularly for groups such as the Puerto Ricans and Chicanos that have been able to easily harmonize with the mainstream culture. The task of the educator should be to ensure that the cultures of these children are not stolen from them in the classroom. There are many problems encountered in trying to establish culturally pluralistic programs in the schools. Among these are acceptance by the traditional educational system in America, the stereotyping of ethnic groups, ethnocentrism, and the training of teachers with a new awareness. There are also numerous factors which make up a good program but are difficult to achieve. The program must contain bilingual materials—it should include both English as a second language and Spanish as a second language—and must study both cultures. Finally, if a bicultural program is to work, teachers must always try to build the child's self-concept, and parents must be included in the program. [RC]

Houser, Norman W. And Others

About You and Smoking.

Pub Date 71

Note—64p.

Available from—Scott, Foresman and Company, Glenview, Illinois 60025 (No price quoted)

Document Not Available from EDRS

Descriptors—\*Elementary Education, \*Health, \*Health Education, Instructional Materials, Junior High Schools, \*Smoking, Stimulants, \*Tobacco

This booklet acquaints the student with current scientific knowledge about smoking and its effects on health, with the economic aspects of smoking, with ways in which young people might help those who now have a smoking problem, and with significant health statistics. It begins, in chapter 1, with a discussion of the history of tobacco and its use. Chapter 2 describes cigarette smoke and its effect on the air. Chapters 3 and 4

concern the lungs and respiratory system, the heart and circulatory system, and the effect that smoking has on them. How smoking causes illness, pain, and death is the topic of chapter 5. The cost of smoking, both financial and physical (such as fires), is discussed in chapter 6, while chapter 7 tells how students can help adults who already smoke. Chapter 8 lists facts that will hopefully discourage the student from smoking. Finally, a glossary of terms is presented. This book is intended for students in grades 4-9, although students in other grades may also find it interesting and useful. A pamphlet containing resource notes for teachers accompanies this booklet. (RC)

VD: Facts You Should Know.

Pub Date 70

Note—63p.

Available from—Scott, Foresman and Company, Glenview, Illinois 60025 (No price quoted)

Document Not Available from EDRS

Descriptors—Communicable Diseases, Health Education, Instructional Materials, Secondary Education, Sex Education, \*Venereal Diseases

This booklet presents information about venereal disease to the student in a simple, step-by-step way. It includes at least one question box on almost every page, requiring the reader to become actively involved with the material which is presented. The booklet is made up of seven sections, and is accompanied by a separate booklet which contains resource notes for teachers. Section 1 explores the nature of the problem, and includes discussions on the causes of gonorrhea and syphilis, how they are contracted, immunity, and treatments. Section 2 discusses how venereal disease affects the male and female reproductive organs. Sections 3 and 4, entitled Gonorrhea and Syphilis, include discussions of the symptoms, prevention, and treatment of these diseases. Section 5 contains a comprehension test with 25 questions relating to the previously covered material. The sixth section is composed of reference notes for the student and discusses how venereal disease probably began, the search for a cure, and venereal diseases and young people. The last section is a glossary of words used in the text. (BD)

Attributions of Success and Failure for Males and Females as Actors and Observers.

Pittsburgh Univ., Pa. Learning Research and Development Center.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date 75

Note—22p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Achievement, \*Evaluation, \*Failure Factors, Performance Factors, Sex Discrimination, Sex Stereotypes, Student Teacher Relationship, \*Success Factors

Identifiers—\*Causal Attributions

This study compares the differences in causal attributions of a person experiencing success or failure in an achievement situation (the actor) and someone who read about the situation (the observer). The subjects were given sets of anagrams which varied in difficulty. The results of both studies showed that actors were relatively more likely to perceive their outcomes as caused by external factors (task difficulty and luck), while observers attributed these outcomes more to internal factors (effort). Attributions for both actors and observers were also strongly affected by whether the outcome was a success or a failure. Hypotheses concerning significant differences in attributions made by male and female observers or actors were only weakly supported; however, the data that did emerge suggested a general tendency toward stereotypic thinking by both sexes, but especially by male observers. It has been suggested that the differential attributions made by an actor and an observer may cause conflicts in educational settings, where the student is the actor and the teacher the observer. However, this present study explores a situation that differs from a classroom situation, and additional research is needed to investigate differential attributions of teachers and pupils. (BD)

Integrate or Disintegrate!

Pub Date 9 Jun 75

Note—10p.; Paper presented at the Meeting of the Canadian Association of University Athletic Directors (University of Victoria, B.C., Canada, June 9, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Athletic Programs, \*Athletics, Cooperative Planning, Cooperative Programs, \*Financial Support, Foreign Countries, Higher Education, \*Intercollegiate Programs, \*Physical Education

Identifiers—\*Canada

This address cites studies, reports, and conferences having to do with the integration of physical education and athletics in Canadian universities. Some of the things the speaker notes are that (1) most Canadian colleges are integrated, and those that are not wish they were; (2) most researchers recommend integrating sports and offering them in conjunction with a physical education or health department; (3) more nonintegrated sports programs than integrated programs lost funding in recent years; (4) more integrated programs than nonintegrated offer 11 or more sports; (5) more money is spent on integrated programs than on nonintegrated programs; and (6) American sports programs, the majority of which are nonintegrated, are in bad shape financially despite their size and image. The speaker suggests that integrating Canadian sports programs offers the best hope of continuing Canada's excellent intercollegiate sports program. (CD)

Descriptors—\*Athletes, \*Athletic Programs, \*Awards, Foreign Countries, Recruitment, \*Scholarships

Identifiers—\*Canada

The introduction of new scholarships and awards in Canadian college athletics led to a panel discussion at the 1971 Canadian Association for Health, Physical Education, and Recreation on the issue of opposing or supporting such scholarships. The first participant supported them and felt it was wrong to assume Canadian sports would automatically imitate American mistakes of ignoring the athlete's academic life and allowing too much recruitment activity. The second participant felt athletes do not need special scholarships because in Canada financial aid is available to anyone who really wants a college education. Also, competitive recruiting would mean appealing to Americans to the disadvantage of Canadian boys, and the healthy, relaxed atmosphere surrounding Canadian sports in the past would be lost. A government spokesman supported third-party scholarships, particularly those in which the athlete gets the money from the government and decides for himself where to go to school. He did not see why sports should be singled out as a cultural activity not worth supporting. He also suggested that offering scholarships would keep promising athletic talent in Canada. The next participant warned that over-recruiting and commercialization in sports would follow, with physical education teachers having to engage in extensive recruiting and noncompetitive sports losing support. He said that the costs incurred in attracting larger audiences to big sports events cancel the profits. Reactors then gave additional views to which panelists replied. (CD)

A Progress Report on the Development of the Minnesota State IGE Network 1973-75.

Pub Date Jun 75

Note—19p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Individualized Instruction, \*Individualized Programs, Networks, Program Evaluation, \*State Programs

Identifiers—\*IGE, Minnesota

This is a progress report on the development of the Minnesota State Individually Guided Education (IGE) Network. The foreword states that the state IGE network came into being in July of 1973 in response to a need for the continuing awareness, implementation, and refinement of IGE on a statewide basis. Section 1 is an introduction which explains the purpose of the report: to determine how the IGE Network is being evaluated and what the results of that evaluation are. The procedures used to gather the data for the report are listed in section 2, while the data is presented in the third section. The fourth section lists conclusions, the major one being that, in terms of its purposes, the State IGE Network is in the process of fulfilling its major goals. Recommendations for the Leadership Committee of the State IGE Network are presented in the last section. (RC)

**Descriptors**—Career Change, \*Education Majors, \*Faculty Mobility, \*Teacher Employment, Teacher Placement, \*Teachers, Teachers Colleges, \*Teaching Experience

**Identifiers**—Harris Teachers College

This study attempted to determine whether those who enter teaching remain in the profession or use teaching as a stepping stone to other occupations. The study was conducted at Harris Teachers College in St. Louis, Missouri. The following two groups of graduates were identified for followup: (1) those who received a Bachelor of Arts in Education in 1970, and (2) those who received a Bachelor of Arts in Education in 1965. The data were collected by examining the personnel records of the St. Louis Public Schools and by direct contact with the graduates, either by telephone or by letter, during the summer of 1975. Data were obtained for 76.8 percent of the graduates. The findings indicated that students who prepare for teaching at Harris Teachers College do enter and remain in the profession. Only 4.5 percent of the 1970 graduating class and 8.8 percent of the 1965 graduating class had left teaching for noneducational employment. It was also shown that more men than women and more whites than blacks were likely to leave the profession. Since the results of this study are based on a sample consisting of two groups of graduates from one institution, they can be regarded as only suggestive, and additional studies are needed to determine their validity. (Several tables are included.) (RC)

**Dynamics of Discussion: Grouptalk.**

Pub Date 75

Note—467p.

Available from—Porthole Press, Box 417, Belmont, Massachusetts 02178 (\$13.95 cloth, \$8.95 paper)

**Document Not Available from EDRS**

**Descriptors**—\*Discussion (Teaching Technique), Discussion Experience, \*Discussion Groups, Discussion Programs, \*Group Discussion, Student Participation

**Identifiers**—\*Grouptalk

Grouptalk, a communication model with many actual and potential uses, was initially developed to help children become more skilled as participants in small-group discussions; the model has since become a multipurpose learning technique. The Grouptalk model is defined in chapter 1. Chapters 2 and 3 describe in detail how to set up and lead sessions with children and adults. Chapter 4, which outlines the potential gains from participation in a series of sessions, is basic to the understanding that underlies excellence in leadership skill. Chapter 5 is concerned with the actual improvement of specific groups. Chapter 6 discusses the potential benefits to leaders from acquiring the skills of Grouptalk leadership. Ways to acquire leadership skills is the topic of chapter 7. Chapter 8, with examples of adaptation, underlines the message that as one gains familiarity with the Grouptalk model designed for use under ideal conditions, both the possibility and advisability of introducing modifications should be kept in mind. By illustrating the variety of ways Grouptalk has been and can be applied, chapter 9 denies the allegation that the Grouptalk model was limited usefulness because it rigidly specifies conditions unobtainable in most schools today; one can adapt the technique for large classes and for children with hearing impairments. Appendixes 1 and 2 give the specifics for this adaptation. Appendix 3 describes a situation in which second-graders draw pictures while listening to the playback. (BD)

**Descriptors**—\*Cultural Awareness, Cultural Background, \*Curriculum Guides, Curriculum Planning, \*Elementary Secondary Education, \*Ethnic Groups, Ethnic Stereotypes, \*Ethnic Studies, Films, Music, Poetry

This curriculum guide contains a preface and an introduction for each level of learning plus three parts. The preface and introduction make a case for reversing the trend in American schools of teaching children to be well-assimilated Americans. They state, rather, that children should be encouraged to know and be proud of their ethnic heritage as well as the ethnic background of others. Primary level units include a lesson on "I'm Special" and "Differences Equal You and Me." The child learns to value his/her own specialness and to understand the things he/she has in common with other children in addition to their differences. General objectives (or rationale) and specific procedures, including suggested songs, exercises, and poems, are included. The intermediate level units focus on specific ethnic groups such as German, Jewish, black, Mexican-American, and others. These units are more sophisticated than those in the first group, and include maps, bibliographies for students and teachers, and imaginative exercises, one of which, for example, involves children in constructing a hypothetical community. The third part is for secondary schools. The model units are designed to be useful in a number of classes besides social studies. Some of the units that are presented are Asian-American culture, minority literature, folk dances, and European influences on architecture. A list of film topics for philosophical discussion, ideas for role playing, and recipes are included. (CD)

**Descriptors**—\*Behavioral Objectives, Curriculum, \*Elementary Education, \*Elementary School Students, \*Health Education, Health Guides, \*Inservice Teacher Education, Objective Tests, Performance Criteria

**Identifiers**—Michigan, \*Objective Reference Tests

This study determined the effects of health instruction upon the Objective Reference Test (ORT) scores of students in grades one through five of the Troy School District in Troy, Michigan. In September 1971, all elementary teachers in Michigan were instructed to begin teaching substance use and abuse. An Elementary Health Committee was established to design a curriculum guide for health education incorporating most of the Minimal Performance Objectives (MPO) prepared by the Michigan Department of Education. Upon completion of the guide, the Committee needed to prepare teachers to implement the curriculum. A graduate level course (HED 5231) was, therefore, designed and presented to the teachers. The Troy School District was chosen to be a field testing site for the Michigan Department of Education. Elementary students of teachers who had enrolled in HED 5231 became the experimental group. The control group was made up of classes at the same grade and in the same elementary school as the experimental group, but whose teachers had not enrolled in HED 5231. The experimental group received instruction in the MPOs and were then given assessment tests. The same assessment tests, without instruction, were given to the control group. The study showed that health instruction generally improved ORT scores, that differences on the ORT occurred at grade levels and in content areas, and that a graduate level curriculum in health education was valuable to elementary teachers. This report is a description of self-reported health behavior and attitudes of American youths based on questionnaire responses of a national probability sample of noninstitutionalized youths, 12 through 17 years of age. Topics include behavior and attitudes relating to general health status, cigarette smoking, physical appearance, personal independence, use of leisure time, values, perception of the need for medical or dental care, and aspects of social behavior. Variations in health behavior and attitudes associated with the age attitudes associated with the age and sex of the youths are also discussed. Fifty detailed tables are included. Appended are technical notes and self-report questionnaire forms. (Author/RC)

This guide is divided into three parts. Part 1 provides the purpose and goals of ethnic studies and explains how to use the guide. Part 2 contains eight units for the study of ethnic experiences. These include (1) Native American, (2) Mexican American, (3) Black American, (4) Jewish American, (5) Italian American, (6) Polish American, (7) Japanese American, and (8) Puerto Rican. All but one of the units begin with an introduction, after which inquiry topics are presented. Inquiry topics contain learning concepts (objectives), questions for exploration, and activities and projects. A bibliography of resources completes each ethnic experience unit. Part 3 contains three appendixes, the first of which is a paper entitled *Ethnicity and Education: Cultural Homogeneity and Ethnic Conflict*. The second appendix is an analysis of a NEA/N-JEA Ethnic Studies Programming Survey, and the third contains abstracts of projects funded by the Ethnic Heritage Studies Program, ESEA Title IX. Learning concepts and activities are listed for each inquiry topic. Instructional materials are listed for each ethnic experience unit. No provision indicated. (RC)

**Descriptors**—Administrator Attitudes, Human Relations Organizations, \*Human Relations Programs, Interpersonal Relationship, \*Interviews, Opinions, Parent Attitudes, \*Race Relations, \*Racial Discrimination, \*State Departments of Education, Teacher Attitudes

This report concerns efforts of the Maryland State Department of Education to improve black-white relations throughout the school system. It describes a special staff within the Department of Education whose concerns include institutes and workshops on human relations; recruitment, hiring, and promotion; resolution of intergroup problems; and evaluation of courses, materials, and training programs. It also describes a Human Relations Council, established in May 1973, to promote self-respect and respect for others in students and encourage acceptance of different ethnic and racial groups. The bulk of the document consists of excerpts from taped interviews conducted by a private consultant for the Maryland Board of Education, in which students, teachers, parents, and administrators talked about their views of each other and offered suggestions on what could be done to improve race relations. The excerpts are short quotations which reflect a range of views from hostility and fear to respect and trust, from optimism to pessimism. A questionnaire at the end of the document is intended to generate feedback on this way of presenting information on human relations. (CD)

**Identifiers**—\*Teacher Corps

This report comes out of the 1974 Teacher Corps Conference, which was held to acquaint Teacher Corps personnel with new ideas to enhance their abilities to train interns to work with children with special needs. The first part of the report is composed of 18 speeches on topics such as: community involvement in education, ethnic diversity, discrimination, performance-based teacher education, handicapped children, and the past and future of Teacher Corps. The next part consists of seven reports based on small, informal skill sessions held to give participants opportunities to learn about competency-based teacher education and diagnostic-prescriptive teaching. The majority of the presentations stress the problems and issues which have contributed to the imperfect functioning of the public schools, and represent a commitment on the part of speakers to try to show how the Teacher Corps can be a tool in improving the public school system through creating effective models of what can be done. **Identifiers**—\*Multicultural Education

Seven California school districts, all of them with substantial numbers of minority students, created a regional inservice program for teachers intended to make their understanding of and instruction of minority children more appropriate. Superintendents, students, and members of the communities were involved in the plans. Teachers received credit for taking local college courses on racial and ethnic minorities. Superintendents provided information on minorities in each school; closed circuit TV programs on minorities were shown; and districts held seminars with parents and students to reveal ethnic feelings. Teachers were also given credit for attending college courses on teaching strategies for minority children. Each district, and especially target schools, used these and other approaches to improve staff awareness and also to draw parents and others from the community into the program. (Information on the school districts, and outlines of the goals, the planning process, and general program information are presented. Outlines and bibliographies for the college courses are included in the appendix.) (CD)

**Descriptors**—\*Community Migrant Projects, \*Migrant Child Education, Migrant Children, \*Migrant Education, \*Migrant Schools, Transient Children

**Identifiers**—\*Iowa

This handbook on migrant education is for educators in the state of Iowa who are currently responsible for the operation of migrant educa-

tion programs, for those who anticipate such a role in the future, and for those who are generally interested in this topic. Chapter 1 deals with the emergence of migrant education in the state of Iowa. Discussed in this chapter are the Iowa migrant education administrative structure and each of the three migrant education programs in the state. Chapter 2 contains information on federal and state enabling legislation, and the operational goals and objectives for migrant education. Included are definitions of key terms. Chapter 3 deals with the basic steps and procedures to be attended to in initiating, maintaining, and concluding a migrant educational program in the state of Iowa. Chapter 4 probes the actual practices and possible future practices of Iowa's migrant education programs, as well as practices from other states. Appended are federal guidelines and the rights and responsibilities for Public Law 93-380, and various applications and forms. A bibliography is also included in this handbook. (RC)

This study is addressed to the graduate level needs of prospective elementary school bilingual teachers who did not graduate from bilingual programs at the Bachelor's level, and to the development of a model for training those prospective teachers. An evaluation was performed to determine which curriculum areas of the New Mexico University Bilingual Teacher and Teacher Trainer Institute were perceived as effective and ineffective by participants. Two questionnaires of differing formats were devised for this purpose. After the participants had completed and returned the first questionnaire, they were interviewed concerning their responses. The second questionnaire was adapted to the respondent's reaction to the format of the first questionnaire. Another interview was held with each participant to clear up some items. Also, an interrogation letter was sent to seven bilingual program directors in New Mexico about what would constitute a good graduate program for bilingual teachers. The study showed that the following three main areas should be a minimum graduate component for the preparation of teachers for bilingual/bicultural (Spanish/English) programs: (1) culture, (2) language, and (3) pedagogy. The results from this study represent the voice of teachers in bilingual/bicultural programs and should be taken as a serious mandate. (Appended are 11 items representing legislation, graduate programs, a proposal, the Bilingual Program Director's input, certification criteria, letters, and guidelines.) (RC)

**Identifiers**—\*Teacher Corps

This is the final report of the Cycle 8 Teacher Corps Project of the University of Iowa. The pro-

ject was designed for 20 bilingual interns, all third and fourth year undergraduates. The cooperating teachers were selected upon the recommendation of local superintendents and principals. The planning period of the program was August 1973 to May 1974. The interns completed their preservice in August 1974 and immediately began the inservice period working in various communities. Each intern experienced working in both the lower and upper elementary grades. During the inservice, the interns were involved in developing proposals for community projects. During the 1975 summer session, they completed all work required for the bachelor's degree and/or certification. As a result of the project, competency-based and field-based teacher training programs were seen to be viable approaches to teacher education. The project appeared to have an impact on the schools and communities served. (Appended to this report are an excerpt from "An Analysis of Extended Planning Periods for Teacher Corps Projects;" module clusters; a list of advisory committee members, interns, and cooperating teachers; orientation activities; grading procedures and an evaluation form; a letter of explanation regarding Teacher Corps grading procedures; faculty summaries of Teacher Corps modules; and program evaluation forms.) **Multi-Ethnic Contributions to American History.**

**A Supplementary Booklet, Grades 4-12.**

Caddo Parish School Board, Shreveport, La.

Note—57p.; For related document, see SP 009 719

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Achievement, \*American History, \*Cultural Background, Elementary Secondary Education, \*Ethnic Groups, \*Ethnic Origins, \*Teaching Guides

Identifiers—\*Multicultural Education

This booklet is designed as a teacher guide for supplementary use in the regular social studies program. It lists names and contributions of Americans from all ethnic groups to the development of the United States. Seven units usable at three levels (upper elementary, junior high, and high school) have been developed, with the material arranged in outline form. These seven units are (1) Exploration and Colonization; (2) The Revolutionary Period and Its Aftermath; (3) Sectionalism, Civil War, and Reconstruction; (4) The United States Becomes a World Power; (5) World War I—World War II; (6) Challenges of a Transitional Era; and (7) America's Involvement in Cultural Affairs. Bibliographical references are included at the end of each unit, and other source materials are recommended. (Author/BD)

Descriptors—Achievement, Activity Learning, American Culture, \*American Studies, Bibliographies, \*Ethnic Groups, Films, \*Instructional Materials, Learning Activities, Music, Negro Achievement, \*Primary Education, \*Teaching Guides

Identifiers—\*Multicultural Education

The booklet is intended for primary school teachers. It lists 22 suggested activities as well as ideas for using music, art, and bulletin boards for multicultural education. The purpose of the first activity is to provide opportunities to discuss great Americans of different ethnic backgrounds. An extensive list is included which contains members of many ethnic groups (mostly men) who have made contributions in medicine, sports, science, civil rights, the military, and entertainment. A bibliography of books and films is also included for both teachers and students. (CD)

The Children's Defense Fund Studied school suspension data from HEW's Office of Civil Rights and held independent interviews with administrators, students, and community members in districts around the country. They concluded that suspending children from school happens arbitrarily and very frequently, for non-serious reasons, without fair review of the decision, does a disservice to the child, and is educationally useless. These findings are found in this six-chapter book, with numerous tables and appendixes providing supplementary statistical and background information, documents, and correspondence. Chapter 1 includes interviews with educators talking about their efforts to handle discipline problems without suspensions. Chapter 2 goes into the reasons why children are suspended and why suspension is harmful. Chapter 3 includes data on the use of suspension. Chapter 4 details the issue of racial discrimination in suspension, and recommends federal compliance guidelines. Chapter 5 argues for the end of suspension for non-substantive reasons and proposes a plan for due process in suspension. Chapter 6 examines schools where alternatives to suspension are being tried. The concern of the book as a whole is to dispel what are thought to be popular assumptions that suspension is infrequent, necessary, or helpful to the child; to argue that the incidence of violence in the schools is over-rated and in any case not addressed seriously or usefully; and to protect children's right to be different in behavior, race, or otherwise, without risking suspension. This report contains critiques of American professional societies by the Study Commission on Undergraduate Education and the Education of Teachers. The critiques examine the following five areas: (1) effects of professional societies on curriculum, preparation of teachers, and programs in public schools; (2) effects of professional societies on educational reform in higher education, on departmental divisions, and on curriculum of higher education; (3) the professional society's own informal curriculum and socialization process; (4) accreditation activities of professional societies; and (5) lobbying activities of professional societies and their effect on undergraduate education. The commission evaluated data received from professional societies and believes that by and large professional societies tend to be more concerned with their own status and the status of their disciplines than in disseminating knowledge of their disciplines or in improving young people's education in their disciplines. The critiques are divided into sections on scientific societies, social science professional societies, and humanities. Supplementary essays on broad themes are included along with the critiques evaluating specific professional societies. The report makes recommendations for making professional societies more responsive to the needs of the society and the public whose tax money helps support them. (CD)

**The Teaching of the History of Physical Education and Sport in the United States and in Canada.**

Pub Date 75

Note—11p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Athletics, \*College Majors, Course Descriptions, Higher Education, History, \*History Instruction, \*Physical Education

Twenty-seven universities were surveyed to determine types of programs, approaches, problems, and solutions in teaching the history of physical education and sport. All those that responded (23) indicated that they had at least one course in this field. Both elective and required undergraduate and graduate courses were offered at different institutions. Courses were usually three hours per week for one semester, and the normal format was the lecture, often with visual aids. Problems identified included overly large classes, insufficient time to cover the subject, lack of qualified faculty and appropriate texts, and student unfamiliarity with history. Recommendations to improve classes included provision of greater curriculum balance, with more attention to humanities; more emphasis on history; and greater involvement of historical organizations in taking on projects such as producing visual aids. Suggested innovative techniques included having students give mini-papers, going to museums, talking about current events, and using reproduced prints of primary sources. Beginning level classes focused on an understanding and appreciation of sport, while upper level classes dealt with the role of sport in society, and graduate classes stressed methods of historical research. Descriptors—Teacher Education, \*Teaching Guides, \*Teaching Methods, \*Teaching Models, Teaching Procedures, Teaching Techniques

Identifiers—\*Learning Modules

This paper discusses one practical difficulty that emerges when teachers begin to construct learning modules: that most module developers make the error of becoming "course choppers" rather than "system builders." The paper is written for teachers who have begun the process of developing modules and have encountered organizational difficulties. The paper stresses learner reinforcement: the teacher must see how the pieces of the course will fit together and the learner must reinforce himself/herself through a selection of motivational experiences coordinated into a coherent system by the teacher. The paper is presented in a question and answer format. The questions are the types that teachers ask when presented with modular instruction as an alternative approach to teaching, and the answers are those developed by teachers to explain this approach to one another. Descriptors—Ability, \*Achievement Need, Complexity Level, Expectation, Failure Factors, \*Individual Differences, \*Locus of Control, \*Motivation, \*Performance Factors, Success Factors, Task Performance  
Identifiers—\*Attributions

Performance is affected by cognitive learning skills, but also by the reasons people perceive as causes of their successes and failures. People with high achievement needs perceive their successes as caused by their own ability and effort, and their failures as caused by lack of effort. People with low achievement needs blame their failures on lack of ability and do not take credit for their ability when they experience success. A change in attributions changes the way people perform. In one research study, high achievers given placebos they thought would interfere with their abilities tried less hard on a task, while people with low achievement needs and little self-confidence, since they had an excuse for experiencing difficulty, did better than usual. In another study, children subjected to repeated failures kept trying if they believed effort would make a difference. Tendencies to form causal attributions are learned, perhaps differently by different racial and social groups. However, interventions can change people's assessment of their chances for success. For example, tests on children who were reinforced for exhibiting effort attributions showed that their work improved and they became more persistent. Teachers should thus take students' individual attribution styles into consideration as a characteristic which affects achievement behavior, and, at the same time, attempt to change students' attributions in the direction of emphasizing ability and effort. **A Monte Carlo Study of the Analysis of Variance by Unweighted Means.**

Pub Date 75

Note—17p.; Paper presented at the Annual Meeting of American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—\*Analysis of Variance, Comparative Analysis, \*Computer Programs, Goodness of Fit, Sampling, \*Simulation, \*Statistical Analysis, Tests of Significance

Identifiers—Least Squares Analysis, Monte Carlo Methods, Unweighted Means Analysis

The intent of the study was to determine the extent to which test statistics computed by the unweighted means analysis are F-distributed. Applicability criteria were sought in terms of the number of factor levels and the degree to which cell frequencies differ. The unweighted means analysis, a frequently used approximate analysis, was contrasted with three least squares solutions. Evidence was relatively strong in favor of a least squares analysis if one is to conduct a two-factor analysis of variance for fixed effects. However, results confirmed that the approximate solution

can be used with some confidence on main effects but not interactions when cell frequencies do not differ by more than four to one and factors exist at no more than four levels. (Author)

Identifiers—\*Office of Education

A comprehensive report on Office of Education programs is provided in this evaluation of the programs for the 1974 fiscal year (FY). This report also updates and extends the FY 1973 report and provides additional information from 1974 program operations and monitoring activities. The status of the evaluation function itself is briefly discussed; a general overview is made of the effectiveness of the Office of Education programs, and short evaluation reports are provided for each of the educational programs and legislative titles. These reports appear under the following categories of programs: Elementary and Secondary Education Programs, Education for the Handicapped Programs, Vocational and Adult Education Programs, Higher Education Programs, Education Professions Development Programs, Library Programs, Educational Technology Programs, Special Demonstration Programs, and Indian Education Programs. The three principal thrusts of the Office of Education programs are seen as being: (1) equalizing educational opportunities; (2) improving the quality and relevance of American education; and (3) providing limited general support to selected educational functions and activities. Descriptors—\*Definitions, \*Evaluation, \*Evaluation Methods, \*Evaluative Thinking, \*Models, Professional Personnel, Training

Evaluation can be considered as a general activity not specifically confined to educational settings. This paper considers the assumptions leading up to a definition of value, defines value within the framework of the stated assumptions, and discusses evaluation as a conceptual, rationalizing activity. Terms defined in the paper's first section include infinite regress, distinction, potential set, variety, constraint, decision, conflict of interest, and value. An evaluation model is developed which regards the matching of concepts and world states as the key feature of evaluation. Section 2 of the paper draws implications from the general evaluation model for the specific role of the educational evaluator. Section 3 considers the training needed by an evaluator if the general model is accepted. (Author)

**Student Response in Television Instruction.**

Note—9p.; Paper presented at the Annual Meeting of the Military Testing Association (16th, Oklahoma City, Oklahoma, October 21-25, 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Analysis of Variance, \*Comparative Analysis, \*Educational Television, High Achievers, \*Individualized Instruction, Low Achievers, \*Response Style (Tests), \*Retention, Teaching Methods, Tests

The effectiveness of passive, covert, and overt methods of student response in individual television instruction was investigated. Students were classified on the basis of high and low achievers, then randomly assigned to one of four treatment groups. Group 1 (passive) was given conventional television instruction without opportunity to respond during the instruction. Group 2 (covert) was given multiple-choice recall questions during the instruction and asked to make a mental selection of the correct answers. Groups 3 and 4 (both overt) were also given questions during the instruction and asked to actively select the correct answers. A two-way analysis of variance of the criterion test scores revealed significant differences on both the posttest and the delayed retention test. On the posttest, significant differences were found between the passive group and each of the three student response groups in both achievement levels. However, no significant differences were found among the three student response groups. On the retention test given one week later, low achievers in the covert group obtained significantly higher scores than the low achievers in the passive group. These findings, in favor of student response in individual television instruction, support the related research which has generally found student response superior in group instruction. They also support the concept that retention seems to be influenced more by the initial level of learning than by the method. (Author/BJG)

**Sex and Race Effects in the Conformity Behavior of Upper-Elementary-School-Aged Children. Iowa Testing Programs Occasional Papers No. 16.**

Iowa Testing Programs, Iowa City.

Pub Date Jul 75

Note—24p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—Caucasians, \*Conformity, Disadvantaged Youth, Elementary Education, \*Elementary School Students, Females, Imitation, Males, Measurement Techniques, Negroes, \*Racial Differences, Rating Scales, \*Role Models, \*Sex Differences, Slides, Social Differences

In two studies, children rated infant pictures on an "unhappy-happy" scale after being told how adolescent male models (black or white) had allegedly rated them. The subjects in Experiment 1 were black and white females and males (ages 9-12 years) attending inner-city schools in Des Moines, Iowa. Those in Experiment 2 were white females and males (ages 10-11 years) attending school in a predominantly white, middle-class, university community (Iowa City). In both experiments, the subjects as a total group were significantly affected by the models' ratings. In Experiment 1, girls conformed more than did boys; there was no sex difference in Experiment 2. With regard to race, only one obtained effect of any direct interest (in Experiment 1, black subjects conformed more to white than to black models). The results suggest that social-class differences may now exist in the conformity behavior of the sexes. The general absence of race effects is viewed as encouraging, from an egalitarian standpoint. Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Minneapolis Public Schools, Minnesota (Minneapolis)

The Mathematics Basic Skills Development Project served 15 secondary school locations in

the Minneapolis Public Schools' Target Area in 1972-73. The objectives of this project were to develop and use an instructional system which would enable low achieving secondary students to learn basic mathematical concepts and skills. An instructional unit was to be considered successful if over 50 percent of the students who studied it achieved mastery (85 percent or more correct) on a criterion-referenced posttest. Instructional materials to be used in an individualized setting for the remediation of deficiencies in mathematics basic skills were developed, revised, and produced by the project following precise behavioral objectives. In this third year of the project, 2,128 secondary students and 38 teachers made use of the project's revised materials. Four instructional units were given preliminary trials, and revision was indicated for two of the four units. More than 2,100 students completed 6,937 units in 11 instructional areas. Over 50 percent of the students completing units in each area achieved mastery as shown by criterion-referenced posttests. Percents of students achieving mastery ranged from 52 percent in Area Measurement to 85 percent in Dividing Fractions. These were all students who had been below the mastery level on diagnostic tests of these mathematics basic skills. Recommendations are given. (Author)

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Minneapolis Public Schools, Minnesota (Minneapolis)

The aim of the Title I math program was to improve the teaching of mathematics at the primary level in Title I schools. School staff and Parent Advisory Committee members had suggested and helped plan the focus of the project. It was expected that improved teaching would raise the level of understanding of basic mathematics skills and concepts of primary pupils. Testing of the children, however, was incomplete and inconclusive. All Title I primary teachers were eligible for the project. Most of the teachers from 25 public and 9 nonpublic schools availed themselves of the services offered by the project during the two years, 1972-74, covered by this report. This evaluation concentrated on the activities of the project and teachers' responses to those activities. Teachers received over 11,000 hours of inservice training. More than 900 demonstration lessons were given by the Math Team and more than 10,000 sets of instructional materials were distributed. These activities were supported by Title I funds of \$155,408 for the two year period. Participation in the project was voluntary. The high number of requests for the Math Team's services was an indication of the need felt by the teachers for assistance in teaching math. Recommendations were made. These included clarification of objectives and development of criterion-referenced tests to measure those objectives. (Author/BJG)

Descriptors—Communication Skills, Comparative Analysis, Elementary Secondary Education, \*Human Relations Programs, Inservice Teacher Education, Instructional Staff, \*Integration Readiness, \*Program Evaluation, Questionnaires, Racial Integration, \*School Integration, \*School Personnel, School Surveys, Staff Improvement, Teacher Attitudes

Identifiers—\*Minneapolis Human Relations Program, Minneapolis Public Schools, Minnesota (Minneapolis)

The first phase of the Minneapolis Public Schools' Desegregation/Integration Plan involved a human relations oriented staff development program which focused on improving communication skills. The goal of the Human Relations Program for 1972-73 was to change the climate in the schools in preparation for desegregation and integration. The object of teaching communication skills was to overcome any communication barriers caused by isolation and to have the staffs serve as models for communicating and interacting. Anonymous questionnaires seeking participant reactions to the program were administered in every school and special site in the district in April 1973. Most of the respondents were nonadministrative certificated staff-teachers, social workers, counselors, and librarians. Respondents also included teacher aides, clerical staff, administrators, and custodial staff. Most said they found the program useful, improved their communication skills, and thought the program had improved interpersonal relations. While most of the participants thought the program was possibly, though not directly related to desegregation/integration, fewer thought it had made the climate more conducive to desegregation/integration, and fewer still thought it would actually help implement the desegregation/integration plan. Opinions concerning the overall value of the program were about evenly divided between those who said it was worthwhile and those who said it wasn't. (Author/DEP)

Donlon, Thomas F.

An Optimizing Weight For Wrong Scores.

Pub Date [May 75]

Note—19p.; Paper presented at the Annual Meeting of the New England Educational Research Organization (7th, Provincetown, Massachusetts, May 1-3, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Achievement Tests, Comparative Analysis, Guessing (Tests), \*Multiple Choice Tests, \*Response Style (Tests), \*Scoring Formulas, Statistical Analysis, Testing, \*Test Reliability, Test Validity, True Scores, \*Weighted Scores

This study empirically determined the optimizing weight to be applied to the Wrongs Total Score in scoring rubrics of the general form  $R = kW$ , where  $S$  is the Score,  $R$  the Rights Total,  $k$  the weight and  $W$  the Wrongs Total, if reliability is to be maximized. As is well known, the traditional formula score rests on a theoretical framework which is of dubious validity. Two instruments, variant approaches to the assessment of mathematical knowledge, were administered to approximately 1,700 entering college freshmen during an orientation period. The method consists of an iterative computer procedure for calculating split-half reliability of the tests as the weights are systematically varied throughout the region of maximization as determined by essentially canonical approaches. The results indicate that in contrast to the negative weight for the a priori formula score, a sizable positive weight maximizes reliability. The implications for rate of work as the single most reliable aspect of test performance seem clear. The validity of much educational testing rests on assumptions of fairness to those tested, achieved through optimization of standardized conditions. The study suggests that factors which alter rate-of-work characteristics of performance may be most detrimental to candidate success. (Author/DEP)

A Further Examination of the Effects of Administering the Metropolitan Reading Tests in Spanish and English to Spanish-Speaking School Entrants.

Pub Date [Apr 75]

Note—12p.; Paper presented at the Annual Meeting of the National Council on Measurement in

Education (New York City, New York, March 31-April 2, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Bilingual Students, Comparative Analysis, Elementary Education, \*Kindergarten Children, Puerto Ricans, \*Reading Tests, \*Spanish Speaking, Standardized Tests, Testing, \*Test Results

Identifiers—\*Metropolitan Reading Test

In a study designed to assess effects of administering the Metropolitan Reading Test (MRT) in Spanish versus English, 100 Puerto Rican kindergarten pupils were randomly split into two groups. The MRT was administered in English to one group and in a Spanish translation to the other group. The group who took the Spanish version significantly surpassed the group who took the English version with respect to total score and all but the two most nonverbal subtests. These differences were particularly evident for, but were not exclusive to, the subsample from the bilingual classes. (Author/DEP)

Identifiers—Brainerd Groupement Research, \*Piagetian Theory, \*Synchrony

The question of developmental synchrony within the concrete operations period described in Piagetian literature was investigated. The idea of synchrony has been challenged by Brainerd's initial groupement research, which indicated a two-dimensional structure, corresponding to class operations and relational operations. A review of the literature indicated conflicting views concerning the nature of synchrony and how it may best be investigated. The secondary issue of distinguishing which groupements were operationalized by several traditional Piagetian tasks was explored. Indications from this study were (1) that the class-relational distinction was not a clear-cut one; (2) considering absolute difficulty level, groupements I, II, and III were more difficult than the other five groupement tasks; however, groupement IV, also a "class" task, indicated an intermediate difficulty level in the older grades; (3) traditional Piagetian performance does not appear to be completely subsumed by the groupement tasks; and (4) nonmetric scaling and clustering techniques aid in the analysis of dichotomous, developmental data. Faculty Opinion Toward Publication of Student Ratings Results for Students. Report No. 76-1.

Washington Univ., Seattle. Educational Assessment Center.

Report No—EAC-P-249

Pub Date Jul 75

Note—12p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—College Students, College Teachers, Higher Education, Information Dissemination, Student Evaluation, \*Student Publications, \*Surveys, \*Teacher Attitudes, \*Teacher Rating

Identifiers—Instructional Assessment System, University of Washington

A telephone survey of 97 faculty members at the University of Washington was conducted to determine attitudes toward publication of student ratings results. Eleven respondents were opposed to any form of publishing. Of the remaining, 95 percent approved of distribution to advisory offices, 71 percent approved of individualized student distribution, 60 percent approved of publication in the Time Schedule, and 53 percent approved of publication in the campus newspaper.

A majority of faculty approved of presenting item means and norms along with response percentages. Finally, most faculty found the Instructional Assessment System useful in improving instructional effectiveness. The interview guide is included in the appendix. (Author/DEP)

Identifiers—Army

This report summarizes the techniques used in gathering and maintaining a data file on most of the Army aviator trainees who have been through the Officer/Warrant Officer Rotary Wing Aviator Course and the Warrant Officer Candidate Course during the period 1 July 1968-31 December 1969. Specific regression analyses dealing with the prediction of student performance in training are furnished, and the methods used to obtain them are described. The equations allow the extrapolation of current training performance to a prediction of (1) the probability that the individual will pass the course, and (2) what his final end-of-course grade will be. A review of the most pertinent literature in the area is included as are frequency counts of a large volume of training data. (Author)

Forsyth, G. Alfred Huber, R. John  
An Individual Differences Analysis of Double-Aspect Stimulus Perception.

Pub Date [Nov 74]

Note—16p.; Paper presented at the Annual Meeting of the Psychonomic Society (15th, Boston, Massachusetts, November 1974)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Attention, \*Cognitive Processes, Factor Analysis, Homogeneous Grouping, \*Individual Differences, Information Processing, Matrices, Models, \*Multidimensional Scaling, Perception, \*Response Mode, Situational Tests, Stimuli, Visual Perception, \*Visual Stimuli

Any theory of information processing must address both what is processed and how that processing takes place. Most studies investigating variables which alter physical dimension utilization have ignored the large individual differences in selective attention or cue utilization. A paradigm was developed using an individual focus on information processing. The purposes of this paper were to: (1) review the essential features of this paradigm, and (2) discuss its use as a beginning step in the investigation of double-aspect, human vs. nonhuman stimuli. Ten double-aspect, human vs. nonhuman stimuli were presented to a heterogeneous sample of 520 first, third, fifth, ninth, eleventh graders, college students, and state hospital patients classified as neurotics, schizophrenics, or sociopaths, for identification. An individual-differences multidimensional scaling analysis resulted in a four-dimensional stimulus space used to subgroup like perceiving people. Characterization of the responses to the double-aspect stimuli by each subgroup demonstrated the value of the approach in studying selective information processing. (Author/BJG)

The Development and Evaluation of a Measure of Giving Care and of Receiving Care.

Pub Date [May 75]

Note—6p.; Paper presented at the Annual Meeting of the New England Educational Research Organization (Provincetown, Massachusetts, May 1-3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Altruism, Attitudes, College Majors, Higher Education, Individual Differences, Interpersonal Relationship, Item Analysis, Personality Tests, \*Role Perception, \*Sex Differences, Test Reliability, \*Tests, Test Validity, \*Young Adults

The purpose of this study was to develop a measure of caring attitudes among young adults with specific reference to how persons in training for a variety of professions feel about caring for others and receiving care from them. A sample of 264 and 261 persons, ages 17 to 25, responded to the giving care and the receiving care instruments respectively. In both samples, approximately 50 percent of the subjects were studying for caring professions such as nursing, public health, and clinical psychology. Using coefficient alpha, a reliability of .794 and .794 was obtained for the giving and receiving care instruments. Studies of population differences on giving care show: carers score higher than noncarers, female and male carers score equally well, and female noncarers, score higher than male noncarers. On receiving care, studies of population differences show no differences obtained between carers and noncarers and between males and females. Results were discussed both in relation to a theory of care giving and sex differences. A review of the literature of help-giving and caring reveals that the first two have received some recent attention. Scant information is available, however, on either the theory or measurement of caring. (Author)

Howell, John F.

A Follow-Up Evaluation of a Preschool Program.

Pub Date [May 75]

Note—10p.; Paper presented at the Annual Meeting of the New England Educational Research Organization (Provincetown, Massachusetts, May 1-3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Academic Achievement, Compensatory Education, \*Disadvantaged Youth, Followup Studies, Grade 1, Kindergarten, Language Skills, Listening Skills, Parent Participation, \*Preschool Education, \*Program Effectiveness, \*Social Adjustment, Student Evaluation

Identifiers—\*Elementary Secondary Education Act Title I, ESEA Title I

The effectiveness of an Elementary Secondary Education Act (ESEA) Title I preschool education program, which stressed listening habits and language skills, on disadvantaged children in kindergarten and first grade was examined. Graduates and nongraduates were administered the Boehm Test of Basic Skills and a teacher completed adjustment rating scale. Teachers were asked to provide data concerning parent attendance at scheduled conferences and parent interest in their child's progress or school activities. In both kindergarten and first grade, preschool graduates were identifiable on the basis of test scores and adjustment ratings. These findings indicate that participation in a language-based preschool program does have positive effects on achievement in cognitive skills and school adjustment in kindergarten and first grade. A child's participation in the Title I preschool program does not appear to have a positive influence on parental involvement, as measured by parent attendance at conferences or other overt indications of interest in the child's school activities. However, the parent interest variable does not appear to be a significant factor in the child's achievement in kindergarten and first grade. (BJG)

Cross, Lawrence H.

An Investigation of a Scoring Procedure Designed to Eliminate Score Variance Due to Guessing in Multiple-Choice Tests.

Pub Date [Apr 75]

Note—22p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (Washington, D.C., April 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Algebra, Comparative Analysis, \*Guessing (Tests), \*Multiple Choice Tests, \*Response Mode, Response Style (Tests), \*Scoring Formulas, Senior High Schools, Statistical Analysis, Testing Problems, \*Test Reliability

A novel scoring procedure was investigated in order to obtain scores from a conventional multiple-choice test that would be free of the guessing component or contain a known guessing component even though examinees were permitted to guess at will. Scores computed with the experimental procedure are based not only on the number of items answered correctly, but also on the average quality of both correct and incorrect choices as reflected in the difficulty and discrimination values associated with these choices. The scores resulting from this procedure were compared to number-right and conventional formula scores for predicting guessing-free scores, which are independently determined for the same test. These data suggest that significant increases in reliability can result if score credit is assigned only to items that were answered correctly without guessing on any type. Since the examinees were not aware that the statistical analysis of their tests included a penalty for guessing, findings should be treated with theoretical interest. (Author/BJG)

Donlon, Thomas F.

Estimating Rate-of-Work Parameters in the Assessment of Test Speededness.

Pub Date [Apr 75]

Note—35p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (Washington, D.C., March 31-April 2, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Mathematical Models, \*Statistical Analysis, \*Timed Tests

Identifiers—Power Tests, \*Speededness (Tests), Variance (Statistical)

The use of indices of speededness in tests is reviewed and three possible indices which derive from a model which assumes that rate of work is normally distributed is proposed. Each of these indices is seen as limited by the failure to adequately consider the correlation between speed and power, but they have the advantage that they are derivable from a single administration of a test. The plausibility of an assumption of a normal distribution of work rates was tested on empirical data from seven tests, and in six cases the assumption was not unrealistic although the fit was only approximate. The analysis of tests for which the assumption is not completely tenable will often be instructive for those who construct instruments. Specific item material seems to govern departures from normality. The goal of a single, intuitively satisfying index of speededness in tests is important. Without some sort of metric or scale with which to assess degrees of speededness, the evaluation of tests in this important area remains inordinately subjective. (Author/BJG)

Descriptors—Academic Achievement, Advisory Committees, Basic Skills, \*Citizen Participation, Community Involvement, Curriculum Development, \*Educational Accountability, Elementary Secondary Education, Evaluation Criteria, Program Development, \*Program Evaluation, \*School Community Relationship, Staff Utilization, Student Evaluation, Teacher Improvement

Identifiers—\*Minneapolis Accountability Project, Minneapolis Public Schools, Minnesota (Minneapolis)

The Minneapolis Accountability Project represents an effort to allow the community to evaluate existing school programs which are locally funded. The project informs the community about school problems, establishes a channel for expression of community concerns, and provides findings and proposals for educational change. This report describes the operation of the project during its first three years. Community evaluation committees, made up entirely of volunteers, were established to evaluate topics selected by a citizen advisory board. Five committee reports

were completed: (1) Pupil Progress Reporting in the Minneapolis Schools, (2) The Use of Teachers' Skills in the Minneapolis Schools, (3) Basic Skills in the Minneapolis Schools, (4) Curriculum Development Procedures in the Minneapolis Schools, and (5) Community Participation in the Minneapolis Schools. Committee concerns, recommendations, and implementation efforts are discussed. (Author/BJG)

Evidence: Educational Evaluation and the Metaphors of Law.

Pub Date [Apr 75]

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Civil Liberties, Court Litigation, \*Educational Accountability, \*Evaluation Criteria, Evaluation Methods, Evaluation Needs, \*Legal Problems, Legal Responsibility, \*School Responsibility, \*Student Rights

A suit was filed in 1972 in California by an 18 year old high school graduate who asserted that he remained functionally illiterate after 13 years of regular attendance in the San Francisco public schools. Claiming personal injury as a consequence of the failure of school professionals to exercise reasonable care in the discharge of their duties, he asked the court to hold the school district liable to him for damages in excess of \$500,000. This suit reflects the relationship between educational accountability and educational outcomes. School negligence is difficult to demonstrate because of the underlying dilemma as to what evidence is relevant, reliable, and credible. One solution to this dilemma requires that procedures be adopted and modified which rely more on human testimony than other evaluation approaches. The forum for carrying out such a procedure is called an educational hearing, and it may provide a more effective way of adequately seeking balanced factual data, while not replacing existing designs for the collection and analysis of evaluational evidence. Computer-Aided Techniques for Providing Operator Performance Measures.

Air Force Human Resources Lab., Wright-Patterson AFB, Ohio. Advanced Systems Div.

Report No—AFHRL-TR-74-87

Pub Date Dec 74

Note—86p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Algorithms, \*Computer Oriented Programs, Computer Programs, \*Flight Training, \*Man Machine Systems, Measurement Techniques, Multiple Regression Analysis, \*Task Performance, \*Test Validity

Identifiers—Air Force, FORTRAN IV

This report documents the theory, structure, and implementation of a performance processor (written in FORTRAN IV) that can accept performance demonstration data representing various levels of operator's skill and, under user control, analyze data to provide candidate performance measures and validation test results. The processor accepts two types of information: (1) sample performance data on magnetic tape, and (2) user information reflecting knowledge about features of the performance that are considered to be important to measurement. The sample performance data input is smoothed by the processor in order to remove or reduce noise factors in accordance with information provided by the user. Criterion performance functions are, optionally, provided by the user or are computed by the processor using skilled performers' data. The processor then develops a discrete representation of the continuous performance data based on observed deviations from the criterion functions. This discrete representation, in turn, is used to model each performance using state-space techniques. The processor operates on the state-space model to compute vectors which form generators of various conceivable measure spaces. Candidate performance measures are then generated by operating on the vectors with multiple regression algorithms. Empirical validation tests of several types are applied to the candidate measures for assessment of their validity-likelihood. (Author/DEP)

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Minneapolis Public Schools, Minnesota (Minneapolis)

The Minneapolis Public School system was awarded an Elementary Secondary Education Act (ESEA) Title I grant. The purpose of these funds was the further development of insights, awareness, competence, and skill toward making living and learning effective for eligible students. Two programs are described: (1) inservice teacher training for the East, North, and West Areas; and (2) a Mathematics Criterion Referenced Testing Program. Evaluation of the inservice program focused on two major concerns: (1) the process of implementing the inservice programs, and (2) the perceived need for the future inservices. Tables provide summaries of participant responses to Title I services and provide a comparison between staff with less than one year or no experience with Title I children and the total group, as reflected by the mean rating of desire for more inservice factor. The Mathematics Criterion Referenced Testing Program was developed to: (1) produce a computational math skills testing program, (2) identify Title I children in mathematics, (3) evaluate the progress of Title I children, and (4) evaluate alternative math programs. The report presented here focuses on the development of operational guidelines. (Author/BJG)

Identifiers—Lake Harriet Elementary School, Minneapolis Public Schools, Minnesota (Minneapolis)

The Lake Harriet Elementary School Open Classroom was initiated at the request of parents in the summer of 1973. The program was imple-

mented in the fall of 1973. This evaluation indicates that, after the first year of operation, the original goals for the program are being met: The students, for the most part, are performing at normal or above normal levels in reading and math, and they say they like the open classroom. The teachers feel they have input into their own programs feel free to make constructive criticisms about the program. The parents are very highly involved in the program and generally feel their children have made favorable progress this year academically and socially. Only four parents indicated a desire to change their child to the regular program next year. Two problem areas stood out this year: lack of quiet areas for students to use for independent study and lack of an adequate system for progress reporting to parents. Recommendations are given. Comments and attitude questionnaire results from students and parents and teachers' program evaluations are included in the appendix. (Author)

A Summary of the Major Findings from "Reading with Television: An Evaluation of the Electric Company."

Educational Testing Service, Princeton, N.J.

Pub Date Mar 73

Note—17p.; For the full report, see ED 073 178

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Educational Television, Elementary Education, \*Elementary School Students, Grade 1, Grade 2, Grade 3, Grade 4, \*Program Effectiveness, \*Program Evaluation, \*Reading Instruction

Identifiers—\*The Electric Company

Highlights and major conclusions of the report, "Reading with Television: An Evaluation of the Electric Company" are summarized. One hundred public school classrooms in each of two sites—Fresno, Calif. and Youngstown, Ohio—were involved in the study. Half of the classrooms studied in each site were randomly assigned as viewing classes and the other half as nonviewing. An attempt was also made to evaluate the effects of viewing the program at home in Richmond, Va. and Washington, D.C. In-school viewing classes made significantly greater gains than nonviewing classes in the reading skills the program was designed to teach. The program had a clear and significant impact on its target audience—second grade children who were in the bottom half of their class as indicated by standardized reading test scores, indicating the program was an effective instructional supplement for children who were beginning to experience reading difficulty. The program was also effective on first grade classes that viewed in school. Significant impact was also seen on third and fourth grade classes. Gains were produced among first and second

grade classes across almost all of the 19 major curriculum areas built into the program. Some positive effects on a standardized reading test were also found. Effects were similar on all groups—Spanish, blacks, whites, boys, and girls. Teachers also reacted favorably. (RC)

Descriptors—\*Adult Education Programs, \*Case Studies, Data Analysis, Evaluation Methods, \*Program Evaluation, Questionnaires, \*Surveys, \*Technical Education

This is the second of three reports in a series of theoretical and empirical investigations of program evaluation. A questionnaire survey of 200 adult, technical training programs and their evaluations was conducted. This was followed up by site visits to 14 of them for indepth study. The 200 programs were divided equally among Department of Defense, other federal government agencies and departments, state and local governments and agencies, and private sector commercial, business, and industrial organizations. Great diversity of programs was noted. Most evaluations involved questionnaires and interviews of program participants to obtain data to improve the program. Fully a quarter of the evaluations were unplanned and of poor quality. The exemplary evaluations subject to site visits were uneven in quality too. The survey was useful in isolating areas of concern that have subsequently become the subject of other phases of the series of studies on program evaluation. (Author/RC)

Identifiers—National Longitudinal Study High School Class 1972

Over 14,000 high school seniors were studied with respect to sociocultural differences on cognitive test item responses. Six different cognitive tests and ten different groups were analyzed. The tests were: vocabulary, picture-number, reading, letter-groups, mathematics, and mosaic comparisons. The groups were: American Indians, blacks, Mexican-Americans, Puerto Ricans, other Latin-Americans, Oriental-Americans, white Northeastern, white North Central, white Southern, and white Western. Proportions of each group responding correctly to each item of each test were computed and then transformed to equal interval scales of delta-values. The delta-values for the white North Central group were then cross-plotted with each of the other groups to yield an elliptical pattern of points for each comparison. The major axis of the ellipse for each cross-plot was determined and the distance of each item point from it computed. These distances were used to create a vector index of cross-cultural stability. Items having notable patterns of instability were examined closely for factors which might explain the instabilities. It was concluded that certain vocabulary items were unstable for some Spanish-speaking groups. These vocabulary instabilities were attributed to coincidental cognate influences operating to make some English vocabulary items relatively easier for the Spanish-speaking groups. It was also observed that reading test items containing material relevant to black culture were relatively easier for blacks than were other items in the test battery. (Author/RC)

Identifiers—Minneapolis Public Schools, Minnesota (Minneapolis), \*Southeast Alternatives

Parent input to administrative decisions within Southeast Alternatives (SEA) takes several forms. First, administrators often seek individual or group opinions on issues. Secondly, parents sit on advisory councils and governing boards which set policy or make recommendations. Finally, a broad base of feedback is sought through systematic interviews or surveys of all parents. This document reports the results of the third all-parent survey effort. Every parent was mailed a questionnaire packet containing six sections—one to be answered by all-parents and one from each of the SEA component schools. Parents were directed to respond to the all-parent section and to those school sections at which their children attended. In addition to responding to questionnaire sections, parents were urged to supply further comments. All parent responses were anonymous. Questionnaires were computer analyzed, except for write-in comments which were collected and included in feedback information to particular schools. Approximately 45 percent of questionnaires mailed were returned. The response data was found to be reasonably representative of SEA parent opinion. (Author/BJG)

Identifiers—Naltrexone

Efforts of the National Academy of Sciences (NAS) as a contractor to the National Institute on Drug Abuse (NIDA) include: (1) assessment of the usefulness of naltrexone, a narcotic antagonist, in the rehabilitation of several types of opiate-dependent individuals; (2) assessment of any drawbacks to the use of naltrexone; and (3) appraisal of acceptability of naltrexone in the addict populations under study. The role of Educational Testing Service (ETS) in the overall study effort was to provide services facilitating the interpretation of changes in behavior occurring in response to narcotic antagonist treatment. ETS undertook a review of data forms NAS-3, Background Interview; NAS-6, Craving Scale; and NAS-11 Status Interview; and the User's Manual with the intent of editing and modifying, when necessary, from the standpoint of clarity. Draft reports of the editorial comments are included as Appendix 1. Subsequent comments and suggestions pertaining to earlier revisions of forms and the revised manual are presented in Sections 2 and 3. The second goal of the ETS effort was to develop behavioral scales to provide a simplified summary of behavioral variations during the course of the study. Scales which were statistically feasible are presented in Section 4 along with the statistical information which led to their development. (RC)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, \*Minneapolis Public Schools, Minnesota (Minneapolis)

Minneapolis Public Schools' Reorganized Junior High School Program completed its third and final year of operation with Title III ESEA funds in June 1974. An additional counselor was hired for each of the schools, Jordan and Marshall-University. A major objective was that the counselor would change from a traditional resource person to more of a team member, program coordinator, and facilitator in creating a positive, student-centered program. Outcome objectives were increased counselor effectiveness, positive student attitudes toward school, and increased parent and student involvement. Questionnaires were administered to teachers, administrative and resource personnel, students, and parents at both schools. At Jordan, teacher contact with counselors increased over all previous years data were available. Counselors had more contact with students in all three years of the project than in the year prior. Nine of ten parents felt involved and satisfied with the program at Jordan. Less than half the students felt involved in school decision-making. At Marshall-University teacher-counselor contacts reported by the 1973-74 team teachers was less than reported by the team teachers in the two previous years, but more than reported by the non-team teachers in the past. Counselor office contact with students was down in 1973-74, but students reported more frequent classroom visits by the counselors. Parent results indicated that parents were generally aware of the program options available, could identify and describe the programs, and felt well informed. (RC)

Descriptors—Aptitude Tests, Cognitive Ability, \*Cognitive Measurement, \*Cognitive Processes, Comparative Analysis, \*Individual Differences, Memory, \*Psychometrics, \*Reaction Time, Scores, Statistical Analysis

As part of a long term project relating individual differences in performance on paper and pencil tests of intellectual aptitude and achievement to differences observed in laboratory studies of cognition, data have been collected comparing test scores with simple choice reaction times. The three studies summarized here suggest that the relationship may be fairly strong except where the sampling of subjects to be studied seriously restricts variability in those measures. Identifiers—\*Starkweather Target Game for Preschool Children

The Starkweather Target Game is designed to measure preschool children's willingness to try difficult tasks independent of ability. The game consists of a box-shaped target which responds, when the target is hit by a rolled ball, somewhat like a jack-in-a-box. When the ball's eye is hit, the lid opens and a surprise picture appears. After being seen by the child, another picture replaces it. The game is appropriate for children between three and six years; older children have an understanding of competition and success in hitting the target is their only goal. Materials include the target; 21 surprise pictures; a rubber ball; a cloth strip on which black lines at two foot intervals show the distance at which the target may be placed; and two small markers, one marked "easy" and one marked "hard" indicating the target distances between which the child chooses as he plays the game. During the game, the child shows his willingness to try difficult tasks, making a total of 20 choices between the easy and hard. The score is calculated from the number of balls the child uses and the number of times he chooses the difficult in relation to the number of successes he experiences. The game is adjusted for the ability of each child on the basis of a pretest. Statistical data is included in the report. (RC)

Descriptors—\*Peer Relationship, \*Photographs, \*Preschool Children, Preschool Education, \*Preschool Tests, \*Social Relations

Identifiers—\*Starkweather Social Relations Test (Preschool)

The Starkweather Social Relations Test is designed to measure a young child's social value within his own peer group. It is more than a test

of popularity. It combines a picture interview technique with gift-giving, and each child's value in his group is measured in terms of the extent to which his gift-giving is reciprocated by the children whom he chooses. The assumption underlying the choice of gift-giving as a technique for measuring social relations is that an individual wants to benefit someone he likes. Materials needed include a composite picture of children in the group, inexpensive toys, and envelopes, prelabeled with the names of the children in the group. Then the child is given a choice of several gifts, one of which is his to keep. Three gifts, identical to the one he chose, are then placed before him and he is allowed to choose three friends to whom he wishes the gifts to be given. This procedure is repeated until the child has chosen friends for four gifts, making 12 choices. Scoring shows the relationship between the child's choice of other children and their choice of him. The calculations are illustrated. (RC)

Descriptors—Age Differences, \*Conformity, Preschool Education, \*Preschool Tests, Sex Differences, Statistical Analysis, Test Reliability

Identifiers—\*Starkweather Social Conformity Test (Preschool)

The Starkweather Social Conformity Test is a research instrument designed to measure conforming and nonconforming behavior by providing the young child with opportunities to make choices in a situation in which he can follow a model or respond freely according to his own preferences. The test discriminates between compulsive conformists or nonconformists and children who are free to use either conforming or nonconforming behavior. The test is based on color preferences and is adjusted to the actual preferences of individual children. A pretest provides an opportunity for each child to indicate his color preferences. In the test proper, each child is given opportunities to conform as he constructs a picture booklet, identical to or different from booklets constructed by other persons (parents, peers, etc.). Scoring consists of a numerical count of the conforming and nonconforming responses made by the child. Scores range from -20 (complete nonconformity) to +20 (complete conformity). Statistical data resulting from administering the test to 200 children are discussed and include reliability of the test, age differences, and sex differences. (RC)

Identifiers—\*National Longitudinal Study High School Class 1972

The eight reports brought together here were based on data collected for the base year of the National Longitudinal Study of the High School Class of 1972. Minor but systematic biases were present in the data since certain schools and students did not participate in the study. The accumulative effects of bias emphasize the need for care in analysis and interpretation. The class of 3 million persons consisted of about 82 percent white, nine and one-half percent black. About half of the white students were enrolled in academic curricula, compared to a quarter of the black students. Close to half of the black students were enrolled in general curricula, compared to 29 percent of all white students. In a set of six tests, females slightly outperformed males, academic students outperformed other students, and blacks scored about a standard deviation below whites. The socioeconomic status (SES) of academic students was higher than general students who had a slightly higher SES than that of vocational/technical students. Blacks had lower SES than whites. Students in federal programs scored higher than others in the same curriculum who did not participate in federal programs. Significant differences were seen regarding exposures of various students to various special teaching techniques. About one-third of the sample may face a financial barrier to continued education. Remedial instruction was more frequently provided to blacks than to whites, to general and vocational students than to academic students, and to more males than to females. (RC)

**Identifiers**—\*National Longitudinal Study High School Class 1972

This study sought to identify distinguishing characteristics of high school vocational students. Academic ability, post secondary school plans, student ratings of their school, psychological variables, values, extracurricular activities, and the influence of various key people were used as independent measures for identifying vocational students. Multivariate methods were used extensively to determine which information from the Longitudinal Study of Educational Effects could be used effectively to distinguish vocational students from general and academic students in the class of 1972. After much work in developing constructs, two conclusions were reached. Academic students were superior to both general and vocational students in terms of measured academic ability. The relationship between curriculum and academic ability was both strong and reliable. No other variables appeared to distinguish strongly academic from vocational and general students. Although the relationship was less reliable and considerably less strong than was the case for distinguishing academic students, vocational students differed from general students primarily in terms of alienation, focus on the work world, channeling, sex, and race. Typically, vocational students were less alienated from school and focused more on the work world than general students. Vocational students experienced less channeling than general students; they were less frequently assigned to their high school program and expressed more choice in selecting programs than were general students. More women and whites were enrolled in vocational programs proportionally. (Author/DEP)

**Identifiers**—\*Joint System Social Studies Project, Pennsylvania (Philadelphia), Philadelphia School District

The Joint System Social Studies Project provided students from the public and parochial school systems with an innovative ethnic studies curriculum developed during joint staff meetings. Intersystem cooperation and communication was encouraged through this joint undertaking. Twenty public and parochial school teachers participated in monthly staff development meetings for training in ethnic and racial cultures and in current social studies approaches. A curriculum guide was developed and instructional materials were produced and identified. The ethnic studies curriculum was implemented in four elementary schools, one junior high school and four senior high schools from each system. Approximately 700 students participated in the project each year. A pre- and post-test attitude survey taken during the third year of the project revealed that there was a significant change in student attitude toward ethnic groups. No significant change was found in student attitude toward racial groups or toward students from the other system. Participating students made significant gains in cultural knowledge. However, few joint classes' needed to stimulate student interaction took place. Increased cooperation and communication between teachers from the public and parochial systems was noted. Resources common to both systems were effectively utilized. (Author/RC)

**Identifiers**—California Achievement Tests, Pennsylvania (Philadelphia), \*Philadelphia School District, Stanford Early School Achievement Test

This is a report of pupil performance in Philadelphia schools based upon the February 1975 Philadelphia City-Wide Testing Program involving all pupils in kindergarten through grade 12. School performance distributions show the combined percentages of pupils in each school scoring within various national percentile rank ranges. The performance distributions describe four groups of pupils in each school: (1) below national 16th percentile, (2) between the 16th to 49th national percentiles, (3) between the 50th to 84th national percentiles, and (4) 85th national percentile or above. These lists provided for the city, each of the eight districts, and all schools show the full range of pupil performance in the various test areas compared to national pupil norms provided by the test publishers. For kindergarten only the total battery results in the Stanford Early School Achievement Test are given. For the California Achievement Tests, total score results are given for each of the test areas and the total battery. For reference, the performance distributions for the national norm, city, and district are also given. Data are organized by district for all elementary schools in district order. Schools are listed alphabetically in each district. The middle, junior high, senior high, and area vocational-technical schools follow next with schools listed alphabetically without regard for district location. (RC)

The Philadelphia Urban Education Network Project is a staff development project that deals with the problems of the urban teacher and the needs of the urban students. Project activities include workshops, conferences, open houses, and teacher exchanges, all of which involve project participants. Staff development workshops are held to aid teachers develop organizational strategies, curricula, and instructional practices. All five project objectives were attained. Progress has been made in the following areas during the 1974-1975 school year: (1) an increase in the use of individualized and small group instruction; (2) an increase in the use of affective approaches in instruction; (3) training of student-teachers in an urban setting; and (4) getting the community involved in various school activities. Appendixes contain the instruments used in the study and their results. (Author/RC)

**Descriptors**—Achievement, Behavior Rating Scales, Classroom Observation Techniques, Inservice Teacher Education, \*Instructional Programs, Language Development, Motor Development, \*Multiply Handicapped, Occupational Therapists, Parent Participation, Physical Therapists, Program Development, \*Program Evaluation, Public Schools, Retarded Children, Self Care Skills, \*Special Classes, Speech Therapists, \*Student Needs, Summer Programs

**Identifiers**—Pennsylvania (Philadelphia), Philadelphia School District

The Classroom Centers for Multiple Handicapped Children were designed to provide profoundly retarded children with instructional programs meeting individual needs. In addition to the educational and training components of the program, speech and physical therapy services were also included. Seven classroom centers served approximately 56 children in 7 schools. Results from classroom observations, together with teacher and physical and occupational therapists' ratings found that students showed improvement in the following areas: Self-care, perceptual and motor development, self identification, language development and socialization. Parental participation and inservice training components of the project were of limited success due to a lack of direction and coordination of activities in these areas. (Author)

**The Factor Structure of Concrete and Formal Operations: A Confirmation of Piaget.**

Note—24p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Abstract Reasoning, \*Cognitive Development, \*Cognitive Processes, \*Cognitive Tests, Correlation, Elementary Secondary Education, \*Factor Structure, Logical Thinking, Matrices, Models, \*Problem Solving

**Identifiers**—\*Piagetian Theory

Piaget has hypothesized that concrete and formal operations can be described by specific logical models. The present study focused on assessing various aspects of four concrete operational groupings and two variations of two formal operational characteristics. Six hundred twenty-two 9-14 year old students participating in the Human Sciences Program designed by Biological Science Curriculum Study were the subjects. Two 15-item written tests were given on two consecutive days. Twelve items included drawings, 19 were open-ended, and 11 were multiple choice. For analysis seven items were eliminated because of deviant difficulty indices; the remaining 23 items were subjected to an image analysis with the initial factor matrix obliquely transformed using Hofmann's orthotran. Three factors were exceptionally clean: one including formal operational systematic permutations; one measuring concrete operational addition of increasing asymmetrical relations; and one involving the formal operational logic of making correct implications and denying incorrect implications. Four other factors were mixed within developmental period and across developmental period. Results are discussed relative to tentative support for some of Piaget's logical models, the robustness of Piagetian theory, and the feasibility of a written test of cognitive development. **Descriptors**—\*Data Analysis, \*Data Collection, \*Library Science, \*Questionnaires, Reactive Behavior, Research Methodology, \*Research Problems, Response Mode

**Identifiers**—\*Emporia Kansas State College

Questionnaires are important research tools despite their unpopularity. They are generally less costly per response than other techniques, may elicit more candid answers, provide more time for

respondents to consider their replies, and do not introduce interviewer or observer bias. The rate of return is an indication of the usefulness of a questionnaire. The number of returns are affected by several factors, but only the method of distribution, the kind of information requested, and the status of respondents are considered here. At Emporia Kansas State College, students working on masters research projects who used questionnaires were studied. Of the four methods of questionnaire distribution: U.S. mail, personal distribution by researcher, distribution by other persons, and campus mail, personal distribution was the most effective method in getting returns. There was little, if any, relationship between the information requested and response rate. Analysis of rate of return and status of subjects was inconclusive, with college and university educators at the lowest rate for any group. (Author/BJG)

**Descriptors—**\*College Entrance Examinations, \*Comparative Analysis, \*Competitive Selection, \*Correlation, \*Grade Point Average, \*Higher Education, \*Predictive Validity, \*Standardized Tests, \*Tables (Data), \*Test Results

**Identifiers—**Air Force Academy, \*American College Test, Scholastic Aptitude Test, Selective Colleges

Included are three studies, each dealing with an aspect of comparative validity of the American College Test (ACT) and the Scholastic Aptitude Test (SAT) at selective colleges. The first study considered the predictive efficiency of the ACT test scores and ACT test scores plus high school grades at 120 colleges, separated into three groups according to average college ACT composite. The second study concerned four selective colleges where all students had taken both the ACT and the SAT. At all four of these colleges, the mean ACT Composite score was above 24.5; the mean SAT Total score was above 1200. The third study took place at the U.S. Air Force Academy, a highly selective institution. A focus of concern in this study was to correct for selection on one of the tests, in this case the SAT, by designing the study in such a way that prior selection of students by the SAT would not be an extraneous factor in the analysis of the comparative predictive validity of ACT and SAT. The evidence in the three studies points to the conclusion that ACT and SAT scores typically yield similar results at selective colleges, and where they do not the ACT is usually favored with higher correlation coefficients. **Identifiers—**\*National Assessment of Educational Progress

In the past years the National Assessment of Educational Progress (NAEP) has released results from a variety of learning areas. The purpose of this paper is to point out male-female differences in achievement across several learning areas. Hopefully, the results discussed here will be used as a basis for examining the possible existence of social and curriculum biases in these areas. Female and male performance in social sciences, mathematics, and science are nearly equal at age nine, but very different by adulthood. For example, at age nine, both sexes do equally well on numerical operation, geometry, and measurement, while males have a substantial advantage by adulthood. Since females have been found to read and write better than males, skills prerequisite for academic achievement, the superiority of males in social sciences, math, and science needs further explanation. It is hypothesized that females do not excel in political areas because social studies classes make it clear that females have not been actively involved in their countries' political decisions. No explanation is offered for why females are less able than males to answer questions concerning the location of the Great Lakes, the source of government revenues, and the purpose of the European Common Market. It is concluded that as sex barriers are lifted, females will be given the opportunity to reach their full potential. (BJG)

This paper explains the method used to locate low-income inner-city participants and describes progress during the first fiscal year of the endeavor. Several educational programs are described briefly. Among them are the archaeological summer camp, 4-H teams' participation in a basketball league, 4-H clubs' in the low-income inner-city target area, a 4-H club conference, and the renovation of Grant Park. A special instructor and basic reading and articulation program, which has as its objective the involvement of low income youth in activities con-

TM 004 976

sidered interesting and educational, is described in detail. Classes conducted under this program include creative crafts, women's awareness, awareness, basic reading and articulation, musicology, craft ideas, and others. The program is said to provide a viable means to reach and teach low-income people with great success. A motion film of this program documenting some of the described courses is scheduled for release in the fall of 1974. Success of the program described is considered to be due to their applicability to both transient and stable life style. Participation by minority groups in these programs is observed to have increased nine fold. The youth programs offered are held to reflect an applied anthropological approach to ethnic minority, and majority interests. (Author/AM)

This manual is considered to be comprised of interesting resource materials to be used to stimulate teachers, community members, and others concerned with education in order to become more conscious of Japanese Americans and their role in American society. The manual includes a section on history and contemporary concerns of Japanese Americans, suggested instructional activities for grades K-12, an annotated bibliography on teachers and student resources, an annotated bibliography on multi-media resources and other annotated resource materials concerning Japanese Americans. Among the issues discussed are those concerning the Issei, the Nisei, the mass evacuation of persons of Japanese ancestry, U.S. - Japan relations in international politics, the elderly, redevelopment and urban renewal, legal rights, feminism, inter-marriage and equal employment opportunities (Author/AM)

**The Nature-Nurture Issue Reconsidered: A Discussion of Uzgiris' Paper.**

Pub Date Jun 68

Note—43p.; Published in the proceedings of the Peabody-National Institute of Mental Health Conference on Socio-cultural Aspects of Mental Retardation (June 9-12, 1968)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**Behavior Development, Biological Influences, Cultural Differences, \*Cultural Factors, \*Environmental Influences, \*Genetic Heredity, Human Development, Individual Differences, Intelligence Differences, Learning Theories, Mental Development, \*Mental Retardation, \*Nature Nurture Controversy

Areas of agreement and disagreement concerning intellectual developmental and the problem of mental retardation espoused by the author and by Uzgiris are discussed in this paper. The importance of environmental factors, along with the genetic and/or constitutional nature of the organism on which these environmental events impinge, is seen as central to the interactionist's position. A naive or premature environmentalist approach of the determination of development is asserted to be as erroneous as a naive or premature hereditarian approach. Considerable attention

voted to the presentation of materials that highlight the importance of genetic factors in the teractionists' equation. The paper is considered ) to insure that the reader never loses sight of e biological components of intelligence, (2) to int out that certain psychological functions ay be more amenable to environmental manipulation than others, and (3) to highlight the issues at must be resolved before the manner in which ivironment affects both the intellectual and the n intellectual components of behavior is comended.  Descriptors—Dropout Prevention, Dropout Problems, \*Dropout Programs, Dropout Rehabilitation, Dropout Research, Dropouts, Dropout Teaching, Educational Programs, Experimental Programs, \*High School Students, Program Administration, Program Costs, Program Descriptions, \*Program Effectiveness, \*Program Evaluation, Program Improvement, Student Characteristics, Urban Dropouts  
 Identifiers—New York (Manhattan), \*New York Urban League Street Academy Program

The Street Academies discussed in this evaluation report are considered to represent outstanding attempts to develop positive culturally different instructional models, rather than the compensatory deficit disadvantaged models that are utilized by regular school programs. Seven chapters discuss the background of the Academies, purposes and procedures, participants and staff, financing the Academies, the program in operation, findings, conclusions, and recommendations, and future implications. Of the 14 academies studied, nine are judged to be successfully achieving the pursued objectives of admission to college, connection to formal education, improvement of academic achievement, development of self-identity and personal life-goals, development of the ability to think critically, and improvement of social and emotional adjustment. Two Academies are found moderately successful, with the remaining two minimally successful in attaining the stated objectives. Among the recommendations made are that the program be continued and extended with some modifications, that goals and objectives be clarified, implemented, and promulgated, that a basic curriculum be standardized, that a comprehensive central system of program administration be implemented, and that recreation and artistic development be made integral parts of the program.  Descriptors—\*Citizenship Responsibility, \*City Problems, Civil Rights, Community Agencies (Public), Community Cooperation, Community Organizations, Community Relations, Community Services, Court Litigation, Federal Government, Government Role, Integration Litigation, Local Government, \*Public Schools, Racial Integration, School Community Relationship, \*School Integration, Social Problems, State Action, State Government, Urban Areas  
 Identifiers—\*Massachusetts (Boston)

This document presents findings and recommendations on the implementation of court ordered school desegregation in Boston. Major divisions of the document include a general section, Boston municipal government, the State government, leadership of Boston's private sector, and the Federal government. Within these major categories, various sub-divisions are listed and followed by findings and recommendations thereof. The view that court-ordered desegregation of public schools in Boston for school year 1974-75 is disastrous is not supported here. Evidence

developed by staff and testimony under oath from over 100 witnesses during five days of public hearings is considered to indicate that substantial progress was made in Boston in 1974-75 in the direction of upholding and implementing the constitutional rights of children and young people. The groundwork for even more significant progress in the same direction for school year 1975-76 is stated to have been laid. The Boston School Committee is said to have treated the court ordered Phase I school desegregation plan as an administrative problem and refused to take the affirmative steps necessary to desegregate successfully. The attitudes and practices that characterized their approach to Phase I are held not to have changed. Since the major administrative responsibilities for implementing the desegregation order still rests with this committee, the resolution of this unresolved issue is seen as crucial. (Author/AM)

Descriptors—Beliefs, \*Change Agents, Economic Factors, Educational Change, Educational History, Educational Objectives, Educational Policy, \*Negro Education, \*Reconstruction Era, Social Change, Social Influences, Southern Schools, \*Southern States, \*Values

This historical investigation explores the foundations of black education in the United States. It focuses on the ideology of the northern whites who labored during and after the Civil War to assure that the ex-slaves -- the freed men -- received proper schooling. The study investigates the role of the Freedman's Bureau, and sets the movement in its economic and social context. It also seeks to provide an accurate narrative history of the freedman's aid movement. One of the major conclusions drawn here is that after a century of dealing with racism and inequality as an educational issue, perhaps it is time to realize those are economic issues utterly beyond the reach of schools. A second conclusion is that liberal educational reformism has, on the one hand, served to drain energy and attention away from basic criticism and analysis of the social and economic determinants; on the other hand, it has victimized, stigmatized, and objectified its clients as extraordinary and needing special assistance, thereby deepening their own sense of inferiority. Perhaps the overriding finding considered to emerge from this study is the conclusion that it is time educationists and education policy makers begin to understand educational history and to approach their problems with a clear understanding of the role of schools as social institutions within a specific social setting. Identifiers—Minnesota (Bloomington), Project Success

Project Success, a program of modified interdisciplinary instruction coordinated with special services, is considered to be consistent with the theory of individual differences and individualized instruction which is inherent in the philosophy of Bloomington Public School's educational goals and objectives. The project, which began as an alternative program for grades 10-12 in September 1969, completed its fifth full year of operation in June 1975. The stated rationale which guided the general direction of this alterna-

tive program has been to implement strategies of instruction designed to: provide success oriented learning alternatives consistent with the needs of students; avoid labeling students as incapable nonlearners and as social outcasts; remove biases within the school which impede positive youth development; provide an opportunity for students to make a transition from the alternative program to the regular program; provide the opportunity for vocational training or work experience during their high school careers; and provide alternatives among the elective courses that will provide a wide range of interdisciplinary experiences. This report focuses on data collected as it pertains to the present 12th grade students who have elected to remain in project classes throughout three years of senior high school. (Author/JM)

 Identifiers—Elementary Secondary Education Act, \*Ohio

This publication, the ninth annual report of the Division of Federal Assistance of the Ohio Department of Education, summarizes the work of the division during fiscal 1974 (July 1, 1973-June 30, 1974). In addition to presenting statistical, fiscal, and graphic data, the report is designed to help educators and other interested persons to: understand the various federal programs administered by the division, review the size and scope of these categorical aid programs; comprehend the past, present, and potential impact of the educational opportunities provided throughout the various acts and titles; and recognize the progress made during the past five years. During fiscal 1974, the Division of Federal Assistance had seven distinct areas of responsibility connected with the Elementary and Secondary Education Act: (1) Basic Title I, designed to meet critical instructional needs of selected educationally disadvantaged children; (2) Special Title I, designed to meet the educational needs of children of migratory agricultural workers, handicapped children in state-operated schools, and orphaned, neglected, and delinquent children in state operated schools; (3) Title II, which provides funds for library resources and other instructional materials; (4) Title V, which provides funds for strengthening leadership capabilities of the Ohio Department of Education; and (5) Adult Basic Education. Identifiers—\*Emergency School Aid Act

The Emergency School Aid Act was enacted to provide financial assistance for relieving particular problems associated with public school desegregation and minority group isolation. The act mandated the establishment of a 15-member National Advisory Council on Equality of Educational Opportunity (NACEEO) with at least half of the members representing minority groups. The council has four specific purposes: (1) to advise the Assistant Secretary with respect to the operation of the program authorized by the Act, including the preparation of regulations and development of criteria for the approval of applications; (2) to review the operation with respect

to its effectiveness and with respect to the Assistant Secretary's conduct in the administration of the program; (3) to meet not less than four times in the period during which the program is authorized and submit, through the Secretary, to the Congress at least two interim reports; and, (4) not later than December 1, 1974, to submit to the Congress a final report. The present third interim report contains continuing major findings and recommendations of NACEEO, some of which are considered to reinforce earlier ones. The Report has three sub-divisions: (1) summary of recommendations; (2) detailed recommendations and findings; and (3) NACEEO activities and exhibits, including a summary of previously published recommendations in December 1973 and January 1975. How Does Mathematics Learning Take Place?

Pub Date 14 Jun 74

Note—18p.; Based on an invited talk given at a general session of the National Council of Teachers of Mathematics, Inc. (Bozeman, Montana, June 14, 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Cognitive Development, Cognitive Processes, \*Concept Formation, Deductive Methods, \*Elementary School Students, Learning Activities, \*Learning Processes, Learning Readiness, Mathematical Concepts, Mathematics, \*Mathematics Instruction, Performance Factors, Research Methodology, \*Symbolic Learning, Thought Processes

In a study of mathematics learning, taking a rule-oriented approach, students were taught to trade objects of type A for objects of types B and C. Children ranging from ages 7 to 9 were given rules for converting A to B and B to C and were then presented with the task of converting A to C. Of the 30, 6 succeeded. Of the 24 who failed, half were taught via a higher order rule to link arbitrary pairs of compatible rules. The other 12 pupils were not given this training. Then, all of the students were presented with a new pair of compatible rules for converting A to B and B to C. Finally, they were presented with a corresponding A to C task. The results showed that all of the students who received training succeeded whereas not one of the other students did so. The results, it is stated, indicated that knowing the components of a solution (rule) for a task is not sufficient. Integrating components is accomplished by applying higher order rules to lower order ones (e.g., component rules). Component rules and higher order rules, although behaviorally sufficient for problem solving, are not logically sufficient. Presumably, it is asserted, the learner must have some innate capability which tells him when and how the various rules are to be used in attacking a problem. With regard to the last point, an innate mechanism which is basic to a structural learning theory is then discussed. (Author/JM)

Identifiers—\*Jensen (Arthur R)

This paper critically examines the portions of Arthur Jensen's books, "Genetics and Education" and "Educability and Group Differences," that concern Barbara Burks' 1928 study of adoptive families. Jensen cites the low correlations of children's IQs with measures of home environment from Burks' study as evidence that environment plays only a minor role in the determination of intelligence. The finding here is, however, that

Burks' sample was highly selective, that her environmental measures were limited, and that Jensen has thoroughly misrepresented the content and implications of the Burks' study. (Author/AM)

Identifiers—District of Columbia, Elementary Secondary Education Act Title III, ESEA Title III

Designing and Implementing Programs for the Little School Component is a program funded under Elementary Secondary Education Act Title III and designed to develop, implement, and disseminate a program of individualized instruction at the Howard D. Woodson Senior High School. This program is a third year continuation of the program initiated in 1972-73. The original 300 students entering as 10th graders in 1972-73 have continued in the program and are now in their senior year. The third year program was expected to complete the development of pilot experiences for staff and students alike in the development and implementation of individualized programs. The current year program was designed to be conducted in four phases described in the project proposal: Articulation and Planning Session, Implementation of the Little School Component, School-Year Workshop and Staff Development, and Evaluation and Redesign. Phases 2-4 were in effect concurrently from the beginning of the 1974-75 academic year while Phase 1 was conducted during the summer of 1974. The results of the evaluation discussed here are considered to clearly indicate support for the Little School Component's achievement of its goals, particularly in the areas of developing a viable program of individualized instruction and in creating a positive atmosphere for learning. The tables contained in this document present data concerning the 1973-74 high school graduates of New York State's public and nonpublic schools. The data were secured through the State Education Department's Basic Educational Data System and reflect the status of graduates, as reported by school principals, in the fall of 1974. Table 1 presents trends in the college-going rate of high school graduates from 1965 through 1974. The rows of the table define categories of high school graduates according to type of institution entered and type of high school graduated from. The columns correspond to the years in which graduates entered post secondary education (i.e. fall of 1965 through 1974). The cell entries in the table are percentages. Table 2 presents "Trends in New York State High School Graduates Entering Institutions of Higher Education Within and Outside New York State, 1970 to 1974" for Public High School Graduates, Nonpublic High School Graduates, and Public and Nonpublic High School Graduates. Table 3

presents the "Distribution of 1973-74 Public High School Graduates, New York State." Table 4 presents the "Distribution of 1973-74 Nonpublic High School Graduates, New York State." Table 5 shows the "Distribution of 1974-75 Public and Nonpublic High School Graduates, New York State." (Author/JM)

Identifiers—District of Columbia

The purpose of this study is to collect, analyze and report on statistics and program information relative to selected aspects of the overall budget and program of selected large city school systems. Furthermore, the intent is to isolate areas of variation in what is seemingly common operation and by means of adjustment, whether it be in the form of calculation or definition, provide for decision makers that data which may be compared. The school systems included are several large city school systems with characteristics similar to those of the public schools of the District of Columbia. The eight systems reported are Atlanta, Baltimore, Boston, Cleveland, Milwaukee, St. Louis, San Francisco, and Washington D.C. The study began in August 1974 with requests to each of the participants for copies of school system and city budgets for fiscal year 1974 and 1975. The report is organized into four substudies, each dealing with a major area of high priority interest to the public schools of the District of Columbia. Expenditures per pupil, the subject of Substudy 1, and staffing, the subject of Substudy 2, are key indicators of the level and allocation of resources within each school system. Substudy 3, dealing with special education, and Substudy 4, dealing with capital outlay programs look at two specific areas of importance in current planning and budget efforts. (Author/JM)

Black Child Care: How to Bring Up a Healthy Black Child in America. A Guide to Emotional and Psychological Development.

Pub Date 75

Note—408p.

Available from—Simon & Schuster, Inc. Rockefeller Center, 630 Fifth Avenue, New York, New York 10020 (\$9.95)

Document Not Available from EDRS

Descriptors—Adolescence, Child Care, \*Child Development, Educational Problems, Elementary School Students, \*Emotional Development, \*Guides, Individual Development, Infancy, Mental Health, Negro Students, \*Negro Youth, Parent Child Relationship, \*Parent Role, Preschool Children

This book is designed to serve as a practical reference guide for parents. The bulk of it is devoted to a stage-by-stage study of the black child's development from infancy through adolescence with special emphasis on the role of parents and teachers of school age children. The book begins with a brief summary of the historical experience of black youth in America. A question-and-answer format is used throughout the book. Most child care books are considered to be geared toward the middle-income white family, and few discuss race-related issues of child rearing and low-income children and families. Because race-related and income-related issues are said to cause special problems, it is held essential that an approach to child rearing takes these important factors into consideration be available. Among the topics discussed are how children mature and how that growth affects their emotional, psychological, and social development. The intent is to share with the parent some of the latest findings and thinking in the child development field. Knowing the causes of black family problems and what can be done about them, a

well as having an awareness of black family and community strengths, can affect how black mothers and fathers think about themselves and, in turn, influence the kind of care they give their young. It can also affect, it is stated, how white teachers and others view black youth. (Author/JM)

Descriptors—Academic Achievement, \*Compensatory Education Programs, Curriculum Development, Elementary Education, Federal Programs, \*Individualized Instruction, Mathematics Instruction, Measurement Techniques, National Surveys, \*Program Evaluation, Reading Instruction, \*Research Design, \*Research Methodology, Sampling, Teaching Methods

The National Institute of Education is in the process of designing and conducting a study of compensatory education in accordance with the Education Amendments of 1974. Special attention will be devoted to examining the relative effectiveness of "standardized" versus "individualized" instructional programs. The stated purpose of this report is: (1) to develop a conceptual framework within which a meaningful comparison of individualized versus standardized instruction can be made; (2) to identify specific variables which need to be assessed; and (3) to develop and describe specific procedures which should be used in gathering, analyzing, and reporting the results of the research effort. It is proposed that, rather than attempting to sample schools with uniformly "individualized" or "standardized" programs, the sampling procedure should involve a deliberate and systematic attempt to sample programs which vary as widely as possible on different dimensions of individualization. The primary sampling unit should be classrooms. The central concern of the research should be the accurate description of what is being implemented rather than how well, and a careful evaluation of how those processes affect student outcomes. The analysis and interpretation of the study should be directed toward providing guidelines and recommendations for policy information, and therefore should focus on program variables (and not merely the programs). (Author/JM)

Descriptors—Academic Achievement, \*Attitude Tests, \*Compensatory Education Programs, Economically Disadvantaged, Educationally Disadvantaged, Evaluation Criteria, Evaluation Methods, Federal Programs, \*Minority Group Children, Primary Education, School Attitudes, \*Student Attitudes, Teacher Attitudes, Test Interpretation, Test Results, \*Test Validity

Identifiers—Connecticut, Elementary Secondary Education Act Title I, ESEA Title I, School Sentiment Index

The stated purpose of this study is to determine hat pupil, teacher, and school district characteristics relate to young children's expressed attitudes as measured by the School Sentiment Index and to determine the usefulness of this easurement instrument. The subjects of the study were kindergarten through grade two children who received compensatory education during the 1972-73 school year. Three questions are addressed: (1) What are the interrelationships of pupil attitudes toward school at the end of the school year and selected other pupil, program,

teacher, and school district factors? (2) Does attitude toward school, pre-test reading level, reading test gain, extent of school district disadvantage, and cost of the compensatory program vary when the data are grouped according to the grade promotion status of the pupil, the emphasis of the compensatory instruction provided, the size of the group in which the pupil received compensatory instruction, or the specialized background of his compensatory teacher? and, (3) What is the value of using the School Sentiment Index on a year-end basis for pupil, school district, and statewide evaluation purposes? It was concluded that one major value of the School Sentiment Index lies in using it to interpret group scores of young children for compensatory education evaluation purposes. Several limitations of the study, along with definitions of terms, are provided. Results for each question are described in detail. (Author/AM)

**On Models of Racial Prejudice and Urban Residential Structure.**

Wisconsin Univ., Madison. Inst. for Research on Poverty.

Report No—IRP-283-75

Pub Date Jun 75

Note—48p.; Discussion Paper

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Comparative Analysis, \*Housing, Housing Discrimination, Low Rent Housing, Middle Income Housing, \*Models, Negro Housing, Neighborhood Integration, Racial Differences, \*Racial Discrimination, Racial Segregation, \*Residential Patterns, Social Discrimination, \*Socioeconomic Status

Economists have studied the effects of racial prejudice on urban residential structure using a set of models that focus on conditions at the border between the black and white areas. This paper reviews the theoretical literature on these border models and investigates their generality. Section 1 considers the border model developed by Bailey in 1959 and shows that without substantially stronger assumptions than are made in its original statement, this model is internally inconsistent as an equilibrium model of residential structure. Section 2 considers a general equilibrium border model developed independently by Courant (1973) and Rose-Ackerman (1975) and briefly summarizes it. These two models are amended to allow for the possibility of differences in income between and within the racial groups in Section 3. Section 4 presents the implications of these findings for the appropriateness of border models and makes suggestions for alternative ways of modeling the effect of racial prejudice on urban structure. The main result derived in the paper is that border models are logically inconsistent without unrealistic assumptions either about the incomes of blacks relative to the incomes of whites or about the extent of white prejudice. The paper concludes with several suggestions for more satisfactory modeling of prejudice and urban structure. (Author/AM)

**Black-White Differences in the Occurrence of Job Shifts.**

Wisconsin Univ., Madison. Inst. for Research on Poverty.

Spons Agency—Department of Health, Education, and Welfare, Washington, D.C.

Report No—IRP-261-75

Pub Date Oct 75

Note—37p.; Discussion Paper

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Economically Disadvantaged, \*Employee Attitudes, \*Employment Patterns, Employment Problems, Employment Trends, Income, \*Negro Employment, \*Occupational Mobility, Race Influences, \*Racial Differences, Racial Discrimination, Racial Factors, Social Disadvantage, Socioeconomic Status, Unemployment

This paper presents an analysis of black-white differences in job shifts based on panel data. Three topics are investigated: (1) whether a person intended to quit (a person's intention to quit); (2) whether or not a person actually quit his job; and (3) whether or not a person was laid off. The outcome of these events is analyzed in relation to income derived from the job and the education, age, marital status, and number of

children of the job-holder. It is hypothesized that if job shifts represent an interplay between personal characteristics and structural opportunities, then occupational discrimination toward blacks should be reflected in the job shifts blacks undertake. Results demonstrate a pattern where blacks are systematically disadvantaged in their income attainment process in relation to whites. It is shown that while blacks and whites form their intention to quit in much the same way, actual quits and lay-offs take place according to very different mechanisms for blacks and whites. Descriptors—Cultural Factors, Educational Change, \*Educational Needs, Educational Problems, Inservice Teacher Education, \*Minority Group Children, \*Minority Group Teachers, Political Issues, Racism, School Orientation, \*Teacher Attitudes, Teacher Orientation, Teacher Responsibility, \*Teacher Role, Urban Teaching

This booklet was developed to assist teachers of Third World students in a workshop setting to understand the impact of institutional racism on schools, and provide them with viable skills so they might assist Third World students to cope and survive more effectively in the society. The topics discussed in this booklet are as follows: What is the Mis-education of Third World people? What I as an educator must know in order to deal effectively with negating the mis-education of Third World students? Major goals in educating Third World students; Educator Self-Inventories; Awareness of Third World culture and its implication for educating or mis-educating Third World students; and some of the things Third World educators must do to effectively confront the mis-education of Third World students. The booklet concludes by stating that six basic realities must be considered by Third World educators: (1) Change must occur if schools are to be meaningful for Third World students; (2) Only power can bring change; (3) Only political involvement can bring power (political salience); (4) Only personal commitment can bring political involvement; (5) Only personal awareness can bring commitment; (6) Awareness produces commitment, which produces political involvement, which produces power, which produces change. Descriptors—\*Academic Achievement, Bias, Caucasian Students, Ethnic Status, \*Expectation, Low Ability Students, \*Minority Group Children, Racial Discrimination, Sex Differences, Social Discrimination, Student Characteristics, Student Grouping, Student Teacher Relationship, \*Teacher Attitudes, Teacher Behavior, Teacher Evaluation, \*Teacher Influence

This study manipulates the variables of children's ethnicity, sex, and ability to ascertain the nature of the interaction relationship between teacher expectancies and student performance. The subjects were urban teachers who were asked to read case histories and then rate the child on a Likert-type family and pupil behavior rating form and a modified Osgood semantic differential scale. In addition, each subject completed a revised F scale of 30 items to assess each subjects' degree of prejudice. Analysis of the ratings given by the 386 teachers confirms

the premise that the interactions between teachers' expectancies and students' performance is more complex than originally expected; the variables of ability, sex, ethnicity and prejudice of teachers were found to be of importance in understanding these interactions. It is further concluded that the global ratings of the Osgood semantic differential scale are more powerful in recording the differential ratings of the teachers than are the particular judgments of the family and pupil behavior rating form. The third conclusion is that low ability students are the particular group of students who are "victimized" by the ratings of the high prejudice teachers. These findings suggest the need for administrators to be aware of their staff's prejudices, particularly as they interact with low ability students of minority status. They also suggest the need for retraining of teachers who are prejudicial or the assignment of them to schools where they do not come into contact with low ability minority students. (Author/AM)

This study describes and evaluates the participation and status achievements of Orientals in the labor market, with particular attention to factors affecting such participation and whether differences in participation of Orientals and whites reflect discrimination. Inequalities and discrimination within the labor market are examined in terms of four major areas: labor force participation, occupational achievement, occupational mobility, and earnings from wages and salaries. It is concluded that, on the basis of their accomplishments in the labor market, Orientals are no longer a disadvantaged minority; they often equal or surpass the levels of socioeconomic status attained by whites. However, it is pointed out that problems of language and cultural differences still do exist, and there are still vestiges of the anti-Oriental movement. (Author/AM)

This volume contains lesson plans for grades 4 through 8 on the contributions of Blacks, Latinos, and First Americans and on prejudice and racism. The lesson plans are presented within the framework of main ideas, activities for the ideas, and resources for the activities. The section on racism includes definitions and examples of racism. The section on Blacks, First Americans and Latinos are developed in a chronological manner. The Black section deals with the Pre-Columbian Period, Exploration and Colonization, Developing Another Nation, and Struggle for Identity and Equality. First American topics are Pre-Columbian, Columbian Period, Developing Another Nation 1775, Western Imperialization, and Struggle for Identity and Equality. The Latino materials include General Background Information, Mexican Indian Cultures of the Pre-Columbian Period. It is suggested that the handbook be used as a reference upon which the teacher can build. (Author/AM)

**Identifiers**—HEOP, \*Higher Education Opportunity Program, New York

The purpose of this study is the substantiation of the use of selective cognitive and affective measures for effective identification of degree and level of academic disadvantage of Higher Education Opportunity Program (HEOP) students in New York State. This was accomplished by investigating the relationship between academic efficiency (e.g., selective cognitive and non-cognitive measures) and persistence (e.g., time spent in college); (b) establishing base rates

of learner behaviors for each grade level for selected predictor and criterion measures; and, (c) investigating the relationship between academic efficiency and academic success criteria. The design of the study is based on two premises: that academic efficiency is related to persistence, and that it is also related to success. Predictors used are academic efficiency measures and biographic data, while criteria used are persistence measures and academic success measures. Major results and conclusions based are: (1) upper classmen perform more efficiently than lower classmen on the measures selected for inclusion in the study, leading to the acceptance that academic efficiency is related to persistence; (2) positive but weak relationships exist between individual academic efficiency measures; (3) relationships between persistence and sex, type of high school diploma, and ethnicity do not exist. The purpose of this report is to describe a study concerning organizational processes in an alternative high school with walls (Metro High School), which is part of the Chicago public school system, and its effects on students during the first 18 months of operation. Student development comparisons are made between a group attending Metro and a control group, both randomly chosen from a pool of volunteers who wanted to attend Metro. The major organizational changes implemented were: (1) the development of student-teacher relationships based on dialogue and noncompartmentalization; (2) freeing students from conventional school restrictions on personal functioning; (3) use of community-based learning experiences in the educational program; and (4) an increase in the variety of learning options available to students. The study revealed complex problems of social process in implementing such organizational innovations that have significant policy implications. Basic differences were found among six student subgroups in their perception of and participation in the program. Multiple methods converge which are considered to indicate that the aspects of the Metro experience valued most positively by students compared with the conventional high school experience are humanistic interpersonal relationships with teachers and fellow students. ## Introduction

**Resources in Education** is prepared monthly by the Educational Resources Information Center (ERIC) to make possible the early identification and acquisition of reports of interest to the educational community. ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating the most significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 clearinghouses located at universities or with professional organizations across the country. These clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The clearinghouses are listed on the inside back cover.

All the documents cited in the Document Résumé Section of the journal, except as noted, are available from the ERIC Document Reproduction Service. Availability and prices of document collections are to be found on the How To Order ERIC Document Reproductions page.

Informative Abstract.

Abstractor's initials.

**Women's opportunities for employment will be directly related to their level of skill and experience but also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1970 and 1980, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craftsmen and foremen (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance which are available to them. (SB)**

Identifiers—\*Gerontology

The community-based training model conducted at Pennsylvania State University in cooperation with the Pennsylvania Department of Public Welfare, Office for the Aging, provides accessible gerontological education throughout the State through a multi-faceted approach of informal seminars, undergraduate academic courses, short-term module presentations, and certification programs. At a time of fiscal accountability, the Pennsylvania prototype shows how the cooperative efforts and coordination of activities of two organizations can be combined into an organized attack upon a critical social problem. The five features unique to the Pennsylvania approach include a program that is cooperative, universal, accessible, progressive, and responsive. An important component in the long-range educational plan is that educational opportunities are planned in 20 off-campus centers for all persons within the State who work with older adults. Minimal cost has enabled more paraprofessionals and volunteer workers to attend. Students deciding to matriculate may transfer short-term training and work experience into credit hours. Likewise, with increasing education, persons can change occupations within an agency or transfer among service provision agencies. The 1974 training plan included three workshops on Normal Aging, Aging Problems, and Alternatives to Institutionalization, with a strong evaluation component planned for the series. (EA)

Identifiers—\*Gerontology

Passage of landmark legislation in the form of the Older American Act initiated a broad program of research and training in the area of adult development and aging and social gerontology. Various types of model programs emerged around the country. One type is the State-recognized consortium (University of Michigan and Wayne State University) while a second type is the interdisciplinary and diffused model (University of Chicago). Other types are the center entity model (University of Southern California), the single program model (Washington University, St. Louis), and the functional program orientation model for smaller colleges and universities. Future projections indicate a need for the continuance of multiple models, strong State-oriented programs, and functional, informal consortiums. The establishment of a National Institute on Aging is expected momentarily, with the Administration on Aging moving toward a role of being a Federal clearinghouse on aging for all Federal funds. State units on aging can currently benefit from the amended Older American's Act. The primary goals of the recently formed Association for Gerontology in Higher Education (AGHE) is helping to formulate national policy on gerontological training/education. An example of AGHE effectiveness was Congressional restoration of \$6.5 million for university-based gerontological training/education. (EA)

The project investigated the effectiveness of an environmental therapy training program for geriatric mental health workers when used in two different institutional settings. Site A was a State-operated facility for psychiatric in-patient care, accommodating 2,000 patients, with emphasis on maintenance and general patient welfare. Site B, a former State-operated custodial care facility with 100 beds, placed emphasis on diagnosis and assessment for subsequent placement in nursing/boarding residences and patients' homes. Thirty trainees at each institution were selected non-randomly by the institutional directors for the training program promoting patient independence. The first training phase consisted of the presentation of environmental therapy principles in 18 two-hour sessions (lecture, discussion, role playing, audiovisual materials, and small group problem-solving sessions). Two pre- and post-measures, a Negative Attitude Toward Old Age Score and an Assessment of Hospital Score, were used at both institutions. The results of pre/post comparison on the Assessment of Hospital Score showed significant differences, demonstrating the effectiveness of the training program in changing trainees' assessments of direct patient care and of their hospital environment in general. The principles of milieu therapy appear to be sufficiently useful to institutional geriatric service providers to warrant continued dissemination. (EA)

Descriptors—Educational Planning, \*Geriatrics, Health Personnel, \*Inservice Education, Institutional Personnel, Paraprofessional Personnel, \*Professional Personnel, State Agencies, \*State Programs

Identifiers—\*Gerontology

In devising training programs for gerontological service providers in Pennsylvania, attention was

focused on determining to what extent inservice training improved the quality of or skill with which services were ultimately delivered. The Gerontology Manpower Project is recommending a client or consumer-oriented approach, as evidenced by project research. Four participant groups of institutional geriatric mental health workers, representing various sections of the State, were identified. An environmental therapy program was presented to one group, while the other three groups received basic gerontology information; two of the groups received an expanded program. Evaluation relied on pre- and post-testing for attitude changes and increased knowledge, subjective reactions of trainees and trainers, and agency assessments. Two factors which were predictors of change were the agency's philosophy of aging as it affects care for the aged and the degree of structure existing in the organization/agency. Interpretation of the results led project staff to believe that some degree of structure is needed for trainees to implement new learning and new approaches. The individual trainee needs to be considered in relationship to the job performed and the institutional setting and needs to be actively involved in determining the training objectives and training process. **Identifiers**—\*Gerontology

The report deals with the design, development, and evaluation of a short-term training program directed toward modifying attitudes and acquiring new information and skills about sensory impairments frequently found among institutionalized elderly people. The training attempted to provide participants with a clearer understanding of the implication of visual and hearing loss in the elderly and to encourage more positive attitudes and empathy toward their client population. The three-hour training module consisted of lecture, film, discussion, and simulation. Participants were over 300 women, 18-74 years, working in institutions, agencies, or community programs as institutional staff, agency workers, and interested volunteers. Using a non-equivalent control group design, the program was evaluated for content effectiveness and techniques of adult instruction. Pre- and post-testing was conducted to measure knowledge gain and attitude change. Although complete data analysis is in process, there appears to be a definite indication that older people began the training with a more negative view of aging than younger groups in all categories of attitudes. For all age groups, training seemed to change attitudes concerning stereotyping in a more positive direction. However, training also resulted in higher anxiety about aging in all age groups. (EA)

The Influence of Life Change on Dropout Behavior of Adult Continuing Education Students.

Pub Date Jul 75

Note—85p.; Ph.D. Dissertation, Walden University

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Academic Achievement, \*Adjustment (to Environment), Adult Dropouts, Adult Education, \*Adult Students, Anxiety, Correlation, \*Dropout Rate, \*Dropout Research, \*Rating Scales, Social Adjustment

Identifiers—\*Life Change

The purpose of the study was to examine the relationship between life change and dropout behavior of adult continuing education students. The population used for the study consisted of 100 freshmen adult evening students at Tidewater Community College, Virginia. The adult students were divided into groups of low, medium, and high academic achievement expectancy based on their high school grades. During the first class sessions data on recent life change events were collected through the Social Readjustment Rating Scale. At the end of the quarter (five months later), dropout data for the population was obtained. Six hypotheses were tested and the statistical analysis of the data gathered revealed the following conclusions: no significant difference existed in mean life change scores among the adult students at the low, medium, and high academic risk populations; there was a significant relationship between the amount of life change in adult students and the frequency of their dropout behavior; and there were no significant differences in the frequencies of dropout behavior of adult students in low, medium, and high academic risk categories. Dropouts, regardless of academic risk category, had experienced significantly more life change than non-dropouts. The rating scale and a bibliography are appended. (Author/EC)

Career-OCC Relating School Subjects to Career Possibilities.

Pub Date Sep 74

Note—340p.; Not available in hard copy due to marginal reproducibility

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Career Choice, \*Career Education, Employment Opportunities, \*Occupational Clusters, \*Occupational Information

For career education instructors to help in the career choices of their students, it is necessary that a knowledge of occupational information related to different subject areas be acquired. By introducing occupational possibilities into the career education curriculum students can explore these possibilities and make worthwhile decisions. The document presents detailed occupational information for teachers, students, and guidance counselors. It is comprised of a list of occupations (based on the Dictionary of Occupational Titles (DOT), 1965 edition), in some cases with an outline of their activities and suggestions for appropriate teaching, related to the following areas of study: art; business and office education; distributive education; English language arts; foreign languages; health; home economics and potential related areas; industrial arts; math; music; physical education, recreation, and outdoor education; science; and social studies. Occupational information is described and arranged according to the DOT code, worker trait group, occupational title, and related industry. Instructions on how to use the DOT, and the DOT code number and its corresponding Dewey library code are appended. (EC)

Identifiers—Texas

The study sought to identify competencies required for effective functioning of various guidance personnel and to validate those identified competencies. A pilot study led to the development of the final survey instrument which listed 318 guidance-related competencies. The following respondents rated each competency in terms of its importance to success in his particular position: 50 percent of all elementary, secondary, and special education counselors in Texas public schools; all vocational counselors, occupational exploration teachers, and occupational investigation teachers in Texas public schools; and smaller samples of community college counselors and counselor educators. Analysis of the results indicated support for almost all of the competencies by the "core" counselor groups (secondary, elementary, special education, and vocational). Further analysis produced lists (included in the report) of competencies unique to each of these counselor groups. Utilization of a hierarchical analysis and elimination process established a list (also included in the report) of 157 competencies common to all guidance personnel and related to: staff consulting, pupil appraisal, public relations, educational and occupational planning, guidance program planning, placement, parent help, counseling, local research, referral work, and personal qualities. A graphic representation of the respondent groups' ratings of each competency is presented. (Author/MS)

The monograph orders career education program components and assigns responsibility for their delivery, stating major differentiation areas and placing career development and the counselor's facilitating role at the center. The first three chapters review the modern history of vocational choice, career development, and career education concepts; draw implications for present career education programs; and discuss counselors' and computers' roles in some detail. Currently at a statemate due to the counselor's poorly defined role and resultant consumer dissatisfaction, guidance clings to a remedial model rendered inadequate by contemporary vocational maturity and career development constructs. Future career guidance needs to be a sequential, planned, developmental support system promoting increasing self-direction and self-support; four exemplary career guidance programs are cited. The status of the five presently operational computer-based career guidance systems is reviewed. Studies reveal guidance tasks which computers perform extremely well; high student appeal and low cost indicate that those should become computer functions, freeing counselor time for functions computers cannot perform. The final chapter presents a unified model for career education delivery and guidance, with role implications for teacher and community. Ex-

tensive appendixes include an annotated list of innovative programs and an annotated bibliography of relevant ERIC literature. (Author/AJ)

Identifiers—Appalachia, DILENOWISCO Educational Cooperative, Virginia

The DILENOWISCO Educational Cooperative designed the Four I's Project (intervention, introduction, investigation, and involvement) and the K-12 Career Education Program for Norton City in an effort to assist in solving some of the educational problems existing in this isolated central Appalachian area of Virginia. The two projects are discussed extensively in both summary and body reports in terms of: program objectives; procedures; evaluation methods; problems; evaluation instruments; project results and accomplishments; a third party evaluation; conclusions, implications, and recommendations; information dissemination; and a geographical description of the area served by the projects. The Four I's Project was designed to serve older students who were potential dropouts from the school districts of Dickenson and Wise Counties. The K-12 Career Education Project was designed to serve all the children in the Norton City Schools with the ultimate objective of leading seniors toward realistic career plans and self concepts. Both projects were considered to be successful and therefore will be continued. Achievements are reported in the areas of: guidance, work placement programs, changes in self-concept, changed teacher attitudes, parental awareness, and occupational knowledge. (BP)

A Career Decision-Making Handbook for Adult Basic Education Teachers.

Huntsville City Schools, Ala.

Spons Agency—Bureau of Occupational and Adult Education (DHEW/OE), Washington, D.C.

Pub Date Jun 75

Note—60p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Adult Basic Education, \*Adult Counseling, Adult Educators, \*Adults, Adult Students, Annotated Bibliographies, \*Career Choice, Counselor Role, \*Decision Making, \*Disadvantaged Groups, Personal Values, Resource Materials, Teacher Role, Vocational Counseling, Vocational Development

Identifiers—Alabama (Huntsville)

The purpose of the special project, operated by the City Board of Education (Huntsville, Alabama), was to perfect a career decision-making model that could be used by Adult Basic Education (ABE) teachers to help the disadvantaged adult upgrade himself educationally and to make a realistic career decision based on his and his family's personal value system. Career counselors trained the ABE teachers in the use of the career decision-making model, using preservice, inservice, and on-the-job training. The teacher and the counselor worked with adult learners in developing the thinking processes needed for career decision making. The document explains in detail the adult career decision-making processes and provides an example of a career decision-making chart, briefly describing each of the 18 points on the chart. Also discussed are the four counseling techniques used: (1) behavioral techniques, (2) educational media, (3) group techniques, and (4)

vocationally oriented curriculum. The remainder of the document consists of lists of materials: an annotated bibliography covering occupational information, job search, and study guides for job entry; local community resources; and an annotated list of tests useful in counseling adult learners. Identifiers—Texas

The document is a summarized final report of the Multi-County Assessment of Adult Needs Project (MAP) which took place in central Texas (Bosque, Falls, Hill, and McLennan Counties). It summarizes the major activities and accomplishments of the project and contains all materials except Attachments 1 and 2, the reports on Phase I (Survey of Adult Needs) and Phase II (Assessment of Business and Industry Needs) of MAP. Attachment 3 is a summary of the survey findings. Two items of correspondence regarding the project comprise Attachments 4 and 5. Attachment 6 contains the MAP mailing list. A fourth quarter report combined with an independent evaluation of the project are presented in Attachment 7 as well as the agenda and a list of participants in a dissemination conference. News reports about the project are included in Attachments 8 and 9. A final overall evaluation report of the project is discussed in two parts: summary of quarterly reports and evaluation of accomplishments toward original project objectives. Accomplishments singled out for mention are: (1) utilizing older adults as survey team members, (2) demonstrating the use of a new approach to sampling, (3) obtaining input from potential users before developing the questionnaire, and (4) determining the questionable validity of commonly-held assumptions. The program is designed to provide an opportunity in independent study for junior high school students with high ability and motivation. The independent study program is undertaken with the guidance of an advisor. Four independent study activities offered to the student are: write a research paper on Arizona history, government, U.S. History, and U.S. Government; create a tape library on an approved topic; organize a career day for grades 7-8; and investigate one of the branches of the armed forces. Each activity is provided with a description, general objectives, and student objectives. A separate activity packet for each independent study program outlines specific responsibilities for the student and the advisor. These include a suggested schedule, worksheets, forms for the student's evaluation of the activity, and forms for the teacher's evaluation of student performance. (Author/EC)

Descriptors—Adult Education, \*Community Development, \*Community Education, Community Health, Community Programs, Community Resources, Community Study, \*Conference Reports, \*Educational Development, Educational Programs, Educational Trends, \*Foreign Countries, School Community Cooperation

Identifiers—\*New Zealand

The document contains the texts of nine papers presented at the first conference of the New Zealand Association for Community Education. "Community as a Basis for Education" focuses on ways of utilizing community resources for education and offering learning programs based on the needs of community members. "Community Education and the Role of the Department of Education" discusses the functions of the department as a center for establishing conditions for educa-

tional change. An educational program which focuses on community needs and integrates vocational and liberal education is formulated in "The Content of Community Education." "A Community Programme" discusses the processes involved in a particular program for community education. Growth and change occurring in communities and their impact on educational trends are discussed in "Community Development and Community Education." "Administration, Financing, and Facilities for Community Education" focuses on management aspects of community education. An historical review of adult education in New Zealand and recommendations are presented in "The Role of the Voluntary Association in Community Education." "Community Education and Health Needs" discusses the relationship between education, economic development, and community health. An outline of a recreation program is presented in "Community Recreation in Community Education." (EC)

Identifiers—\*Poland

The main task of rehabilitation in Poland is the maximum integration of the disabled into ordinary life. Developmental trends in recent years have focused on rehabilitation services for the chronically ill. The document provides information on the organization of rehabilitation services in Poland and discusses specific problems of rehabilitation activities dealing with the locomotor system, circulatory system, mental diseases, and pulmonary diseases. An assessment of the economic aspects of rehabilitation as they relate to work is presented with supporting data. The counseling, training, and employment processes for medical and vocational rehabilitation are discussed in relation to existing forms and procedures. Nine major legislative regulations concerning the rehabilitation services are reproduced. These deal with the planned employment of the disabled, the development of Invalids' Cooperatives, principles and procedure in planning for the employment of the disabled, the supervision of working conditions and correctness of the employment of the disabled, the cooperation of health and social

welfare departments, employment of and social welfare for the disabled in light industry enterprise, the exemplary statute of a voivodship outpatient department for rehabilitation, and rehabilitation and employment of the disabled within the organizational framework of invalids' cooperatives. (EC)

The hearings review aspects of the vocational education program assistance granted through the Federal government and how the programs have been implemented at the Federal and State levels. The testimonies from the first hearing deal with the evaluation of Federal and State assistance and include statements from representatives of the following agencies: General Accounting Office (GAO); the Bureau of Occupational and Adult Education of the Department of Health, Education, and Welfare (DHEW); and directors of vocational education from three States audited by the GAO. The second hearing focuses on the impact of vocational education programs on the States and includes testimonies from representatives of the National Association of Education and the University of the State of New York. The third hearing deals with vocational education and other educational associations and includes testimony from a representative of the National Advisory Council on Vocational Education and a panel of educators and professional association representatives. The fourth hearing deals with administration proposals and includes statements from representatives of the U.S. Commission of Education of DHEW, and the Rhode Island, Minnesota, and Maryland State Advisory Councils on Vocational Education. Extensive supporting materials are reproduced to supplement the testimonies presented during the hearings. (Author/EC)

The Federal Civil Rights Enforcement Effort—1974. Volume 6: To Extend Federal Financial Assistance.

Commission on Civil Rights, Washington, D.C.

Pub Date Nov 75

Note—838p.

**EDRS Price MF-\$1.39 HC-\$42.53 Plus Postage**

Descriptors—\*Administrative Agencies, Administrative Policy, \*Civil Rights Legislation, Discriminatory Legislation, Evaluation Methods, Federal Legislation, \*Federal Programs, Government Role, Program Content, \*Program Effectiveness, \*Program Evaluation, Racial Discrimination, Sex Discrimination

Identifiers—\*Civil Rights Act 1964 Title VI

The report evaluates the civil rights activities of several Federal agencies with responsibilities for ensuring nondiscrimination toward women and minorities in their Federally assisted programs under Title VI of the Civil Rights Act of 1964. The agencies reviewed are the Extension Service of the Department of Agriculture; the Health and Social Services Division of the Office for Civil Rights of the Department of Health, Education, and Welfare; the Department of the Interior; the Law Enforcement Assistance Administration of the Department of Justice; the Manpower Administration of the Department of Labor; the Federal Highway and the Urban Mass Transportation Administrations of the Department of Transportation; the Environmental Protection Agency; and the Federal Programs Section of the Civil Rights Division of the Department of Justice. Some of the areas analyzed within the agencies are program and civil rights responsibilities, organization and staffing, data collection, complaint investigations, compliance programs, audits, enforcement action, regulations and guidelines, coordination activities, litigation, certification, and reporting systems. The evaluations are based on a review of documents produced by these agencies, interviews with Federal officials, and an analysis of available literature. It offers recommendations for the improvement of programs which require change. Twenty-two charts supplement the discussions. (Author/EC)

A Detailed Sample of the Minute Analysis and Planning That Precedes the Final Draft of a Request for a Research Grant.

Pub Date Oct 75

Note—57p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Financial Support, Grants, \*Guidelines, \*Models, Planning, \*Project Applications, Research Criteria, Research Needs, \*Research Proposals, \*Technical Writing

Procedures for organizing and planning a request for a research grant are presented in the document. The guidelines are divided in five sections with related subsections and contain information on what areas each section should cover: (1) a narrative statement of objectives and major tasks of the study including a list of current work in progress within the specified area; (2) a design and procedures section which describes the specific plan for accomplishing the objectives of the project (it should delineate procedures, outline project arrangements, specify time-lines for the achievement of each objective, and explain how activities will contribute toward achieving the desired results); (3) a detailed management plan and an organization chart showing decision points in planning, development, implementation, and end product production as well as time-lines for operational phases and delivery dates for products or processes; (4) a description of necessary competencies and roles of the project

director, professional staff, and consultants; and (5) a statement of institutional commitment including reference to the applicant's experience in contract work and any activity previously performed which would contribute to the project. Each section includes all procedural steps coordinated with the author's writing model. (Author/EC)

Planning, Implementing, and Evaluating Community Health Programs.

Northern Illinois Univ., De Kalb.

Pub Date 9 Nov 74

Note—15p.; Paper presented to the Annual Meeting of the Illinois Hospital Association (52nd, November 9, 1974)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Community Health, Delivery Systems, \*Health Needs, \*Health Programs, Health Services, Individual Needs, Program Administration, \*Program Development, \*Program Planning, Speeches

Planning, implementing, and evaluating an effective community health program requires a basic understanding of the dynamics and precedents that affect such programs. A community health program's general goal is to assist individuals and communities in identifying and meeting their health problems. In order to accomplish this goal the American Public Health Association has developed general objectives for future planning. Further, an understanding of the concept of basic human needs as it is related to community health programs is essential to a health program. The resolution of community health problems can be facilitated by understanding and dealing with the five processes (planning, organizing, directing, coordinating, and controlling) required for effective administration. Any program to be effective and efficient must be accountable for six program aspects: prevention, detection, appraisal, treatment, rehabilitation, and evaluation. With these program objectives, processes, and aspects in mind the eight procedures (establishing goals, clarifying goals, restating program goals in official written form, developing an action plan, establishing enabling objectives, collecting materials and resources, establishing evaluation criteria, and relating to program goals) should be utilized in implementing a health program that is relevant to human and community needs. With all these elements functioning properly health programs can expect success. (Author/BP)

Identifiers—Enrichment Teacher Counselor Competency Career Ed, ETC, \*Museum Curator

The document contains elementary level instructional materials representative of curricular materials developed for the Enrichment of Teacher and Counselor Competencies in Career Education (ETC) Project. A career education model chart depicts the career development concepts and subject matter concepts for the various experience levels of the K-6 ETC project. The document presents a detailed 32-page teaching guide for a fourth experience level infusion strategy unit entitled "Curiosity Created the Curator" focusing on career development for the specific occupation of museum curator. The learning activities in the infusion strategy unit are

entitled: Mini-Museum, A Few of My Favorite Things, Sharing Culture through Language, and Museums Protect and Preserve. Each activity provides (1) performance objectives stressing decision making, attitudes and appreciations, and educational awareness, (2) subject matter concepts, and (3) preplanning suggestions. In addition charts, illustrations, and worksheets are given. The document concludes with a 28-page master index of the K-6 infusion strategy contents listed by experience level and subject area. The Chicago Association of Commerce and the Organization of Extra-Curricular Activities in the Chicago High School, 1914-1925.

Note—27p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Business, City Wide Programs, \*Curricular Activities, \*Educational History, High Schools, High School Students, \*Immigrants, Laborers, Labor Unions, Political Socialization, Professional Associations, Racial Attitudes, \*School Industry Relationship, \*Social Science Research, Social Stratification, Student Organizations, Values, Vocational Counseling, Vocational Education, Youth Clubs

Identifiers—Association of Commerce, Chamber of Commerce, \*Illinois (Chicago)

An analysis of the Chicago businessmen's Association of Commerce's great influence in the public high schools, 1914-25, reveals Americanization and labor control as primary goals. The association organized and operated a vocational guidance bureau and three important high school clubs. A concerted enrollment effort netted the membership of roughly two-thirds of Chicago's students by 1920. Given a free hand in the schools by the superintendent, the association held direct control of the clubs' ideologies and activities through a centrally devised program which the schools' faculties carried out. A press club controlled the content of school newspapers. Original club objectives, civic pride, and community involvement faded before the major emphasis: sympathy and respect for the businessman's role and position. The Federation of Labor noted the association's motives; it argued that the close affiliation between the public school and the employers violated democracy, and that the psychological influence was worse than open and direct capitalist propaganda. The clubs were organized to fit the student into a classist, racist society; the association's vocational guidance counseled students to adopt the businessman's stereotype of the lower working class immigrant; and economic and political values were taught which would stabilize the economy to guarantee continued profits. A Survey of Student Interest in a First Year Master of Social Work Program for the Greater Rockford, Illinois Area. Final Report.

Illinois Univ., Dixon. Regional Office for Continuing Education and Public Service.

Pub Date Oct 75

Note—12p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Educational Interest, Educational Needs, \*Extension Education, \*Graduate Study, Masters Degrees, Needs Assessment, Professional Training, Regional Planning, Social Work, \*Social Workers, Student Interests, \*Surveys

Identifiers—Illinois (Rockford), Jane Addams School of Social Work, University of Illinois Chicago Circle Campus

A mailed questionnaire was utilized to survey social service agency personnel in the Rockford, Illinois area about their interest in and need for a first year Master of Social Work extension program. The questionnaire was sent to social service agency personnel holding at least a bachelor's degree and performing or administering social services; the individuals were identified through agency liaison persons. Total response was 196 of 244, or 80 percent. The findings of the needs assessment research, contained in the brief document, offer apparent evidence of the need to develop a first year graduate program for the area. The findings clearly indicate that the personnel surveyed would participate in such a program. They are appropriately qualified in terms of professional experience and grade point

averages. Their preference is to take evening courses; a majority, in fact, would enroll in two courses per quarter. On the whole, they would finance this education by themselves. The findings were submitted to the Jane Addams School of Social Work at Chicago Circle Campus (University of Illinois) with intentions of continuing the effort toward program delivery. (Author/AJ)

Identifiers—\*Compliance Safety and Health Officers, CSHO, Occupational Safety and Health Administration, OSHA

The report describes revision of the Compliance Safety and Health Officers (CSHO) course for the Department of Labor, Occupational Safety and Health Administration (OSHA). The CSHO's job was analyzed in depth, in accord with OSHA standards, policies, and procedures. A listing of over 1,700 violations of OSHA standards was prepared, and specialists in occupational safety and health then evaluated each violation in terms of criticality based on likelihood of hazard, probability of effect, severity of effect, and range of effect. A set of "performance" and "knowledge" instructional objectives was then established, and a four-week course was developed including these features: (1) instructional paralleling sequence in which activities are performed; (2) an instructor manual having course guide and lesson plans; (3) a student handbook having a course outline, course objectives, and reference materials; (4) an intermingling of "compliance" and "standards" instruction; and (5) role-playing exercises to provide realistic practice for CSHOs in dealing with employers and employees. The document concludes with 35 pages of appended materials: compliance officer functions; sequential relationship among tasks; sample pages of the Hazard Questionnaire and compliance officer task descriptions; sample lesson formats; and an outline of the compliance and health officer course. The report provides an account of how the U.S. Office of Education's discretionary Vocational Education Research Program for 1975 was planned and implemented. It contains information about the legislative and regulatory framework for Section 131 (a) of Part C Research Program, as stated in the Vocational Education Amendments of 1968 Act. Five research priority areas were determined: (1) administration of vocational education at the State level; (2) administration of vocational education at the local level; (3) comprehensive systems of guidance, counseling, placement, and follow-through services; (4) educational personnel serving the educationally disadvantaged, handicapped, and minorities; and (5)

curriculum, demonstration, and installation studies. The processes used to implement the award program are outlined, and the award outcomes are discussed in terms of an overview of the purposes and expected results of the funded projects. A total of 361 applications were received for consideration. Synthesis papers are presented for the priority areas with the exception of the fourth. Abstracts are included for all funded projects, arranged by priority area (22 in State level administration, 16 in local level administration, 19 in guidance and counseling, 17 in administration for the handicapped and minorities, and 12 in curriculum) and for eight special projects of national significance. Identifiers—CODAP, \*Comprehensive Occupational Data Analysis Programs

The Comprehensive Occupational Data Analysis Programs (CODAP) are designed for analyzing and retrieving occupational survey information collected by means of job inventories. Two programs that are parts of the CODAP system are described: the Ordering of Hierarchically Grouped Case Data (KPATH) program which reorders case data permitting identification of background variables having similar values for all or most cases in the group and enabling the generation of composite job descriptions for any hierarchical group; and the Print KPATH (PRKPTH) program which produces a printed report of case data elements for any selected background variables from an input-ordered or KPATH-ordered history data tape. The report discusses the application of these programs with supporting diagrams, tables, charts, and examples. Appended materials consisting of descriptions of other CODAP programs and a definition of terms used in the KPATH program documentation are included. (Author/EC)

Descriptors—\*Business Education, Business Subjects, Courses, \*Curriculum Development, \*Educational Programs, Educational Trends, \*Instructional Innovation, National Surveys, Program Descriptions, School Surveys, \*Secondary Education, Vocational Education

To gather information on how the business education curriculum in secondary schools is being affected by changing trends, questionnaires were sent to State and local business education supervisors. Some aspects of instructional innovations are discussed based on the responses gained from the national survey, particularly the responses of 78 local supervisors directly involved with high school programs. Business education has become an important part of the general education of students and more courses in this area are being offered. To meet employment needs of various industries new courses are being taught on word processing, micrographics, reprographics, electronic calculators, and data processing. Job training for students in some

schools is being achieved through simulation, block-time patterns, and performance-based business education. Changes in business education curriculum have also been the result of greater emphasis now being placed on career education, human relations in business, metrication, record-keeping, vocational youth organizations, and individualizing teaching and learning. The discussion of these changes in business education is supported with brief descriptions of actual high school programs. (Author/EC)

Identifiers—\*Air Force

The report is a study of the utility of social reinforcement for improving Air Force training. It was conducted through a field evaluation of social incentive instructional systems which would serve to improve student motivation, classroom performance, and attitudes. The participants included a total of 300 trainees from two Air Force bases; 25 instructors were involved, two of whom participated in two experimental treatments. Data were collected on performance records, instructor evaluation, and trainee attitudes. The experimental treatments attempted to increase the incidence of student leadership behaviors and included the Baseline Control Condition, the Leader Attitude Training System, the Leader Recognition System, and the Classroom Behavior Development System (CBDS). The activities, covering a period of approximately three months, are described for each experimental system. Statistical analyses were conducted to assess their impact. The general finding was that none of the classroom social leadership systems had any important positive or negative effect on block examination scores, on completion time, on trainee attitudes, or on instructors' assessment of student performance. The CBDS had a positive effect on student attitudes toward fellow trainees. Twenty-two tables supplement the discussion. Appendixes (132 pages) present the instructors manuals used in the four intervention systems and additional tabulated data. (Author/EC)

The book presents a series of articles that explore the issues and problems generated by open learning and career mobility approaches in nursing education within the context of higher education. It focuses on a description of representative models of career mobility patterns and approaches. The presentations are arranged in six parts. Part 1, Nontraditional Study Comes of Age, consists of five introductory articles providing an overview of the problems facing

nursing education. Part 2 discusses the issues and problems related to career mobility in nursing and contains eight articles emphasizing curriculum development and educational planning. Parts 3-6 discuss the four models of career mobility patterns in nursing: (1) the licensure-based model (six articles), (2) the advance placement model (six articles), (3) the multiple exit-reentry model (eight articles), and (4) the assessment model (two articles). They include essential information about their development, implementation, problems, curriculum design, learning and evaluation methods, resources, and specific descriptive data about the students when possible. Identifiers—Louisiana

To determine the extent to which the secondary education system meets student needs a study of high school graduates in Louisiana was conducted. A sample of graduates from Louisiana high schools in the period 1956-65 was selected. A multiple choice questionnaire was mailed to 4,700 graduates with a 3,035 return of which 2,895 forms were completed (1,383 males and 1,513 females). Data were sought on the high school experiences, postsecondary education or training, and employment experiences of graduates, and on the relevance of high school experiences to later experiences. The findings from the questionnaire focus on 32 areas and are discussed and analyzed item-by-item, with 37 supporting tables. Conclusions and recommendations based on the study are presented, and it is suggested that they might provide useful information for educators concerned with the planning and development of high school programs that would meet the particular needs of high school students. A 171-item bibliography is included. Comments and suggestions offered by respondents, the participating parishes and guidance counselors, and the questionnaire used for the study are appended. (EC)

Descriptors—\*Demography, Educational Background, Geographic Distribution, \*Geographic Regions, \*Income, Labor Market, Mathematical Models, Racial Factors, \*Surveys, Tables (Data), \*Veterans

Slightly over 180,000 draftees were surveyed 10 months after leaving the military to gain data regarding training, employment, occupation and wages if working, marital status, education, Armed Forces Qualification Test (AFQT) score, age, race, military occupation, and home. Differences in earnings functions among smaller, homogeneous labor markets are examined in terms of urban and regional location and black and white individuals. Aggregate statistics about the structure of earnings, characteristics of earnings functions, regional variations in earnings, and black-white differentials are analyzed; 10 tables supplement the discussion. Conclusions state the estimated effect of schooling and ability differences is low, with an additional year of schooling worth about 5 percent higher income and one

decile move in the AFQT score matched by 1 percent increase in earnings for whites, lower for blacks. The estimation of separate earnings functions for labor markets across the country is significant, with the choice of region for employment often equivalent to the marginal earnings of several years of schooling. Racial difference in earnings stems from differences in the earning functions for blacks and whites, not in schooling, ability, or experience levels. Sample and population characteristics are discussed in the appendix. The nonrepresentative character of the sample is emphasized. (LH)

Descriptors—\*Annotated Bibliographies, Books, Career Education, Decision Making, \*Ethical Instruction, \*Ethical Values, Ethics, Filmstrips, Instructional Films, \*Instructional Materials, Job Satisfaction, Magnetic Tape Cassettes, Self Concept, Tape Recordings, Video Tape Recordings, Vocational Education, \*Work Attitudes

Fifty-six items of instructional materials are listed in the annotated bibliography, which was prepared as the first phase of a research project designed to compile, evaluate, and organize titles and sources of instructional materials which deal with subjects related to work ethics. The titles were selected from an original total of 140, collected from vocational teacher education departments, curriculum development centers, research coordinating units, representatives of the National Network for Curriculum Coordination in Vocational Education, State departments of education, and other selected vocational education agencies. An attempt was made to include only those materials which dealt specifically with developing pride in good workmanship, job attainment and holding power, occupational decision making, self-image, ethical conduct, career advancement, reasons for working, and potential job satisfaction. More broadly based career education materials which do not deal specifically with the development of attitudes toward work were excluded. A photograph, descriptive abstract, and ordering information are provided for each item. Additional information provided includes the subject and type of material, intended audience and audience target level, copyright information, and an indication of whether special training is required for optimum use of the materials. Organizing and Using an Advisory Council.

Virginia Polytechnic Inst. and State Univ., Blacksburg. Agricultural Education Program.; Virginia State Dept. of Education, Richmond. Agricultural Education Service.

Pub Date 75

Note—43p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Advisory Committees, \*Agricultural Education, \*Program Planning, School Community Cooperation, \*Secondary Education

Identifiers—\*Committee Role

The primary purpose of an advisory council is to assist and advise the teacher and administration in planning, organizing, and conducting an instructional program in agricultural education that will effectively meet the needs of the people in the community. Advisory councils are classified as general (serves all of vocational education or a selected occupational segment), local option (serves as a specific consulting committee), and ad hoc (serves to advise on a particular problem or task). The procedures for establishing the council are described: preliminary planning, selecting council members, organizing and starting the new council, officers, rotating members, constitution and by-laws, and frequency of meetings. Suggested activities to be undertaken by the council and the agricultural education

teacher are provided. Guidelines are presented to insure the maintenance of the council. References are included. One-half of the document contains appended materials: a sample constitution and by-laws for the agricultural advisory council of a high school, a sample outline for a handbook for committee members, the functions of the advisory council member, sample agenda, examples of items for consideration by the committee, and an open letter in reply to an invitation to serve on an advisory council. Competency Based Education (CBE) is a system of instruction which holds that the learner has completed his preparation only when he effectively does the job he has been learning to do. Three major assumptions which form the basis for CBE are: (1) an educational program should prepare the student with competencies to effectively do the job he is learning to do; (2) an educational program should make the best use of all resources; and (3) an educational program should be designed, developed, implemented, and revised by management approaches which effectively and efficiently operate all of the various parts of the program in concert. Occupational competency may be classified as skill oriented or process oriented. Personal attributes complement the training of an occupational competency. The preparation of statements for competencies requires more detailed descriptive statements to help others understand what is meant when the competency statement is used. Four sources for identifying competencies for any given occupation include job performance, analysis of job description, product analysis, and consensus. (The document is presented in a simplified approach to introduce CBE to those unfamiliar with the more complex concepts in much of the available literature.) (Author/EC)

Ford, Ann Suter  
The Physician's Assistant: A National and Local Analysis.

Pub Date 75  
Note—245p.

Available from—Praeger Publishers, Inc., 111 Fourth Avenue, New York, New York 10003 (\$17.50)

Document Not Available from EDRS

Descriptors—\*Health Personnel, Literature Reviews, Medical Education, \*National Surveys, \*Physicians Assistants, \*Professional Training, Questionnaires, Research, \*Role Conflict, Role Perception

The book is devoted to an exploratory and descriptive study of the physician's assistant (PA). Chapter 2 describes the research methodology and the questionnaires constructed for data collection. The 1970 national survey questionnaire was sent to 33 operative (79 percent return) and 10 planned (50 percent return) PA training programs in the United States. The second national questionnaire was for a 1973 study. The other three questionnaires were used in a local case study of the obstetrical PA. Chapter 3 discusses some of the relevant behavioral science literature (innovations and resistance to change, organizations and conflict, and health manpower) that was examined. The following three chapters focus on the survey results, which are integrated with PA literature. Issues of the national surveys dealt with role definition, educational programs, recruitment, placement, and acceptance. Much progress was made in the three-year period toward resolving basic issues; the PA has been considered a new health professional rather than a dependent appendage of the physician. The PA/nursing role remains as an issue of debate. The case study of the obstetrical PA surveyed patients, physicians, and nurses regarding the PA. Appendixes contain copies of the questionnaires and a list of the national program respondents. (EA)

Child Care Occupations Handbook—Pre-Publication Draft.

Oregon State Dept. of Education, Salem. Career and Vocational Education Section.

Pub Date Mar 75  
Note—192p.

**EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage**

Descriptors—Child Care, \*Child Care Occupations, \*Course Descriptions, Course Objectives, \*Curriculum Guides, Educational Objectives, Educational Programs, Job Analysis, Occupational Information, Program Content, Program Planning, \*Secondary Education, Service Occupations, \*Vocational Education

The handbook presents training guidelines for the development of child care services training programs at the high school level. Twenty-four child care occupations are identified and briefly described. An occupational and task analysis of common functions in the different occupational areas are presented in tabular form. Recommended background training for the occupations are listed. Four suggested planned course statements in child care and a list of goals and competencies are given. A curriculum outline for child care occupational courses is structured according to the following goals: aids growth and development, guides behavior, plans and uses play activities and creative media, provides for physical needs, promotes health and safety, and demonstrates qualities required for employment. Each goal contains information on the following areas: competencies and concepts, content outline, learning experiences, and performance indicators. Nearly two-thirds of the document (128 pages) contains appended materials that can be utilized for child care program development and planning: instructional materials, addresses, other resources, rules and statutes governing child care in Oregon, equipment for a child care facility, equipment supply companies, course materials, work experience, tests and scales, records and forms, child abuse, feeding young children, and a poem. Work or Welfare? Factors in the Choice for AFDC Mothers.

Pub Date 74  
Note—126p.

Available from—Praeger Publishers, 111 Fourth Avenue, New York, New York 10003 (\$12.50)  
Document Not Available from EDRS

Descriptors—Economically Disadvantaged, \*Employment, Federal Aid, Federal Legislation, \*Mothers, \*Welfare Problems, \*Welfare Recipients, \*Welfare Services, Working Women

Identifiers—AFDC, \*Aid to Families with Dependent Children

Such factors as a belief in individual freedom of choice, the support of minority groups' rights, and a concern for the psychological effects of mothering on children have tended to mitigate against a clear-cut advocacy of the employment of mothers under Aid to Families with Dependent Children (AFDC). Two recent phenomena, however, have emerged tending to favor such employment—the large numbers of AFDC mothers in the labor force and their great amount of work experience. Chapter 1 provides the historical background of the impact of the State Mothers' Pension programs, the Social Security Act and Aid to Dependent Children (ADC), 1962 ADC amendments to contain the caseload, and the 1967 Federal work incentives/work requirements. Chapter 2 documents the close association between work and welfare in the lives of AFDC mothers. Chapter 3, "Determinants of the Work-Welfare Choice," examines labor force/monetary/cultural determinants and focuses on welfare policy as the most important determinant. Chapter 4 focuses on "Work Incentives: Thirty and One-Third," while Chapter 5, "Work Requirements: WIN," examines the work incentive program's effect on the work-welfare choice of mothers. The concluding chapter examines Federal proposals for "welfare reform." (Author/EA)

Identifiers—\*Manpower Planning

A resource tool for the manpower planning practitioner, the book provides significant background information on the growth of manpower programs and reasons for placing heavy emphasis on local labor markets. The background material includes a discussion of the role and functioning of labor markets. The major portion of the book is devoted to practical applications of manpower planning theory. Various stages of the manpower planning process are presented in step-by-step fashion for an easier understanding of the considerations involved and the objectives of each step. Chapters are devoted to the development of a local manpower policy, the mix and staging of manpower services, the evaluation of local programs, and the politics of planning. An analytical framework, sample forms, and flow charts are provided for analysis of the population account and the accessible jobs account. A glossary and index are included. (Author)

Descriptors—\*Career Awareness, Career Education, Comparative Analysis, Control Groups, Data Analysis, Educational Programs, \*Elementary Education, \*Evaluation Methods, Experimental Groups, Occupational Clusters, \*Program Evaluation, Questionnaires, Teacher Attitudes, Test Results  
Identifiers—Pennsylvania (Edinboro), Project AWAKE

An evaluation made by outside experts was conducted to measure the effectiveness of the nine revised cluster units in Project AWAKE, to investigate the program's progress towards its stated objectives, and to evaluate the methodology employed. Career awareness of students was compared and evaluated through separate tests. Scenes depicting work and nonwork activities were shown to students in K-4, and a career awareness inventory was administered to students in grades 5 and 6. Teacher and administrator attitudes toward the experimental methodology were evaluated through questionnaires and interviews. Participants included an experimental group of 120 students who received instruction in the revised career education units, 120 students who attended schools which utilized career education units but did not receive instruction, and 120 students who attended schools that did not utilize career education units. An analysis of the collected data is presented. It revealed that the experimental class did better than the two control groups in the K-2, 3-4, and 5-6 grade levels. Two-thirds of the document (76 pages) contains appended materials which were used for the evaluation process: the career awareness inventory; administrator, developer, and user questionnaires; grade level concept questions; and related items. Associate Degree Nursing Students in Family Health Maintenance: A Pilot Project.

Dallas County Community Coll. District, Tex.; Texas Education Agency, Austin. Div. of Occupational Research and Development.

Pub Date 73  
Note—15p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Associate Degrees, Community Colleges, Community Health, Course Content, \*Family Health, Home Visits, \*Medical Education, \*Nursing, Pilot Projects, \*Program Descriptions, Program Evaluation, Public Health

The report describes the implementation and continuation of a family health maintenance program for associate degree nursing students at a community college. Four specific objectives are stated supporting the overall purpose of increasing student awareness of the total health care situation of the family. Implementation of the project, which initially involved 100 freshmen students, is discussed and includes procedures for establishment of health agency contacts, family orientation, student orientation, and student assignment to families. Seventy-five students were still enrolled in the project at the end of the first year. Of these, 32 had participated fully and elected to count time spent with families toward clinical experience time. A student need for more direct objectives, and guidance and measures to meet this need, are stated. Program evaluation was planned to include attitudes and personality tests, seminars, and conferences for the freshmen students. The responsibilities of the staff are listed. Also described are the student and faculty activities in the second year and the final evaluation plan which involved a checklist survey and conferences with the project director for students and families. A seminar schedule and student assignment sheets are appended. (MS)

Descriptors—Adult Education, Career Planning, Clerical Occupations, \*Clerical Workers, \*Curriculum Guides, \*Educationally Disadvantaged, Entry Workers, Experimental Curriculum, Instructional Materials, \*Language Arts, Learning Activities, Low Achievers, Minority Groups, Task Analysis, \*Vocational Development

The learning program described is primarily for adults working at entry-level clerical jobs who do not have the language arts, problem solving, or interpersonal skills they need for advancement. The program is suitable for adult continuing education courses, inservice training by business, and educational advancement courses sponsored by community organizations. Information on the development, purposes, implementation, content, and organization of the program is included. An outline chart presents the major clerical tasks divided into entry-level and intermediate level, together with skills and knowledge needed to perform them. This data serves as the framework for developing the curriculum. Three sections of the guide contain goals, learning objectives, performance objectives, learning activities, and instructional materials for the following: the task approach (establishes the relationship between task analysis, job competency, and educational advancement), areas of academic knowledge (problem solving, listening and speaking, writing, reading/vocabulary), and career- and education guidance (experimental section outlining a series of career development workshops). The final section, task-based learning materials, contains teacher, tutor, and student materials for 13 sequenced clerical tasks. A 15-item bibliography concludes the guide. (Author/MS)

Job Training, \*Manuals, Meteorology, \*Military Training, Navigation, Radar, Technical Education

Identifiers—\*Air Controlman, Air Traffic Control, Navy

The Rate Training Manual is one of a series of training manuals prepared for enlisted personnel of the Navy and Naval Reserve studying for advancement in the Air Controlman (AC) rating to Air Controlman Third and Second Class. Chapter 1 discusses air controlman qualifications, the enlisted rating structure, the Air Controlman rating, references which will assist in working for advancement and in performing the duties of an Air Controlman, and information on how to make the best use of the Rate Training Manual. Chapters 2-14 cover the following topics: military aircraft designation and characteristics; Federal air regulations; basic air navigation; flight services; meteorological elements affecting aviation; aviation weather reports and advisories; aids to air navigation; control tower equipment; airport traffic control and airfield equipment; air traffic control communications; IFR/SVFR control procedures; radar and allied equipment and procedures; and publications, records, and security measures. Numerous illustrations, diagrams, and charts are interspersed throughout. The associated Nonresident Career Course (96 pages) for AC 3 and 2 is included. Supplementary material is appended. (BP)

McAfee, Donald C.

[Speculations on Nutrition Education for the Next Generation].

Pub Date 8 Aug 73

Note—16p.; Speech delivered at the Annual Meeting of the Society for Nutrition Education (Atlanta, Georgia, August 5-8, 1973)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—Adult Education, \*Attitudes, Curriculum Design, \*Curriculum Development, Educational Change, \*Elementary Secondary Education, \*Nutrition Instruction, Social Change, Social Influences, Teacher Education, \*Values

Analyzing the changing needs of young people today can be helpful in designing future nutrition education programs. Studies indicate that 40 percent of today's 18-26 year olds have considerably different values/attitudes from past values/attitudes. Technology may determine what is possible, but values and attitudes determine what people will accept. The influence of three major value-teaching institutions, the family, church, and school, has been changing in recent years. Changing family influences include the impact of preschool education, increased numbers of young people leaving home to attend college, and the increased number of working mothers. Decline of the influence of institutionalized religion is reflected in 1971 Gallup surveys of decreased church attendance. Two important changing school influences are the analytical teaching approaches and a new breed of teachers representing a broader spectrum of society than previous groups of middle class teachers. Among numerous other influences are television, the trend toward life simplification, and the growth of consumerism. A relevant, challenging nutrition education curriculum is needed from preschool to adulthood, with greatest emphasis at the elementary level. Professionals must serve as catalysts to make nutrition education basic to school curriculum design and an integral part of teacher training. (EA)

Identifiers—\*College Entrance Examination Board

The harmonizing of occupational development with academic learning is not a passing fad. A primary aim of early 17th-18th century colleges was to supply regions with knowledgeable professional workers. The functional role of education continued to remain strong, as evidenced by the Morrill Act in 1862. The Smith-Hughes Act (1916), however, was an instrument of divisiveness separating the academic and vocational. The Vocational Education Act of 1963 gave new impetus toward reconciling general and vocational education. Its amendments provided many of the major dimensions for career education as did the Educational Amendments of 1972 and 1974. The College Board has responded to evolving laws and practices by providing and offering new dimensions of testing. Currently, the College Board is conducting a study that will include a listing of existing effective career education linkage systems in States, an identification and analysis of the most critical linkage areas, models of career education delivery systems, successful implementation approaches, and legislative recommendations. In conclusion, the career education movement needs liberal arts defenders and vocational/occupational development specialists; the labor/business/industry community; Federal leadership; and the leadership of teachers, professors, and students. Descriptors—Computers, Computer Storage Devices, \*Cost Effectiveness, Data Bases, Electronic Data Processing, Employment Services, Information Storage, Information Systems, Job Applicants, Job Market, \*Job Placement, Management Systems, \*Mathematical Models, Occupational Information, Office Management, \*On Line Systems, \*Simulation

The purpose of the research described in the report is twofold. First, it is to analyze the relative benefits and costs of on-line computerized placement systems. The techniques developed for such an analysis which might be useful in evaluating other manpower programs are presented. Second, it is to provide a prototype model which shows how Employment Service planners and managers could use simulation to better utilize human and machine resources in the placement activity. The demonstration is accomplished in two steps. First, the local office and the placement process are modeled, that is, the underlying dynamics of the system are described. Second, the model is used as the basis for computer simulation of placement-related Employment Service office activity. Recommendations for the use of the tool and for further development are also presented. An example of simulation output and a discussion of random number generation are appended. (Author)

**Identifiers**—Mississippi

The purpose of the study was to determine the degree to which factors other than job skills, in particular mobility and social factors, are important for the success of students from vocational and technical training programs at the secondary and postsecondary levels. Data were gathered from interviews with selected center directors, from teacher observation, and from questionnaires developed for the study and given to students. The State of Mississippi was divided into nine geographic zones in order to secure a representative sample of institutions and participants. Participants in the study consisted of 1,781 secondary vocational students and 2,243 postsecondary vocational students. The social and mobility factors for secondary and postsecondary students in each zone are presented in table form, with discussion, separately according to the type of vocational training program: trade and industrial, technical, business and office, marketing and distribution, and health occupations. State composites of social and mobility factors for secondary and postsecondary students are also presented. Conclusions about each subject area and general conclusions are presented, based on the data collected. (EC)

The document contains the detailed tabulation of the data collected in an investigation of the degree to which social and mobility factors are important for the success of secondary and postsecondary students in vocational and technical training programs. Chapter 1 presents information on the relationship of social competency to mobility factors in the form of 122 5x4 matrices for the nine geographic zones of Mississippi, categorized in the following occupational areas: trade and industry, technical education, business and office, marketing and distribution, and health education. Matrices for each area contain data for secondary and postsecondary students and a zone composite of the students. Matrices are also presented for State composites of each occupational area, secondary and postsecondary students, and a State total for all students. Chapter 2 presents information on the relationship of mobility and social factors to personal and contextual factors. Data were derived from questionnaires completed by students. Mobility and social data are tabulated and discussed separately for secondary and postsecondary students. Twenty-two general conclusions from the study are outlined. The questionnaires used are appended. (Author/EC)

The manual describes the vocational rehabilitation program and services for handicapped individuals that are provided by Goodwill Industries of North Central Pennsylvania, Inc., which services an eight-county outreach area. An introductory section provides general background information regarding program objectives, philosophy, and organizational structure. Goodwill's basic rehabilitation program consists of employment and training through repairing and reconditioning useable clothing and household articles and performing subcontract work. Each client participates in designing his/her own individualized rehabilitation plan. The manual focuses on the intake, evaluation, work adjustment, job readiness/placement, and sheltered employment aspects of the program and provides corresponding definitions and goals, objectives, flow charts, procedures, requirements, and personnel needs. Continuous, on-going evaluation and needs assessment are used to increase the facility's overall performance. A curriculum outline is included for the 11 skill training areas currently being offered: laundry, pressing, automatic shirt ironing; allocation and pricing of soft and hard goods; merchandising/sales; office clerical; shoe repair/orthopedic shoe repair; truck helper; maintenance/custodial; janitorial; appliance repair; machine tool operators; and electronic coil winding. Copies of various agency rehabilitation forms also are included. (EA)

A program to develop career aspirations in middle school students has been implemented in the Philadelphia Public Schools and is entitled "Give Our Children Room to Grow." It utilizes a series of teacher guided projects; dialogues with resource persons from industry, business, and upper schools; field trips; pupil created projects; and hands on activities to expand the students' awareness of the relationship between school, home, community, and jobs. Different aspects of the program are discussed, and include: Focus on Pupils, with manuals and resources materials for teachers and workbooks for students, encouraging informal discussions interrelating education, the individual student, and the world of work; Visitors to the Classroom, including representatives from industrial and commercial establishments, near peers, and those requested by students to serve as role models and to provide occupational information; Career Choice, discussing the influence significant people may have in determining a child's area of interest and touching on educational relevancy; Environments, encouraging thoughts about future communities; and The Self, encouraging verbalization of hoped for personality development. Responses from children participating in the program are included, and it is stated that they are indicative of the value of the program as a motivational educational device. (LH)

**Identifiers**—Pennsylvania (Philadelphia), Room to Grow Program

The career exploration booklet in the Room to Grow series is intended for use in the fifth and sixth grades. Its purpose is to motivate each student to investigate the self and to become aware of and develop individual potentials and abilities.

The booklet may also supplement career development activities in other grades. Each student should have their own copy, and each page of the booklet should be developed and extended by teacher and student activities. The trait-factor theory is utilized to assist the student in becoming aware of individual interests, areas of competency, aspirations, and preferences for working with people, data, things, or ideas. The project, which utilized a series of workshops and supervisory visits to successfully plan a curriculum in the work ethic for grades 4-6, originated in response to a concern expressed by western Massachusetts educators and employers as to the attitudes toward work of their students and employees. The project report includes: (1) project, teacher, and student objectives; (2) a financial statement; (3) list of participants; (4) an introduction which briefly describes project philosophy, participant selection and responsibilities, implementations, and suggestions for continuation; (5) workshop schedules; and (6) a three-page list of materials purchased for the project. The bulk of the document (106 pages) contains detailed teacher developed units for the three grade levels. Teachers involved in the project found they needed to focus on the interrelationships between work attitudes, self-esteem, and the interdependence of individuals. The units are composed of specific self-awareness and career awareness activities with objectives, teaching procedures, and student materials or lists of material sources. The report also contains a project evaluation form for use by the 24 participating teachers and a copy of a brochure describing the project. (Author/MS)

Pretesting Navy Career Information Themes for Audience Interest.

Bureau of Social Science Research, Inc., Washington, D.C.

Spons Agency—Office of Naval Research, Washington, D.C. Organizational Effectiveness Research Program.

Report No—BSSR-450(2)

Pub Date 31 Mar 74

Note—116p.; Not available from EDRS due to extremely small type

Available from—Bureau of Social Science Research, Incorporated, 1990 M Street N.W., Washington, D.C. 20036 (Report Number BSSR450, no price given)

Document Not Available from EDRS

Descriptors—Career Awareness, \*Career Education, Communication (Thought Transfer), Diffusion, \*Information Dissemination, \*Military Personnel, Nonverbal Communication, Pretests, Questionnaires, Radio, Retention, \*Surveys, Tables (Data), Verbal Communication

The study describes the results of a mail survey of a Navywide sample of 7,604 officers and enlisted men conducted to pretest Navy career information themes and messages for interest and predicted exposure. Respondents (83.3 percent of the sample) rated for interest each of 25 messages (approximately one-half print and one-half radio) on a questionnaire form. The principal measures used in analysis were mean scores for individual items and proportion of respondents rating items equal to or greater than 90 (on a scale of 0-100). The data suggested that content is the most important determinant of interest. Overall, officers indicated lower levels of interest and lower predicted self-exposure to both print and radio messages than did enlisted men. Enlisted men tended to rate most highly those items concerning immediately available benefits, particularly those which might increase economic

well being. Officers tended to rate items relating to Navy management and policies more highly. First-term enlisted men who are unlikely to reenlist rated almost every item significantly more negatively than other enlisted men. Percent scores on the items indicated that only a minority of men are likely to read (or listen to) each separate item. (Author/JR)

Learning Disabilities.

Illinois Business Education Association.

Pub Date 75

Note—29p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Business Education, Elementary Secondary Education, \*Learning Difficulties, \*Learning Disabilities, Learning Processes, Mathematics Education, \*Reading Difficulty, Student Motivation, Student Problems, \*Teaching Techniques

The learning disabilities monograph contains five brief articles dealing with various aspects of learning disabilities as they related to business education. "Learning Disabilities: A Challenge for the Vocational Business Educator" (Dorothy Munger) concerns screening students with learning disabilities into rather than out of business education classes. "The Atypical Student in Basic Business Courses" (Robert E. Schick) discusses the various factors which bear on students' learning and which teachers need to consider when locating, diagnosing, and correcting learning problems in basic business classes. "Learning and Reading Disabilities" (Walter B. Barbe and Raymond Swassing) examines the differences between learning and reading disabilities, offers suggestions for helping students with reading disabilities, and discusses the need for providing students with a feeling of success. "Math? Yech:" (Carolyn Brenner) simulates a classroom situation in which the teacher interests students of below-average computational ability in learning to compute, and offers eight suggested ways of fostering computational skills. "Understanding and Teaching the Discouraged Student with Learning and Emotional Problems" (Paul Painter, M.D.) discusses the nature of learning and emotional disorders and the origins and development of learning disabilities, and makes suggestions to classroom teachers for successfully teaching students with such problems. An annotated bibliography is appended. (JR)

The "Right to Read": An Assessment.

Pub Date Sep 75

Note—14p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Adult Education, Adult Literacy, Change Strategies, Community Influence, \*Continuous Learning, Early Childhood Education, \*Educational Assessment, Educational Needs, \*Educational Strategies, Family Environment, Functional Illiteracy, Literacy, \*Literacy Education, National Programs, Parent Education, Preschool Education, Reading, Reading Failure, Reading Instruction

Identifiers—Right to Read

The late commissioner of education, James Allen, proclaimed the "Right to Read" as the educational target of the current decade. The object was to inculcate and improve reading skills among 25 percent of the American population who either lacked or were deficient in them. Has this goal been at least half-way attained? Midway through the 1970's it must be admitted that the goal has not been realized at all. In fact, there is every indication that the situation is actually more severe than was initially posed, and the gaps between readers and nonreaders may actually be widening. The crux of the reading failure syndrome lies in the creation of "conditions for reading" or a "reading environment," implying a need for organized intervention among population groups not attending schools (parents and preschool children). Parents, who must require reading skills in order to function and who are the pivotal factors in the creation of home environments, are those most neglected by organized reading instruction efforts. Reading instruction within the framework of recurrent education is the theme expounded. The target remains vitally desirable; the remedies are in need of alteration. With a fresh look at strategies, "Right-to-Read" is attainable. (Author/AJ)

Descriptors—Agribusiness, \*Agricultural Education, \*Agricultural Occupations, \*Agricultural Skills, \*Occupational Surveys, \*Program Design, Vocational Education

The purpose of the project was to identify a common core of basic skills for agribusiness and natural resources instruction in vocational education. This objective was undertaken through an inventory of 28 tasks and 28 occupational surveys. Completed task inventories were made for 28 representative occupations in agribusiness and natural resources: daily farmer, swine farmer, beef farmer, horse farm hand, grain farmer, forage producer, commercial vegetable producer, farm manager (owner-operator), feed salesman, feed mill worker, bulk fertilizer plant worker, chemical application equipment operator, animal health assistant, agricultural-industrial equipment mechanic, agricultural-industrial equipment set-up and delivery man, agricultural-industrial equipment partsman, tree service worker, floral designer, greenhouse worker, retail landscape and garden center salesman, horticultural firm equipment mechanic (small gas engines), park worker, buildings and grounds foreman, soil conservation aide, sawmill worker, all-round logger, meat cutter, and dairy plant worker. The final report does not include specific findings but discusses briefly project goals, procedures, results, and conclusions. Specific findings relating to each of the occupational surveys of the 28 occupations and findings relating to tasks common within the four taxonomies of agricultural production; agricultural business, supply, and service; agricultural mechanics; and horticulture are all reported separately in related project documents. Occupational information needed for the development of vocational and technical education curricula in agriculture is presented in the report. It discusses the findings of occupational surveys of incumbent workers that relate to the identification of a common core of skills or tasks performed within each of the following vocational education in agricultural taxonomy areas: agricultural production (eight occupations); agricultural business, supply, and service (four occupations); agricultural mechanics (four occupations); and horticulture (four occupations). A total of 1,476 questionnaires were mailed and 720 replies were received. Background information was collected on the total work experience in the occupation, employment at current job, size of business where employed, and preparation for the occupation.

Data are provided for 2,013 task statements in agricultural production; 593 task statements in agricultural business, supply, and service; 1,354 task statements in agriculture mechanics; and 786 task statements in horticulture. The common core of skills for the agricultural production industry was divided into areas of farm management, farm mechanics, animal production, and crop production. Data on the common core of skills are presented in tabular form. Conclusions and recommendations are formulated based on the data obtained from the occupational surveys. A selected bibliography is included. (Author/EC)

To improve vocational educational programs in agriculture, occupational information on a common core of basic skills within the occupational area of the retail landscape and garden store salesman is presented in the revised task inventory survey. The purpose of the occupational survey was to identify a common core of basic skills which are performed and are essential for success in the occupation. Objectives were accomplished by constructing an initial task inventory to identify duty areas and task statements for the occupation. The initial task inventory was reviewed by consultants in the field and 147 tasks were identified. A random sample of 75 retail landscape and garden store centers was obtained. Data were collected utilizing employer and employee questionnaires. Thirty-four questionnaires were returned of which 29 were usable. A compilation of basic sample background information is presented on the size of a retail landscape and garden center, total work experience, employment at current job, and preparation as a retail landscape and garden store salesman. A compilation of duty areas of work performed and work essential for the occupation is given. Percentage performance by incumbent workers and the average levels of importance of specific task statements are presented in tabular form. (Author/EC)

The purpose of the occupational survey was to identify a common core of basic skills which are performed and are essential for success in the occupation. Objectives were accomplished by constructing an initial task inventory to identify duty areas and task statements for the occupation. The initial task inventory was reviewed by consultants in the field, and 214 tasks were identified. A random sample of 75 meat cutters based on the Kroger Company and Cardinal Foods office records was obtained. Data were collected utilizing employer and employee questionnaires. Forty questionnaires were returned of which 38 were usable. A compilation of basic sample background information is presented on size of retail meat market department, total work experience, employment at current job, and preparation as a meat cutter. A compilation of duty areas of work performed and work essential for the occupation is given. Percentage performance by incumbent workers and the average level of importance of specific task statements are presented in tabular form. (Author/EC)

To improve vocational educational programs in agriculture, occupational information on a common core of basic skills within the occupational area of the feed salesman is presented in the revised task inventory survey. The purpose of the occupational survey was to identify a common core of basic skills which are performed and are essential for success in the occupation. Objectives were accomplished by constructing an initial task inventory to identify duty areas and task statements for the occupation. The initial task inventory was reviewed by consultants in the field, and 103 tasks were identified. A random sample of 75 retail feed businesses based on the 1975 directory of the Ohio Grain, Feed, and Fertilizer Association, Inc. was obtained. Data were collected utilizing employer and employee questionnaires. Forty-five questionnaires were returned of which 30 were usable. A compilation of basic sample background information is presented on size of feed business, total work experience, employment at current job, and preparation as a feed salesman. A compilation of duty areas of work performed and work essential for the occupation is given. Percentage performance by incumbent workers and the average level of importance of specific task statements are presented in tabular form. (Author/EC)

Descriptors—\*Disadvantaged Groups, Employer Employee Relationship, Employment Opportu-

nities, \*Employment Services, Federal Legislation, \*Federal Programs, \*Indemnity Bonds, Insurance Programs, Program Design, \*Program Development

Identifiers—Exoffenders, \*Fidelity Bonding

The history of the Federal Bonding Program is traced from the first Bonding Assistance Demonstration Projects to the passage of the Comprehensive Employment and Training Act, 1973. The bonding program provides fidelity bonding for individuals who are normally excluded from insurance policy bonding, including ex-offenders, enabling them to work at jobs for which they would be otherwise ineligible. The program's origins began with the passage of the Manpower Development and Training Act in 1962, with subsequent legislation authorizing the bonding program in 1965. An analysis of program design includes the adoption of the basic program and administrative structure, eligibility criteria, development of a procurement document, the United Bonding Insurance Company's bid, and the negotiation of a contract. Program implementation is traced from the initial site selection through development of reporting systems, expansion to the status of a national program, modification, legislative developments, and funding. Appended materials take up approximately half of the report and contain historical documents, including excerpts from the Manpower Development and Training Act of 1962, Department of Labor documents, materials from State and local employment services offices, and an article on the Federal Bonding Program. This is the first in a series of three documents. (LH)

Descriptors—\*Data Analysis, Demography, \*Disadvantaged Groups, Employer Employee Relationship, Employment Services, Evaluation Methods, \*Federal Programs, \*Indemnity Bonds, Insurance Programs, Participant Characteristics, Program Descriptions, Program Development, \*Program Evaluation, Tables (Data)

Identifiers—Exoffenders, \*Fidelity Bonding

The Federal Bonding Program, providing fidelity bonding for individuals excluded from insurance policy bonding and thus ineligible for certain types of employment, is analyzed. The first section of the document contains a brief history of the program, a discussion of the data analysis approach, a series of 36 summary findings, conclusions, and recommendations. Two basic conclusions state: (1) the program appears to be achieving significant results for some ex-offenders at a relatively low cost, but there are insufficient data to determine program impact estimates; and (2) efforts to pinpoint who is best served, and why, should be made to improve program utilization. Operational characteristics are presented in detail in the second section, and include participant, utilization, and loss information. Data state that 6,655 bonds have been issued to 6,401 individuals, predominantly male, between June 1966 and July 1974. The third section deals with program results extensively, including information on an Illinois Case Study, bondee data, employer data, the insurance industry, and bondee employability. Forty-nine exhibits of tabulated data are included. Eight appendixes present additional information regarding conclusions, data, survey instruments, program descriptions, and Federal government activities. This is the second in a series of three documents. (LH)

Identifiers—Exoffenders, \*Fidelity Bonding

A summary of the final report analyzing the Federal Bonding Program includes an overview, historical summary and analysis, summary of findings, conclusions, and recommendations. The bonding program provides fidelity bonding for individuals who are normally excluded from insurance policy bonding, including ex-offenders, enabling them to work at jobs for which they would be otherwise ineligible. Data analysis, research methodology and objectives, agency nomenclature, data utilization, categories, limitations, and a case study are discussed in the overview. The material in the historical summary and analysis sections is presented in considerably greater detail in Volume 1 of the final report, Program History. The bases for the summary of findings, conclusions, and recommendation sections are presented in Volume 2 of the final report, Program Analysis. The program's origins began with the passage of the Manpower Development and Training Act in 1962, with subsequent legislation authorizing the bonding program in 1965. Two basic conclusions state: (1) the program appears to be achieving significant results for some ex-offenders at a relatively low cost, but there is insufficient data to determine program impact estimates; and (2) efforts to pinpoint who is best served, and why, should be made to improve program utilization. Descriptors—\*Classification, \*Comparative Analysis, Job Analysis, Jobs, \*Military Personnel, \*Occupations, Systems Development

Identifiers—\*Census Occupational Classification, Navy

The Bureau of the Census and Navy occupational classification systems are outlined and examined for the purpose of identifying the civilian occupations which correspond to each Navy rating. The procedures for and problems encountered in matching occupations from the census system (a public information document designed to portray an accurate picture of the labor market) with those in the Navy system (an administrative tool designed to promote effective management of a large organization) are described. The results of the matching are presented in the form of a Navy-Census cross-reference dictionary, to be used in forthcoming analyses involving Navy and civilian manpower problems. The dictionary contains 71 ratings, 45 (64 percent) of which are associated with a single census detailed occupation. The remainder are associated with two or more occupations. An 11-item reference list concludes the report. (NTIS)

Descriptors—\*Academic Education, \*Career Education, Class Activities, \*Course Content, English, Health Education, Languages, Mathematics, Occupational Information, Physical Education, \*Program Coordination, Recreation, \*Secondary Education, Social Studies, Teaching Techniques, Visual Arts, Vocational Development

A product of a conference sponsored by the National Foundation for the Improvement of Education for classroom teachers from national associations representing seven academic areas, the book explores the various relationships between traditional academic disciplines and career education concepts. The book is designed to motivate teachers to include career education as part of their classroom techniques and content and to provide illustrations and examples to implement career education. Interspersed throughout the book are sections of various classroom activities and related occupational information. Individual chapters link career education to mathematics; English; social studies; visual arts; foreign languages; and health sciences, recreation, and physical education. Today's science teacher is faced with developing a scientifically literate population and meeting society's increased need for scientific technicians. Career education in mathematics tends to reinforce and motivate mathematical learning, and English communications skills are vital for work and leisure, while both social studies and career education have intimately related objectives. Career education in art emphasizes the broad functions of a wide variety of occupations; effective career education development in foreign languages implies close contact with guidance personnel. Reorganization of physical education into three separate disciplines has increased the opportunities for career education. (EA)

Identifiers—\*Air Force

The report describes the results of an Air Force occupational survey of the television equipment repair career ladder. A job inventory, administered to 808 job incumbents, consisted of a background information section and a duty-task list designed to assess the relative amount of time spent on tasks performed in current jobs. The resulting summaries of tasks performed by airmen (based on information from 415 incumbents) are tabulated and analyzed according to skill level, experience level, and similarity of tasks performed. The survey results show that the television equipment repair job descriptions generally reflect an accurate picture of the tasks performed by personnel. The job structure of the career ladder presented was determined on the basis of similarity in the tasks performed by the incumbents. Computerized structure analysis produced (1) job cluster groups, (2) independent job type groups, and (3) job type groups within the clusters. Background information on personnel in each of these groups is summarized. Two recommendations for modification of training procedures based on the survey results are included. Appended is a detailed description of all reported job groups. (NTIS)

Performance Tests, Program Development, \*Program Effectiveness, Program Evaluation, Safety Education, Secondary Education, Student Attitudes, Task Analysis, Tests

To determine the effectiveness of a model driver education curriculum in leading to safe vehicle operation among beginning drivers, the Safe Performance Curriculum, based on instructional objectives derived from analysis of the driver's tasks, was developed and pilot tested. Students were randomly assigned to one of the following: a Pre-Driver Licensing (PDL) course (instruction in the minimum requirements for a license), Safe Performance Curriculum (SPC), or a control group (no formal instruction). Intermediate criterion measures of performance, knowledge, skill, and attitude were administered to students in the first two groups. Program effects were measured in terms of curriculum (SPC versus PDL), sex and scholastic achievement level. Evaluation of knowledge and performance measures indicated a general trend toward higher scores by the SPC students, by students in the upper half of their class, and by male students. Recommendations are for further revision of the intermediate criterion measures and for a followup study. Appended material (158 pages) includes program test forms (with administration procedures and answers), SPC unit test results, basic skills range test analysis of variance source tables, and project staffing requirements. Descriptors—\*Caseworkers, Communication Skills, Counselor Attitudes, Counselors, Course Content, Course Descriptions, Group Experience, \*Physically Handicapped, \*Public Support, Role Perception, Self Directed Groups, Social Workers, \*Team Training, \*Vocational Rehabilitation

The set of five self-training modules was developed as a companion document to the Institute on Rehabilitation Services study on rehabilitation of disabled public assistance recipients. The training sessions were designed primarily for use by teams working together in this priority area, especially at the level of the counselor/social worker teams. They cover: problem identification, information/communication, client centered systems (use of decision making and feedback), evaluation/planning for service delivery, and personal attitudes/values. Although self-administered, the modules are meant for group use while the team is being trained. Each person responds to a set of questions and the differences in response demonstrate role differences within the team, thereby helping to sharpen concepts of roles and their interplay. Differences in viewpoints about service delivery help members of the team to begin to understand one another. The report provides suggestions on how team supervisors might use the course, and lists materials needed for it. Each of the five sessions takes three hours of student group time. It is recommended that the sessions be spread over several weeks so there will be assimilation time between sessions. (NTIS)

The paper was developed as part of a series on the employment outlook for graduates in various fields of study. The goals of home economics which reflect its commitment to the family and to the interaction between man and his environment are briefly described. Trends influencing the demand for professional home economics are presented. The trends involve: growth of the labor market, opportunities in industry and business, the growth of consumerism, the need for services including day care, the need for higher education (especially for doctoral and master's degree graduates), and the increase in the number of graduates. The career outlook for graduates in nine specialty areas is detailed. These areas are (1) business, communications, journalism; (2) child development, family relations; (3) extension, welfare, community service; (4) foods-nutrition, dietetics; (5) housing, equipment, home management, family economics; (6) home economics education; (7) institutional, hotel, restaurant management; (8) environmental art, interior design; and (9) textiles-clothing merchandising. The report concludes with a statement of the need for long-range planning to meet future societal needs. Appended are two charts containing employment figures for dietitians in the southern region of the United States. (Author/MS)

Identifiers—Air Force, \*Avionics

The Avionics Instrument Systems career ladder (AFSC 325X1) provides flight line and shop maintenance training on aircraft instrument systems, electromechanical instruments, components, and test equipment. Duties involve inspecting, removing, installing, repairing, operating, troubleshooting, overhauling, and modifying systems such as flight and engine instrument systems, flight data recorder system, central air data computer (CADC) systems, flight director indicating systems, gyro/magnetic compasses, clocks, pressure, temperature, and liquid and torque indicating systems. A wide variety of instruments is maintained on all types of aircraft stationed world-wide. This results in the performance of a rather large number of tasks by personnel in DAFC325X1. If a decision is made to combine the 325X1 with 325X0, some compensating reduction in workload should be provided. (NTIS)

Descriptors—Educational Policy, Health Personnel, Labor Supply, Manpower Development, \*Manpower Needs, Occupations, Policy Formation, \*Prediction, \*Research Methodology, \*State of the Art Reviews

The study is an evaluation of the utility of manpower forecasting in the United States as a basis for manpower, education, and health policy. It examines the methodology employed and the scope of analysis in nearly 400 forecasts made in the period 1965-73. It assesses the adequacy of the theoretical and empirical knowledge base for forecasting in three analytic areas: the forecasting of sector outputs, the estimation of human resource input requirements, and limitations of occupational classification systems in specifying the relationship between manpower requirements and supply systems. The study concludes that the major limitation on the current state of the art is conceptual and institutional, and improvements in the knowledge base are not sufficient to policy needs. It suggests an agenda of institutional and empirical research for this purpose. (Author)

Descriptors—Academic Achievement, Academic Aspiration, \*Career Choice, Career Planning, \*College Choice, Decision Making, Economic Factors, Educational Background, \*Educational Opportunities, Factor Analysis, Family Influence, High School Curriculum, \*High School Students, Occupational Choice, Performance Factors, Post Secondary Education, Social Factors, \*Socioeconomic Influences, Student Characteristics, Surveys

Identifiers—ACT, American College Testing Program, Kentucky

The report is a response to Kentucky Higher Education Assistance Authority's concern about limiting factors which constrain students' choices of paths to follow after leaving high school, specifically unacceptable factors that prohibit students (1) from pursuing postsecondary education and (2) from entering postsecondary institutions of their choice. Not causal factors, limiting variables simply place some boundaries on students' educational and career futures. Information about the educational background, future plans, parental economic status, and other factors which influence students' decisions was gathered through an American College Testing Program (ACT) 121-item questionnaire administered to a 10 percent random sample of Kentucky high school juniors and seniors in 1973. The results of the survey data analysis are reported and discussed with reference to each of the two types of decisions. The decision to enter postsecondary education was found to be related to: students' high school curriculum program, their high school average, their expected postsecondary education cost, and their family's annual income. The many findings concerning relationships of factors limiting the institution-choice decision include the discovery of wide disparities between expected and actual costs of postsecondary education, and between expected and computed parental contribution. Descriptors—Counselor Training, Employee Attitudes, \*Job Satisfaction, Job Tenure, \*Labor Turnover, Need Gratification, Organizational Climate, \*Professional Personnel, \*Rehabilitation Counseling, Relocation, Self Actualization, \*Vocational Counseling, Work Attitudes, Work Environment

Identifiers—\*Vocational Evaluators

The project for which the document is the final report began with concern over rapid turnover among vocational evaluators in rehabilitation facilities. The job turnover problem was analyzed according to the Minnesota theory of work adjustment. Resulting data suggest that vocational evaluators who change jobs do so because of dissatisfaction with extrinsic factors such as organizational policies and compensation, and that change of supervisory practice is needed at least as much as change in training or functions of the evaluators. Document Not Available from EDRS

Descriptors—Careers, Employment, Females, Income, \*Labor Market, Males, Negro Employment, Negroes, \*Racial Discrimination, \*Salaries, \*Sex Discrimination, Statistical Analysis, Tables (Data), \*Young Adults

The study uses a multiple-equation model of earnings determination to assess and measure the impact of labor market discrimination according to race and sex. Focusing on full-time, nonresident workers 18-25 years of age in 1968-69, the observed intercolor and intersex wage differentials are decomposed according to their sources. While less than one-fourth of the black/white differential is attributed to current labor market discrimination, more than nine-tenths of the sex disparity in hourly earnings is attributed to discrimination. Although young black women are found to be doubly victimized, their sex seems to be the greater handicap. These conclusions and others are in accord with the limited prior research in the area. stration Projects, Educational Finance, Elementary Education, Grants, Information Dissemination, Minority Group Children, \*Minority Groups, Negro Businesses, Out of School Youth, \*Program Development, Secondary Education

The overall objective of Subcommittee No. 3 of the Implementation Task Force on Education and Training for Minority Business Enterprise was to effect actions required to implement two recommendations in the final report of the initial task force. The two recommendations were: (1) to establish a minimum of 12 pilot programs in entrepreneurial career awareness and training for minority youth at the elementary and secondary levels and for youth outside the established school systems, and (2) to establish a minimum of six pilot programs in entrepreneurial career awareness and training for adults. The document contains a suggested plan for implementation, or timetable, for fiscal year 1975-76; a two-page discussion of sources for funding; a chart providing detailed information on projects already funded in 1975, with five pages of supplementary information; and a three-page discussion of the prospects for institutionalization of Subcommittee No. 3 programs, which are all pilot, or demonstration, programs. Some provisions which have already been made to assist these programs in continuing beyond the life of the current or pending contracts or grants are recounted, and efforts being made toward information dissemination are described. Attitudes on En Route Air Traffic Control Training and Work: A Comparison of Recruits Initially Trained at the FAA Academy and Recruits Initially Trained at Assigned Centers.

Civil Aeronautical Inst., Oklahoma City, Okla.

Report No—AD-A013-343; FAA-AM-75-3

Pub Date May 75

Note—39p.

Available from—National Technical Information Service, Springfield, Virginia 22161 (Order No. AD-A013-343; MF \$2.25, HC \$3.75)

Document Not Available from EDRS

Descriptors—Dropouts, Educational Facilities, Educational Programs, Females, Job Satisfaction, \*Job Training, Males, Professional Training, Questionnaires, \*Surveys, Tables (Data), \*Trainees, \*Work Attitudes

Identifiers—\*Air Traffic Controllers, Attrition, Federal Aviation Administration Academy

In the comparison, questionnaires concerning aspects of training-related and work-related attitudes were sent to 225 Air Traffic Control (ATC) trainees who represented groups of attritions and retentions in two En Route training programs; viz, programs that provided basic training at the FAA Academy and programs that provided basic training at the trainees' assigned facilities. The return rate on the questionnaires

was 82.7 percent. Data from both groups generally support previous findings regarding sources of differences in work attitudes between sexes and between attrition-retention groups. The most frequent recommendations for change involved facility training and facility instructors; modifications in the pace of training were also recommended frequently. (NTIS)

**Development of Criteria for Evaluating Consumer Education Programs and Curriculum Materials.**  
Pub Date 72  
Note—69p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
Descriptors—Academic Standards, \*Consumer Education, \*Curriculum Guides, Educational History, \*Educational Programs, \*Evaluation Criteria, Home Economics Education, Literature Reviews, \*Program Evaluation, Standards

The history of and case for public school consumer education is made in the document's opening chapters; a literature review reveals emphasis on need and program implementation, with very little emphasis on criteria for program evaluation. Standards and a rating scale developed by the author to evaluate and compare consumer education programs and curriculum guides are presented and subsequently applied to several programs and guides; the criteria are based on the author's personal experience and on recommendations from experts as expressed in the literature. Consumer education programs are evaluated in four areas: implementation, involvement, pupil exposure, and instructional program. Curriculum guides are rated according to their implementation suggestions, rationale and general objectives, content, and resource materials. The standards require meaningful ideas that are broad enough to be used in a variety of situations, as well as specific content and resources. The selected consumer education programs evaluated with reference to the criteria are Lincoln High School, in Yonkers, New York, and the Westborough and Newburyport, Massachusetts, public schools. Only partial use of the instrument was made, as the evaluations were based only on written program descriptions. The curriculum guides evaluated are the New York Department of Education's and the President's Committee Guidelines. (Author/AJ)

In developing a project to increase the effectiveness of service delivery systems to ethnic minority groups, the cultural orientation and needs of the minority community must be addressed. Cultural and historical barriers to service delivery exist in the Japanese American community which result in under-utilization of services. To meet this problem, the project addressed itself to two barriers: (1) the incongruities of service delivery systems and (2) the marginal status of handicapped consumers. Also explored were: (1) the viability of the formation and utilization of ethnic self-help models as a methodology for servicing ethnic minority communities and (2) whether the intermediate use of an ethnically homogeneous group in service delivery would heighten consumer receptivity and enhance consumer identification. The project demonstrated that an institution would be created to serve

several purposes in assisting the ethnic handicapped towards self-reliance and facilitating a more effective delivery of services from public service agencies. A detailed research utilization strategy and a 12-item selected bibliography are included in the report. Appended are reports, a seminar agenda, testimony transcript, and examples of articles related to the project. (Author/MS)

Descriptors—Aircraft Pilots, Curriculum Development, \*Data Collection, \*Flight Training, \*Learning Processes, Performance Based Education, Program Improvement, \*Statistical Data, Statistical Surveys, Task Analysis, \*Task Performance

Identifiers—Air Force

The objectives of the study were: (1) to determine the number of training task repetitions required for an Undergraduate Pilot Training (UPT) student to become proficient, and (2) to determine the total number of task repetitions that UPT students receive for each maneuver in T-37 and T-38 training. The project was conducted in two parts. Study 1 involved the development of data collection procedures which could be used in an operational UPT program and the initial application of these procedures. Problem areas identified in this effort resulted in procedural revisions which were implemented in study 2. The data collected on recording cards from UPT students (46 in study 1 and 75 in study 2) were analyzed to provide the following descriptive statistics for each task in a specified training phase: mean, standard deviations, medians, modes, and ranges. The results for both studies are presented in summary tables in Appendix A and Appendix C (marginally reproducible in microfiche). Conclusions and recommendations relate to the usefulness of the data to the Air Training Command for UPT syllabus development. Other appended material includes a list of T-37 and T-38 maneuvers and sample data collection cards. (Author/MS)

The report of a national conference to present material for training public assistance and vocational rehabilitation staffs in cooperative efforts to enable disabled recipients of public assistance to become self-supporting is divided into two main parts. The first part deals with Public Assistance/Vocational Rehabilitation (PA/VR) policies and practices and includes material on: the Maryland PA/VR project, joint services, use and design of the joint form, other cooperative measures, case finding, and job placement. The second part, barriers and issues, covers the following subjects: behavior disorders, child care

services, implications of the Work Incentive Program (WIN), joint case counseling and reporting, and program assessment. Informal surveys and discussions carried out by a planning committee of Federal, State, and local leaders and Research Utilization Laboratory staff identified training needs from which specialists drafted materials for the conference. Appended material (46 pages) includes conference agenda and participant list; chart of Federal allocation for social services; examples of joint forms; screening, selection, and referral procedures; income disregards; WIN materials; list of PA/VR training materials; proposed outline for joint training; instructions for preparing a slide tape program; VR public information; and guidelines for working with news media. Descriptors—\*Accounting, Evaluation Methods, \*Job Skills, \*Military Personnel, Occupational Surveys, Personnel Evaluation, Supervisors, Supervisory Training, \*Task Analysis, Vocational Development, \*Work Experience

Identifiers—Air Force

Air Force research has identified 254 highly rated journeyman-level tasks, out of a potential 683, in the career field of Accounting and Finance, and has evaluated the extent to which 1,261 first line supervisors in this area have had experience in these tasks. Two seven-skill level specialties within the career field, General Accounting (67131/51) and Disbursement Accounting (67133/53), were studied. Research methodology involved three phases: (1) occupational analysis of two previous job inventory studies of the two specialties, including a job inventory by job incumbents and work experience information regarding supervisors; (2) identification of task importance by supervisors, with supervisors rating tasks in the area where they had the most experience; and (3) evaluation of supervisory career work experience in journeyman-level tasks. Results indicate that the present accounting and finance management structure may be too broad for a supervisor to gain sufficient experience on all required work activities. A system of career work area rotation of assignments is suggested as possibly leading to improved career development of the supervisors. Five tables supplement the discussion and extensive data regarding the percentage of career work experience on desirable journeyman-level tasks is appended. (LH)

Identifiers—California (Palo Alto), Fire Captains

The assessment laboratory is a full-day program devoted to evaluations of the candidates during various exercises. The test involves participation by the candidates in an in-basket exercise; a leaderless group exercise; a 5-minute oral presentation; an unstructured group discussion requiring

solutions and consensus; and one requiring recommendations and consensus. The exercises were designed to elicit certain behavioral characteristics which were predetermined to be essential for success as a fire captain. The candidates' demonstrations of these characteristics were rated by specially trained raters. (NTIS)

Identifiers—California (Palo Alto)

The assessment laboratory function is supplementary and subsequent to the usual mass testing procedures. It is designed to elicit information not furnished by older more traditional methods, e.g., assessment of personal attributes, communication skills, etc. The exam involved participation by the candidates in both individual and group exercises. The individual exercises included a 5-minute oral presentation; the assembly of a fire hydrant, hoses, and nozzle; a multiple choice test on the identification of tools; and the writing of a report. Group exercises included small group interaction, an unstructured group discussion requiring solutions to a variety of problems, and a leaderless group experience requiring the reproduction of a model. All candidates were given a presentation by the department training officer followed by a written examination on the material offered. (NTIS)

Descriptors—Academic Achievement, \*Admission Criteria, \*Educational Programs, \*Military Personnel, Military Training, Multiple Regression Analysis, \*Physicians Assistants, \*Predictor Variables, Statistical Studies, Success Factors

Identifiers—\*Air Force

The efficacy of a variety of selection measures in predicting successful performance in Air Force physician assistant training were investigated. Variables identified for the analysis of 51 subjects (graduates of the Air Force program) were: Scholastic Aptitude Test (SAT, combined verbal and mathematics composites), Airman Qualifying Examination (general aptitude index), college semester hours, age, total active military service, class rank, basic science grade average, clinical grade average, basic science test score, patient management problem test score, National Board of Medical Examiners/Physician Assistant Certification Exam, and several scores derived from averaging scores from some of these measures. The results of multiple linear regression analysis, presented in tabular form and briefly discussed, indicated that the SAT, combined verbal and mathematics composites, could be usefully added to the existing prerequisites for entry into training. A mandatory minimum SAT score of 900 was recommended. (NTIS)

Descriptors—\*Career Change, \*Career Choice, College Majors, \*College Students, Dentists, Enrollment Influences, Enrollment Rate, \*Enrollment Trends, Followup Studies, \*Health Occupations Education, Higher Education, Longitudinal Studies, Medical Education, Medical Laboratory Assistants, Nurses, Occupational Aspiration, Physicians, Student Characteristics, Therapists

Highlights of the findings from a three phase study are presented in the report. Data were drawn from annual surveys, beginning in 1966, of the entire entering freshman classes at a national sample of higher education institutions and from followup studies, at subsequent intervals, of smaller subsamples of the same students. The growing popularity of the health fields of study, gains and losses in specific fields, and the impact of changing enrollment patterns are described. Health career aspirants are compared to non-health aspirants, and trends in the characteristics of health aspirants over a six-year period are identified. Patterns associated with stability in recruitment to, and defection from a major in the health fields are focused on in reference to health majors. A final section profiles aspirants to specific health careers (physicians, dentists, nurses, laboratory technicians, and therapists) with emphasis on those who planned to become physicians. The report concludes that such factors as demographic attributes, socioeconomic backgrounds, academic ability, self-image, values, and institutional characteristics play an influential role in student choices of probable major, actual major, career, and specialty within a career. Appended are selected statistical tables (24 tables) for each of the study's three phases. (Author/MS)

Handbook on Implementing Vocational Education Special Needs Programs.

Alabama State Dept. of Education, Montgomery. Div. of Vocational Education and Community Colleges.

Pub Date [75]

Note—34p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Disadvantaged Youth, Educational Facilities, \*Guidelines, \*Handicapped Students, Instructional Programs, Program Administration, Program Evaluation, Records (Forms), \*Special Education, Special Programs, Teacher Qualifications, \*Vocational Education

Identifiers—Alabama, \*Special Needs Programs

The handbook presents a series of implementation suggestions for vocational education special needs programs generally, and in Alabama. Special Needs Programs for Disadvantaged Students defines the term disadvantaged student and provides criteria for their identification, with form information. Special Needs Programs for Handicapped Students lists 10 handicapping conditions and provides form information. Vocational Teachers for Special Needs Classes describes certification and personality requirements for working in such programs. Facilities discusses the need for maximum accessibility and usability by the students. Evaluation stresses the need for continuous evaluation of the program in terms of individual student progress and overall program effectiveness. The terms of the Cooperative Agreement with Vocational Education, Vocational Rehabilitation and Crippled Children and the Program for Exceptional Children and Youth in the Coordination of Services to the Handicapped in Alabama are presented in full. Plan for Assuring Vocational Education for Disadvantaged and/or Handicapped Students provides guidelines and necessary State form numbers. Policies and Procedures for Conducting Special Needs Programs in Alabama cover the responsibilities of the State coordinator and supervisors, and district supervisors. The forms used in Alabama are appended. (LH)

Identifiers—\*Management Information System Occupational Educa, MISOE

The document is a guide to the products developed, adopted, and/or adapted by the Management Information System for Occupational Education (MISOE), a major development effort to improve the policy-making function at the State level, undertaken in Massachusetts in 1971 and ended in 1975. MISOE sought to combine three large data sets (a census data system, a longitudinal sample data system, and an ex post facto data set) on a single computer with interactive capability, bringing to the policymakers' fingertips a range of psychological, economic, and demographic data and providing them with a knowledge base for "parametizing" forecast models. Designed primarily for secondary education, the system is considered to be generalizable to postsecondary and adult education. MISOE developed and/or organized a substantial number of tools required to implement a comprehensive management information system; the paper describes these and cites sources for full documentation. The guide assumes familiarity with the general MISOE structure in its references. (Author/AJ)

Identifiers—\*Management Information System Occupational Educa, MISOE

The journal describes the Management Information System for Occupational Education (MISOE), designed to provide computerized information support capability for State level occupational education planning. An introductory chapter presents a guide for reading the publication. The second chapter describes basic components and terminology and outlines the conceptual structure of inputs, process, product, and impact. Chapter 3 briefly outlines the important information types of the census data systems which provide minimum information for statewide management of occupational education. The sample data systems which provide information necessary for policy development are presented in chapter 4. The economics of public investment in education and MISOE cost analysis systems are discussed in chapter 5. Chapter 6 describes interactive computing systems and the flexibility of MISOE data files. Interacting with MISOE data, operations, and output indices is the subject of chapter 7. Planning for occupational education using MISOE is dealt with in chapter 8. Educational policy and system dynamics are described in chapter 9. The final chapter offers assessments of MISOE from the professional perspectives of a State manager of occupational education, an educational researcher, and an economist. A two-page reference list and brief notes about the 10 contributors conclude the journal. (Author/MS)

Identifiers—Management Information System Occupational Educa, Massachusetts, MISOE

A study of underemployment, written as part of the development of a management information project (MISOE) for the Division of Occupational Education of the Department of Education in Massachusetts, the work represents the beginning of an effort to bring systematic, empirically based policy analysis to bear on problems of occupational education. The essay concerns the dynamics of social stratification and the labor market in the Commonwealth, addressing two issues: (1) What are the determinants and consequences of occupational educational stratification in Massachusetts? (2) To what extent can extreme occupational inequalities be reduced by various purposeful social policies? Following a brief introduction and a discussion of methodology, an analysis of the empirical foundation of the study of educational and occupational stratification occurs, in discussions of theory and model structure. The model generates a 40-year time history; during the simulation, the period 1960-2000 is traversed in one-year intervals, given initial conditions. The model is self-regulating. The curves in graphs provided are computer plots showing the behavior of selected system variables as generated through time by the simulation model; sequentially numbered equations required to run the program are included. Twenty-five pages of variable definitions are appended. (Author/AJ)

Descriptors—Employment Projections, \*Hypothesis Testing, Job Market, Management Information Systems, \*Mathematical Models, Models, Program Development, \*Program Planning, \*Simulation, Student Interests, Systems Approach, \*Vocational Education

Identifiers—Management Information System Occupational Educa, MISOE

The paper presents a speculative model of the growth and development of an occupational education program as it responds to changes in student interests and job market conditions. Informal discussions with the directors of several occupational schools in Massachusetts provided the base for the model. Intended as a tool for educational managers, to stimulate new thinking about policies and practices, the model can be described in precise mathematical terms, so that computer simulation can be used to test various policies and hypotheses. Not a detailed description of any single program, the discussion emphasizes aspects of all such programs important for an understanding of any single program. The model is experimented with, using different potential employment curves, and the response is

shown for each of three possibilities. The study is framed in the system dynamics methodology of Jay W. Forrester, explained in the appendix, where a precise mathematical formalization of the assumptions discussed is given. (Author/AJ)

Identifiers—Management Information System Occupational Educa, MISOE

The paper, one of a series written as the Management Information System for Occupational Education (MISOE) was conceptualized, examines relationships between the anticipated census and sample data to be developed and maintained by the system. Two related information sources are planned: one is a census information system which includes data about every occupational education program in every school in every city and town in Massachusetts, and the other is a sample information system by occupational programs, stratified over school-type, geographical setting-type, and student characteristic-type dimensions currently operative in the State. The types and purposes of the census and sample data to be collected and maintained are described. The descriptive data (input information, process information, product information, and impact information) and analytical data (cost accounting information, process product data, cost product information, product impact information, process impact data, and cost impact data) included in the sample data system are discussed at length, defining each type and showing how each data type is related to the census. (The author suggests that Monograph Number 1, which is available as ED 062 553, be read in conjunction with this paper.) (Author/MS)

Identifiers—Input Process Product and Impact Model, IPPI Educa, IPPI Model, Management Information System Occupational Educa, Massachusetts, MISOE

The paper described the Input, Process, Product, and Impact (IPPI) model in preparation for a 1972 Management Information System for Occupational Education (MISOE) planning conference. The IPPI model is designed (1) to provide a structure for integrated State and local decision-making within occupational education and for decision-related descriptive information which accounts for reality by decision types within the model, and (2) to provide a framework for analysis of relationships between inputs and process with product and impact. The system also permits decision-makers to simulate the interactive effects of the total system over time. The model describes the totality of occupational education; links to the larger world occur with input and impact. The paper establishes

some differentiations, distinctions, and definitions, and thereby provides a structure for project development which not only stipulates developmental tasks, but ties consultants and staff to development in a functional way. Eight tasks are described in the paper, related to space differentiations, variable selection, instrumentation, the sample, the information system, analysis types, simulation, and other information needs. The final section of the paper suggests an integrated procedure for task development, including a schedule for the planning conference. (Author/AJ)

Identifiers—Management Information System Occupational Educa, MISOE

The developmental paper, one of a series written as the Management Information System for Occupational Education (MISOE) was conceptualized, is a first attempt to picture the computer system necessary to carry out the project's goals. It describes the basic structure and the anticipated strategies of development of the computer system to be used. Three major subsystems are discussed: the data entry subsystem (processing raw census and sample data organized into input, process, product, and impact data types), the analysis subsystem (performing second level and contingency analyses), and the optimization and forecasting subsystem (providing decision-making tools through mathematical and simulative analyses). The use of computer simulation as a decision-making tool is discussed in some depth. System development in two phases is outlined. All figures supplementing the text are placed in the appendix. Descriptors—Classification, Decision Making, \*Information Processing, Information Retrieval, Information Storage, \*Management Information Systems, \*Models, Research Design, \*Vocational Education

Identifiers—Input Process Product and Impact Model, IPPI, \*IPPI Model, Variables

The paper develops a suggested model of process space for the Input, Process, Product, and Impact (IPPI) model of vocational education. Part 1 presents the need; Part 2 develops a schema for classifying process variables (human, physical, and organizational); their interactive nature is reflected in a dual classification system which enables users to get at process variable information in two ways: each variable in the process space is referenced by a causal decisional factor and a learning-occurrence factor. A total of four hierarchical process levels (State, and three local levels) are identified for discussions of these factors. In summary, the process space is conceived of as an interactive two-dimensional

entity divided vertically into three columns of process factors and horizontally into four hierarchical levels. In Part 3, the use of a numbering system for process space is explained, and in Part 4, a system is suggested for classifying and storing process information. An index to be compiled for users of the system, for retrieval of process information, is described in Part 5. Most information contained in the model will be provided by a representative sample of vocational education schools and programs; census data will also be included, minimally. (Author/AJ)

Identifiers—Generalized Management Information System, GMIS

The report presents the underlying software architecture and rationale of the Generalized Management Information System (GMIS), along with a sample demonstration (an energy analysis problem) of its characteristics and a summary of topics of continuing research. The field-tested experimental system has the following features: It allows on-line interactive data management as well as a batch facility; allows for storage of large quantities of various types of data; and allows the changing of data, addition of new data series, and modification of tables. It gives the user a simple and consistent view of the way data is stored in the system, permits several users to select and access data according to many criteria, allows for easy viewing of data, and contains facilities for validation of data. The system provides facilities to interactively change data protection, is able to store data about data, provides a mechanism for assuring the integrity of the data, and provides mechanisms for monitoring and tuning performance. The system provides the user with an efficient, flexible environment to specify, construct, and execute statistical analyses and model studies, and to produce the associated plots and reports. (GMIS is being exercised for MISOE application.) (Author/AJ)

Identifiers—Collaborative MISOE, Management Information System Occupational Educa, MISOE

The report was prepared by a member of the staff of the Management Information System for Occupational Education (MISOE). It constitutes a clear and precise statement of the tasks required to establish a "laboratory MISOE," as described in the Journal of Research and Development in Education (Winter 1974), to accomplish the purposes of "Collaborative MIS-

OE." Collaborative MISOE's major goal is to provide a "real time" experience for MISOE developers and occupational education policy-makers such that future development of interactive computer systems designed to facilitate improved policy can be based on human experience. The report specifies clearly the alternative required to accomplish this goal. MISOE was a major development effort to improve the policy-making function at the State level, undertaken in Massachusetts in 1971 and ended in 1975. MISOE sought to combine three large data sets (a census data system, a longitudinal sample data system, and an ex post facto data set) on a single computer with interactive capability, bringing to the policy-makers' fingertips a range of psychological, economic, and demographic data and providing them with a knowledge base for "parametrizing" forecast models. Proposals for the adaptation of existing systems to MISOE's needs and discussion of these proposals is included. (Author/AJ)

Identifiers—Management Information System Occupational Educa, MISOE

The impact battery consists of two instruments used to obtain impact data (descriptions of the experiences of program completors during post-program life) for the Sample Data Systems of the Management Information System for Occupational Education (MISOE). The first, Massachusetts Educational Impact Instrument (MEII), is an 11-page extensive inventory to be completed by the former student. Questions concern the respondent, his life-style, and his working career. The instrument also develops information about a variety of State services, the respondent's attitude toward education and whether or not he is continuing his education in some form, and military service experience. Finally, the MEII asks permission of the respondent to contact his or her supervisor on the current or most recently held job and to provide the name and address of that supervisor. The supervisors are contacted by way of the second impact instrument, the Massachusetts Job Evaluation Inventory (MJEI). This two-page form seeks some information about the rater and asks for a job rating of the former student in general and specific terms. Also included in the battery is a two-page guidance department reporting form which seeks subject and performance data from the student's secondary instructional program. (Author/MS)

Identifiers—Management Information System Occupational Educa, MISOE

The paper describes the instruments and procedures for collecting process information (information describing components of the planned educational process) for the Management Information System for Occupational Education (MISOE). The selection of variables and the decision to assess interactive rather than isolated process variables are discussed. The three process batteries, groups of self-report questionnaires, are reviewed with a listing of the instruments included and a description of the variables measured by them. The batteries and the instruments in them are: the Teacher Process Battery (Massachusetts Occupational Education Teacher Survey, Teacher Program Questionnaire, Image of Vocational Education Questionnaire, Purdue Teacher Opinionnaire, Verbal Reasoning Scale of the Differential Aptitude Tests, and Planning Activities Sheet for Teachers and Administrators), the Administrator Process Battery (Massachusetts Administrator Inventory, Image of Vocational Education Questionnaire, Verbal Reasoning Scale of the Differential Aptitude Tests, and Planning Activities Sheet for Teachers and Administrators), and the Student Process Battery (Student Program Questionnaire and School Sentiment Index). An item by item analysis of the variables and factors measured by the three batteries is presented in tabular form. The research design and recommendations for future investigations are outlined. General guidelines for administering the batteries are provided. The instruments are not included. (MS)

Identifiers—Management Information System Occupational Educa, MISOE

The document contains optical scannable forms for some of the instruments in the Input and Process Batteries, and guidelines for administration of the instruments in the Input Batteries of the Management Information System for Occupational Education (MISOE) Sample Data Systems. Input information describes the characteristics of the students at entry point into the program. Process information describes components of the planned educational process. The forms include: the cover sheet, student master identification form, Planning Activities Sheet (P.A.S.T.A.), Massachusetts Pupil Inventory (M.P.I.), Massachusetts Adult Level Pupil Inventory (M.A.L.P.I.), Program Questionnaire, School Sentiment Index (S.S.I.), Survey of Study Habits and Attitudes, Teacher and Administrator Master Identification Form, Survey of Interpersonal Values, Massachusetts Occupational Education Teacher Survey and Image of Vocational Education Survey (M.O.E.T.S.), Attitudes Toward Vocational Education in High School, Teacher Opinionnaire, Massachusetts Administrator Inventory, and Student Master Identification form update. Detailed guidelines for the administration of the two Input Batteries describe the type of students each is to be administered to, room requirements, proctors, students, distribution and collection of test materials, necessary supplies, and scheduling. A final section outlines the cost of administering the Input and Process Batteries. (Author/MS)

Identifiers—Management Information System Occupational Educa, MISOE, Sample Data System, SDS

The report specifies the design of the data entry system for the Sample Data System subsystems (SDS-1 and SDS-2) providing connectivity to meet previously specified purposes and functions of the Management Information System for Occupational Education (MISOE). General assumptions for specifying the SDS data entry system are stated including the important assumption that initial processing of information be done by optical scanning using an OPSCAN-100 (Digitek) and 24K Honeywell computer system. General specifications for operational MISOE files interfacing the analysis system are presented, with the file identification-descriptor system designed to ensure connectivity of MISOE components. The specifications for the individual file types as they are developed longitudinally are also given. The general considerations for moving from available instrumentation to operational MISOE SDS files are presented using flow charts and accompanying text to provide an overview of the SDS data entry system. More precise specifications of optical scanning and of the data entry operations for the individual pieces of data entering the system from the following batteries are provided: student input, student process, student product, impact, teacher, and administrator batteries. Identifiers—CDS, Census Data System, Management Information System Occupational Educa, MISOE

The MISOE Census Data System (CDS) is one of two major subsystems of an integrated management information system (MISOE), which was developed to provide occupational education managers with comprehensive data on which to base rational management decisions. Essentially, CDS contains descriptive information systematically structured in a manner which allows it to be used as a basis for sampling evaluative research studies. CDS collects and stores census data for all school systems offering occupational education programs, including all data formerly collected by the Annual Federal Report for Occupa-

tional Education, except followup data, which is included in the Sample Data System (CDS). The publication contains an introduction to the census data system, describes concepts that are essential to its understanding, and provides step-by-step instructions for the reporting of information in the CDS reporting booklets. The concepts described are indigenous to CDS and provide solutions to problems historically encountered in the design of management information systems for education. They include a systematic means of accurately describing occupational education programs, a unique system of terminal performance objectives (TERMOBS), and a program cost-estimating process that circumvents major objections heretofore raised to program budgeting systems. Identifiers—CDS, Census Data System, Field Testing, Management Information System Occupational Educa, Massachusetts, MISOE

The document describes the process and presents the results of a field test of the Management Information System for Occupational Education (MISOE) Census Data System (CDS) Fall Reports. The data system was designed to collect and store basic census data (mandated State and Federal) for all occupational programs in Massachusetts and to meet all of the current data requirements of the Division of Occupational Education, including the Annual Federal report. CDS structure related programs, enrollments, and costs (input information) to job-entry skills (terminal objectives, or TERMOBS) acquired by program completors in 20 program areas (output information). The overall goal of the field test was to measure the validity and workability of the CDS in Massachusetts school systems, specifically, to test/validate the TERMOBS, the data collection process, and the value of the CDS to local educators. Six school systems were principally involved in the field test. Although cost data was not collected in this field test, the process of collecting program, enrollment, and job-entry skill information in a prescribed format was fully validated. The immediate short-term management benefits offered by the system are outlined. The tables and addenda include all data collected in the test implementation. (AJ)

Identifiers—CDS, Census Data System, Field Testing, Management Information System Occupational Educa, Massachusetts, MISOE

The publication describes the process by which a portion of the Management Information System for Occupational Education (MISOE) Census Data System (CDS) was field-tested in a sample of six Massachusetts schools. It is intended to provide guidelines for those who will be responsible for the planning of statewide implementation of the fully developed Census Data System. Transcripts of the presentations and discussions among MISOE and school staffs at an introductory presentation, in a workshop, during an individual contact, and during a data collection experience comprise a large part of the document. The workshop transcript includes instructions for reporting information in the CDS terminal objectives (TERMOB) Fall reporting booklets. These instructions applied only to experimental reporting booklets used in the CDS Fall Report field test and are not necessarily in the sequence required by the final version of the Fall Report, as the intent of the document is to provide only a basis from which a full-scale plan for workshops may be modeled, not to provide a step-by-step process applicable to the Fall Report as developed. An outline of the field test plan and visual aids which were utilized in the field test are included in the document. (Author/AJ)

Identifiers—CDS, Census Data System, Field Testing, Management Information System Occupational Educa, Massachusetts, MISOE

The document reports a pilot test of the feasibility of the MISOE Census Data System (CDS) for estimating the costs of individual programs in a regional vocational school setting. The test determined that the data collection forms can be completed by a regional vocational school but that they can be simplified, and the costs of individual programs can be determined from the data collected. As the system is structured to be applicable to all schools offering occupational programs, this determination implies that per-pupil costs for individual programs would be available to school managers within-school analysis and between-schools comparisons, and, used with program evaluation data, would provide a basis for cost-benefit and cost-effectiveness studies to be conducted on an operational scale. The balance of the report is directed to describing the mechanics of estimating the costs of individual occupational programs in a typical regional vocational school and is supplemented with general discussions of analyses of program costs and implementation alternatives. Fifteen pages of tables are appended. (Author/AJ)

Descriptors—Annual Reports, Census Figures, Data Collection, Demonstration Projects, \*Educational Objectives, Job Skills, \*Management Information Systems, Program Design, Program Evaluation, \*Records (Forms), Shop Curriculum, State Programs, \*Vocational Education, \*Woodworking

Identifiers—Census Data System, \*Management Information System Occupational Educa, MISOE, Terminal Performance Objectives, TERMOBS

The reporting booklet is required for the Census Data System (CDS) of the Management Information System for Occupational Education (MISOE); it contains the reporting forms which collect data that describe program structure and job-entry skill outcomes expected of program completors in the individual occupational education area of woodworking. Utilization of instructional area is also determined. This booklet contains the terminal performance objectives (TERMOBS) for this program area. They are actually the forms by which the skills of program completors are reported by department heads. CDS, one of two major subsystems of the integrated management information system, was developed to provide occupational education managers with comprehensive data on which to base rational management decisions. Essentially, CDS contains descriptive information systematically structured in a manner which allows it to be used as a basis for sampling evaluative research studies. CDS collects and stores census data for all school systems offering occupational education programs, including all data formerly collected by the Annual Federal Report for Occupational Information, except followup data. (Author/AJ)

The reporting booklet is required by the Census Data System (CDS) of the Management Information System for Occupational Education (MISOE); it contains the reporting forms which collect student data that are available at the end of the school year, such as completors, dropouts, transfers, and repeaters, by department, and student enrollment in programs beginning after October 1. CDS, one of two major subsystems of the integrated management information system, was developed to provide occupational education managers with comprehensive data on which to

base rational management decisions. Essentially, CDS contains descriptive information systematically structured in a manner which allows it to be used as a basis for sampling evaluative research studies. CDS collects and stores census data for all school systems offering occupational education programs, including all data formerly collected by the Annual Federal Report for Occupational Information, except followup data. Identifiers--Area VOTEC Support Centers, AVSC, Marine Corps

The two-part report describing the Phase 2 findings of a two-phase study demonstrates the utility of the commercial contract training concept for satisfying certain Marine Corps skill training requirements. Part 1 concerns source evaluation, skill analysis and selection, contractual considerations, and comparative training capability evaluation. It provides guidelines for management decision-making subsequent to procuring training services from commercial sources. Over 100 pages of appendixes include: the study's survey forms, detailed analyses of the training capability of industry organizations and of Vocational/Technical (VOTEC) training in-

stitutions, the special forms used in the cost analysis, skill training charts, data describing the current Marine Corps Reserve VOTEC training program, and the proposed Marine Corps order regarding basic skills training from commercial sources. Part 2 is an Area VOTEC Support Center Guidelines package designed to facilitate the implementation, administration, and management of VOTEC training programs. It contains: descriptions of VOTEC basic concepts, coordination structure, and a typical functional process to obtain VOTEC training; contracting notes; typical survey forms; VOTEC sources of Marine Corps related instruction; and an 18-page appendix stipulating the general specifications for Navy/Marine Corps VOTEC Skill Training Program which can be used independently of the report. NABTE Review. A Journal of the National Association for Business Teacher Education.

National Association for Business Teacher Education, Washington, D.C.

Pub Date 75

Note--112p.

Available from--Association for Business Teacher Education, 1906 Association Drive, Reston, Virginia 22091 (\$2.50)

Document Not Available from EDRS

Descriptors--\*Business Education, Business Education Teachers, Conference Reports, \*Educational Needs, Educational Objectives, \*Educational Problems, Educational Programs, \*Educational Research, Post Secondary Education, Secondary Education, Teacher Associations, Vocational Education

Identifiers--National Association Business Teacher Education

A discussion of current issues and problems in the area of business education as well as materials produced in the field are presented in the document. The materials are divided in four sections. Section 1, The Role of Business Education at Various Educational Levels, provides an overview of the roles and functions of business education at the secondary school and vocational-technical school levels, and describes a one-year proprietary business school, community college business programs, and collegiate business education. Section 2, 1974 Research Foundation Conference Reports, includes four articles on particular problems in business education concerning graduate students, research methodology, measurement of teacher effectiveness, and an interpretation of the goals of business education. Section 3, National Association of Business Teacher Education (NABTE) Convention Reports, includes seven presentations based on premises about NABTE. Section 4, Research Reports with Curricular Implications, focuses on three studies--one in the area of office management and two concerning different issues and problems involved in advanced typewriting. Identifiers--\*Minnesota

Eight Minnesota school districts took part in a statewide career education program involving approximately 570 teachers and 20,000 students from grades 1-12. Alternative models were explored at each site and included orientation and in-service training for teachers, curriculum/instructional materials development, dissemination, and community involvement. Project implementation was the responsibility of local project directors in each school district, with State staff serving as liaison between the school district, State, and Federal agencies involved. The document includes three sections. (1) Final Report: a 3-page summary, an 11-page presentation of project information (time, goals, objectives, procedures, design, evaluation, conclusions, recommendations), and 30 pages of appended material (a position paper and project site goals, descriptions, and curriculum development). (2) A 68-page third-party review of and recommendations regarding project design, context, management, instruction, information, costs, internal evaluation, documentation, and transportability. Nine tables are included; on-site evaluation questions are appended. (3) A System for Evaluating Career Education in Minnesota, 55 pages, a State agency evaluation of the project discussed in terms of formative and summative evaluation methods, with interpretation of the findings; evaluation related forms and data are appended. A table of contents for the entire document is not provided. (LH)

The Job Classification Plan as an Instrument for Affirmative Action.

Pub Date May 75

Note--141p.; Master's Thesis, California State University, Fullerton; Appendix H contained copyrighted material and was deleted

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

Descriptors--\*Affirmative Action, \*Classification, Data Analysis, \*Job Analysis, \*Jobs, Librarians, Personnel Evaluation, Personnel Management, \*Personnel Selection, Promotion (Occupational)

The purpose of the project was to determine if a pre-existing job classification plan, arbitrarily

constructed, can serve as an effective instrument for affirmative action in personnel selection and promotion. In order to meet this objective, the job classification plan of the Altadena (California) Library District was examined. A theoretical discussion of the principles, methodology, and techniques of job analysis as it applies to job classification is presented. Important in the process is determining what the worker does and the level and difficulty of the work which determines the job requirements. An overview of the principles and techniques of position-classification are presented as a guide for formulating a job classification plan. The Altadena Library District represents a typical case of how job classifications are developed in smaller public agencies that have limited funds and professional manpower to analyze the organization's positions. A critical analysis of the library's job classification plan concluded it was not a desirably effective instrument. Several specific and general recommendations are presented. A bibliography and glossary are included. Appended materials contain much of the data used in the position-classification performed on the Altadena Library District. (Author/EC)

Pub Date 28 Jul 75

Note—185p.; Pagination in the original document was not correct; all pages are present except numbers 38 and 39

EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage

Descriptors—\*Annotated Bibliographies, \*Correspondence Study, Dropout Rate, Educational Technology, \*Experimental Teaching, Gifted, \*Home Study, Instructional Media, \*Literature Reviews, Needs Assessment, Tables (Data)

The report contains: (1) a literature review on correspondence education in the United States; (2) a summary of a study of home-based computer-assisted instruction for gifted students conducted by the Institute for Mathematical Studies in the Social Sciences (IMSSS); and (3) an extensive cross-referenced annotated bibliography surveying the instructional uses of computers, television, and other media. Subsections of the literature review include: enrollment trends, completion rates and factors, student profiles, comparisons of correspondence work to residence work, methods of presenting and conducting correspondence courses, and a partially annotated bibliography of cited references. The IMSSS study involved a selected number of highly gifted 10-14 year old students (with IQ scores of at least 165 and a wide range of outside activities) from eight school districts surrounding Stanford University. The students participated in home-based teletypewriter courses in mathematical logic and related parts of mathematics, including programming courses, and an introductory Russian course. The high dropout rate of the gifted group was characteristic of high dropout rates of home-study courses. Further home-study evaluation is needed in course structure, the use of predictive student trajectories, and the costs of various technologies to alter the high dropout rates. (EA)

Descriptors—\*Building Operation, \*Building Trades, Community Organizations, Construction Industry, \*Custodian Training, Demonstration Programs, Depressed Areas (Geographic), Employment Opportunities, Inner City, \*Job Training, Maintenance, \*Minority Groups, Neighborhood Improvement, Off the Job Training, On the Job Training

Identifiers—\*Illinois (Chicago)

A demonstration program, administered by a community based building maintenance, management, and construction corporation, was developed to provide technical training for minority adults in construction, building maintenance, and property management in the Chicago area. The program was concerned with seeking solutions to the lack of housing, job training, and job opportunities in large metropolitan depressed areas and with demonstrating how occupational opportunities for inner-city residents could be improved while their neighborhoods would simultaneously be rebuilt. The report describes the recruitment of trainees, pre-skill training, pre-apprentice skill familiarity practice, on-site training, and trainee evaluation procedures for the program which was designed to accommodate 26-43 participants at any given time. Six goals and specific objectives for attaining them are stated. A Concluding section discusses accomplishments of the relatively successful program in comparison to its goals, program improvements based on experience, and need for continuation. (NTIS)

**VIEW Handbook: Vital Information for Education and Work. Applications for the Local School.**

Michigan VIEW Lab., Mason.

Spons Agency—Michigan State Dept. of Education, Lansing.

Pub Date [72]

Note—126p.

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—Career Education, Career Exploration, Career Planning, Guidance Counseling, Information Dissemination, Information Services, \*Information Systems, Instructional Materials, \*Manuals, Microfiche, Microfilm, Microforms, \*Occupational Information, Program Guides, \*Secondary Schools, State Programs, \*Vocational Counseling

Identifiers—Michigan, VIEW, Vital Information for Education and Work

VIEW (Vital Information for Education and Work) is essentially an information-gathering, storing, and dissemination system which uses microfiche application for information retrieval. It provides a means for giving current occupational information at a local level. The State of Michigan has made the VIEW project available to every junior and senior high school in the State with the participating schools responsible for providing their own microfilm readers and an implementor. The basic services provided by the State include two VIEW microfiche decks, an orientation filmstrip, newsletters, an inservice training session, and the VIEW handbook. The handbook contains samples of the collection's occupational information materials; self-exploration, career planning, career exploration, and decision-making worksheets for use by counselors with students; and supportive classroom worksheets for use by teachers. Preference tests and occupa-

tional fact-finding exercises comprise most of the counselor's materials, while games such as scrambled words, 20 questions, and crosswords are representative of the collection of teacher's materials. The VIEW indexes, however, comprise the largest part of the handbook (66 pages). These indexes are alphabetical listings of job titles on which information is contained in the VIEW collection. Available from—National Technical Information Service, Springfield, Virginia 22151 (PB-240-970; MF \$2.25, HC \$4.75)

**Document Not Available from EDRS**

Descriptors—\*Building Improvement, \*Building Trades, Community Development, Economic Factors, \*Employment Programs, \*Job Training, \*Low Rent Housing, Metropolitan Areas, Neighborhood Improvement, On the Job Training, Volunteers

Identifiers—\*Massachusetts (Boston)

The report gives a brief history of Boston's South End, its housing situation, and the Low Cost Housing Corporation (LCHC), founded in 1965 as a nonprofit organization to provide housing for low income tenants. The rehabilitation process for brickfront row houses is described thoroughly. Details of a training program which utilized volunteers and LCHC construction supervisors to assist trainees in renovating neighborhood buildings for low income tenants are given. Trainees were employed by LCHC or other building rehabilitation or construction firms and received classroom instruction (from LCHC supervisors, five hours per week) and on the job training (from skilled crew members at the construction sites) in plumbing, plastering, painting, woodworking, and electrical work. After varying periods of time in the program, the trainees were employed as follows: 11 as skilled tradesmen, 15 as experienced helpers, and 14 as construction laborers. The report also gives information on tenant relations and community development. Conclusions stress the economic value of the human commitment factor as contributing to the program's success. (NTIS)

Descriptors—Audiovisual Aids, Bibliographies, Career Awareness, \*Career Education, Educational Objectives, Instructional Materials, \*Learning Activities, \*Primary Education, Resource Guides, Teacher Developed Materials, \*Units of Study (Subject Fields)

Identifiers—Alaska, \*Anchorage Borough School District

The classroom activities presented in the document were designed by primary teachers in the Anchorage Borough School District for field-testing and evaluation in the 12 elementary schools in the Exemplary Career Education Project. The activities, for grades K-3, are arranged under the following areas: self-knowledge and interpersonal relations, work, leisure, planning and decision making, community involvement, basic studies and occupational preparation, and discovering Anchorage. Information on each activity includes: grade; subject; concept; developmental goal; objective; learning activities, including descriptions and procedures; materials and resources necessary; and occupations to explore, where applicable. A 21-page bibliography suggests materials for career education and includes titles under the following categories: books, 17 pages; 5 super eight film loops; 11 cassettes; 26 filmstrips; 5 film strip and cassette; 4 film strip and sound; 6 prints; 4 records; and a supplementary book list. Job Satisfaction, Job Training, \*Metals, Milita-  
ry Personnel, Occupational Clusters, Occupa-  
tional Information, \*Occupational Surveys,  
Task Analysis, \*Task Performance  
Identifiers—Air Force, \*Corrosion Control

The report describes the results of a detailed  
occupational survey of the corrosion control  
career ladder. Responses to a 457-task, time rat-  
ing inventory from 1,015 personnel (representing  
64 percent of the career field) were analyzed to  
produce seven specific findings and the career  
ladder structure. The career ladder includes a  
variety of jobs performed by airmen in the  
prevention, identification, and control of corro-  
sion on metal surfaces of aircraft, missiles, and  
support systems within the Air Force. Subject  
areas investigated include duties and tasks  
characteristically performed by corrosion control  
personnel at various stages in their careers from  
the standpoint of their career progression and  
time in service. Background data on the person-  
nel, comparisons between field performance and  
items in the Specialty Training Standard, and a  
short discussion of the relative difficulty of tasks  
as rated by personnel of the career field are also  
contained in the report. Appended are sum-  
marized survey results for personnel in each job  
cluster and job type in the career ladder (number  
of members, major command, skill level, mean  
number of tasks performed, and primary duties).

[Career Counseling for Women]: Speech at the  
NAIS 1975 Annual Convention in Atlantic City.  
Pub Date 3 Aug 75

Note—16p.; Speech given before the Annual  
Convention of the National Association of In-  
dependent Schools (Atlantic City, New Jersey,  
August 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Career Opportunities, \*Educational  
Change, Educational Needs, Females,  
\*Feminism, \*Individual Needs, \*Sex Dis-  
crimination, \*Sex Stereotypes

There is an increasing need to prepare women  
for careers other than the traditional roles they  
have had in the past. Statistics referring to the  
occupational needs of women today and the  
lower position they hold in the labor market  
document this need. Women have tended to oc-  
cupy positions in elementary and secondary  
schools, nursing and medical laboratory work,  
library science, and home economics. Changes in  
educational programs and school curriculum are  
necessary to increase the number of opportunities  
available for young women in choosing a career  
for themselves. For example, sports facilities  
should be equally available for both boys and  
girls; the choice of textbooks, especially in the  
lower grade levels, should avoid sex stereotypes;  
counseling for female students should focus on  
their importance in the work force; and both  
sexes should be represented when outside  
resources are brought in the school. Suggestions  
to try new experiences outside the school through  
summer jobs can also provide new interests.  
School programs directed at increasing the  
awareness of female students regarding their  
place in the world of work should be encouraged  
so that they can have more control over their life  
decisions and plans. (EC)

**Career Education Curriculum Guide Hume R-  
VIII School.**

Missouri State Dept. of Elementary and Seconda-  
ry Education, Jefferson City.

Pub Date Jun 75

Note—65p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Career Awareness, \*Career Educa-  
tion, Career Exploration, \*Curriculum Guides,  
\*Elementary Secondary Education, \*Integrated  
Curriculum, Junior High Schools, \*Learning  
Activities, Special Education, Vocational Edu-  
cation

The book sketches the career education con-  
cepts and learning activities which have been  
developed for inclusion in the academic curricu-  
lum of one Missouri school, from kindergarten  
through secondary grades. Several learning activi-  
ties are suggested for each elementary grade  
level. The primary-level activities are intended to  
increase students' awareness of self and others;  
the intermediate-level activities emphasize aware-  
ness of occupations. Two page special education  
and remedial reading career education guides  
supplement recommended commercial materials  
by indicating very briefly, in the former, learning  
activities related to 10 occupational clusters; in  
the latter, activities related to farming and home-  
making. The section intended for use by junior  
high and high school teachers is organized by  
academic or vocational education subject, with  
several career-related lesson suggestions offered  
for each. It assumes that only female students will  
be taking certain sections of the home economics  
curriculum. The concluding section lists the  
career education resources available to teachers  
in the school which produced the career educa-  
tion guide. The book also contains an outline of  
the career education responsibilities of the  
guidance counselor at each grade level from 7 to  
12 and an overview of the vocational curriculum  
available in the area vocational-technical school.

Rehabilitation Programs, \*Special Education,  
Vocational Education

Identifiers—\*Project MODEL, Vocational  
Evaluation

Included in the report of Project MODEL's  
final year of operation as a Federally-funded edu-

cational project is a brief description of the pro-  
ject and an examination of its various operational  
activities. The project was originally designed to  
test the effectiveness of a specialized form of in-  
struction for specific groups (physically and men-  
tally handicapped, the incarcerated, ethnic  
minorities, and other socioeconomically disad-  
vantaged) and to demonstrate their instruction to  
agencies which serve these groups. To deliver  
these programs of entry-level skill training or vo-  
cational assessment and orientation, four mobile  
units dealing in business education, distributive  
education, small engine repair/auto tune-up, and  
vocational evaluation were utilized. An outline of  
the project's 10 major objectives and their status  
and disposition are presented. A third party  
evaluation was conducted to assess the produc-  
tivity and effectiveness of the project in reaching  
and dealing with five distinct groups: corrections,  
retarded, handicapped, disadvantaged, and racial  
and ethnic minorities. The evaluation was  
uniformly quite favorable. A rationale for the  
continuation of the project's concepts and opera-  
tion as a private non-profit organization are  
presented. Tables and charts supplement the  
discussion on the project's operations and activi-  
ties. (Author/EC)

Descriptors—Administrator Role, \*Advisory  
Committees, \*Career Education, Committees,  
Educational Administration, \*Guidelines, \*Pro-  
gram Planning

The guide provides background information  
and suggested procedures to assist school ad-  
ministrators in the planning and implementation  
of career education in a local school district. Key  
decision-making bodies are necessary to imple-  
ment an effective career education program  
(school boards superintendent, principals, instruc-  
tional staff, counselors, and the community), and  
suggested activities and considerations for each of  
them are presented. Career education may be im-  
plemented with the use of three primary commit-  
tee structures: (1) the steering committee, with  
district wide representation, provides an organiza-  
tional structure that is responsive to community  
needs; (2) the building committee for each  
school building provides plans for the inservice  
training program; and (3) the community adviso-  
ry committee provides the school system with ac-  
cess to community resources. The possibility of a  
communications program for promoting career  
education is discussed with reference to the  
public to be reached and types of media and  
communication systems. A reference list, a  
bibliography, and a list of school districts in Mis-  
souri with special projects in career education are  
included. (Author/EC)

The guidelines are intended to assist the in-  
service program coordinator with a staff develop-

ment program for comprehensive career education. The contents of the document cover the following career education topics: (1) overview; (2) the need for staff development; (3) roles and functions of the career education inservice coordinator; (4) initial considerations in developing a staff development program (goals, model, and management plan); (5) planning and implementing inservice education programs; (6) evaluating the staff development effort; (7) suggested inservice education programs and materials; and (8) sources of inservice educational assistance. Appended are several instruments including career education competency statements for teachers, counselors, and administrators; self-assessment and needs assessment materials; and a workshop planning kit. A glossary is also provided. (LJ)

 The document presents a complete, introductory training program for potential inservice coordinators. The program format includes the use of both written and audiovisual learning materials. The purposes of the program are to provide an awareness of the responsibilities of the coordinator's role, acquaint the learner with necessary skills, and present opportunities to practice these skills. Aspects of the inservice coordinator's role are presented in five interrelated units: instructional design, evaluation, instructional materials development, administration, and public relations. Study exercises and followup activities are utilized throughout the document. A pretest and posttest accompany the program and scripts for the slide/tape presentations are appended. (LJ)

The program is intended for inservice use by State department consultants, intermediate and local school district inservice coordinators, and college and university instructors. It affords them the opportunity to examine the concept of career education and the concomitant implications for change in their local settings. The document is the introduction to a subset of six instructional packages focusing on teacher orientation to career education. It contains a facilitator's instructional plan, instruments to assist assessment and program planning activities, and a glossary.

Appended are explanations of techniques to be used during the orientation program: brainstorming, demonstration, discussion, field trips, interviewing, role playing, question box, symposium, simulation, and the use of resource persons. (LJ)

**Descriptors—**\*Career Education, \*Educational Development, \*Group Activities, Inservice Programs, Inservice Teacher Education, \*Instructional Materials, Leaders Guides, Learning Activities, Orientation Materials, Teacher Orientation, Teacher Workshops

The document is the first of a subset of six instructional packages focusing on teacher orientation to career education. Utilizing a group approach, the module presents both historical and current perspectives on factors influencing the development of career education. Four lessons comprise the module concerning the topics of: (1) preparing participants for group involvement, (2) the career education movement in perspective, (3) current educational and social characteristics affecting the need for career education, and (4) a rationale for emphasizing decision-making skills in career education. Each lesson is organized according to goals, performance objectives, content, learning activities, related resources, and study questions. Along with a glossary and a list of supplementary readings, transparency masters, task sheets, handouts, and readings pertinent to each of the lessons are included. (LJ)

The document is the second of a subset of six instructional packages focusing on teacher orientation to career education. The module is designed to assist an administrator in the implementation of a career education program. Two lessons present two approaches for the school administrator. One provides information relative to the nature and available support from national, State, and local agencies. The second lesson details the collection and use of data pertinent to student needs in an administrator's local area. Each lesson is organized according to goals, performance objectives, content, learning activities, related resources, and study questions. A glossary and supplementary readings are included as well as readings, task sheets, and handouts for each of the lessons. (LJ)

The document is the third of a subset of six instructional packages focusing on teacher orientation to career education. It focuses on career education theory, goals, philosophy, and the concepts that are important to school staffs as the bases for implementation guidelines. The lessons also attempt to promote a thorough understanding of career education by the staff to help them correct misconceptions held by the public. The document contains four lessons which deal with the following topics related to career education: (1) supporting theories; (2) issues; (3) elements, concepts, goals, and outcomes; and (4) philosophy, goals, statements, and objectives. Each lesson is organized according to goals, performance objectives, content, learning activities, related resources, and study questions. A general glossary is part of the document, and readings, transparency masters, task sheets, and handouts for each lesson are also provided. (LJ)

The document is the fourth of a subset of six instructional packages focusing on teacher orientation to career education. The module presents four national career education modules of Federal and State career education projects: (1) the school-based model, (2) the experience-based model, (3) the home/community-based model, and (4) the rural-residential model. Three lessons make up the document, and include the implementation strategies, approaches, and descriptions of Federal and State career education programs. Each lesson is organized according to goals, performance objectives, content, learning activities, related resources, and study questions. A glossary, lists of readings and supplementary readings, task sheets, transparency masters, and handouts are presented for each of the lessons. (LJ)

The document is the fifth of a subset of six instructional packages focusing on teacher orientation to career education. The two lessons included in the module are designed to aid inservice teachers in the identification and understanding of the value of cooperative relationships within the school and the community and the potential contributions of various groups to the development of career education. Further, methods for analyzing their roles in implementation of career education are presented for exploration by the teachers. Each lesson is organized according to goals, performance objectives, content, learning activities, related resources, and study questions. A glossary, lists of readings and supplementary readings, task sheets, and handouts for each lesson are included. (LJ)

The purpose of the instructional module is to provide educators with an orientation to career education—its goals, objectives, and rationale. The material is presented in an individualized instructional format, consisting of a pretest and four units. Completion of the units in sequence assures a logical presentation of these introductory materials to career education. The introduction provides a general overview and includes a pretest for those who wish to identify the sections with which they are familiar and those that need review. Unit 1 presents a discussion of conditions in society to which career education can respond. Unit 2 identifies and describes four national models for career education. The third unit discusses the goals of the school-based comprehensive career education model and describes the methods of development and implementation. Unit 4 describes the function of the school-based career education components: staff development, community relations, curriculum development, guidance and placement, support systems, and evaluation. Each unit includes a goal statement, introduction, performance objective, learning activities, study exercises and answers, and a post-test. A glossary defines terms that are unique to career education models and to the materials presented in the module. (Author/NJ)

The module is one of a series of eight developed to provide inservice training for administrators of career education programs. An opportunity is presented to the administrator to examine career education, its implications for educational change, and the various administrative functions affecting its implementation. Suggestions for the formulation of an implementation strategy base in local areas are presented. In addition, opportunities are provided for administrators to gain experience in handling criticism related to career education and to expand their own perspectives on the concept. The introduction provides a brief overview of the purpose and rationale for the module. Module goals and objectives are presented together to show the interrelationships, flow, and depth of coverage. Each of the four lessons is organized around a module goal, supportive content, and learning activities, with accompanying transparencies, task sheets, and handouts. An 80-page section of supplementary readings is coordinated with the lessons. (Author/NJ)

The module is one of a series of eight developed to provide inservice training for administrators of career education programs. It focuses the attention of the administrator on the various resources of the informational services (occupational, educational, and personal-social) which are available for use in career education resource centers and the integration of career education materials into the regular classroom curriculum. The lesson topics include: using resources to facilitate student awareness; classifying and disseminating career information; assessing human and nonhuman resources; and sources of occupational, educational, and personal-social materials. Task sheets and handouts to accompany the lessons are included, along with a list of supplementary readings. (Author/NJ)

Descriptors—\*Administrator Education, \*Career Education, Community Involvement, Curriculum, Educational Administration, Evaluation, Guidance, \*Inservice Education, Instructional Materials, Leaders Guides, Learning Activities, \*Program Development, Staff Improvement, Workshops

The module is one of a series of eight developed to provide inservice training for administrators of career education programs. It attempts to identify the essential components of comprehensive career education program development. A careful examination is made of the major components of program development: curriculum, staff development, guidance and placement, community involvement, support systems, and evaluation. The process of working such a program into the school through staff, students, parents, and community groups is presented and views as an interactive process wherein planning, implementation, and review are continuous and of concern to all groups. The two lesson topics are (1) program development components and (2) operational characteristics of program development components. Transparencies, task sheets, and handouts accompany the lessons. A 50-page section provides coordinated supplementary readings. (Author/NJ)

The module is one of a series of eight developed to provide inservice training for administrators of career education programs. It addresses itself to developing an understanding of evaluation as it applies to accountability and decision making. The learning objectives are: to understand the accountability function of evaluation; to relate evaluation to the decision-making process; to consider the basic components of a comprehensive evaluation system; and to become familiar with evaluation as it applies to the program components of career education. Each of the four lessons is accompanied by transparencies, handouts, and task sheets. A 36-page section provides lesson-coordinated supplementary readings. (Author/NJ)

The module is one of a series of eight developed to provide inservice training to administrators of career education programs. It presents financial program planning as an integral part of the administration of career education. Financial program planning as a concept and basic administration task is defined in this module to include three elements: (1) financial planning, (2) financial programming, and (3) budgeting. The learning objectives of the module are: to become familiar with procedures in financial planning; to become familiar with a financial program for career education; to identify financial and human resources necessary for the support of a total program; and to develop an operational plan for use in a local education agency. Each of the four lessons includes transparencies, task sheets, and handouts. A 32-page section provides lesson-coordinated supplementary readings. (Author/NJ)

The module is one of a series of eight developed to provide inservice education training for administrators of career education programs. An examination of basic scientific planning approaches and procedures is presented to provide the administrator with a basic tool to implement career education. Various scientific management techniques and their application to educational planning are reviewed. The emphasis is then placed on activities that involve students in practical, useful exercises. The final product is a plan of implementation which is applicable to the situation in students' local districts. Both lessons include transparencies and lists of related resources. A 46-page section provides lesson-coordinated supplementary readings. (Author/NJ)

Descriptors—Comparative Analysis, Demography, Educational Needs, \*Educational Planning, \*Employment Statistics, State Surveys, \*Statewide Planning, \*Statistical Data, Tables (Data), \*Vocational Education

Identifiers—\*Tennessee (Davidson County)

The document is one of a series of 95 booklets, one for each county in Tennessee, and presents data for Davidson County in the form of tables and charts to assist educational planning at the State and local level. The data presented is chosen for its practical value in determining which vocational course offerings would be of the greatest value to the community as a whole after considering both the demographic and economic growth patterns. By combining data found in various sections of the booklet with the knowledge available only to those persons dealing with the practical realities of day-to-day operations, it is hoped that the strengths of both the theoretician and the practitioner will emerge by causing operational decisions to be based on hard data. Descriptors—Demand Occupations, Educational Needs, Employment Qualifications, Employment Trends, Interest Research, \*Manpower Needs, \*Needs Assessment, Occupational Choice, \*Occupational Information, Parental Aspiration, Semiskilled Workers, Skilled Workers, Student Interests, \*Surveys, Tables (Data), Teacher Attitudes, \*Vocational Interests

Identifiers—Tennessee (Nashville)

The results of several surveys conducted to assess current employment needs and student and parent interests in greater Nashville (Tennessee) are reported. The needs assessment was conducted in an effort to generate information which would be useful for planning expanded vocational education programs in the metropolitan public schools of Nashville-Davidson County. The findings of the surveys are reported in five chapters as follows: (1) Nashville area employment needs survey for 1976, (2) entrance requirements for highest demand occupations, (3) student and parent survey findings, (4) perceptions of curricular needs by school personnel, and (5) recommendations. Identifiers—\*Virginia (Wise County)

The document is the final report of a project designed to make the public and students aware of the possibilities available in vocational education in the Wise County Schools in Virginia. The objectives of the program were as follows: (1) to provide materials to be used for career guidance, (2) to make the public aware of the total vocational programs in the division, (3) to renew dropout interest in vocational training, and (4) to make adults aware of the retraining possibilities. A slide-tape presentation was prepared and used in six secondary schools prior to preregistration for the 1975-76 school year. After each showing,

students and teachers were asked their reactions. Plans are in progress for presentations in public places such as bank lobbies, city hall, and the county fair. Included in the report is a copy of the script used with the slides pertaining to the Wise County vocational program. (Author/NJ)

Descriptors—Career Choice, Developmental Programs, \*Followup Studies, Graduate Surveys, \*Health Occupations Education, \*Participant Satisfaction, \*Program Effectiveness, \*Program Evaluation, Questionnaires, Relevance (Education), Secondary Education, Tables (Data), Vocational Education, Work Experience

Identifiers—Virginia (Roanoke)

The report is a one shot followup study of 128 secondary school students who had completed a health careers course at Jefferson High School in Roanoke, Virginia. The response rate was 87 percent. The former students were surveyed by questionnaire to determine the effectiveness of the program and to provide data relevant to program improvement. It was found that 48 percent of the respondents were employed in the field of training, and also that part-time work experience as a student increased the related employment to 80 percent. Also revealed was that part-time work experience increased the percentage of students who sought additional education. The program aided 88 percent of the students in making career choices, and 79 percent felt prepared for all occupational experiences. A high degree of job satisfaction was reported. The most frequent suggestion for course improvement was for more "hands on" experiences during class time. Overall, the program was found to be effective in meeting its objectives. The six-page questionnaire and samples of related correspondence are appended. (Author/NJ)

An Investigation Into the Use of Criterion-Referenced Measurement in Vocational and Technical Training.

Report No.—VT-102-309

Pub Date 75

Note—71p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Behavioral Objectives, Comparative Analysis, \*Criterion Referenced Tests, Educational Research, Feasibility Studies, Literature Reviews, Measurement, Norm Referenced Tests, \*State of the Art Reviews, Technical Education, Testing, \*Test Reliability, \*Vocational Education

The paper investigates and analyses the current state of the art of criterion-referenced measurement (CRM), with a view to determining its use in training and instructional programs. It presents a review of the literature pertaining to the following aspects: a brief history of CRM; a definition and comparison of criterion-referenced and norm-referenced measures; usage of the two measures; and the construction and evaluation of criterion-referenced tests in terms of validity, reliability, and other test characteristics. The literature supports the following conclusions: (1) all definitions of CRM stress score interpretation as representing what the individual can do relative to instructional objectives rather than other individuals; (2) criterion-referenced information is valuable in making certain decisions based on what a person can do at a given point in the training cycle; (3) CRM has focused much attention on behavioral objectives and training outcomes; (4) behavioral objectives must be carefully written to effectively direct and measure instruction; (5) more than one measure should be used to validate any CRM to decrease the error associated with its measurement; (6) it is difficult to develop objective procedures necessary for CRM of complex behavior; (7) CRM supplements but should not replace normative tests in training; and (8) more research is needed before

## 40 Document Resumes

extensive use of CRM in instructional programs can be recommended. (Author/NJ)

Descriptors—Contracts, Developmental Programs, \*Directories, \*Federal Programs, Financial Support, Government Publications, Grants, \*Manpower Development, \*Program Descriptions, \*Research Projects, Research Proposals, Research Reviews (Publications)

The fourth annual edition summarizes the projects funded by the Office of Manpower Research and Development that were ongoing or completed during the fiscal year ending June 30, 1974. In addition, reports and other significant publications received during the previous two fiscal years are listed. The 1974 volume includes a set of "descriptors," or index terms, to provide a quick summary of the subjects of the project or publication. As in the 1973 edition, the projects and publications presented in chapters 1-5 are grouped by subject matter: (1) manpower program planning and administration; (2) manpower programs and their specific populations; (3) manpower program services and techniques; (4) the labor market; and (5) manpower, economic, and social policies. However, doctoral dissertations, small research project grants, and manpower institutional grants are listed separately in chapter 6. The appendix contains guidelines for submission of proposals and the statutory language outlining the goals and functions of the research and development program. The volume is indexed by (1) contract and grant numbers, (2) contractor and grantee organizations, (3) individuals associated with contracts and grants, and (4) research subjects. (Author/NJ)

Descriptors—Career Choice, Career Education, Economically Disadvantaged, Junior High Schools, Mexican Americans, \*Occupational Aspiration, \*School Surveys, \*Secondary School Students, Tables (Data)

Identifiers—New Mexico

Prior to the implementation of a career education program, a career aspirations survey was conducted in one New Mexican community. The sample population included first and second generation Mexican-American secondary school students. A six-item questionnaire was administered to 720 students from one junior and one senior high school. The results were categorized according to 15 occupational clusters. A composite of all six grade levels showed the most desired careers seem to be in the areas of health, business and office, public service, environment, and communications and media. Upper grade students were more specific about careers. The largest number of students undecided about a career are in the 12th grade and the smallest in the 7th grade. It appears that a large portion of the student population is not prepared to step into a career at graduation. In this community of relatively low economic status, the apparent need for a practical, realistic career education program is evident. Tables display the distribution of desired careers according to grade level, and the six-item questionnaire is appended. (Author/NJ)

Identifiers—Rhode Island (North Kingstown)

From June 1973 to June 1975 the development and implementation of a Model K-14 career education program was attempted in the North Kingstown Schools in Rhode Island. Project objectives included the development of career and self-awareness, provisions for exploratory and work experiences, provisions for job placement at graduation, and provisions for counseling services at all levels. Public controversy concerning the project-developed elementary manual precluded the attachment of project goals, and funding was not renewed for the third year. The major results of the project are presented in terms of a series of recommendations and conclusions about development and infusion strategies for programs that seek to make changes in educational institutions. One-half of the report consists of appended materials: (1) a 4-page program implementation check list, (2) a 9-page report of the career education advisory committee, and (3) 90 pages of local news coverage which chronicle the course of events in the school-community controversy. Descriptors—\*Career Education, Community Support, \*Developmental Programs, Educational Change, Elementary Education, Models, \*Open Education, Program Attitudes, \*Program Evaluation, \*School Community Relationship, Secondary Education, Summative Evaluation

Identifiers—Rhode Island (North Kingstown)

The evaluation report addresses a two-year effort of an originally planned three-year project designed to plan, pilot test, and implement a K-14 career education program into the North Kingstown, Rhode Island public schools. During the two years of the project, administrative and community support diminished until funding for the third and final year was ultimately withdrawn. The report attempts a summary evaluative statement as to the impact of the project and the probable future of career education in the district. In spite of the difficulties encountered, some accomplishments were achieved. A fully developed and implemented placement service at the high school is in operation, curriculum development has become a high priority area in the district, and career education instructional materials have been incorporated into the library system and are in use by classroom teachers. The major lesson learned in the course of the project was that too much effort was expended on program content and too little on the process of educational change. Suggestions are presented to aid future projects which seek to implement career education programs. The third party evaluation design is included in the appendix. (Author/NJ)

Descriptors—\*Career Education, Conferences, Information Dissemination, Models, \*Program Descriptions, \*Program Development, Program Evaluation, Publicize, \*Research Projects, \*State Programs

Identifiers—\*Rhode Island

The project, conducted from June 1973 to December 1974, was designed to further the development of career education activities in Rhode Island. The goals and objectives of the project were as follows: (1) a synthesis of statewide and national information regarding career education models; (2) development of three model types focusing on the specific problems of urban, rural, and suburban settings; (3) establishment of a broad based advisory committee for the State; (4) a conference involving representatives from each local educational agency in Rhode Island; (5) a career education state of the art paper; and (6) three plans for the implementation of career education in local school districts. The body of the report explains in detail the procedures involved in carrying out the project objectives. The third party independent evaluation entails both formative and summative analyses of the various process and product objectives. The method for collecting information for these analyses principally consisted of review and interview of project staff at critical stages. The conclusions are that through the activities of the project, career education awareness has

reached business leaders and the public sector and more people have a better understanding and are more receptive to the concept. Appendixes, making up the body of the report, include instruments and products developed in the course of the project. (Author/NJ)

Identifiers—\*Rhode Island

The evaluation study was undertaken to measure the progress of 15 elementary and secondary career education projects funded by the Rhode Island State Department of Education for 1974-75. Information was obtained from project proposals, teacher questionnaires, onsite observations of classroom activities, and conferences with teachers and administrators. The data are displayed in tables that allow for comparison among the projects and capsule comments appear for each of the projects. Evaluation instruments are appended. (NJ)

Descriptors—Adult Education, \*Architectural Barriers, \*Check Lists, Facility Planning, Facility Requirements, \*Handicapped Students, \*Physically Handicapped, Safety, \*School Buildings, Tables (Data), Vocational Schools  
Identifiers—Wisconsin

The project was designed to determine what architectural barriers to physically disabled persons existed in Wisconsin's vocational, technical, and adult education system's institutions. A checklist based on the American Institute of Architects' recommendations was developed and completed for one school in each district to determine the presently existing architectural barriers, including entrances and exits, elevators, fire escapes, restroom facilities, ramps, and corridors. In addition, existing barriers in classrooms, laboratories, learning centers, food service, and recreation areas were identified. Finally, a checklist rating scale was developed to determine the campus modifications required in order to offer programs to persons with physical disabilities. Chapter 2 is concerned with the methods and procedures used to develop the architectural barrier checklist, the checklist guide, and the population of the project. Chapters 3 and 4 contain project results and recommendations. (NJ)

Descriptors—\*Career Education, Career Exploration, \*Curriculum Guides, Grade 11, Grade 12, \*Health Occupations Education, \*Learning Activities, Program Descriptions, Secondary Education, Vocational Education

A program of pre-postsecondary instruction in engineering and health occupations for grades 11 and 12 was developed and implemented at Firestone High School from June 1974 to July 1975. It was designed to be compatible with high school graduation requirements and offer experiences related to postsecondary education that would lead to a paraprofessional or professional goal. The main features of the program were the "hands-on" experiences, career planning, and a broad educational foundation based on the student's career objectives. The activities were designed to provide the students with an understanding of careers related to the program offering, to introduce them to the personal and educational requirements of their choices, and to promote understanding and acceptance of their abilities and aptitudes in light of future occupational aspirations. Field experience comprised a large part of the curriculum. The engineering segment of the program is touched on briefly (2 pages) while the body of the document (60 pages) consists of a curriculum guide of health occupation learning activities developed by the project. Organized into a 36-week continuum of second year activities, the curriculum materials outline developmental and behavioral objectives, student assignments, and activities designed to introduce the student to the varied career opportunities in the medical fields. Identifiers—Wisconsin

The objectives of the study were twofold: (1) to determine if correspondence study is a viable approach for offering vocational education to residents of Wisconsin who want and need a vocational education program, (2) to design a correspondence study model for vocational, technical, and adult education (VTAE). To carry out these broad objectives: (1) inquiries were made into the amount of correspondence study presently available to Wisconsin residents; (2) existing correspondence study programs were studied to determine their effectiveness and suitability for vocational education; (3) consideration was given to the type of courses most appropriate for correspondence study within the Wisconsin VTAE system; (4) four models were developed to indicate ways in which correspondence instruction could be implemented with the VTAE system. The report describes the methodology and presents the conclusions and recommendations. Descriptions of the program models developed by the project are contained in appendices. (Author/NJ)

Identifiers—West Virginia (Ohio County)

The project has provided the basis for determining the vocational education curriculum and needed equipment to be incorporated into a new high school facility in Ohio County, West Virginia. The goal of the project was to develop expertise on the part of all involved in planning for

the new school. This was accomplished by an in-depth study of all information relevant to the new facility. The study included results of a 1972 vocational needs study, site characteristics, probable course offerings, enrollment projections, desirable equipment, student interest surveys, and statistical data on the local, State, and national levels. An important phase of the project was visiting several new facilities so that the best features of each would be incorporated into the new high school. The objectives of the project were to determine and design the vocational education curriculum, to determine the facility and equipment needs, and develop specifications. An outline summary of the vocational education courses selected by the project is included in the report. (NJ)

Identifiers—Arkansas, Drapery Construction

The document consists of a brief project report, copies of program publicity and related correspondence, and one of the nine learning packets developed for use in the program. The purpose of the project was to develop guidelines for planning, conducting, managing, and evaluating a simulation program for teaching the skills and competencies required for employment in the clothing and textile industry. Through individualized study packets and a community survey, the students acquired information about job opportunities in the clothing field. Certain basic skills were developed by the students in the course of the program, and positive work attitudes and habits were fostered. The program consisted of three phases. In the first phase, self-contained learning packets instructed students in very basic skills and permitted extensive skill attainment, providing them with specialized interests and an opportunity to concentrate on one area. A simulated laboratory was operated in the second phase with all students participating in the various roles needed for occupational garmentmaking services. The third phase provided on-the-job training in local businesses for 12th grade students with the adequate skills and competencies. A followup study conducted after one year of employment indicated a third of the students who had completed the program were employed in a related field. A 12-page sample learning packet on drapery construction is included. (NJ)

The project reported in the document focused on two aspects of career education programs.

One focus was on determining effective methods for implementing career exploratory experiences for junior high school students. The second focus was on determining effective procedures for establishing a comprehensive school-based placement service for all exiting students. The project was conducted in 10 Alabama schools, five for each component, during the 1973-74 school year. The exploration component found that the most effective method for providing exploratory experiences involved a combination of on-the-job experiences, work-setting observations, visiting resource persons, a career resource center, and printed materials. The procedures followed, and results achieved by the placement component for each site are discussed in the report. Appended materials (36 pages) include: site selection criteria, program objectives and administrative guidelines, procedural suggestions for individual project site, and a followup questionnaire. Identifiers—Alabama

The State of Alabama career education-exploration and placement project was an attempt to organize and study alternate methods of providing career education to students in the junior and senior high grades. Emphasis was placed on "exploration" at the junior high level, whereas the major program goals for older students revolved around the development of procedures to insure the placement of all exiting students in either a job, a postsecondary occupational program, or a baccalaureate program. Ten sites, five exploration and five placement, participated in the project during the 1973-74 school year. Volume 2 consists of the third party evaluation and is reported in three sections: management, exploration, and placement. The exploration and placement components are further subdivided into product evaluation (data from tests and output in the form of suggested successful methods) and process evaluation (procedures and activities). Appended materials (53 pages) include: site selection criteria, program participant guidelines, procedural suggestions for individual project sites, examples of different instructional methods utilized, administrative memoranda, listing of project concerns, conference schedules and discussion outlines, project methods by individual site, a placement program model, and a followup questionnaire. Descriptors—\*Audiovisual Instruction, \*Curriculum Development, \*Early Childhood Education, Inservice Education, Instructional Materials, Nursery Schools, \*Preschool Teachers, Teacher Education Curriculum, Teaching Procedures, \*Video Tape Recordings

The purpose of the project was to develop video tapes to be used as minilessons in the instruction of child day care center personnel. The tapes are of experienced and qualified teachers working with small children in 22 licensed day care centers in the Louisville area. Five curriculum units form the framework for organization of the taped lessons: understanding and guiding children under six, food for children in day care centers, creative activities for children in centers, planning a daily program for children in centers, and caring for infants in day care centers. Twenty-two video tapes, varying from 15 to 30 minutes, cover the major concepts in the five curriculum guides. The body of the document (54 pages) consists of the instructional packet, developed for use as a supplemental guide to the video tapes. It includes detailed concepts for each tape which are clearly identified by the title. (NJ)

Descriptors—Career Education, \*Career Exploration, \*Communications, Cooperative Programs, Developmental Programs, Mass Media, Production Techniques, Program Descriptions, \*Radio, Secondary Education, \*Teaching Programs, \*Television, Vocational Education, Work Experience

From August 1974 to June 1975, three schools in the Owensboro, Kentucky area cooperated in an effort to provide an instructional program in mass communications to high school students. A four-year comprehensive high school, a vocational school, and Kentucky Wesleyan College pooled teaching staff, equipment, and facility resources in a course offering for 32 students during the 1974-75 school year. Students experienced extensive hands-on activities, learned how radio and television stations operate, and learned about career opportunities in the mass communications field. The high points of the program were the production of radio programs for airing on local commercial stations and the production of closed-circuit television programs. A course outline, bibliography, and equipment list are appended. (NJ)

Identifiers—Land Reclamation, \*Mining

The exemplary project was the cooperative effort of two schools in the western Kentucky coal fields to field test a program in mining and reclamation technology. Covering the first year of the project, the report describes the problem and scope of the study, the objectives pursued, the methodology, and the results obtained. The goal of the project was to relieve the manpower shortage by training and retraining people in Region 2 to be safer coal miners or reclamation technologists. Selection of students desiring work experience while enrolled in the program was made jointly by the schools and the mining companies. During the year the cooperative coordinator continued in recruitment, counseling, interviewing, evaluation, and securing co-op positions. Appended materials include news clippings, conference agendas, a report of a practicum in reclamation technology, a budget report, and other program-related materials. (NJ)

The report evaluates the Kentucky Valley Educational Cooperative Career Education Project in eastern Kentucky. The project staff involved personnel from Morehead University, Eastern Kentucky University, Bowling Green and Owensboro, and from the Kentucky State Department of Education in workshops, inservice training, demonstration units, and conferences. The evaluator made three three-day on-site visits, meeting with superintendents, project staff and coordinators, principals, counselors, teachers, pupils, parents, and community leaders. Various project products—reports, handbooks, plans and outcomes for workshops, surveys, newsletters, lesson plans, and students' work were considered in the evaluation. After meeting with the people in Region 12, reading the materials furnished, studying the objectives and attainments, and discussing the outcomes and practices, it was found that the overall goals of the project were achieved. Identifiers—Maine (South Portland)

The activities of the second year of a career education project in the South Portland School are reported in the document which covers the time period of July 1974 to June 1975. The project consisted of a career awareness component for grade levels K-6, a career orientation component for levels 7 and 8, a career exploration phase for grade 9, and a career preparation component for grade levels 10-12. A program recycling component offers course work and guidance services to all out-of-school youth and adults. In addition, the project is involved with dissemination of information about career education. The report describes the procedures, results, and accomplishments of the project year. A third party evaluation is included. Making up two-thirds of the document, the appendix includes: (1) the project evaluation design, (2) career guidance institute reports, (3) career fair booklets, (4) followup questionnaire, (5) tenth grade questionnaire, (6) secondary English curriculum recommendations, (7) language arts curriculum guide, and (8) secondary mathematics revision followup. **Descriptors**—Adult Education, \*Annotated Bibliographies, Audiovisual Aids, Indexes (Locators), Information Sources, \*Metric System, \*Reference Materials, \*Resource Guides, Technical Education, \*Vocational Education

The annotated bibliography is designed to help vocational, technical, and adult education teachers and others locate available materials on metric education. Each cited item is available from a supplier or an information system. It is organized into three sections: instructional materials, reference materials, and resource lists. The instructional materials section is organized by material type: instructor guides, student materials, and audiovisual materials. Each citation provides information on possible use; for example, educational level indicated in parenthesis at the end of each citation and content indicated in the annotation. Included in the reference materials section are items on general metrication, impact on education, metrication of business and industry, impact on consumers, international systems of units (SI), converting from customary to metric units, national and international standards, and bibliographies. The lists of resources in section 3 are designed to help the user locate organizations, publishers, suppliers, and resource persons who may be helpful in developing or selecting curriculum materials. Names, addresses, and available materials and services are given. (Author/NJ)

Covering the time period of October 1972 to May 1974, the final report documents the efforts of a career education project in the Ogden City School District. In the elementary grades the program stressed the importance of work and workers and introduced some very basic careers. On the junior and senior high school levels, a career guidance and placement center served as the hub of career exploration, planning and placement, providing resource materials, and coordinating community involvement. The program also provided career information to parents and teachers to enable them to more adequately fulfill their guidance responsibilities. Operation Partnership surveyed local business and industry to gain information to more effectively educate students for the world of work. Provisions were also made for field trips, on-the-job experience, and job training. The results of the independent third party evaluation are included in the report. (Author/NJ)

**Identifiers**—Wisconsin (Sheboygan)

Conducted from May 1971 to July 1974 at the Lakeshore Technical Institute in Sheboygan, Wisconsin, the comprehensive career education program was established initially to serve 15 school districts but was redirected into a "model school" approach serving four schools. Business, industry, and labor became involved and loaned support to the project. A K-14 curriculum guide was developed and career information centers established in all four schools—elementary, junior high, senior high, and postsecondary. A job bank of microfiche proved to be the most effective activity to bring interested high school students into the career information center. Results of the third party evaluation were positive for teacher and counselor roles and attitudes, the career centers development and use, community awareness and interest, staff workshops, student awareness of post high school education, and career awareness in elementary children. The report describes the project, presents a 356-page evaluation report, and includes various project related materials: (1) program models, (2) sample handouts, (3) graduate followup study, (4) manpower survey, (5) list of science related careers resources, (6) guidelines for pupil services, and (7) a 54-page value rated list of career education resource materials. The document is a study of the food service industry intended for use as a reference by food service teachers and curriculum planners. The purpose of the study is to map the economic and technological territory of the industry, to identify the dynamics shaping the industry today, and to consider questions crucial to an orderly consideration of the future. In the section on industry dynamics, a principal focus of concern is on labor cost and supply and on the productivity of labor. Other major topics are food processing equipment and methods, nutrition, and economic trends. The effects of demography and migration on the demand for food service are also considered. Bibliographic essays place the main points of the source materials into an overview context in narrative and sequential form. Bibliographies follow each section. (Author/NJ)

**Identifiers**—Illinois (Chicago)

From April 1971 to December 1974, a career education project for elementary and secondary grades was conducted in a lower income area of urban Chicago. The general objectives involved the development of a guidance program, integration of occupational information into the classroom, skills training, placement, and attitude adjustment. Career education curriculum material suitable to all levels of elementary classes was developed. The counselor-coordinator coordinated guidance activities, parent conferences, home visitations, placement activities, and information dissemination. Occupational training programs were conducted, and six skill development classes were held in automotive services, data processing food services, clerical procedures, offset printing, and typing. Regular assemblies focusing on student accomplishments were held. Other features of the program were outside speakers, weekly group guidance sessions, group trips, newsletter, and various social functions. It was concluded that the program has made a definite impact on the students and the school community, reaching students who were unskilled and uninvolved and helping them to regard themselves as potentially valuable employees. A third party evaluation, occupational information, student inventory forms for the elementary and secondary level, and tabulated inventory results are included in the report. A K-8 career guidance laboratory design is appended. (NJ)

**Identifiers**—Indiana

Covering the time period of July 1974 to June 1975, the report documents project activities of the second year of a three-year career education project in southern Indiana. A total of 37 school corporations in an economically depressed rural area participated in an effort to infuse career education concepts into their existing curriculum. Through inservice activities, teachers experienced the techniques involved in unit writing and curriculum development and were exposed to the variety of ways career related concepts may be integrated into the subject areas. Both teachers and students became better informed of the career opportunities available in their communities and observed firsthand, workers functioning in their roles. As a result of the mobile units, a large population became acquainted with the variety of resource materials available in the area of career education. Utilization of community personnel in program development increased the community's awareness of career education and its many merits. Appendixes contain a model for the infusion of career education concepts into current curriculum, public relations materials, teacher performance objectives (K-12), and the third party evaluator's summary of the second operational year. A final attachment (over one-third of the document) provides teacher and student questionnaires, and a summary of teacher interview results. (Author/NJ)

Identifiers—Pennsylvania

The project was an effort to alleviate a recognized need of educationally disadvantaged students enrolled in vocational agriculture classes in Pennsylvania. This need extended to teacher preparation, instructional materials, and vocational guidance. Instructional materials in ornamental horticulture, agricultural mechanics, and agricultural production were developed and tested. Materials were written at the sixth grade reading level usually in task sheet format. Two teacher institutes were held to improve competency of 25 teachers in the project. Occupational information of entry level type jobs was disseminated to the teachers. In evaluation, it was found that the experimental materials were superior to materials currently in use when criterion measures were achievement and performance tests. Teacher attitude toward disadvantaged students became more positive, with the gains stabilizing during the third project year. Occupational information in the form of a manual was printed and disseminated to guidance counselors and teachers. Appendixes include some of the project developed instructional materials. Also included in the report is a list of theses and publications that resulted from the project. (Author/NJ)

Descriptors—Accounting, \*Business Education, \*Community Colleges, \*Curriculum Evaluation, \*Followup Studies, \*Graduate Surveys, Management Education, Questionnaires, Secretaries

The purpose of the study was to determine the adequacy of the business administration department curricula of the Williamsport Area Community College in meeting the needs of graduates and employers. Graduates from 1969 to 1973 in accounting, management, and secretarial science were surveyed via mail questionnaires on their degree of satisfaction with the training they had received in their programs. Employers of the school's graduates were also assessed by the same method concerning their evaluation of the caliber of work performed by the graduates. The findings supported the conclusions that both the graduates and the employers were satisfied with the school's program. Samples of the survey questionnaires are appended. (NJ)

Descriptors—Career Opportunities, Curriculum Development, \*Educational Demand, \*Employment Opportunities, \*Off Farm Agricultural Occupations, \*Ornamental Horticulture Occupation, Questionnaires, Surveys, Vocational High Schools, Vocational Interests

Identifiers—Pennsylvania (Berks County)

Student vocational interest and agricultural business surveys were conducted in Berks County, Pennsylvania to gauge career opportunities in off-farm agricultural occupations. The seven categories of businesses surveyed included agriculture supplies, agriculture mechanics, horticulture mechanics, floriculture, landscaping, turf, and garden center sales. Over 25,000 students and parents were surveyed, but a low percentage of returns failed to reveal accurately student career interests. The business surveys indicated increased demand for training in ornamental horticulture. To meet this educational demand, a pilot program of curriculum development was established for selected high school seniors through the cooperative efforts of Berks County vocational-technical schools and Nolde State Park Environmental Education Center. The program included classroom instruction in air and water pollution, land use and management, energy and waste disposal problems, and wildlife concerns; visits to resource facilities; hands-on experience; seminars with resource personnel; and student research projects. As a result of student pretesting and posttesting, employer evaluations, and student questionnaire responses, an ornamental horticulture pilot program was initiated in Berks County vocational-technical schools. Survey instruments, results, and program related materials are appended. (KN)

Identifiers—Wisconsin

Covering the period from July 1, 1974 through June 30, 1975, the interim progress report describes the second year of career and continuing adult education programs in a rural district serving more than 186,000 persons of all ages in western Wisconsin. During this period the project staff focused on developing programs and services to meet the needs of grades K-14 and of adult evening students. Use of the five resource centers, with testing programs and a broad scope of materials of all kinds, has increased. Staff in-service programs have expanded and articulation among various levels of education is continuing. Included in the document is the third party evaluation report by the Center for Vocational, Technical, and Adult Education at the University of Wisconsin-Stout. The evaluators concluded that the project was effective in extending job presentation and other educational opportunities, in establishing a career learning system, and in making area residents aware of change. Making up two-thirds of the document, the appendixes contain: inservice teacher education materials, surveys of parents and students, adult evening student surveys, teacher questionnaires, various publicity materials, sample instructional materials, and other project-related items. Identifiers—\*Wisconsin

Covering the time period of July 1974 to June 1975, the interim report describes the activities of a project designed to provide career education to the adult population of a low income rural area in north-central Wisconsin. Special emphasis was focused on out-of-school persons in need of entry jobs or those needing job upgrading or retraining. Programs incorporating the concepts of self-awareness, career awareness, career development, and career exploration were developed. Activities were designed to provide career education information to the parents of high school age youth in the area. This included classes, small group sessions, counseling, career material displays, tours, and informational meetings. In addition, the materials resource center was expanded, and materials were disseminated on a loan basis. Inservice was conducted for all project personnel in the form of meetings, workshops, and classes. Publicity efforts, through newspapers, newsletters, radio, and television, increased the public awareness of career education. Appendixes make up two-thirds of the report and contain evaluation instruments, publicity samples, sample programs, a 51-page bibliography and resource guide, and other project-related materials. Descriptors—\*Adult Education, \*Career Education, Developmental Programs, \*Economically Disadvantaged, Elementary Secondary Education, Program Effectiveness, \*Program Evaluation, \*Rural Areas

Identifiers—\*Wisconsin

The third party evaluation report focuses on the second year activities of a three-year exemplary project in career education conducted by the North Central Technical Institute (NCTI). The project was designed to provide career education activities to the adult population of an economically depressed rural area in north-central Wisconsin. Job upgrading and retraining career information dissemination, and inservice education were carried out through workshops, counseling, classes, group sessions, displays, tours, and informational meetings. Initially, the report deals with such areas as communication, adults 16 and over, women, agency cooperation, NCTI staff, school participation, and personnel. The second part of the report is concerned with the results of the efforts of the staff in selected elementary and secondary schools in the NCTI district. Overall, the school systems accepted the project consultants and the concept of career education, although with varying degrees of effectiveness. This acceptance was regarded as an indication of the need for such services. It was found that the efforts of the project staff were often frustrated by the personal characteristics of the target population, as the staff was prevented from dealing with them in groups such as classes or other captive situations. **Descriptors**—General Education, \*Graduate Surveys, \*High School Graduates, Program Effectiveness, \*Relevance (Education), Secondary Education, Student Records, Vocational Education, \*Vocational Followup

**Identifiers**—\*Virginia (Albemarle County)

A five-year followup survey of 1969 Albemarle County high school graduates was made from July 1, 1974 to July 1, 1975. Data collected regarding present job status, college attendance, and high school training were compared with high school ability level to gauge the relevance and effectiveness of high school vocational education programs. Survey results showed that the percentage of all 1969 graduates now in the work force is high. Although a relatively high percentage of general education graduates attended college, only half finished. More than half of the graduates had no high school vocational training at all, and the percentage of those with training for their present job is low. The figures also indicate that the general level student would benefit most from vocational programs, although academic students should not be discouraged from enrolling. Academic students desiring to enter management areas should, however, be encouraged to enroll in vocational programs. The survey instrument is appended. (KJ)

**Identifiers**—North Carolina

From 1973 to 1975, the school systems of North Wilkesboro and Wilkes County, North Carolina engaged in a mutual venture to adjust the focus of special educational services from one of academic orientation to one of academic and occupational preparation. The special educational services provided to mentally retarded pupils in seven elementary schools and one high school

were changed in format to include occupational preparation. The vehicle of occupational education was used to teach essential academic subjects, broaden awareness and involvement in community enterprise, develop interest and selection of employment opportunities, and introduce occupational proficiencies and requirements. The purpose of the project was to demonstrate the implementation and continuation of an occupational-academic public school program and to describe the benefit to mentally retarded students in terms of life-work preparedness. The success or failure of the project objectives was based on: pupil attitudes and achievement, description of population, teacher's opinions evaluation, principals' evaluation, pupil employment, graduates and dropouts, community participation, trainable mentally retarded, and a study of costs. Appendixes include a review of research and literature, instructional program outlines, competency assessment records, pupil attitude test, teacher opinionnaire, and related investigation. During the 1974-75 school year, the Owensboro-Davies County middle and high schools engaged in developing an exemplary program in human relationships and occupational competencies. The purpose of the program was to provide classroom instruction and exploration-placement activities that would enable the student to gain knowledge about himself in relationship to his personal worth, relationship to others, his attitudes, interests, capabilities, and to use this self-knowledge in making occupational decisions. The program involved simulated activities, work experiences, classroom instruction in job acquisition skills, and classroom experiences in clarifying values, identifying interests and abilities, and in developing goal-setting and decision-making skills. A teaching resource guide and student handbook are appended to the project report. The teaching guide is a compilation of learning activities engaged in during the project year. The materials were selected and developed by the teachers to meet the students' needs in occupational competencies through exploration experiences both within the schools and within the community. Identifiers—\*Kentucky (Region 12)

Covering the time period of February 1974 through January 1975, the final report describes a project to plan and implement a K-14 career education program in a rural and mountainous area of Kentucky. The project design consisted of an awareness component for grades 1-6, an exploration component for grades 7-9, a preparation component for grades 10-12, and a guidance component integrated with the other three. A regional career education staff directed and coordinated the program which sought to involve the community as much as possible. The five phases of the project described are: orientation, preparation, inservice, implementation, and evaluation. The report concludes that a regional concept to the delivery of a program in career education is workable and effective and provides a means of reaching a great number of persons. During the second year, the program reached over 22,000 students. Appended are: (1) a 75-page section covering teacher workshops in career awareness and career exploration, with detailed outlines of individual learning modules; (2) evaluation instruments and results; and (3) agendas of other related workshops and conferences. The three-year plan includes development of a State industrial arts guide, development of instructional materials common to all existing programs, and inservice teacher education for program implementation. To date only the first phase has been completed, with total project completion scheduled for the next three years. Master plan committee members, secondary school industrial arts instructors, and State education representatives, attended a series of leadership development workshops. This committee was responsible for establishing priorities, soliciting industrial arts input on a Statewide basis, evaluating materials, and recommending guidelines. The major topics of the guide developed for industrial arts education in North Dakota include: philosophy and goals, curriculum structure and content base, industrial arts physical facilities, teacher qualifications, criteria for reimbursement of industrial arts programs, and operational guidelines. The guide will be used as the framework for development of instructional materials in the second phase. (KJ)

Identifiers—\*Pennsylvania, VEMIS, Vocational Education Management Information System

The Pennsylvania State Department of Education developed an automated system in 1970 to facilitate meeting report requirements to the United States Office of Education. This system provides for computer processing of such information as labor market needs in planning vocational programs, standards for these programs, graduate followup, demographic profiles of pupils and teachers, and utilization of facilities. The starting point of the system, the manpower conversion equation, indicates underdeveloped manpower resources as input into employment policies, manpower requirements, labor supply, and manpower development sources. The system operation calls for meeting the information needs of various management functions concerning the vocational education process and its products. The system programs and procedures discussed in this document were established as a backup facility for the Pennsylvania State Department of Education's present outside contractor. (Author/MF)

Descriptors—Community Colleges, Conference Reports, Developmental Programs, \*Material Development, \*Mathematics Instruction, \*Program Descriptions, Program Evaluation, Secondary Education, Technical Education, \*Vocational Education

Identifiers—\*Oregon

Covering the time period of January 1974 to June 1975, the report describes the activities of an ongoing project to provide verbal problem sets for occupational math courses offered in Oregon community colleges and secondary schools. The problems were selected to provide the math skills necessary for job entry and performance in several vocational-technical occupations. An individualized format permits students to work problems in various career areas and alleviates

material duplication by individual instructors. An evaluation of a small subset of problem sets was carried out in 12 model secondary schools and seven community colleges. In addition to compiling, printing, and disseminating the problem sets, the project also developed a proceedings booklet illustrating some of the uses of the problem sets. The five-page booklet is appended to the report along with a 20-page report of a subproject that consisted of three State conferences for vo-tech instructors. Other project-related materials are included. (NJ)

Descriptors—Attitude Tests, \*Career Education, \*Change Strategies, \*Changing Attitudes, Inservice Programs, \*Inservice Teacher Education, Measurement Instruments, \*Teacher Attitudes, Teacher Workshops

Identifiers—Oregon (Grants Pass)

The project was conducted to test the assumption that there is a positive correlation between teachers' knowledge about career education and their attitudes toward using it in the classroom. The projected goal was to implement career awareness activities for teachers in an inservice program in order to promote teacher attitude change. Results indicated that the assumption was correct. Inservice workshops for teachers were held at a district community college. Tests before and after the inservice programs indicated that the teachers did have more positive attitudes about career education after the programs. Appendixes include a bibliography, a list of audiovisual materials used in the inservice programs, tests and surveys, and workshop agenda. (MF)

Descriptors—Educational Demand, Educational Planning, Educational Supply, \*Management Information Systems, \*Manpower Needs, School Surveys, \*State Departments of Education, \*Systems Development, Teaching Guides, \*Vocational Education

Identifiers—VEMIS, \*Virginia, Vocational Education Management Information System

The project was conducted to evaluate the vocational education reporting system in Virginia. Objectives were to determine if the student enrollment and followup information collected by the system is adequate for program planning by local school divisions; to revise the reporting system; to study procedures used in other States in determining manpower demand; to develop an instrument to determine student demand for vocational programs; to revise the forms and procedures used in plans for vocational education; to determine availability and utilization of vocational education facilities in Virginia; to develop an instrument for gathering data on teachers' daily assignments; and to assist in developing computer software for program standards. It was concluded that while the reporting system is functioning reasonably well, major revisions of forms and procedures are needed to improve its efficiency. Materials resulting from and

related to the project are appended. Included are: a report on adequacy of information to localities (4 pages); 1974 and 1975 teacher guides (55 pages); a manpower demand state-of-the-art study (67 pages); vocational education student demand projection system (33 pages); annual projected plan for vocational education and preliminary applications for Virginia vocational funds for 1975-76 (87 pages); and a report on facility utilization study. Descriptors—Computer Programs, Educational Programs, \*Evaluation Methods, \*Handicapped, Hospitals, Institutional Schools, \*Models, Pilot Projects, Program Development, Program Effectiveness, \*Program Evaluation, Questionnaires, State Programs, \*Vocational Education

Identifiers—Texas

An evaluation model was developed to measure the effectiveness of pilot programs in vocational education for handicapped persons in selected State schools and State hospitals in Texas. The model was field-tested by conducting evaluations of 16 pilot programs in vocational education for the handicapped located in seven State schools/hospitals. Data were collected by evaluation teams from the field of vocational education or special education for the mentally handicapped. The testing indicated that the model was useful for collecting and evaluating appropriate data to determine program effectiveness. It was concluded that the model program concepts were more applicable to vocational education programs in public secondary and post-secondary institutions than to pilot programs in the State schools/hospitals. Model development, test procedures, and findings are detailed in the report. Vocational program evaluations are appended, including a 39-page section presenting the instruments used to obtain evaluation statement ratings (questionnaires to conduct personal interviews with directors, counselors, program instructors, vocational students, and employers). Thirty-one pages of computer program information and tabulated data conclude the document. (MF)

Identifiers—\*Wisconsin

The annual report documents Wisconsin's vocational programs for the 1969-70 school year and serves as the initial study of the State advisory council. Objectives were to provide a broad assessment of the vocational and technical education program in Wisconsin, to identify program processes and outputs, to determine the degree to which the program is serving the population, and to see how it reflects the labor force requirements. Contents are arranged in chapters on study background, goals, delivery system, people and programs, labor market data and manpower needs, financial programs, State and local personnel, professional growth and development, ancil-

lary services, analysis of projects, and recommendations. Statistical data are displayed in tables and graphs, with State outline maps showing geographical locations of programs and funding. (MF)

**Descriptors—**\*Alternative Schools, \*Career Awareness, \*Career Education, \*Disadvantaged Youth, \*Educational Alternatives, \*Educational Development, \*Educational Needs, \*Educational Principles, \*Educational Strategies, \*Freedom Schools, \*Futures (of Society), \*Individualized Programs, \*Open Education, \*Social Values, \*Speeches

Three alternatives for education in the future are presented in the paper, which was initially delivered as a university graduate school lecture. The author first describes three groups of children with different life environments—the advantaged, the silent majority, and the disadvantaged. The significance of possible educational alternatives is then related to the three groups. The first educational alternative is renewed academic planning, holding that there is nothing basically wrong with the present subject-centered curriculum and educational practice. A second alternative is the free-school movement, or the "de-schooled society" of Ivan Illich, proposing a structureless school in which the child guides himself. There is a real potential in the concept of a free school, which would emphasize choice and individual determination in place of authority and control. However, this existentialist structureless school does not place human development in the proper context of social relationships. The educational system has an obligation to society as well as to the individual. The third alternative is career education, which would give all children the means of coping with the problems of their environment through developing a sense of vocation. (MF)

**Document Not Available from EDRS**

**Descriptors—**Administrator Guides, \*Career Education, \*Change Strategies, \*Changing Attitudes, \*Discriminatory Attitudes (Social), \*Educational Needs, \*Ethnic Stereotypes, \*Inservice Programs, \*Instructional Staff, \*Leaders Guides, \*Needs Assessment, \*Questionnaires, \*School Community Relationship, \*Sex Stereotypes, \*Socioeconomic Status, \*Staff Improvement, \*Student Teacher Relationship, \*Teacher Attitudes

The materials in the staff awareness program were developed to assist facilitators of career education inservice training. The purpose of the program is to increase the expectations of teachers toward the career potentials of all students regardless of their race, sex, ethnic background, or the socioeconomic status of the family. The program helps to identify staff stereotypes toward students and provides a tested intervention for changing staff behavior. The materials are presented in four sections: (1) a review of the literature, rationale and research base containing a conceptual framework, research data from three sites, and a summary of inservice outcomes found during program testing (26 pages); (2) administrator's guide, providing an overview of the total staff awareness program with information needed for decision making (11 pages); (3) guide for a local study, containing instrumentation and directions for studying local needs in order to adapt the inservice program products (60 pages); and (4) staff training, presenting an inservice pro-

gram with implementation and evaluation materials and activities (81 pages). (Author/MF)

**Descriptors—**Behavior Change, \*Career Education, \*Change Strategies, \*Changing Attitudes, \*Inservice Programs, \*Instructional Staff, \*Intervention, \*Manuals, \*Planning, \*Questionnaires, \*Role Playing, \*Staff Improvement, \*Teacher Attitudes, \*Teacher Workshops

One of five sections of materials for a program to change teacher attitudes toward career education, the procedures manual presents the theoretical base of the program, the operational plan, and program procedures for strategies to implement a comprehensive staff development effort in assimilation of a career education program. The results of the pilot study and field tests indicated that active participation in workshop activities, including role playing, does increase attitude change. The evidence substantiates the assumption that discrepant role playing must be induced in order to promote a positive change in resistive teachers. Such teachers can be influenced to change their attitudes in a specific direction as a result of planned intervention developed on the theoretical framework of Festinger's theory of cognitive dissonance. Appended materials include sample forms, memoranda, and questionnaires. (Author/MF)

The comprehensive career education staff development questionnaire presented in the document was developed for use in inservice education programs in career education. Detailed in-

strument development and a suggested method of administering the questionnaire are described. Three subscales are designed to measure variations among staff members of their affective acceptance, commitment, and change orientation. The questionnaire has three purposes: (1) to measure the magnitude of change toward career education, (2) to measure variations among staff members, and (3) to generate an attitude profile of educational staff toward career education and change orientation. The instrument should help local educational personnel to make more realistic decisions regarding their inservice programs. (Author/MF)

The staff development program was prepared to provide inservice education to grades K-12 school staff members in making more effective use of community resources in career education. The program was designed to help coordinators plan and conduct inservice sessions for teachers and other instructional staff responsible for using such resources. The publication, Section 1, contains the program contents and management plan, procedures and sample survey forms for conducting a local needs and attitudes assessment, and a summary of a research study conducted by the Center for Vocational Education in 1973 on the attitudes of educators and citizens toward the use of community resources. The sample survey instruments are for use with teachers and counselors, students and parents, school administrators and board members, and business and industry representatives. Section 2 of the program contains eight inservice modules and is available as CE 005 820. (Author/MF)

Identifiers—Health Services Administration, \*Licensing

The report contains requirements and practices in credentialing and recredentialing of health professionals by States and by professional societies. It begins with an overview of the health care components of the Health Services Administration (HSA). Credentialing needs and four types of credentialing activities are discussed: basic or initial credentialing (graduation, certification/regISTRATION, licensing), advanced credentialing (formal education, work experience, examination for specialties), credentialing maintenance (renewal by fee, continuing education, re-examination/recertification), and other credentialing activities (lapses, staff privileges). Information on the four types of credentialing activities, including requirements and actual practices, is given for more than 20 categories of health providers. Credentialing activities of the United States Public Health Service, Army, Navy, Air Force, and Veterans Administration are reviewed. Costs are projected for HSA support of all future credentialing and recredentialing requirements for health care providers employed by HSA. Conclusions are related to payment of these costs by HSA. An 88-item reference list is included. (NTIS)

**Descriptors**—Affective Objectives, Behavioral Objectives, Cognitive Objectives, \*Course Objectives, \*Course Organization, \*Individualized Instruction, \*Matrices, \*Nursing

The document recounts in a narrative scenario how fictional nursing teachers and a consultant in a work-session developed a matrix which helped the teachers organize their clinical nursing courses more effectively by discriminating carefully among knowledge, performance, and attitude objectives. Placing the objectives on the matrix revealed the degrees to which the courses were balanced. Concise language was encouraged in a series of Socratic exchanges. The document is titled "illustrated" because, in itself, it illustrates what a learning module should be, or, serves as a model, in which the reader may discern by analysis the components of a successful module. There are no illustrations in the usual sense of graphic embellishment, nor are there explicit instructions provided on developing a learning module, beyond the note that a module contains objectives, pretests, learning environments, and post-tests, just as the document does. The reader is pretested and post-tested on his knowledge of the matrix-development scenario. Thirty-two pages of the document are devoted to sample nursing education course objectives, and one completed matrix is provided for barbers. Implications for career ladders and lattices must be drawn by the reader. (AJ)

**Descriptors**—\*Career Opportunities, Charts, Community Problems, Data Analysis, Developmental Programs, Educational Programs, Employment Opportunities, \*Employment Programs, \*Graphs, Job Training, Manpower Development, \*Manpower Needs, \*Program Planning

**Identifiers**—New York (Bronx)

The program is designed to provide a system for joining job seekers and job providers in Community School District No. 9 through a medium of teaching and training and to meet the immediate and future job training needs of community residents. The program was conducted according to the following processes: (1) a needs assessment, an income and education analysis, and an employment analysis of the district; (2) an evaluation of other job training programs; (3) an examination of existing manpower programs in the district which are later evaluated in a conference; (4) an outline of major businesses and continuing education programs; and (5) an outline of a plan for the development of cluster center components. The implementation plan for a program to meet the employment needs of the district include the following components: outreach to community residents, career counseling, comprehensive client assessment and recommendation, basic skills program, job training centers, on-site job training program, computer based job market analysis and job placement, follow up and evaluation, and coordination with existing programs. A list of references and a bibliography are included. Appended materials include form letters, the questionnaires used in the study, and manpower training programs in the district. (Author/EC)

**The Masculine Focus in Home Economics.**

Home Economics Education Association, Washington, D.C.

Pub Date 1 Apr 75

Note—31p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

**Descriptors**—\*Adolescents, \*Curriculum Development, \*Home Economics Education, \*Males, Secondary Education, \*Student Characteristics, Student Interests, Student Needs

The publication explores what home economics has to offer young men and provides information useful in establishing or implementing a curriculum to meet the needs of today's adolescent male. The growing recognition that home economics at the secondary and middle school levels provides important knowledge, attitudes, and skills for the adolescent male is discussed. The existing barriers to male students' involvement in home economics classes are described and identified: community involvement, parental attitudes, peer attitudes, attitudes of school personnel, and teacher attitudes. Some general observations on understanding and teaching boys are presented. The need for considering the masculine self-image is also discussed. Detailed suggestions for curriculum development include methods of recruitment and ideas for adapting course content and activities to the needs of males in co-educational classes. Specific areas of the curriculum discussed are: child development, clothing and textiles, food and nutrition, housing and home management, personal development and family relations, and occupational home economics. The report concludes that the inclusion of males in the home economics curriculum is a forward step which requires teachers to become acquainted with male students' characteristics, needs, and attitudes in order to provide relevant and interesting instruction. **Instructional System Development.**

Department of the Air Force, Washington, D.C.

Report No—AFM-50-2

Pub Date 31 Jul 75

Note—108p.

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

**Descriptors**—Attitudes, Curriculum Development, \*Educational Development, Educational Objectives, Flight Training, \*Instructional Systems, Manuals, Military Service, \*Military Training, Program Evaluation, \*Systems Development, Technical Education, Testing, Training Objectives

**Identifiers**—\*Air Force

The manual presents a technology of instructional design and a model for developing and conducting efficient and cost effective Air Force instructional systems. Chapter 1 provides an overview of Instructional System Development (ISD)

Chapters 2-6 each focus on a step of the process: analysis of system requirements; definition of education/training requirements; development of objectives; and tests; planning, developing, and validating instruction; and operation and evaluation of the instructional system. Chapter 7 summarizes the steps involved when applying ISD to knowledge and attitudes. In chapters 8 and 9, the ISD process is related specifically to Air Force flying training and technical training. Appendixes contain an explanation of terms, references, annotated bibliography, bibliography of technical materials, and instructions for completing the ISD status report. (EA)

**Career Education Programs; Grades 7 and 8.**

Pulaski School District, Wis.

Pub Date 75

Note—71p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

**Descriptors**—Business Education, \*Career Education, \*Career Exploration, Curriculum Development, \*Curriculum Guides, Health Education, Health Occupations, Industrial Arts, \*Junior High Schools, Learning Activities

**Identifiers**—Wisconsin (Pulaski)

The Pulaski Community Schools have developed a career education curriculum that involves seventh and eighth graders in a year-long study of health, industrial arts, and business education. The Health Education Curriculum outlines 10 basic concepts and areas of study: social living, mental health, nutrition, tobacco, alcohol, drugs, hygiene, physical fitness, consumer health, and birth/aging process/death. Health Careers lists jobs in these areas and presents instructions for classroom activities, with an outline of elements to be studied in terms of each career area given. The Business Education Curriculum presents separate outlines for each grade with a two-page guide regarding specific texts and audiovisual aids not identified in full. Public service, communications and media, marketing and distribution, transportation, and business and office are covered in the seventh grade curriculum outline; job orientation and a review of clusters studied in seventh grade are in the eighth grade outline. The Industrial Arts Curriculum outlines separate curricula for each grade, with a two-page guide regarding a specific text, Exploring. The seventh grade outline covers natural resources, environmental, marine science, manufacturing, agri-business, transportation, construction, and a sample unit on agri-business, with the eighth grade curriculum adding a mini course in careers. **Management by Objectives and Program Planning and Budgeting Systems: A Guidebook for Developing a Model Local Annual Plan and a Model Local Five-Year Plan for Vocational Education.**

Indiana State Board of Vocational Education, Indianapolis.

Pub Date [74]

Note—77p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

**Descriptors**—\*Budgets, Cost Effectiveness, \*Educational Accountability, Educational Finance, Educational Objectives, Evaluation Methods, \*Management by Objectives, Management Systems, Models, Performance Criteria, \*Program Planning, School Districts, Systems Concepts, Systems Development, \*Vocational Education

**Identifiers**—Indiana, \*Planning Programming Budgeting System, PPBS

The guidebook is intended to acquaint vocational educators with two specific management strategies: Management by Objectives (MBO) and the Program Planning and Budget System (PPBS). The long range goal of this project is the formation of a model local annual plan and model five year plan for vocational education in local school districts throughout Indiana. For this reason, it was necessary to examine the theoretical bases for MBO and PPBS as well as to develop detailed, practical steps for implementing the systems at the local level. Chapter 1 presents the rationale for the development of the MBO system, and examines its benefits and pitfalls. Chapters 2 through 5 detail the theory and practical applications of the four phases of MBO: (1)

establishing mission and role statements, (2) setting and validating objectives, (3) developing action plans to achieve objectives, and (4) developing a performance appraisal system. Chapter 6 defines PPBS and discusses its advantages and disadvantages. The document concludes with appended worksheets and evaluation forms. (Author/BP)

**An Exploratory Study of Adult Learning Styles.**

Pub Date 75

Note—32p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Adult Learning, \*Adult Students, Computer Assisted Instruction, \*Educational Research, Interviews, \*Learning Processes, Metric System, Post Testing, Pretests

**Identifiers**—\*Learning Styles

The exploratory study focused on the existence, variability, and effectiveness of adult learning styles among participants receiving computer-based instruction in the metric system. A pretest was administered to 75 adults not currently involved in formal educational programs, and 40 participants were selected whose pretest indicated no knowledge or limited knowledge of the metric system. The learning experience was presented by the Plato 4 computer system, which recorded each participant's learner trail (record of moves) and the corresponding time data. A posttest was administered after participants' decision to end the learning; the posttest was followed by an interview to determine learner reactions. The data strongly supported the idea of learning styles, as each participant had a particular way of moving through the lesson (sequencing, pacing, and distribution of moves), and it also was possible to cluster participants according to learning styles. No relationship was indicated between membership in a particular learning style cluster and level of prior knowledge, age, sex, educational level, or recency of education. Approximately one-fourth of the participants were aware of a conscious strategy or plan of study. The high scores on the posttest made it impossible to determine the relative effectiveness of various styles. (EA)

**Syllabus in Medical Assisting: Health Occupations Education Program.**

New York State Education Dept., Albany. Bureau of Occupational and Career Curriculum Development.

Pub Date 75

Note—74p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—Certification, \*Course Content, Course Descriptions, Course Objectives, Educational Programs, Guidelines, Health Occupations, \*Health Occupations Education, \*Medical Assistants, Post Secondary Education, State Standards, \*Teaching Guides

**Identifiers**—New York

The document presents a syllabus which would serve as a guideline for health occupations educators in establishing a course of study for training medical assistants which would meet New York State requirements and be acceptable for State credit. The syllabus is arranged in three columns: (1) minimum acceptable content of study which requires 80 percent of the course time in instruction, (2) instructional objectives based on student performance, and (3) teaching suggestions. The course of study is divided into six sections: general orientation (2 areas), the medical assistant (4 areas), body structure and function (15 areas), administrative duties (4 areas), clinical duties (5 areas), and technical duties (3 areas). A discussion on the relationship of clinical experience, a sample clinical experience agreement, procedures for obtaining certification, a resource list of instructional materials, and source directory of suppliers are appended. **Identifiers**—District of Columbia, National Council of Negro Women, \*Operation COPE

The handbook is comprised of materials related to the implementation of Operation COPE, a Washington, D.C., demonstration Adult Basic Education (ABE) project for low-income young mothers who are heads of households, developed by the National Council of Negro Women (NCNW). The project featured a curriculum which integrated coping skills with Adult Basic Education; a method of inservice training for professionals and paraprofessionals in ABE programs; and a model of an advisory committee for ABE programs. The handbook reveals the work processes by which Operation COPE intervened in the cycle of poverty, functional illiteracy, and deprived family life by involving the mothers in diagnosing their own needs and in planning, conducting, and evaluating their own learning; by involving them in parent and citizenship training and enrichment activities; by providing participants with the added support of NCNW's network of volunteers; and by establishing opportunities for them to acquire needed services through the project's linkages with other community agencies and organizations. The young mothers, interested in acquiring job skills, requested typing, sewing, and crafts classes; reading, mathematics, parenting, home economics, and other skills were introduced only as the mothers perceived needs for them. Sample instructional materials and participant data are among the materials included in the document. (Author/AJ)

**Mobility Study of Industrial Arts Teacher Education Graduates: Patterns of Employment, Education, and Selected Characteristics.**

New York State Education Dept., Albany. Bureau of Industrial Arts Education.; New York State Education Dept., Albany. Bureau of Occupational Education Research.

Pub Date Jul 75

Note—23p.; Pages 16-19 may not reproduce well in microfiche due to lightness and size of type

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Comparative Analysis, Data Analysis, Economic Factors, \*Educational Background, \*Employment Patterns, \*Graduate Surveys, Industrial Arts Teachers, Questionnaires, Social Factors, Student Attitudes, Teacher Education, \*Teacher Programs

The study summarizes the information collected from 1960-70 industrial arts teacher education program graduates in four New York State institutions which offered a program. Questionnaires were sent to 2,523 graduates of which 1,796 were returned. Information was collected regarding their employment patterns, economic and social factors that affected their career choices, and educational patterns. Most program graduates were employed in education (96 percent) upon program completion. Data are analyzed and compared for graduates who were currently employed in education (84.3 percent) and in business or industry (12.1 percent). Those who left education found employment in the professional, technical, and managerial fields. Conclusions based on the data showed that both groups of respondents came from comparable home backgrounds, they were influenced by similar conditions in their decision to enter the program, they had similar familial occupational patterns, and graduates employed in education obtained more postbaccalaureate education and earned less than graduates employed in business or industry. The survey form used for the study is appended. (EC)

**Identifiers**—\*Project ACT, Region 8

Third party evaluation of Project ACT (Adult Competency Training), a United States Office of Education staff development project in Region 8, has examined the achievement of the project's goal of developing a self-generating and self-supporting adult staff development system, thus helping adult educators to become better prepared to serve their clients. The evaluation design includes an examination of internal documents and individual interviews with policy board members, administrators, supervisors, and participants. Findings are arranged under four headings, discussing: (1) documents, examining all project documents from 1973-75 in terms of objectives, structure, and achievements; (2) policy board, examining perceptions of role, outcomes, judgments, objectives, evidence, and decision making; (3) administrators and supervisors, listing interview questions and responses; and (4) other findings, including data on advisory boards, questionnaires, staff perceptions, and follow-up on previous recommendations. A numerated summary of findings includes the following statements: the purpose and objectives of the project have remained constant; very little change has occurred in Board member perceptions; administrators and supervisors consistently rate the project highly; and there is no consistency in advisory board organization throughout Region 8. Eleven tables supplement the discussion. (LH)

**Identifiers**—\*Project ACT, Region 8

Project ACT (Adult Competency Training) was a United States Office of Education staff development project in Region 8 from 1972 to 1975, implementing a self-generating and self-supporting staff system to help adult educators become better prepared to serve their clients. The project served Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming through a policy board, with two representatives from each State; strategy boards, within each State; and a central administrative staff. Major components were developed and are described: Individualized Training Programs (ITP's), developing adult educator competency in specific areas through self-directed study aided by literary and audiovisual resource materials from ACT; Regional Resource Teams (RRT's), involving various adult educators from the six States as consultants and trainers for other adult educators in the region; learning modules and project documentaries, providing audiovisual aids, exercises, and bibliographies as resource materials; and Project ACT Resource Information System (PARIS), employing computer-based data management techniques to make literary and audiovisual materials, and information regarding training sites and resources available to adult educators. It is hoped that funding will be provided to continue the major project components. (LH)

**Identifiers**—AAEC, Appalachian Adult Education Center

The document is a handbook designed to aid program administrators in planning, managing, and assessing adult educational television (ETV), to assure adult viewers the maximum instructional/learning benefit possible. The handbook includes four types of information: (1) an introduction to the Appalachian Adult Education Center (AAEC) experience, (2) justification for ETV utilization in open broadcast, (3) a management planning system for adult ETV, and (4) ETV utilization data collection forms, and figures illustrating analysis systems. The discussion and the systems design are based upon the AAEC experience in a comprehensive demonstration study of an adult educational television series, Kentucky Educational Television's General Education Development Preparation Series (KET/GED), a high school equivalency examination preparation series. The study was conducted in Kentucky as part of an AAEC project entitled Community Education: Comparative GED Strategies. The handbook identifies even the most nominal person-to-person contact as the critical element in the successful utilization of ETV, critical to student involvement, retention, perseverance, and successful achievement. The administrator is advised that, since the goal of the adult education program is the adults' achievement, not the maintenance of the program or class, monies invested to ensure the maximum numbers of adults achieving are appropriate. **Identifiers**—\*Illinois (East Peoria)

The guide to local resources was compiled by the Tri-County Industry-Education-Labor Council for teachers and guidance counselors seeking specific career education information. The resources are classified according to the 15 occupational clusters, as identified by the U.S. Office of Education, plus economic education for integration with classroom material. The guide lists: definitions of career education, the 15 occupational clusters, agencies and businesses for economic education, sequential career management tasks for kindergarten through post-high school, procedures for obtaining resource people and conducting a field trip, other services available from the Council, audiovisual materials available from the Council and other sources, a statement on the Armed Services and the world of work, and Library of Career Counseling Films and locally available films. The bulk of the docu-

ment (72 pages) is a resource chart providing specific information organized by occupational clusters, about regional businesses, industries, educational institutions, and service agencies. The chart indicates the possibilities and requirements for interviews, classroom visits (location, advance notification requirements, age groups), and field trips/career visits (maximum number of students, best days/months, time of day, age groups, time length of tour, and areas/departments open to visitors). Note—11p.; Paper presented at Phi Delta Kappa Symposium; Education: Past, Present, and Future (University of Minnesota, Minneapolis, April 26, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—Career Education, Curriculum Development, \*Educational Change, \*Educational Legislation, \*Equal Education, Equal Opportunities (Jobs), Job Training, \*Sex Discrimination, \*Vocational Education  
Vocational education, reflecting society at large, has been and is guilty of sex discrimination. Currently, individual program areas are predominantly one sex or the other, with the exception of distributive education. Females comprise approxi-

mately 55 percent of all vocational education enrollments, but half of this number exit from the system without specific skill training. Agriculture/technical education/trade and industrial programs contain only limited numbers of females. While females account for 45 percent of the total distributive education enrollment, their employment is concentrated at the lower levels of retail trade. Under Education Amendments of 1972, vocational education will have from one to three years to eliminate any sex-based course requirements, both written policy or attitudinal constraints. Priority areas for vocational education include: (1) a recruiting and informational plan conducted with guidance personnel to encourage males and females to enter non-traditional vocational programs; (2) a focus in home economics courses on examining male/female role expectations and their limitations; (3) units on discrimination in the work world; and (4) additional training and education programs for mature women, especially in skilled trades and apprenticeable occupations. Nursing and the Management Function.  
Pub Date 75  
Note—167p.

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**  
Descriptors—\*Data Analysis, Educational Quality, Job Satisfaction, Literature Reviews, Management, Management Development, Managerial Occupations, \*Nurses, Nursing, \*Occupational Surveys, Organizational Climate, Participant Characteristics, Questionnaires, Research Methodology, \*Supervisors, Supervisory Methods, Supervisory Training, Task Analysis, \*Task Performance, Work Environment

The report describes a study designed to analyze nurses' management duties and to identify their tasks in planning, organizing, staffing, leading, communication, decision making, and controlling. A total of 117 supervisory nurses and unit managers from four Western Michigan short-term general hospitals in the 410-540 bed range participated in the survey in February-March 1975. The survey's specially constructed questionnaire (provided in an appendix) contains five sections: the first four cover biographical information, educational and work history, present work situations, and management training; the fifth lists 101 task statements organized into seven functional management areas for each of which respondents completed scales for frequency, importance, and desire for additional training. Although the importance scale was found to be unusable, the other scales were not. The study concluded that: supervisory nurses are managers by definition of the tasks they perform; management tasks, as identified by functional areas, differ between job titles; head nurses demonstrate a high level of management task performance across unit specialties; the presence of unit managers does not affect the pattern of head nurse management task performance; supervisory nurses desire additional training in management tasks; and supervisory nurses feel inadequately trained for their management role. Descriptors—Counseling, Potential Dropouts, Records (Forms), \*Secondary Education, Student Motivation, \*Summer Programs, \*Underachievers, \*Vocational Development, \*Work Experience Programs

Known also as the Summer Minimal Achiever Rehabilitation Training Program (SMART), the Nassau County work-experience program was designed to motivate minimal achieving students toward more positively directed goals. Of the

more than 300 students referred to the program, 142 were accepted as enrollees. Program objectives were: (1) to provide significant leadership, counseling, and work experience; (2) to help students develop an awareness that occupational education is preparation for a full and rewarding life; (3) to motivate students to participate in community projects and contribute to the general welfare of others; (4) to provide individual and group counseling; and (5) to motivate the minimal achiever to seek higher goals and fulfillment. Staff consisted of eight full-time placement counselors and counselor interns and one part-time counselor. Counselors met with students at the job sites and provided close involvement and follow-up. Job assignments, where possible, were made in an area for which the student was trained during the school year. The program was highly effective as evidenced by the return to school in September of all eligible students. More than half of the document consists of appended job descriptions and related program information and forms. (EA)

Descriptors—Career Education, \*Curriculum Development, \*Curriculum Evaluation, Educational Coordination, Evaluation Methods, Information Dissemination, \*Instructional Materials Centers, Program Budgeting, \*Program Evaluation, State Programs

The goals of the project were to strengthen the curriculum management capabilities of the Oklahoma Curriculum and Instructional Materials Center (CIMC); to expand its efforts toward curriculum management in career education through coordination of efforts in development, dissemination, and diffusion; and to maximize resources for curriculum management through coordination of efforts in development, dissemination, and diffusion. The CIMC conducted several activities to meet these objectives: together with the Research Coordinating Unit, 34 instructional units of curriculum materials were field-tested to determine if the objective-based instructional unit was an effective learning technique; it coordinated efforts with industry in curriculum development to carry out its career education activities; and the Ten-State Curriculum Network was formed as part of the National Network for Curriculum Coordination which focused on new developments in curriculum technology. Over two-thirds of the document contains favorable third-party evaluation of the project and related appendixes. The project's considered to be strong points were field-testing and revision of curriculum materials and workshop planning. The evaluation was conducted through team meetings; meetings with key CIMC and State personnel, instructional staff involved in piloting career education materials, and the project's advisory committee; and a project audit. Descriptors—Health Occupations, Health Personnel, \*Inhalation Therapists, \*Job Analysis, Job Skills, Occupational Information, \*Task Analysis

Frequently assigned tasks performed by qualified respiratory therapy personnel are

delineated in the document in such a manner that proficiency examinations within the profession can be prepared from them. Four distinct proficiency levels are identified and defined. Due to the fact that proficiency examinations will be assigned for them, proficiency levels two and three are described in greater detail, with information provided regarding the clinical and background knowledge required and appropriate clinical skills necessary for each level. The delineation of roles and functions include: experienced level one personnel, equipment maintenance and repair, and clerical duties; entry level two personnel, intermittent positive pressure breathing, humidity/aerosol therapy, gas therapy, pulmonary drainage procedures, cardiopulmonary resuscitation, cardiorespiratory drug administration, and infection control; entry level three personnel, continuous ventilation (standard and special procedures), airway care (tracheobronchial aspiration and tracheostomy care), emergency care, infection control, cardiorespiratory pharmacology, pulmonary function testing, and cardiorespiratory rehabilitation; and level four personnel, managerial skills, formal/academic respiratory therapy, heart-lung bypass, and cardiopulmonary pediatrics. An official definition of respiratory therapy and a glossary of terms used in the document are appended. The document is supplemented by A Guide for Respiratory Therapy Curriculum Design (CE 005 956). (LH)

**Identifiers**—Army

Except for several Human Resources Research Organization studies of the military, no systematic study has been made of the effects of attitudes and incentives on manpower availability. One such study explored the effects of early Army experience in the career orientation of Army recruits and found that early positive motivation for service was inversely related to effectiveness. Another study explored the enlistment recruiting process and found that two-thirds of the potential recruits actually enlisted in the Army but that the occupational options chosen did not adequately match recruit qualifications or Army needs. A third study analyzed career orientation questionnaires of 2,000 Warrant Officer aviators and found that combining items on background, wives' attitudes, career attitudes, and career intentions into a simple composite score produced a correlation of 0.63 with retention vs. departure.

These and other studies demonstrate that studies of motivation and incentives can play a significant role in shaping decisions about national policies regarding military service and civilian occupations. With present-day data systems and data processing capabilities, much more can and should be done to continually update knowledge of the effects of motivation on manpower availability. (JR)

**Descriptors**—\*Analysis of Variance, \*Comparative Analysis, \*Job Analysis, \*Military Personnel, \*Military Training, \*Occupational Information, \*Predictive Validity, \*Rating Scales, \*Task Analysis, \*Test Reliability, \*Test Validity, \*Time Identifiers—Air Force, \*CRICOM, \*Criterion Comparison Values

Since the accuracy and validity of occupational data may vary according to the rating scale format employed, the first phase of the research described in the report employed hypothetical job descriptions from which accurate criterion data could be generated. The second phase of the research required developing an occupational survey instrument specifically designed for Air Force basic trainees. Criterion comparison (CRICOM) or error values were used with an analysis of variance design to determine the relative validities for subjective time rating scales. It was found that five-point relative scales were inferior to the other scales tested and that job incumbents could use scales of greater complexity than had previously been indicated in the literature. Results of the investigation indicate that a nine-point relative time spent scale yield the most accurate job description data from job incumbents using the Air Force developed occupational analysis methodology. Four appendixes covering 35 pages provide hypothetical job descriptions, time spent scales, and basic trainee job-task inventory. (Author/JR)

**Identifiers**—Air Force

The report describes the procedures followed in identifying and analyzing social incentives which might be used in Air Force technical training. Questionnaire techniques were used to scale a list of 62 potential incentives for attractiveness, feasibility, and other characteristics. Personal motives, background variables, and ambiguous surface structure, ones with ambiguous underlying structure, and ones considered social incentives from the original list were redesignated as social behaviors which should be encouraged in training environments to enhance performance. On the basis of the questionnaire and administrative assessments of feasibility data, 18 additional incentives (both social and non-social) were proposed for use in a field experimental situation. Almost half the document consists of 13 appendixes which include: the questionnaire forms used; scatterplots, agreement correlations, and factor analyses of the data; results of a supplementary survey; examples of leadership behavior incentives; and assessments of rating forms. **Functional Job Analysis: An Annotated Bibliography. Methods for Manpower Analysis No. 10.** Upjohn (W.E.) Inst. for Employment Research, Kalamazoo, Mich.

Pub Date May 75

Note—27p.

Available from—The W. E. Upjohn Institute for Employment Research, 300 South Westnedge Avenue, Kalamazoo, Michigan 49007 (\$0.75; price reductions: 10-25 copies, 10 percent; 26-50, 15 percent; 51-100, 20 percent; over 100, 25 percent)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

**Descriptors**—\*Annotated Bibliographies, Classification, \*Employment Qualifications, \*Job Analysis, Job Development, Job Skills, Manpower Development, \*Task Analysis, \*Task Performance

The bibliography provides a chronological survey of the development, growth, and application of the concept of Functional Job Analysis (FJA) which provides for the formulation of qualifications of workers and the requirements of jobs in the same terms so that the one can be equated with measures of the other. An introductory section discusses FJA, pointing out that it conceptualizes experience in terms of human functioning and growth, uses the language of experience to bring into focus the definition of work, defines the unit of work in a way that results in a stable element of design, and links together in a single interacting system worker, work, and work organization. Entries are listed for the years 1951, 1953, 1955-65, and 1967-75 with items arranged alphabetically by author within each year grouping. The early papers are mostly concerned with the theoretical formulations and the research that implemented the development of the occupational classification system used by the U.S. Employment Service for the Dictionary of Occupational Titles. These are followed by the applications of FJA to the study of the impact of automation on job structure. More recent papers describe the application of FJA to various practical manpower needs. **Descriptors**—Computers, \*Computer Storage Devices, Cost Effectiveness, Data Bases, Electronic Data Processing, \*Employment Services, Information Storage, \*Information Systems, Job Applicants, Job Market, \*Job Placement, Occupational Information, \*On Line Systems

The report describes an experimental study involving an on-line placement system in Boulder, Colorado which permitted applicants to request information from a terminal on any job stored in the computer. Data were collected on applicants referred by the Employment Service: whether or not hired, reason for not being hired if not hired, applicant characteristics, and job characteristics. A telephone follow-up, made approximately 150 days after placement, determined tenure on the job, wage rate, hours worked, reason for termination, and date of termination when applicable. Applicants who were referred as a result of a computerized job search had a better chance of finding jobs, stayed on the job longer, and earned more money than applicants referred through self-service microfiche readers. There was not evidence, however, that the computer increased the chances of placement or duration on jobs over those achieved by manual applicant searches for special target groups. Speed of retrieval and consequent cost decreases favor the computer search procedure over the manual. With better applicant and job descriptors, the system could likely be improved. Nearly 50 pages of appendixes provide an abridged version of the users'

guide, referral status file descriptors, and regressions. (Author/JR)

**Descriptors**—Bibliographies, Course Content, Curriculum Design, \*Curriculum Guides, Health Occupations, \*Inhalation Therapists, \*Performance Based Education, Resource Guides, Unit Plan

The document presents educational criterion upon which curriculum builders can create a competency-based program of respiratory therapy education. The 11 modules presented supplement and complement the document Delineation of Roles and Functions of Respiratory Therapy Personnel (CE 005 945) which is listed as appendix D but not included as such. The modules include: (A) medical gas therapy; (B) aerosol humidity therapy; (C) intermittent positive pressure breathing therapy; (D) pulmonary drainage; (E) cardiorespiratory drug administration; (F) infection control; (G) continuous ventilation; (H) introduction to airway care; (I) cardiopulmonary resuscitation; (J) pulmonary function testing; and (K) cardiorespiratory rehabilitation. Units within the modules cover the following materials, generally: introduction, equipment theory and operation, therapeutic techniques, clinical practice, and additional units regarding critical patients. Each unit presents information regarding instructional content and objectives, recommended strategies for teaching and a resource bibliography. The modular format enables a variety of teaching strategies to be employed. Appended materials include: core prerequisites, providing background material on respiratory therapy, integrated sciences, ethics and medical law, compendium of resource bibliographies, listing books and articles; and guide to preparing behaviorally stated objectives (LH)

**Identifiers**—\*Career Opportunities Program, COP

The report describes the accomplishments of the Career Opportunities Program (COP) from its initiation through March 1, 1975. The program trained individuals from low-income backgrounds for new careers in schools serving children from low-income families. Based on data from 36 of 132 projects (27.8 percent), the report, in four major sections, focuses on overall characteristics of program process development and indicates the extent to which individuals participated in and benefited from the program. Section 1 presents an overall view of the participants, participant accomplishments, and other participating elements. Section 2 is a description of the extent to which major COP processes (Career Lattice, Work Study, COP Council, and Recruitment) have been developed. The summary tables and text of section 2 present each process, the development objectives associated with each process, performance objectives relating to each development objective, and the performance criteria/measurements employed to assess the extent to which performance objectives were attained. Section 3 is a composite analysis of the

cost-benefit of the program. Section 4 (179 pages) contains the data and information employed in compiling the report. (Author/MS)

**Identifiers**—\*Wisconsin

An analysis of the achievements of a large sample (4,388) of Wisconsin men during the 10 years following their 1957 high school graduation focuses upon their educational attainments, occupational achievements, and in particular, earnings, in terms of their social origins. Analysis uses a recursive structural education model of achievement. Seven chapters include: The Socioeconomic Achievement Process, providing background information; The Longitudinal Study: Data Sources and Quality, discussing methodological problems and procedures; Socioeconomic Background, Ability, and Achievement, applying a modified model in analyzing socioeconomic influences on the achievements of the sample group; Social Psychological Factors in Achievement, examining their role as variables; Colleges and Achievement, interpreting the effects of colleges on occupation and earnings; Post-High School Earnings: When and for Whom Does "Ability" seem to Matter?, discussing particular circumstances; and, Summary and Conclusions, discussing findings and future research plans. The 1957 questionnaire, the 10-year follow-up questionnaire, characteristics of the social security earnings data, and coverage of male Wisconsin youth in the 1957 survey are appended. Tables supplement the discussion, and the document is indexed. It is stated that the pattern of the achievement process elaborated on by the analysis can be generalized to other areas, and the nation as a whole. (LH)

**Descriptors**—\*Census Figures, Employment Patterns, \*Employment Statistics, \*Geographic Regions, \*Industry, Labor Force, Occupational Surveys, \*Tables (Data)

The volume presents employment by industry from the decennial censuses of population for 1940, 1950, 1960, and 1970. Thirty-five identified civilian industries are presented for each area for 1970, 1960, and 1950, together with 30 groups for 1940. Introductory material deals with the definition of employment, industrial classification of civilian employees, place of residence, seasonal factor, geographic classification, and related analytical capabilities of various branches of the U.S. Department of Commerce. A map shows the regional grouping of States used in the Bureau of Economic Analysis. The same grouping is reflected in a table which presents the total employment data by region and State at each of four census enumeration years together with percent changes over four selected periods comprised by those years. Another table presents the same data, for the United States as a whole,

by industry. Separate tabulations for each of the eight geographic regions contain employment figures by industry for the entire region, each State within the region, and each county within the State. Appendix A lists the data sources for 1970, 1960, 1950, and 1940. Appendix B shows the code designation of the similar groups in the Standard Industrial Classification (SIC) for each industrial group. (Author/MS)

Descriptors—Agriculture, \*Agricultural Occupations, Agricultural Production, \*Agricultural Skills, Curriculum Development, Data Analysis, \*Job Analysis, Job Skills, \*Occupational Surveys, Research Projects, \*Tables (Data)

Identifiers—\*Competency Identification, Montana

The report provides essential information for curriculum development relevant to manpower demands for agricultural production and agribusiness in Montana. It focuses on an analysis of 3,500 competency statements to determine the existence of duplication, commonalities, and uniqueness among 76 identified job titles derived from six Agricultural Manpower Project Competency Studies. The study was conducted by developing a manipulative method for handling the competency statements, establishment of common cores and sub-cores, a review and revision of competency groupings, and documentation of the taxonomy. The eight subject matter cores include animal science, plant science, mechanics, clerical, leadership, business management and marketing, merchandising, and miscellaneous. The data are analyzed in two sets of tables: the first series of six tables documents the unique competencies appearing for the job titles covered in the six studies, and the second series of eight tables documents the competencies according to the eight major cores and corresponding sub-cores to relate commonalities. Conclusions and recommendations based on the data are presented. A bibliography is included. Competency numbers and related job titles listed by study are appended. (Author/EC)

**The Patriot Company: A Simulated Office. Parkview High School, Little Rock, Arkansas. Little Rock School District, Ark.**

Pub Date [75]

Note—150p.; Revised edition 1974

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—Business Education, Course Content, \*Curriculum Guides, Instructional Materials, Learning Activities, Office Occupations, \*Office Occupations Education, \*Office Practices, Records (Forms), Secondary Education, \*Simulation, \*Study Guides

The document is a student manual and teacher's manual for a simulated office practice class designed to give students training in a business office on school premises. In the simulation, students perform as office personnel and as customers and creditors. The first part of the guide, directed to students, contains: general information on the Patriot Company (a simulated office equipment company), employee information, objectives of the simulation, room layout diagram, company organization chart, descriptions of job duties for 19 company positions, a catalog-price list, simulation customer names, simulation creditor names, and forms for evaluation of employees. The detailed teacher's manual lists: materials to be prepared prior to simulation, steps to simulation, suggestions for obtaining supplies, forms and supplies needed for a 12-week simulation, equipment sources, special suggestions, procedure for distribution of mail, company balance sheet, and additional student and

teacher-developed activities. Also included are sample scripts for the simulators to follow, cash sales list, credit limits of customers, inventory list, and instructor evaluation forms for student performance in each of the 19 company positions. A brief description of 50 forms used in the simulation and samples of each form conclude the manual. (MS)

Descriptors—Guidelines, \*Planning, \*Workshops

The author offers some tips from his own experience on ways to streamline a week-end workshop into a one-day workshop; his emphasis is on determined scheduling: begin promptly at 9:00 a.m. and end promptly at 3:00 p.m. He suggests that a workshop should be well-planned, a business-like atmosphere should prevail, and something concrete and specific should result. He further recommends that the workshop planners should discuss the workshop before it is held, and, on the topic of choosing experts to attend, he says that someone is needed who can get the group discussing and doing those things that need to be done. He strongly urges that the meeting place be adequate, and that enough food be served. (Author/AJ)

Identifiers—District of Columbia, National Council of Negro Women, \*Operation COPE

The document reports on the second and final year of a demonstration Adult Basic Education (ABE) project in Washington, D.C., administered by the National Council of Negro Women. Operation COPE: A Family Learning Center served the needs of educationally disadvantaged, low-income young mothers who head households. The learners' expressed interests and needs determined the curriculum (typing, sewing, and arts and crafts) taught to equip the students for employment. Reading and mathematics were incorporated into these skill subjects; homemaking was gradually introduced into the sewing classes. Individualized instruction was available in reading and math. Family and citizenship education, field trips and audiovisual aids, and utilization of service agencies were also program elements. The project's second thrust was developing inservice training for ABE professionals and paraprofessionals. Implementation of the program's essential elements is described: recruitment, counseling, climate, team approach, curriculum, community linkages, volunteers, staff development, advisory committee, and research and evaluation. Included are sample instructional materials and participant data and testimonials. Concluding the report are principles which underlay the successful model, e.g., the low-income mothers see themselves as self-directing, respond to respect, and can be helped to diagnose their needs and to plan, conduct, and evaluate their own learning. Identifiers—District of Columbia, National Council of Negro Women, \*Operation COPE

The findings of the independent evaluation of Operation COPE are reported, with reference to the project sponsors' contractual commitments, in a series of categorical statements congruent with the evaluators' conclusion that the demonstration ABE project for young mothers in Washington, D.C., represented a "spectrum of success hues." The innovative features of Operation COPE which may be projected as having national significance and/or being of special value to the adult education effort identified in the evaluation include: (1) the involvement of a national organization, National Council of Negro Women (NCNW), which gives promise of the delivery of needed ABE and coping services to the racial and cultural minorities interested in acquiring these skills, to whom NCNW already has access; (2) the approaches to staff and volunteer development; (3) the integration of coping skills and ABE in a way which meets the interest of participants in employability, without violating ABE values; and (4) the significant linkage with community resources. The evaluators conclude that the umbrella purpose of Operation COPE, which was to develop a model of a family learning center as a component of a multipurpose arrangement offering a vehicle for education and information related to family needs, was achieved. **Directory of Adult and Continuing Education Agencies, Metropolitan Syracuse 1975-76.**

Metropolitan Syracuse Committee on Continuing Education, N.Y.; Regional Learning Service of Central New York, Syracuse.

Pub Date Jun 75

Note—36p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Adult Education, \*Adult Education Programs, Adult Programs, \*Directories, \*Regional Programs

Identifiers—\*New York (Syracuse)

The directory of educational opportunities has been prepared for counselors of adults in the Syracuse Metropolitan Area. It is intended not only for counselors in educational institutions but also for those working with adults in social and other agencies. The directory is designed to provide enough information so that adults who inquire about learning opportunities may be referred to a specific person at a particular institution or agency where further program details can be explained. Both credit and noncredit continuing education offerings are briefly described. Programs were included if they offered group instruction to the public. Six classifications are listed: universities and colleges, school districts, proprietary institutions, cultural institutions, social agencies and institutions, and organizations and associations. The results are briefly summarized of a study to investigate the relationship of factors other than job skills (such as social skills, life style, mobility, family relationships, and contextual factors) to the long range success of vocational and technical training programs. Data were gathered about students in secondary and postsecondary vocational institutions in nine geographic regions of Mississippi. Information was supplied by center directors, teachers, and questionnaires given to students. Findings relating to the students' plans for living and working location, their need for social change, and the factors tending to affect their mobility patterns are mentioned. (Author/EC)

Identifiers—\*Project Baseline, Vocational Education Amendments 1968

The report reviews the progress and problems of vocational education in realizing the Congressional expectations set forth in the Vocational Education Amendments of 1968. Discussion and analysis focus on the 1971-74 period. The study used analyses of Project Baseline's Common Data Base; many of the results are contained in the text, and information on others is appended. Evidence of a number of achievements, as well as evidence of problems, is presented. Intended as more than a summary of progress and problems, the document describes social, economic, and political conditions affecting vocational education's evolution, in an attempt to define the role of vocational education in a broad social context and to identify the major variables which promise to influence future directions of the program. Research on the relation between education and work revealed radical changes in the value and function of education, with vocational education shown by the study to be in the forefront of the change. In the light of research, the report identifies 20 major issues of importance to the continued development of vocational education and makes specific recommendations for responsive congressional policies. Identifiers—Monographs, Pennsylvania, \*Vocational Development Study

The report is an accounting of activities of the Vocational Development Study (VDS) project during the three-year funding period of July 1971 to July 1974. The longitudinal study, planned to cover a 10-year span, was begun in the fall of 1968. The project was developed to identify the effects of the high school experience on youth in vocational guidance. The sample consisted of the total ninth grade enrollment in three medium-sized Pennsylvania school districts—Altoona,

Hazleton, and Williamsport. Data were collected at several stages through standardized aptitude and achievement tests and inventories of interests, values, and vocational development. Information on family and environmental background, occupational and educational aspirations, as well as school-generated data were also collected and analyzed. The report presents the background of the project and describes procedures involved in sample selection and data collection, handling, and storage. The VDS project resulted in 20 published research monographs and numerous papers and articles. Copies of the monographs and papers and a list of the articles are included in the report. In addition, a one-year graduate followup survey was made of the Altoona class. Several questionnaires are appended. (NJ)

Imitation in Children: The Effect of Being Imitated.

Pub Date Apr 72

Note—14p.; Not available in hard copy due to marginal legibility of original document; Paper presented at the Annual Meeting of the Western Psychological Association (Portland, Oregon, April 1972)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Behavior Patterns, Experimental Psychology, \*Extinction (Psychology), \*Imitation, Models, Preschool Education, Reinforcement, Research Projects, \*Response Mode, \*Role Models

The purpose of this study was to investigate the effect of being imitated on behaviors of preschool children. Each of 24 subjects was given a choice of three responses in a marble-dropping task and was required to make one choice, after which an experimenter either imitated or did not imitate a subject's behavior. The results indicated that when a response is imitated by an experimenter, the response frequency is maintained; however, when a response that was previously imitated was no longer imitated, the response frequency significantly decreased. These results were interpreted as providing evidence that behavioral similarity produced by an experimenter has positive reinforcing properties. (Author)

Summarized is a therapy approach utilizing characterizations designed to help the client reduce his neurotic behaviors and develop his true potentials. Growing up, he may have been forced to reject aspects of his personality to meet others' expectations. Thus, he is not integrated or whole. To reduce the control used to hide his rejected parts of himself and others, and discover and integrate them, identities are formulated which personify these parts. The client is coached to experience himself as these people. Subsequently, he discovers that there is no further need to hide these aspects of himself. (Author)

Khokhlov, Nikolai E. Gonzalez E. John

Cross-Cultural Comparison of Cognitive Consistency.

Pub Date 73

Note—22p.

Available from—Nikolai E. Khokhlov, California State College, San Bernardino, California 92407

Journal Cit—International Journal of Psychology; v8 n2 p137-145, 1973

Document Not Available from EDRS

**Descriptors**—American Culture, \*Cognitive Processes, Congruence, \*Cross Cultural Studies, \*Individual Psychology, Research Projects, \*Response Mode, \*Social Psychology  
**Identifiers**—\*Cognitive Consistency, Greece

A comparison of cognitive consistency was conducted across two cultural groups. Forty-five American subjects in Southern California and 45 subjects in Northern Greece responded to a questionnaire written in their native language and which contained three classical paradigms for balance theory. It was hypothesized that significant differences in responding to cognitive imbalance would emerge in cross-cultural comparisons. As predicted, highly significant differences were detected in the subjects' responses to cognitive inconsistency with balance effect being inoperative in the Greek cultural group. In addition, a unique contribution to the cognitive balance effect in the American sample was demonstrated by the college age group. In the discussion, the validity of a universally operative model of cognitive consistency as an irresistible tendency to resolve cognitive imbalances by an automatic adjustment of attitudes is questioned. This speech, delivered before the World Future Society Second General Assembly, is a call to a future-oriented society guided by both short- and long-term futuristic goals. The author believes it important that we act rather than react to our changing roles. Such roles include helper in complex decision-making and specialist in processing there is a need for a new professional counselor with professional education and training for new roles. Such roles include helper in complex decision-making and specialist in processing and disseminating up-to-date knowledge about the changing world of work. The author also describes his projections of needs for human services workers that will result from anticipated social, economic and vocational changes. He regards it as essential that change be implemented by a concerted interdisciplinary effort. (SJL)

**Identifiers**—Nebraska (Lincoln)

The Lincoln, Nebraska Volunteer Probation Counselor Program is an example of community involvement in the corrections process. Through careful screening, volunteers are selected and then trained to assist the local probation staff in counseling and supervising probationers. After being extensively interviewed, both volunteers and probationers are matched on the basis of mutual interests and the probationer's specific personal needs. The volunteer serves as friend, role model, supervisor, or counselor, depending on the probationer's needs. The relationship is designed to help the probationer understand himself better and see the world more realistically and constructively. Ultimately, the goal is to reduce the likelihood that he will turn to more serious crimes. Using this approach, the Lincoln program has worked with high-risk misdemeanor probationers. This brochure briefly describes the program. (Author)

**Descriptors**—\*Behavioral Science Research, Personality, \*Personality Assessment, \*Psychological Studies, \*Social Psychology, State of the Art Reviews

**Identifiers**—\*Mischel (W)

In the last half dozen years, the field of personality psychology has been asked to reconsider certain premises that traditionally have guided conceptualization and research. The most influential questioner and critic has been Mischel. The essential criticism, advanced and buttressed in a number of ways, is an empirical one: namely, the research evidence accruing over the years supports only weakly or not at all the assumption by psychologists that traits or dispositions importantly govern behavior. Mischel develops this conclusion in a widely-read review of the personality assessment literature. Mischel's 1968 conclusions have become widespread and blandly accepted. This paper offers an "assessment of Mischel's assessment of the state of personality assessment," and indicates some of the ways in which his negative evaluation can be countered. This essay reads the research evidence differently and, in addition, introduces some recent pertinent findings that permit a different structuring of the accomplishments and deficiencies characterizing personality research. More than 250 counselors, psychologists, educators and others from 50 states attended the conference. The purpose was to bring together persons responsible for rendering services to minority people in health, welfare, and educational settings. The goal was the formation of a communications network to facilitate the advancement of minorities in our society. Highlighting the four-day conference were the presentations by a number of nationally known leaders in the fields of psychology and education as they relate to minority affairs. These persons

had created effective models of service delivery for educational, health, and community settings. The thought-provoking content of these presentations was discussed in small groups which also allowed participants to share their problems and individual perspectives on working with minorities and systems. This document presents a brief summary of those presentations. (Author)

Note—57p.; For related document, see CG 010 230

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—\*Conference Reports, Counseling, \*Counseling Effectiveness, Elementary Secondary Education, \*Minority Groups, \*Negro Students, \*Social Services, Student Needs

Participants included more than 400 persons from counseling, educational and related settings. Responding to the suggestions of the participants of the first conference, a number of workshops focusing on skill building were held. The goal was to strengthen the commitment of counseling professionals to assist minorities in the process of self-actualization. A number of experts from the field of welfare, politics and education shared their views and experiences in panel presentations. Workshops, focusing on the theme of each panel, followed. These small group discussions allowed indepth examination of the theoretical formulations and instructional models suggested by the panel members. The document presents a brief summary of each of those presentations and workshops. (Author)

Using Transactional Analysis in Career Development.

Pub Date Nov 75

Note—68p.; Best copy available, occasional sections may not reproduce clearly; script of a presentation at the Annual Meeting of the Florida Personnel and Guidance Association (25th), Jacksonville, Florida, November 21-23, 1974)

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage  
Descriptors—Behavior Change, Career Awareness, \*Demonstration Programs, \*Individual Development, Personality Development, \*Personality Theories, Secondary Education, \*Self Evaluation, \*Vocational Development

Identifiers—\*Transactional Analysis

This program, in two sections, provides a concise introduction to Transactional Analysis (TA) and some practical applications for its use in the field of career development. Lectures and demonstrations show how Transactional Analysis techniques were used in initiating Career Development Programs with teachers, parents, and students. The presentation includes a brief history of TA, and discussions of ego states, life positions, transactions, strokes, time-structuring, and contracting. The premise of the presentation is that student development and career development are mutual concerns. In order for a student to make accurate and meaningful decisions regarding careers it is necessary for her/him to develop adult thinking and maintain an all-OK attitude. TA principles can be used to assist students in attaining this maturity in decision-making so that they will be able to assimilate career information into legitimate potential career directions and choices. A set of slides, used in the original presentation, is not included. (Author/SJL)

Project CREST [Clinical Regional Support Teams]: A University Responds to Juvenile Delinquency. A Conventional Program Summary.

Pub Date Mar 75

Note—8p.; Summary of presentation at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—\*Abstracts, College Programs, \*Counseling, \*Delinquency, Higher Education, Information Sources, \*Program Descriptions, \*Youth Problems

Identifiers—\*Project CREST

Project CREST (Clinical Regional Support Teams) is an innovative, LEAA-funded action

project, using paid and volunteer counselor education students to work as referral agents with juvenile delinquents in several north Florida communities. The program is distinctive in that its assessment, counseling, and consulting services do not replace but rather augment regular Division of Youth Services probation treatment, resulting in ongoing "dual treatment" for CREST clients. This report provides abstracts of presentations on: (1) the need for the CREST project and the challenge the field of juvenile corrections now offers the counseling profession; (2) how the CREST teams of graduate students operate; (3) how the project helps train its staff to be effective with a difficult client population; (4) how team members attempt to function as community change agents as well as personal counselors; (5) what research studies show about the project's effectiveness, together with a discussion of the problems and pitfalls encountered in such research; and (6) funding resources now available to the counseling profession for projects with a delinquent population, plus necessary steps in obtaining these funds. This report includes the names and addresses of program presenters who may be contacted for further information. (Author)

Descriptors—\*Educational Programs, Educational Resources, \*Parent Child Relationship, \*Parent Education, Problem Solving, \*Program Descriptions, Publications, \*Resource Materials, Skill Development

Identifiers—STEP, \*Systematic Training in Effective Parenting

The STEP course is an educational program for parents which teaches them the ideas and skills they need for raising responsible children and feeling more adequate and satisfied as parents. The authors have developed a package of materials designed for nine training sessions. Each session provides an opportunity to: (1) discuss specific activity assignments which involve the application of the ideas with one's own children, (2) discuss readings presented in the book accompanying the course, (3) listen to a brief professional lecture by the authors, (4) participate in skill building exercises, and (5) consider general problem situations as well as the application of these ideas to one's own concerns. The purpose of STEP is to help: (1) develop understanding of a practical theory of human behavior; (2) learn new procedures for developing more effective relationships with your children; (3) improve communication between parents and children through developing skills for listening, resolving conflicts with children; (4) develop skills in using encouragement, logical consequences and other active oriented procedures; and (5) develop more self-confidence in one's ideas about children and one's abilities as a parent. Follow-up Study of Rehabilitation Clients: A Step-By-Step Guide.

Research and Training Center, Institute, W. Va. Spons Agency—Social and Rehabilitation Service (DHEW), Washington, D.C.

Pub Date 74

Note—99p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Data Analysis, Followup Studies, \*Guidelines, \*Program Evaluation, \*Questionnaires, Research Design, \*Research Tools, \*Vocational Rehabilitation

This manual is designed to aid the user in measuring consumer satisfaction with vocational rehabilitation services. The manual contains materials which were used by the West Virginia Research and Training Center in a followup study. Step-by-step guidelines are provided for assessing the effectiveness of vocational rehabilitation services by

surveying clients and their employers. Topics covered are: planning and conducting the study, preparing survey forms, analyzing data and writing research reports. Included in the appendices are employee and employer questionnaires, articles on sampling and standard deviation, and an example of a completed research report. Since there are many aspects of followup studies which are not covered here, manual users can use the materials as a guide to construct their own questionnaires. The manual is geared for those having little or no experience in conducting followup research. (Author/SJL)

Coping in the World of Work: Practice in Problem Solving.

Pub Date [75]

Note—9p.; Paper presented at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Adjustment (to Environment), Educational Resources, \*Instructional Materials, \*Occupational Guidance, \*Problem Solving, Program Descriptions, Publications, Secondary Education, \*Vocational Adjustment

To help students in their adjustment to work, The Center for Vocational Education at Ohio State University has developed an instructional unit entitled, "Coping in the World of Work: Practice in Problem Solving." The unit is designed to: (1) acquaint students with the range of work entry and job adjustment problems they will encounter in making the transition from school to work, (2) familiarize students with the five-step problem solving approach, (3) apply the problem solving approach to real-life simulated practice problems, and (4) apply the problem solving approach to real problems outside the classroom. The five-step approach involves: (1) diagnosing the problem, (2) generating solutions, (3) evaluating the solutions, (4) choosing a solution, and (5) validating the solution. The unit involves each student in a variety of structured group experiences such as role-playing, "in-basket" exercises, sociodramas, case studies, and so forth designed to aid them in discovering their own courses of action in solving simulated problems. It also provides for expansion at a number of points, is flexible for teaching purposes, is low in overall cost, has been field tested over a two-year period, and is planned for 1976 availability. **Descriptors**—Evaluation Methods, \*Guides, \*Program Evaluation, \*Program Improvement, Research Design, \*Research Methodology, State Agencies, \*Vocational Rehabilitation

This training guide for evaluating vocational rehabilitation programs and services is designed for use by state vocational rehabilitation agencies in developing a system for evaluating either their overall program or specific aspects of it. The manual first addresses itself to the rationale for program evaluation, and then examines the evaluation process from the definition of objectives through the selection of criteria. The design for program evaluation is discussed in view of research methodology and the selected focus of program research. After a detailed discussion of the nature and process of various forms of evaluative research, the issue of innovation is considered. The utilization of results obtained through program evaluation is considered in regard to the dynamics of organization and resistance to change. Recommendations for overcoming resistance, implementing program evaluation, and utilizing new information are provided. (SJL)

**On the Future of Personality Measurement.**

Pub Date 29 Aug 75

Note—26p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 2, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Behavior, \*Cognitive Processes, Discrimination Learning, \*Individual Differences, \*Personality Assessment, Personality Theories, \*Psychological Patterns, Speeches, State of the Art Reviews

This paper presents an overview of the knowledge afforded man from research into personality. Approaching his topic from a position valuing the study of persons from complementary psychological perspectives, the author attempts to derive some conclusion about human behavior and personality. He discusses the findings that there is basic continuity in personality; each person is capable of great differentiation in behavior; there are multiple determinants of human behavior; and there is a need to analyze social and psychological environments in order to understand individual behavior. From this common ground, the author suggests the need to specify clearly the goals, purposes and objectives of personality research. Different goals require different foci and different measurement strategies. The author views humans as active organisms interacting in active environments, where person variables must be taken into account so as to understand this interaction. In conclusion, the author suggests that researchers actively involve subjects in their own personality assessments, that information processing may yield increased knowledge of personality, and that a synthesis of various psychological constructs is needed. He further suggests an image of man as an active, aware problem-solver who is multi-faceted, multiply influenced, uniquely organized, yet open to study by scientific methods. (SJL)

**Career Education and Elitism.**

Pub Date Apr 75

Note—6p.; Paper presented at the Annual Meeting of the American Association of Community and Junior Colleges (55th, Seattle, Washington, April 13-16, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Career Education, \*Changing Attitudes, \*Educational Change, Futures (of Society), \*General Education, Historical Reviews, Junior Colleges, Liberal Arts, Speeches, \*Student Needs, Vocational Education

Historically, general education has held a higher status than career training. Vocational programs were modeled on those existing in trade schools, while general education stressed personal development. At present, career education has

gained greater acceptance and status. Present occupational programs have improved due to greater experience of the staff and better planning. No longer is a liberal arts education required to precede career training; personal and social development can now take place effectively in occupational programs, enabling one to develop one's ability to think and communicate effectively. In the future, individualized programs in career education will be available to all individuals who need them. Students will assume greater responsibility for their education, pursuing in-depth study in various fields. Another anticipated development will be the incorporation of ethnic studies as an integral component of liberal arts studies. (SE)

**The Job Satisfaction Research Program. Work Research Unit Information Note No. 3.**

Department of Employment, London (England).

Work Research Unit.

Pub Date Mar 75

Note—6p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Change Strategies, Changing Attitudes, \*Employee Attitudes, \*Foreign Countries, Industrial Personnel, \*Job Satisfaction, Manpower Development, Program Development, \*Work Environment

Identifiers—\*England

This brief paper outlines the work of the Tripartite Steering Group on Job Satisfaction, which has set up a series of projects to explore ways in which the content and organization of work could be changed to meet individual needs for satisfaction from work. This is not to ignore the contribution of other features of the work and its environment to the way people feel about it. Indeed, it will be an important feature of the program to explore the effects of changes on attitudes to these features. The projects will be conducted primarily by university departments and research institutes in coordination with the Work Research Unit of the Department of Employment. Trade union representatives should be fully involved in the planning of changes in work organization and job conditions that affect their members. The program started in 1974 and will run for three years. (Author/SE)

**Descriptors**—\*Evaluation, \*Information Dissemination, Junior Colleges, \*Occupational Information, \*Publications, Secondary Education, State Surveys, \*Vocational Education

The purpose of this study was to provide information for program planning to improve the quality of occupational information disseminated in Washington schools. The study tried to answer the following questions: Are the materials being used? Who is using them? Are they considered helpful? What changes are recommended? The method used was a survey of representative users in state high schools and community colleges. Counselors, librarians, vocational education directors and students were the sampling groups surveyed. While one pamphlet was widely used and accepted, most materials were used differentially with mixed acceptance. Various suggestions were made to alter the occupational information material to make it current, concise and accessible. (Author/SE)

This search cites three kinds of resources: (1) those that describe what has been done or is being done in the area of counselor licensure and certification, (2) those that provide information that can be used in drafting licensure and certification legislation, and (3) those that describe what related professionals have accomplished in this area. The resources that fall into the second category include a variety of legal, ethical, and professional concerns such as accountability, confidentiality, professional standards, codes of conduct, counselor training, and the role and function of the counselor. All of these areas have implications for licensure and certification legislation. Resources in the third category are included to provide information that can lead to further articulation between the certification legislation of counselors and that of school psychologists, counseling psychologists, social workers, and paramedical personnel. **Descriptors**—Abstracts, \*Annotated Bibliographies, \*Counseling Effectiveness, \*Counselor Role, Counselor Training, \*Educational Innovation, Educational Research, Literature Reviews, \*Role Perception

Bibliographically speaking, material on the subject of counselor roles is not difficult to find. However, any close examination of the mass of documents and articles involved quickly reveals that most of these are either purely descriptive studies or critical essays. Document after document points out that counselors are not being adequately utilized, or are being forced into ineffective roles, but few writers have constructive ideas or suggestions to make. The current bibliography, which is based on several computer searches of the ERIC Data Base, is an attempt to weed out the repetitive material and focus on documents of practical, or, at least, conceptual, usefulness to the counselor in his attempt to define new, more effective, roles and acquire the skills necessary to carry out these roles. For a relatively new field of research and interest, the bibliographic control of drug literature (indexing and recording for retrieval) is remarkable. Public and private agencies have taken the initiative in compiling catalogs, bibliographies and indexes which, although often duplicatory, nonetheless ensure access to the many aspects of the drug scene. Their efforts, as this bibliography shows, span the English language literature from street drugs to pharmaceutical houses, from weekend "trippers" to psychiatric patients, from underground gardening manuals to institutional directories. The effort in this bibliography is to sketch for library users some approaches available to this multi-faceted subject, and to bring researchers into closer contact with information sources available at the Stony Brook University Library. The Reference faculty is available to assist in the location and use of materials cited herein. (Author)

Attitudes toward Counseling and Counseling Willingness of Air Force Personnel.

Pub Date Jul 75

Note—63p.; Master's Thesis, North Dakota State University

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage  
Descriptors—\*Attitudes, \*Counseling, \*Counseling Services, Masters Theses, \*Military Personnel, Problem Solving, \*Questionnaires, Research Projects, Surveys

Identifiers—\*Air Force

This study attempts to measure the attitudes of Air Force personnel toward counseling, the willingness of Air Force personnel to seek counseling for personal problems, and the relationships which exist between selected variables and attitude-counseling willingness. The variables examined were technical versus non-technical occupations, length of time served in the Air Force, career versus non-career status, military rank, and counseling agency preferences. The subjects of the study were 545 military officers and enlisted personnel assigned to Minot Air Force Base, North Dakota. Questionnaires were administered to individuals attending mandatory race relations and drug abuse seminars conducted by social actions staff, and 355 participants in the chaplain's portion of a mandatory orientation for newly arrived personnel. Significant correlations were obtained for the relationships between the selected variables and attitude-counseling willingness. These findings are described in detail, and their implications are discussed. (SJL)

Descriptors—\*Arbitration, \*Attitudes, Behavioral Science Research, Behavior Patterns, \*Change Agents, \*Conflict Resolution, \*Intergroup Relations, Perception, Questionnaires

Instead of looking at the impact of specific third party actions or behaviors on negotiation outcomes, the authors studied the effects of anticipated intervention on the negotiation process. Third party power (ability to force an agreement on deadlocked negotiations or merely recommend one) and generalized reputation (favorable or unfavorable) were manipulated in a laboratory experiment to determine their effects on negotiator behavior, perceptions, attributions, and satisfactions. Questionnaires were used in measuring the latter three categories of results. Reliable differences in pre-intervention impact of third party agents possessing differential power were found. One such finding was that those anticipating a high power agent felt more pressure during bargaining and took longer to reach agreement than those in the low power condition. With regard to perceptions, significant and consistent interactions between third party power and reputation were also found. In sum, this study demonstrates the importance of constituent forces on negotiator behavior. (SJL)

Value Changes in a Human Potential Seminar.

Pub Date [75]

Note—16p.; For related document, see CG 010 252

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—College Students, Higher Education, Human Development, \*Humanistic Education, Individual Power, Personality Tests, \*Personal Values, Program Evaluation, \*Self Actualization, \*Values

Identifiers—\*Human Potential Seminar, Personal Orientation Inventory

The study was conducted to determine the effectiveness of the Human Potential Seminar in bringing about value and attitude changes consistent with the stated objectives of the course. The objectives of the seminar are an increase in self-affirmation, self-motivation, self-determina-

tion and an empathetic regard for others. The primary focus of the study is to assess whether the stated objectives of the Human Potential Seminar do, in fact, help students to build a system of values than can be beneficial to scholastic achievement and to develop a value system consistent with their future needs. The Personal Orientation Inventory was administered in order to test three hypotheses developed for this study. This inventory was administered to both the experimental and control subjects prior to any classroom discussion of personal values. The results of the study indicate that students taking the Human Potential Seminar show a significant positive value change when compared with developmental reading students. Awareness of one's value system should enhance one's potential for academic success. (Author)

Identifiers—\*Human Potential Seminar, Prince Georges Community College

The paper was written for someone who wishes to develop and introduce the Human Potential Seminar in a community college setting. The first phase of the paper deals with Prince George's Community College's first experience with Human Potential and how it trained its staff, got the seminar transferable to four-year colleges and worked it into the Developmental Division of the college. The second phase of the paper talks about the use of the Human Potential Seminar at Prince George's Community College. Eleven examples are listed and explained. Next comes the use of the Human Potential Seminar in other community college settings throughout the country. Twelve examples are given with names and addresses of those to whom to write for additional information on each program. The last part of the paper deals with specific examples of student and follow-up evaluations of the Human Potential Seminar. (Author)

As older adult organizations stretch to meet the needs of a growing older adult client population, these Senior Citizen Centers, clubs and other programs are increasingly unable to understand and control their internal as well as external environments. Organizational Development, a body of applied behavioral science techniques, can help older adult organizations become more effective by providing ways of building shared understanding of strengths as well as limitations. Because of the high cost of traditional organizations development programs, the community college is depicted as an indirect provider of the services to older adult organizations. By training voluntary community resources to deliver organizational development services, by integrating this effort into other community programs, community colleges can draw upon their own valuable, specialized competence to serve the older adults of our communities. Moreover, by developing this in-

direct role, it is asserted that community colleges can pursue a direction consistent with their desire to serve older adult agencies without diverting college resources which may be vital to other worthwhile programs. A model for the delivery of organizational development services through community colleges is described. (Author)

Descriptors—Behavior Patterns, \*Goal Orientation, Group Behavior, \*Group Dynamics, Higher Education, \*Hostility, \*Interaction, \*Intergroup Relations, Research Projects

The present study investigated how type of interaction between groups affects intergroup hostility and how this intergroup hostility may be reduced. In the first phase of the study groups were led to believe that they were either competing, cooperating, or having no interaction with a second group. The results indicated that competition led to the greatest intergroup hostility while cooperation between groups led to the greatest intergroup attraction. In the second phase of the study, the two groups were combined to work on a series of superordinate goals. They received feedback that their combined effort had either succeeded or failed in obtaining the superordinate goal. Intergroup attraction scores taken after this stage of the study showed that in groups that had previously competed, failure on the superordinate tasks increased intergroup hostility while success of the combined tasks reduced hostility. However, for groups that had previously cooperated, failure on the superordinate tasks reduced intergroup hostility to a greater degree than did success on the combined effort. The results were interpreted as showing that both previous interaction and success of combined ef-

fort are important variables in determining when working on superordinate goals will reduce intergroup hostility. (Author)

**Handbook for Counselors in Georgia Schools.**  
Georgia State Dept. of Education, Atlanta. Div. of Curriculum Development.

Pub Date 75

Note—184p.

EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage

Descriptors—\*Counseling Goals, \*Counselor Functions, Elementary Education, \*Guides, Objectives, \*Resource Materials, Secondary Education, State Programs, \*Teacher Developed Materials

This handbook, prepared by and for counselors, is designed to serve as a guide for counselors in their everyday work. The main objectives of counseling are seen as assisting students to understand themselves and other students, assisting students to adjust to their school and make decisions, providing students with appropriate information, assisting teachers in understanding students and relating educational programs to them and assisting parents to understand their children and the school. The handbook clarifies the role of counselors and describes the specific functions they should engage in. Various techniques and procedures that counselors might need are presented; various tests appropriate at particular grades are discussed; referral procedures and resources agencies are listed; and special cases, such as dealing with exceptional children, are discussed. The handbook has a wide scope which is designed to be helpful for both elementary and secondary school counselors. (SE)

**U. S. Counselor Education Programs: Nature, Numbers, CBE, Traditional and Nontraditional. A Report of the Commission on Counselor Education Program and Enrollment Characteristics of the Association of Counselor Education and Supervision.**

Spons Agency—Association of Counselor Educators and Supervisors.

Pub Date 24 Mar 75

Note—61p.; Paper presented at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Counselor Certification, Counselor Educators, \*Counselor Training, \*Employment Projections, \*Futures (of Society), Graduate Study, Labor Market, National Surveys, Race Relations, \*Standards, Supervisors

This study aimed at gathering information concerning the program and enrollment requisites of counselor education institutions. Questionnaires were sent to all state supervisors of guidance and all counselor education institutions. The results indicate that within three years guidance counselors will be licensed in only seven states. Most supervisors said they intend to make counselor education programs competency-based. The responses related to "counselor demand" indicate that, while there are a great number of paraprofessional and Bachelor of Arts level counselors, the demand for their services in the near future will be limited. The demand for Masters and Doctoral level counselors is similarly low, with about 2.3 counselors for each open position. Most counselor education institutions reported an 8:1 proportion between graduate level students and educators, with about 95 percent of the institutions requiring practicum courses for certification. Note—9p.; Paper presented at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Agency Role, Child Advocacy, \*Disadvantaged Youth, \*Economic Disadvantage, \*Minority Groups, Policy Formation, \*Sociocultural Patterns, Speeches

This speech examines the culture of poverty and its effect on children. It describes the poor,

the sub-culture within which they live, and the many disadvantages the environment holds for children of the poor. The point is made that it is important to look at the child and family in their uniqueness as well as in their commonality. It is further stated that the poor's style of seeking help is inimical to much of the culture and style of the social agencies. Most agencies were designed for other times and other needs, and thus their response in serving the poor has been to serve them poorly. Suggestions are made for initiating institutional change in order to better meet the needs of the poor. (SJL)

The International Center for Social Gerontology (ICSG) is making available this translation of a timely study by Ernst Noam which describes and compares legislation, policies, and procedures for licensing, supervision, and inspection of homes for the aged in various Western and Eastern European nations. This study is presented to help provide a further understanding of the common goals and objectives contained in both European and American enactments affecting the elderly in institutions, as well as to help illustrate how policies and procedures to implement these goals and objectives may vary according to the social, economic, and political influences prevailing in each country. It is our hope that this report will be useful to public officials and professionals concerned with legal standards and social programs which safeguard and enhance the dignity and freedom of the Nation's elderly in need of institutional care. The day care center is a location where youngsters go during the day for school and group or individual counseling, while continuing to live at home. Juveniles remain in the formalized education and treatment program for approximately four months. Then they graduate into eight months of aftercare. Evaluation measures included recidivism, self-concept, family functioning, and cost-effectiveness. The center was also assessed as an alternative to out of home placement. Evaluators concluded that the program was a viable alternative to 24-hour institutional care and should be continued if steps could be taken to reduce the relatively high recidivism rate associated with the program. Descriptors—Adolescents, Behavior Change, \*Correctional Education, Day Care Programs, Delinquency Prevention, \*Delinquent Rehabilitation, \*Program Evaluation, \*Rehabilitation Centers, Research Projects, Therapeutic Environment

The youths attended the center during the day for school and individual or group counseling, while continuing to live at home. Objectives of the program were to increase academic achievement, improve attitude and motivation toward education, decrease post-center truancy and recidivism, and improve the self-esteem of the individual. A group of 62 experimental and 43 control youth provides the base for analysis. In the first year of operation, cost, in terms of monthly expenditure per child, is the major negative aspect. Suggestions are given to solve this problem. The authors also suggest modifications in the program for the third year of operation. (Author)

The importance of the counselor's or therapist's characteristics of empathy, warmth, and genuineness in client improvement has been established in a number of studies. This manual

was prepared as a means of fostering these qualities. It was prepared by rating segments of interviews taped in psychotherapy sessions and giving examples of the therapist's varying degrees of achievement of desirable characteristics. The manual serves either as a teaching model, or as a procedure for those who wish to evaluate their own responses. (Author)

This report describes and evaluates the Midwest Center/Satellite Consortium which was designed to initiate change in the pupil personnel services in urban schools. This consortium, through university and public school system cooperation, aimed to effect change within institutions while aiding pupil personnel workers to achieve a balance between task and interpersonal dimensions of schooling. This evaluative report begins with a section reflecting the emphasis on program definition, data collection and program change considered by the Center to be essential components of the evaluation effort. The entire consortium is evaluated by examining the individual satellites and their outcomes within the context of the project goals and their interventions. The second section is an evaluation presented by an evaluation counselor. He describes the counseling steps he took and the conflicts and frustrations experienced along the way. He then discusses some alternative evaluation procedures based on the issues he has raised. The final section presents a view of the project from an administrative director. Such issues as decentralized funding, modes of decision making, and prospects for implementing change through university-school system consortia are discussed. (SJL)

The Chicago Satellite, as a member of the EPDA Midwest Center Consortium, sought to create the EPDA's "New Professional" by retraining in-service teachers and school staff. The University of Illinois at Chicago Circle's College of Education and the Department of Educational Psychology at the Urbana campus are working in conjunction with Chicago School District #9 and the Midwest Center at Indiana University to develop and test a model aimed at improving the educational atmosphere of a large inner city high school. A collaborative project was conceived wherein the universities, school district, and community get together to find new ways of cooperative planning which would produce classrooms and curricula that would meet the needs of their students. The model employed attempts to train a new professional able to serve the student client as well as the system client. The major objectives were: (1) development of new degree programs at the university level, (2) development of experimental pilot courses which could identify and teach newly needed skills, and (3) development of courses related to the practical problems of inner-city schools. A second set of objectives included organizational development, staff development, and program development. The fully-developed program was shown to have considerable impact. (Author/NG)

Recognizing the need for improved, more flexible, more reality-based training for pupil personnel workers, the Division of Foundations and Human Behavior, Indiana University, in conjunction with the Department of Counseling and Guidance, formed a relationship with the Indianapolis Public Schools in order to seek out methods of improving PPS training. A major goal of this Satellite Project was to bring together university staff, parents, and teachers for the purpose of collaborative planning and programming. The Satellite operations formally extended over three project years. During the first year the goals of the target communities, schools, and university were defined and synthesized. Needs of the

schools and communities began to be assessed (and continued to be throughout the project). From the needs assessment came the development of training modules for university students, community persons, and school staff members. These efforts dominated the activities of the second year. In the final project year the training programs continued, but greater emphasis was placed upon institutionalizing desirable changes at school, university, and state educational levels. Dissemination of project findings and evaluations then began. Key features of the Satellite project were: (1) collaboration and planned systems change, (2) learning by doing, (3) competency-based learning, and (4) incorporating an inner-city counseling program with an attending course of study. The program had considerable impact. (Author/NG)

Identifiers—Education Professions Development Act, EPDA

The primary goal of the School-Community-Pupil (SCP) Project at the Jane Addams School of Social Work at the University of Illinois, Urbana was to train a new kind of professional school social worker who would work to improve the way school systems respond to children, particularly minority children. The SCP Project was based on the hope that with training and directed practice, the interns could be of help to the school districts in which they worked at the same time that they were learning about school social work. To this end, evaluative information kept project faculty informed of program strengths and weaknesses and encouraged revision of course content and internship plans as needed. The academic courses emphasized planned change in institutions. Instructors prepared students to identify school situations which were, or might become, problem situations for children, such as desegregation, ability grouping, and antisocial behavior. Working with the school administrators, field supervisors, and social workers, the student interns applied problem-solving techniques learned in class to actual school situations. With administrative sanction, then, student interns were encouraged to contact teachers, pupils, psychologists, and parents in their efforts to alleviate problem areas. Over an experimental period of three years, the SCP model was practiced by 52 interns in school systems in Illinois. The results of the program evaluation indicate that the SCP approach to school social work should be continued. (Author/NG)

As part of the Midwest Center/Consortium for Planned Change, the University of Louisville School of Education and the Louisville Public Schools designed a program for the training of a "new professional" to help alleviate problems of inner-city students. Main goals of the program were: (1) to improve the competence of pupil personnel workers by helping them understand the culture, value system, and community standards of the clients being served, and help them improve their skills in consulting with parents; (2) to increase the effectiveness of the pupil personnel staff by providing an opportunity for personal growth and development through group interaction experiences; (3) to develop an effective model for the operation of a Pupil Personnel Team in individual schools; (4) to develop a model for the resolution of staff and administrative problems; and (5) to redefine the role of counselors, whereby they become consultants to teachers as well as counselors to students. Parents of students were actively involved in the program. Pupil personnel workers enrolled in the university to take courses and participated in several workshops organized to realize the goals stated. Most of the major goals of the program were realized. As one component of the Midwest Center/Consortium for Planned Change, the Ohio Satellite aimed at making public schools aware of the need for the structuring of a fully-functioning guidance program, with teaming as a viable change and problem-solving process. A third goal was the recruitment of minority group members as "new professionals," to work in Black urban settings. In working toward this goal, the Ohio Satellite operated in three directions: (1) seeking to improve the counselor education program at Ohio State University, which was achieved by adding four new courses to the basic counselor training program, and requiring counselor trainees to have continuous field experience; (2) operationalizing a collaborative decision-making model in relation to a fully functioning guidance program, which took the form of a modeling process wherein team leaders were trained, and workshops were held; (3) developing a process for assisting the faculties of target schools in using the "teaming" model within daily operations. The Ohio Satellite established a demonstration site for testing and operationalizing guidance as an institutional function in a public school setting, as well as developed a field experience program which gained the acceptance of those responsible for the counselor education program at Ohio State University. **Identifiers**—National Longitudinal Surveying of Young Men

The author, after reviewing briefly the research literature on dropouts, mentions the following shortcomings of such studies: (1) lack of ability to control for differences in the students' abilities; (2) incomplete and inadequate measures of socioeconomic background; (3) inability to control for qualitative differences in the schools attended; and (4) inability to control for the effects of local market conditions on the decision to leave high school. The author used the National Longitudinal Survey of Young Men (NLSYM) data to control for these four factors and find the contribution of each to dropout rates (D). A theoretical model incorporating the four factors and others is explored, and seen as accounting for the reasons given for dropping out. Main findings from this study are: (1) IQ has the most important direct effect on D for whites, while knowledge of the labor market is the most important for non-whites; (2) the quality of high school attended does not have a direct effect on D for either racial group; and (3) parental education level is the only socioeconomic index affecting D rates for nonwhites, while other indexes affect D of whites. Based on these results, some policy implications for dropouts are discussed. (SE)

**Descriptors**—\*Disadvantaged Youth, \*Dropout Prevention, \*Dropouts, \*Educational Improvement, Literature Reviews, Motivation, \*School Improvement, Sex Differences, Social Factors, Values

Dropouts are considered to deviate from the following norms: maintaining certain levels of performance in school work; submitting to the requirements of classroom and school management; abiding by the moral codes of schools; conforming to peer group expectations; and seeking to move into the cultural mainstream of middle class white America. The author suggests the substitution of "school-leaver" for "dropout", since the latter has derogatory implications. Dropout prevention programs are of two types: those that attempt to promote student conformity to existing norms, (counseling, behavior modification and parental involvement efforts are the means used to achieve this goal); and those that attempt to modify the norms (efforts to change students' environments through job training and classroom innovation are some of the means used to attain this goal). The author considers these prevention programs as unsatisfactory, offers certain suggestions as to which norms should be adopted, and makes recommendations about how schools could function according to these norms. **Identifiers**—\*Australia (Queensland)

The principal aim of this study is to provide information on the use and abuse of alcohol and drugs by Queensland school children, and survey their attitudes toward and knowledge about alcohol and drugs. Various questionnaires were presented to a large sample of students from grades six to twelve. Some results were: (1) from grade six to twelve both alcohol consumption and positive attitudes toward alcohol increase greatly; (2) beer and spirits are the more popular; (3) a higher percentage of males than females are drinkers; (4) use of all six drugs studied, except inhalants, increases markedly with grade; (5) after alcohol, cannabis is the next most popular substance during the high school years; (6) sex differences in usage occur only for a few drugs; and (7) younger students perceive little difference in the danger to health of the various drugs, while older students tend to rate the danger more realistically. **Influence of Speech Characteristics on Judged "Therapist" Effectiveness.**

**Pub Date** Jul 67

**Note**—17p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Counseling Effectiveness, \*Counselor Characteristics, \*Interpersonal Competence, Research Projects, \*Speech Skills, \*Verbal Communication

This research, although conducted in 1967, investigates whether speech characteristics of an individual have an influence on others' perceptions of how effective the person would be as either a school counselor or a school speech therapist. The research stemmed from assumptions that (1) speech characteristics of the counselor or therapist may well affect both the client's image of the counselor and the value of the counseling itself, and (2) an identification of speech characteristics that might influence client perceptions of counselor effectiveness would be valuable to counselor-therapist educators and to counselor-therapists engaged in professional practice. Twenty male counselors-in-training recorded a phonetically balanced reading passage, and 96 undergraduate students listened to the recordings and predicted how effective they believed each speaker would be as a counselor or therapist. The listeners were also asked both to identify and rank-order the speech characteristics which had influenced their judgment. The data indicated that (1) the students were in general agreement about how effective each of the speakers would be as a therapist (either a counselor or speech therapist), and (2) the vocal characteristics associated with predictions of effectiveness were either a good vocal stresspattern, a good speaking rate, good articulation, or a combination of these factors. This manual is designed to address some of the basic problems of those who work in family planning education, and is based on the recurring questions and concerns of participants in a nationwide series of DHEW-sponsored family planning education and communication workshops. The manual proceeds chronologically, dealing first with the planning of a family education program and then with the selection, development and use of educational methods and materials. Each section contains relevant questions, and exercises and models where appropriate. The planning section contains a checklist tool for needs assessment. There is a planning model and a list of contraceptive facts for client education. The bibliography is arranged by subject matter and includes references to both client education and professional materials, as well as suppliers. (Author/NG)

Pub Date [73]

Contract—NE-C-00-3-0088

Note—60p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Elementary Education, Locus of Control, \*Motivation, \*Objectives, \*Problem Solving, \*Reinforcement, Research Projects, Student Improvement, Teaching Techniques

Identifiers—\*Achievement Competence Training, ACT

The author hypothesized that (a) an analysis of the research literature would lead to identifying the behaviors and dispositions associated with successful goal-setting and goal achievement. He further hypothesized that (b) based on these data, an instructional package could be constructed to teach children a skill-strategy based on selected behaviors and dispositions identified as being central to achievement. Following an analysis of the relevant literature, the author selected major achievement behaviors and developed Achievement Competence Training (ACT) based on those behaviors to instruct learners in a strategy for setting and achieving goals. The effects of ACT and an alternate set of instructional materials upon goal-setting behavior, perceived locus of control, and self-evaluation were tested in three fifth-grade classrooms in each of 33 schools. ACT significantly increased belief in internal control as compared with the alternative Treatment and an Uninstructed Control

group. Students using ACT also demonstrated (a) greater tendency to prescribe self-directed solutions to problems; (b) lower (more realistic) personal performance standards for favorable self-evaluation; and (c) less discrepancy between self-predicted performance and personal standards for good performance. In addition to these measurement data, interviews, observations, and anecdotes reflected positive results of ACT. Results are discussed in relation to a theoretical model of achievement in which achievement behavior is sustained through covert self-reinforcements. (Author)

Third Party Intervention Style and Intergroup Bargaining.

Pub Date 1 May 75

Note—14p.; Paper presented at the Annual Meeting of the Midwestern Psychological Association (46th, Chicago, Illinois, May 2-4, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Accountability, \*Conflict Resolution, \*Contracts, Group Dynamics, \*Intervention, \*Negotiation Impasses, Research Projects, \*Simulation, Speeches, Teacher Militancy

The present study compared the effects of content, process, and passive types of third party intervention on the bargaining behavior of pairs of group representatives. The setting was a simulated school board-teacher's union dispute over a new contract. Each side was represented by one person who was instructed to bargain tenaciously and obtain as much as possible. The job of the representatives was either in jeopardy (High Accountability) or not (Low Accountability). In the content intervention condition, a reasonable settlement was suggested to the representatives by the third party. In the process intervention condition, he taught them how to paraphrase. In the passive condition, he had them take a break from their negotiations. For the high accountable representatives, as predicted, the order of effectiveness of the interventions (number of agreements, average joint profit, and speed of resolution), from most to least, was content, process, and passive. Contrary to expectations, the process intervention did not produce the highest average joint profit for the low accountability representatives. The representatives who did reach agreement in the low accountability-process and content conditions, however, did achieve higher joint profits than the representatives in the passive condition. Student-to-Student Counseling. Final Report.

Pub Date 31 Jul 75

Note—46p.; For interim report, see ED 106 673; Appendix H (pages 45 and 46) will not reproduce

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*College Students, \*Counseling Effectiveness, Counseling Programs, \*Counselor Training, \*Peer Counseling, Program Descriptions, \*Student College Relationship, Student Personnel Services

The success of a student-to-student counseling Program which involves counseling of students by peers is attributed to greater acceptance of peer counselors by students because they 'speak the same language' and share the same problems. Counseling is conducted informally through telephone calls, in cafeterias and in classrooms. The student counselors are trained and provided with various reference materials they may need in their work. Some tentative results which reflect the success of the student-to-student counseling program include: (1) a decrease in the total number of withdrawals; (2) a decrease in the total number of program changes; and (3) a feeling on the part of faculty, staff and students that the image of the university in responding to the individual has been strengthened by the program. Development of Empathy in Helpers.

Pub Date Aug 75

Note—17p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 2, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Changing Attitudes, \*Counselor Characteristics, \*Empathy, \*Helping Relationship, \*Psychological Characteristics, Rating Scales, Research Projects, \*Skill Development, Speeches, Trainees

A trait measure of empathy, a skill measure of empathy and an attitude scale on psychological effectiveness were administered to both counselor trainees and "natural helpers", i.e. persons in helping relationships who have not been formally trained as mental health professionals or paraprofessionals. The results indicated that the measures of empathy were statistically independent of each other and the attitude scale. Of all supervisor rating-helper empathy correlations for counselors and natural helpers, only counselors' empathy skill significantly correlated with supervisors' ratings. Also, the "natural helpers" who were not trained or oriented to the concept of empathy needed to be provided with "test taking skills" before completing the skill measure of empathy. For both the trait measure of empathy and the attitude scale on psychological effectiveness, a developmental trend was indicated with freshmen students scoring lowest, upperclass "helpers" scoring higher than upperclass "nonhelpers" and counselor trainees scoring highest. Linguistic Theories: Where Are We Going?

Pub Date Nov 75

Note—32p.; Paper presented at the Annual Meeting of the Transmountain Regional Conference of the International Reading Assn. (2nd, Calgary, Alberta, Nov. 13-15, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Higher Education, Language Patterns, \*Linguistics, \*Linguistic Theory, \*Models, Psycholinguistics, Syntax

Identifiers—\*Information Structure Approach

This paper argues that we are moving toward a more experimental approach to language, one which is characterized less by introspective judgments and more by empirical evidence. The first section of the paper is a general discussion of the directions linguistic theories are taking. The second section discusses some of the fundamental problems involved in linguistic theory. The third section is a sketch of a linguistic model based on the assumption that the function of language is to communicate information. The fourth section discusses some syntactic rules represented in the model. The fifth section discusses the testing of the psychological validity of the rules. The sixth section summarizes the focus of this paper and concludes that empirical evidence is of central importance in testing linguistic theories. (TS)

Descriptors—Academic Achievement, Junior High Schools, \*Program Content, \*Program Descriptions, Program Effectiveness, \*Social Adjustment, \*Student Adjustment, Student Behavior, \*Underachievers

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, \*Holistic Approach

This paper describes a holistic milieu approach for underachieving, socially maladjusted students in a junior high school in Mattoon, Illinois. It also reports on the effects of the program on certain academic, affective, and behavioral measures taken on those students. The program, called the Intensive Care Unit (ICU), included five teachers, two pupil personnel interns, a media intern, and four aides. Out of the 98 students involved in the program, at least 20 of them had repeated a grade sometime during their school careers. Initially, several baselining sessions were held and observers recorded the off-task behaviors of the subjects. After a wide variety of pretest measures was collected, several ICU methods were instituted. These included individualized prescribed instruction for each student in the core academic areas of reading, mathematics, and science. At the same time, behavior management techniques were also instituted. To shape behavior, teachers combined continuous, social reinforcement with material rewards. It was concluded that students who participated in the ICU program did significantly better academically and were better adjusted in the classroom than those who did not participate in the program. **Structural Ambiguity and Reading Comprehension.**

Pub Date 75

Note—19p.; Paper presented at the Annual Meeting of the Transmountain Regional Conference of the International Reading Association (2nd, Calgary, Alberta, November 13-15, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Deep Structure, Psycholinguistics, \*Readability, Reading Achievement, \*Reading Comprehension, Reading Processes, Reading Research, \*Sentence Structure, Surface Structure, Syntax, \*Transformation Generative Grammar, Written Language

This study questions the developmental nature of the ability to understand syntactic structures. An exploration is made of the possibility of learn-

ing more about reading comprehension and readability by examining responses made to sentences described by transformational grammarians as structurally ambiguous. A group of fifth grade students were asked to identify paraphrases of three kinds of sentences, ones with ambiguous surface structure, ones with ambiguous underlying structure, and ones considered to be unambiguous. (An example of a sentence with ambiguous surface structure is, "Small boys and girls are easily frightened." An example of a sentence with ambiguous underlying structure is, "Flying planes may be dangerous.") Although the fifth graders did not do well on the test, the order of difficulty of items was found to be similar to that found by other researchers. The order of difficulty ranged from unambiguous sentences as easiest, to surface structure ambiguities as next in difficulty, and underlying structural ambiguities as most difficult. Oral interviews with eight of the students after they took the test resulted in improved scores. A comparable study by Montague is reviewed and similarities in research findings are noted. (MKM)

Descriptors—Higher Education, \*Models, \*Preservice Education, \*Program Descriptions, Program Development, \*Reading Programs, Reading Research, \*Teacher Education

Identifiers—George Peabody College, \*Right to Read

This paper is a summary description of the Peabody College Right to Read Teacher Preparation Project. The goals of the project are to plan, implement, and evaluate a replicable model for the improvement of the preservice reading program and to develop a program that prepares teachers for work in a wide variety of settings. Project objectives are to reduce illiteracy through improved preservice education and to offer a fully developed and validated model that might be adopted by other teacher training institutions. A three-state approach is being taken to attain the goals: an information base has been established to support the development of the model, the model is being applied to the present preservice program at Peabody College, and the potency of the model will be evaluated with respect to the costs incurred and the benefits obtained. Specific goals for the first and second year of the program are also listed. (TS)

**Document Not Available from EDRS**

Descriptors—\*Childrens Books, \*Childrens Literature, \*Content Analysis, \*Death, Doctoral Theses, Educational Research, \*Fiction, Literary Analysis, Primary Education

The purpose of this study was to examine and evaluate the portrayal of death in selected fiction books for children. The sample consisted of 90 books which were listed by six authors discussing the appearance of the death theme in children's books. A method of content analysis was applied as the research design, and each book was analyzed on the basis of 13 categories established by the investigator. The following conclusions about death portrayal were drawn: there is a need for more good quality books with death content for children in the preschool and lower elementary age groups; there is a more violent portrayal of death in books for children aged nine and older than for children aged five, six, and eight; and the portrayal of the impact of the death of the main character's parents is handled in a fair and responsible way by the authors of the books in the study. It was also concluded that the death of parents is treated as having more impact on the life of the main character than does the death of friends. (Author/TS)

Descriptors—\*Beginning Reading, Black Community, \*Child Language, Doctoral Theses, \*Language Enrichment, Linguistics, \*Negro Dialects, Primary Education, Reading Research, Syntax, \*Tutoring, Urban Language, Urban Teaching

This study focused on the following questions involved in the implementation of the language experience approach: (1) Which tutor will produce the most effective responses? (2) What is the reality of the existence of a Black English vernacular syntax? and (3) Is there evidence of black-white linguistic overlap? Natural, transcribed conversations of 28 black first grade subjects and eight white first grade subjects were used for preparation of language experience stories for beginning reading. The stories were generated with the help of four types of tutors: black community adults, white professional adult teachers, black sixth grade children, and white sixth grade children. The results did not prove or disprove the existence of Black English vernacular syntax, but the hypothesis of linguistic overlap was confirmed. Furthermore, the study tentatively indicated that trained teachers and community workers can be encouraged to use children's recorded natural conversations as a basis for language experience stories in beginning reading instruction. Descriptors—\*Behavior Patterns, Doctoral Theses, Elementary Education, \*Instructional Aids, Negro Students, Parent Influence, \*Reading Achievement, Reading Improvement, Reading Research, \*Teacher Attitudes, \*Urban Youth

This study investigates the factors that have a bearing on the elementary urban child's standardized reading test scores. Three areas were investigated: parental contact with the school, supportive services that the child received, and the teacher's perception of the child's behavior and the behavior of the child's class. The study included 637 students in grades two through six in a large urban school. Ninety percent of the students were black. It was concluded that supportive services in the classroom gave the urban child an increased opportunity for reading achievement. The research also indicates the chances for success are greater when supportive services are paired with the teacher's favorable perception of the child's behavior and the behavior of the class. Descriptors—Behavior Patterns, Doctoral Theses, \*Early Reading, \*Identification (Psychological), Parent Influence, Parent Role, Primary Education, \*Reading Achievement, \*Reading Development, Reading Research, \*Role Models, Teacher Influence, Teacher Role

Three psycho-social variables, identified as modeling influences of children's fathers, children's sex-typing of reading, and their judgmental

conformity were investigated as possible correlates of reading achievement in grades one, two, and three. The subjects were 226 children from the first, second and third grades, all of whom came from predominantly middle class families. It was found that children's sex-typing of reading could not be predicted either on the basis of their fathers' formal education or on the basis of their modeling of reading in the home. The second hypothesis, that reading achievement would be higher for those children associating reading with their own sex, received only limited and somewhat equivocal support. The third hypothesis, that reading achievement would be greater for those children who were more influenced by the perceptual judgment cues of a teacher-model, also received limited and equivocal support. Descriptors—Doctoral Theses, Evaluation Methods, \*Measurement Instruments, \*Predictor Variables, Preschool Education, \*Reading Achievement, Reading Instruction, \*Reading Readiness, Reading Research, Reading Skills, \*Television Viewing

This study was planned as two parts. In the first part, a prereading index similar to the ones created for kindergartners was developed for preschool age children. The second part was an examination of the relationship between the prereading measure and four contextual variables. Thirty-six 3 1/2 to 4 1/2 year-old children were randomly selected from a pool of 171 children whose parents responded to a preschool reading survey. After introducing 25 selected background variables and preschool type variables into a stepwise regression analysis, the following variables were most highly related to the prereading measure: educational television recognition, number of materials available to the child in the home, specified parental criteria for television program selection, and warm-up questions preparatory to a parent-child reading episode. The results of this study clearly indicated that reading success and failure may stem from many causes. While there is not an ideal home environment, there seem to be several components of the home environment which children who performed successfully on this study have in common. (Author/RB)

Identifiers—San Antonio College

This study investigates the effectiveness of remedial reading courses for nontraditional students in San Antonio College, a large, urban, and public community college in Texas. The subjects were students who enrolled the fall semester of 1972 and persisted through the fall semester of 1973. The remedial reading courses were described in terms of means of placement, goals, objectives, instructional units, materials, methods, pre-assessment, instructional activities, post-assessment, remediation, and evaluation. Some of the findings were that females tended to score higher, though not significantly higher, on the posttest and earned significantly more grade points than did males; among students who completed reading there was no significant difference in posttest scores and grade points earned between unlike ethnic groups; Mexican-American

and non-Mexican-American surnamed students who needed and completed reading did not earn significantly more grade points than did similar students who needed but did not take reading; and those students who had ACT social studies scores of 15 or above earned significantly more grade points than those who had scores of below 15. Proposals for increasing the effectiveness of remedial reading were offered. (Author/RB)

Identifiers—Iran

The Free University of Iran (FUI) operates by means of a multimedia teaching system, teaching students at a distance and developing a learning environment based near the place of residence or work of its students. This document reviews the development of the Foundation English Course according to the systems approach to instruction adopted by FUI. The purpose of this course is to improve English language reading skills and comprehension so that students can use selected, sub-technical passages to supplement their texts in math, science, and humanities. Course units focus on vocabulary, grammar, and word functions, each of which is described briefly in this document. The first appendix outlines terminal and enroute objectives, while the second appendix consists of a prototype unit. (JM)

Relationship between Affect and Estimates of English Word Frequency.

Pub Date 31 Aug 75

Note—12p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 31, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*American English, Language Research, Language Tests, \*Psychological Tests, Vocabulary, \*Word Frequency

Identifiers—Francis (W N), Kucera (H)

The experiment reported in this document extended the study by Milburn and Bell (1969) of English word frequencies. Specifically, this experiment examined the influence of instructional set on the relationship between affect and frequency estimates, with a distinction between personal and nationwide norms. The experiment design provided for two within-subjects variables—natural language frequency and affect (three categories: positive, neutral, and negative)—and one between-subjects variable—instructions (two categories: personal and Kucera-Francis). Sixty-nine subjects completed the two tests. Results showed that there is a curvilinear relationship between affect and estimates of English word frequency; that subjects believe that positive and negative English words occur equally often, but more often than neutral words; that the influence of affect on frequency estimates was strongest in the personal instructions condition and in the lower frequency range; and that subjects tended to make more conservative judgments in the Kucera-Francis condition than in the personal condition. Readability of Freshmen College Textbooks in the Social Sciences as Compared to the Reading Ability of Students Who Use Them. A Pilot Study.

City Univ. of New York, Bronx, N.Y. Herbert H. Lehman Coll.

Pub Date Aug 73

Note—31p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—College Students, Higher Education, History Textbooks, \*Readability, \*Reading Ability, Reading Research, \*Social Sciences, \*Textbook Evaluation, Textbook Research, Textbook Standards

Identifiers—Nelson Denny Reading Test

The subjects for this study were 81 freshman students who were taking courses in the social sciences at Herbert H. Lehman College in New York. A Nelson Denny Reading Test showed their average reading grade level to be 10.4. Twenty-three books in the social science areas were selected for appraisal, using such procedures as the application of a readability formula for ascertaining the reading grade level of the books and the estimation of the relative difficulty of the books by the students using them. The grade level placements of the textbooks were obtained from the Smog formula, the estimates of two reading teachers, and the estimates of the instructors whose books were being used. It was concluded that only four of the twenty-four books were on the freshman level. Of the remaining twenty books, seven were on the fourteenth level, five were on the fifteenth grade level, six were on the sixteenth level, and two were on the seventeenth level. It was recommended that a coordinated effort be made to help these students by developing a full year's course of special help in reading and study skills and that instructors use supplementary aids for teaching the subject matter. A Developmental Study of the Relationships between Cognitive Abilities and Early Reading Achievement.

Pub Date 75

Note—122p.; Ph.D. Dissertation, University of Minnesota

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-27,207, MF \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—Cognitive Processes, Doctoral Theses, \*Early Reading, Primary Education, \*Reading Achievement, \*Reading Processes, Reading Readiness, Reading Research, \*Reading Tests

This study investigated the developmental relationships between a battery of cognitive tasks—including Piagetian operations of conservation, classification, and seriation—and early reading achievement. Subjects were 128 kindergarten through third-grade students at a suburban elementary school. They were administered a battery of cognitive tests and reading achievement measures. Results were analyzed using t-tests of the differences between group means, one-way analysis of variance, Pearson correlation coefficients, and multiple regression analysis. The major findings of this study were that standardized psychometric measures were more related to reading achievement than were the Piagetian tasks, although conservation was a significant predictor of achievement at the kindergarten and first-grade levels. There were also developmental differences in the relationships of all variables to reading achievement. In the first-grade sample, it appears that the instability of cognitive thought represented by the transitional phase of conservation may interfere with academic achievement. (Author/TS)

Document Not Available from EDRS

Descriptors—\*Critical Reading, \*Critical Thinking, Doctoral Theses, Elementary Education, \*Factual Reading, \*Reading Improvement, \*Reading Instruction, Reading Research, Short Courses, Teaching Methods

This study investigated the effectiveness for fourth grade students of an inductive, self-correcting approach to the discrimination of factual and inferential statements as one aspect of critical reading and thinking. Ninety-seven fourth graders comprised the sample, and an intelligence test was administered to select students with I.Q. scores of 100 or above. The experimental group was given short-term inductive instruction by the investigator in differentiating between factual and inferential statements. The control group fol-

lowed the regular school program. In addition to the first posttest administered one week after the instruction, a second posttest was administered one month after the first. From the results it was concluded that short-term instruction in distinguishing between factual and inferential statements will improve students' skills in this area of critical reading. It was also concluded that the improvement in distinguishing between factual and inferential statements was not transitory. (Author/TS)

Descriptors—Doctoral Theses, Educational Policy, Elementary Secondary Education, Foreign Countries, \*Reading Instruction, \*Reading Programs, \*Reading Research, Reading Tests, \*Remedial Reading Programs, \*Teaching Methods

This dissertation discusses specific aspects of reading programs in thirteen selected countries: England, The Netherlands, Denmark, Norway, Sweden, Switzerland, Israel, Iran, India, Nepal, Japan, Australia, and New Zealand. Chapters examine such topics as present educational policies, teacher training, native language, reading methods, research in reading, remedial reading education, sex attitudes, audio-visual materials, and special schools. The purpose of this research, which was conducted from June 1972 to May 1973, was to study the various methods used in teaching children to read in both primary and secondary schools. The study was carried out by use of a comprehensive questionnaire and interviewing on a one-to-one basis. It was noted that there was as wide a diversity in reading methodology among countries as there was within one country. It was observed that many innovative methods used in the classroom in other countries could be utilized in the United States. (Author/TS)

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I

In 1972 a supportive reading program program to improve the reading achievement of educationally disadvantaged students in second, third, and fourth grades was developed and implemented. This report covers the efforts of the third year of the program (the first two years have been reported previously), which also anticipated improvement in self-concept, attitudes toward reading, and attendance. The report discusses the program goals and objectives; the selection of subjects and the identification of disadvantaged children; reading resource centers; the measurement and analysis of reading achievement, self-concept, reading attitude, attendance, and parental reaction; results (tests, records, inventory, and evaluation); and the conclusions and recommendations. Five appendixes contain test results, inventories, and evaluation instruments. Program results show that the Reading Resource Centers have been successful in improving oral reading, reading skills, self-concept, student attitude toward reading, and attendance. (JM)

A Study of the Relationship between Reading Achievement, Vocabulary Development and Psycholinguistic Abilities of Beginning First Grade Children.

Pub Date 75

Note—80p.; Ed.D. Dissertation, The University of Rochester

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-22,799, MF \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Beginning Reading, Doctoral Theses, Primary Education, \*Psycholinguistics, \*Reading Achievement, \*Reading Research, \*Vocabulary Development

A sample of 79 first grade children, selected from a total sample of 350 subjects from an upper middle class school district, were involved in this study. The sample population was divided into three reading groups (depending on their reading scores) to permit statistical comparisons among groups with differentiated reading achievements. A battery of tests was administered individually to measure the following skills: reading achievement, hearing vocabulary, expressive vocabulary, and psycholinguistic processing ability. A descriptive analysis of the data revealed that the selected population was significantly above average on all variables measured. In order to test seven proposed hypotheses, a correlation matrix of all variables was constructed for the total sample and the mean differences between each of the three reading groups on all variables were tested through t-test comparison. Tests of the hypotheses revealed that reading achievement was significantly related to both expressive and hearing vocabularies and to the following ITPA scores: composite psycholinguistic age, mean automatic level scores and mean auditory vocal score. The study revealed that the reading achievement of beginning first grade children is associated with receptive and expressive vocabulary development. (Author/TS)

Teach Your Preschooler to Read.

Pub Date 75

Note—183p.

Available from—Simon & Schuster, Incorporated, 630 Fifth Avenue, New York, New York 10020 (\$7.97 cloth)

Document Not Available from EDRS

Descriptors—\*Beginning Reading, \*Early Childhood Education, Language Development, \*Manuscript Writing (Handlettering), \*Parent Participation, Phonics, \*Reading Readiness, Sight Method

The premise of this book is that most children are ready to learn to read at age four and that parents are capable of teaching their own children to read. Ways in which parents can and do aid in the development of a child's language are discussed. This development of oral language is very important to learning to read the language and is usually accomplished by the age of four. Examples of successful early readers are cited to support this theory. Guidelines are given to help parents recognize signs of reading readiness such as size of vocabulary, speaking clearly, hearing well, showing interest in reading letters and words, visual acuity, and attentiveness. A step by step program that parents can use to teach a child who is ready to read is explained. Instructions are given in the teaching of sight word vocabulary, phonics, and writing. (MKM)

The Relationship of Time Spent on Reading Instruction to Reading Gains as Measured by Norm-Referenced and Criterion-Referenced Tests.

Pub Date 75

Note—32p.; Indiana University, Bloomington

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Achievement Tests, \*Criterion Referenced Tests, Elementary Education, Grouping (Instructional Purposes), Individualized Reading, Norm Referenced Tests, Program Length, \*Reading Instruction, Reading Research, \*Reading Tests, \*Time Factors (Learning)

This paper reports findings of research done concerning the productivity of types of classroom reading instruction in a sample of New York State elementary classrooms. Data was gathered from approximately 5,800 fourth, fifth, and sixth grade students in five New York State school districts during the spring semester of the 1974-75 school year. The main design of the analysis is based upon the "production function" paradigm used by economists, in which attention is paid to how the inputs of "ingredients" to a production process are mixed together to produce outcomes. To pinpoint instructional resources going into reading, teachers, aides, and specialists were asked to supply figures for minutes per week of reading instruction in each of four instructional modes: whole group, small group, individualized instruction, and individual help. Outcomes were measured by a standardized achievement test and a set of criterion-referenced tests. An important finding was that minutes of classroom teacher instruction seem to be related to student performances when measured by the criterion-referenced tests but not when measured by the standardized test. Identifiers—\*Editors Attitudes, Literary Themes  
This paper describes a study of the criteria children's book editors and elementary classroom teachers use to select fiction books for children in grades four, five, and six. A questionnaire was sent to all members of the Children's Book Council and to elementary classroom teachers of

grades four, five, and six in each elementary school in Hunterdon County, New Jersey. The respondents were asked to rate twenty criteria according to relative importance and to judge fifteen current themes in children's fiction books according to appropriateness for boys and girls. Significant differences between the editors and teachers were found for ten of the twenty criteria. Teachers gave the use of a readability formula, controlled vocabulary in fiction books, high-interest books for slow readers, books enriching the curriculum, books developing appreciation for beauty, and avoidance of controversial themes significantly higher mean ratings than the editors. The mean ratings of the editors were significantly higher on criteria relating to excellence in writing and quality illustrations. Ten current themes were approved by over 60 percent of the editors and teachers. A much greater percentage of teachers than editors approved of traditional roles for boys and girls as a theme. (MKM)

This publication is intended to do two things: reinforce reading skills essential to interpreting the exercises in the social studies, sciences, and mathematics sections of the test of General Educational Development (GED) and to provide students practice in interpreting passages written at a level of difficulty similar to the difficulty of the equivalency test. It is designed to be used as a supplement of "Developing High School Equivalency Reading Skills," which is a curriculum guide for teaching the reading skills needed to interpret the literature, social studies, science, and mathematics sections of the test. The reading passages in the first guide were selected to provide examples for purposes of instruction and are not as difficult as the GED test items, thus these passages for a more difficult reading level were developed. **A Training Program for Reading Supervisors.**

Pub Date 75

Note—14p.; Unpublished study prepared at the University of Manitoba, Faculty of Education

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Elementary Education, \*Reading Consultants, \*Reading Instruction, Reading Programs, Supervisors, Supervisory Methods, \*Supervisory Training, \*Workshops

It is essential that everyone connected with the supervision of reading be trained so that a system of analyzing reading instruction can be effected. Based on the assumption that the most effective supervision occurs in a one-to-one situation, the training program presented in this document centers on a workshop on supervision with four specific components: preobservation conference, observation of the teaching behavior, strategy and analysis, and postobservation conference. This document describes the application of the workshop training to two different programs, one in a small rural school and one in a large urban elementary school. The feedback from these two school situations indicated that supervision is effective (1) when a supervisor, in a series of conferences, helps a teacher search for and attain common goals; (2) if the teaching episode is observed and analyzed according to the teacher's declared needs; and (3) if time is allocated for supervisory conferences. This course guide provides a survey of reading instruction and a description of the skills necessary for teaching reading in the elementary classroom. The purpose of the course is to help the student develop into a competent teacher of reading at the elementary school level through a competency-based approach to teacher education. Each instructional module contains a list of prerequisites, a rationale, a preparticipation assessment, objectives, learning activities, additional activities, and related materials. The topics for the learning modules are an introduction to competency-based teacher education, stating behavioral objectives in reading, the nature of the reading process, assessing performance in reading, readings about reading, word identification, developing comprehension skills, using the basal reader, approaches to reading instruction including language experience and individualized reading, work study skills, individualizing instruction, readability, and children with reading difficulties. This paper reports the consistency of phonic generalization employing two kinds of frequency determined from a corpus of the 18,000 most frequently occurring words in the English language. Twenty-two commonly taught phonic generalizations were analyzed using a computer. It was concluded that consistency alone is not a sufficient criterion on which to judge the utility of a rule. The authors found that when the rule was a simple one-to-one correspondence (e.g., "ch" is always pronounced, as in "chair"), then direct rule learning was most effective. However, when the rule was more complex (simulation of the final "e" rule), then direct rule learning was not as effective as a more inductive approach. This suggests that teaching rules directly is only advantageous over the other approaches when the rule is a simple one-to-one correspondence. (RB)

**Age Differences in Adults' Free Recall of Pictures and Words.**

Pub Date 75

Note—11p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, August 30-September 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Adult Learning, \*Age Differences, Cognitive Processes, Educational Research, \*Learning Processes, Memory, \*Reading Processes, \*Recall (Psychological), Verbal Stimuli, Visual Stimuli

This study was designed to determine whether adults' memory for pictorial and word stimuli might be differentially affected by age. Twenty female secretaries, median age 22.1, and 20 female members of a senior citizens' center, median age 69.4, were asked to learn lists of pictorial and word stimuli under free recall conditions. Eight trials were given on each list and recall was untimed to allow subjects maximum opportunity to develop and use retrieval strategies. Some of the findings indicated that pictorial stimuli were recalled significantly better than the word stimuli. The average number of errors per trial was 4.96 for pictures and 6.63 for words. The young subjects made significantly fewer er-

rors than the old subjects. The young subjects made an average of 4.28 errors per trial whereas the older subjects made an average of 7.31 errors per trial. Performance improved for both groups as the number of trials increased. The results led the investigators to the conclusion that memory processes for the visual and verbal modes differ only quantitatively, and not qualitatively, as a function of increasing age. (MKM)

**Descriptors**—Cognitive Processes, Educational Research, Higher Education, \*Individual Differences, \*Information Processing, Language Skills, \*Listening Comprehension, \*Verbal Stimuli, \*Word Recognition

This study is a preliminary investigation of the relationship between measures of individual differences in perception and the way word components fuse when words such as "lanket" and "banket," both derived from "blanket," are presented one to each ear. Thirty-six native speakers of English participated in the experiment, receiving four dollars plus a bonus for accurate performance. The present research correlated different measures of fusion in an attempt to determine the nature of the basic phenomenon. The measures of fusion included accuracy of temporal order judgments, ignoring stimuli from the left ear, and discriminating instances in which a real word occurred in both ears from instances in which the word components appeared in each ear. It was concluded that most people fused words very little when assessed by the accuracy of discriminating real words from word components. The fusion phenomenon appears not to be a true fusion that impairs discrimination of the components, that is, language appears to bias the response of certain people only. (Author/RB)

The Title I program described in this document focused on the improvement of reading and language skills among educationally disadvantaged children in four elementary schools. Specific objectives included enhanced reading skills, enhanced language skills, and mastery of basic concepts in the areas of food handling, communications, transportation, and career awareness. The instructional program consisted of four activities: the Southwest Cooperative Educational Laboratory Oral Language Program, a locally designed reading assistance program, a locally designed language development program, and a home-school coordination program. For the entire year, 53 kindergarten children and 75, 68, and 73 children in first, second, and third grades respectively were served. This document contains an executive summary and an overview of the program, an introduction to the project, a description of the target population, discussions of the project operations and outcomes, a summary of the project, and examples of various mastery tests used in the program. **Descriptors**—Educational Research, Evaluation Methods, Kindergarten Children, Longitudinal Studies, \*Measurement Instruments, Predictive Measurement, \*Predictive Validity, Primary Education, \*Reading Difficulty, \*Reading Skills, \*Reading Tests

This study determines whether an abbreviated test battery, administered in September, could predict achievement ratings at the end of kindergarten in June of a group of kindergarten children in an elementary school. An additional purpose was to institute a prevention program on a random sample of predicted high-risk children in this group and to evaluate the test outcomes despite the possible ameliorative effects of treatment. The sample consisted of 28 black students and 104 white students who entered kindergarten in September 1974. The results provide additional support for the predictive validity of this abbreviated screening battery. The major reservation concerning the results of this study is the tentative, if not premature, state of the achievement criterion. (RB)

This yearbook includes a summary of the research in reading that has been conducted in recent years, and also contains many ideas that have practical implications for the teacher in the classroom. The essays are divided into six major sections: research review, college and adult programs, teacher education, programs and practices, test materials, and research and theory. Included are essays on such topics as improving college reading and study programs by locating and critiquing research, subjective assessment of auto-instructional learning tasks in secondary and college reading materials, eye-movement photography as an instructional tool, prevention of reading problems in higher education, internal reading flexibility patterns among university undergraduates, reading programs in Illinois high schools, improving a school's reading achievement, children's ability to segment sentences into individual words, the use of prediction equations and computer simulation for identifying preferred sensory modality for training in reading, developmental changes in memory attributes of good and poor readers, and interest as a variable in word acquisition. **Descriptors**—Achievement Tests, Behavioral Objectives, Cognitive Processes, Cognitive Tests, \*Criterion Referenced Tests, Intelligence Tests, Listening Skills, Measurement Techniques, \*Norm Referenced Tests, Reading Skills, \*Standardized Tests

Standardized norm-referenced tests have been much maligned in recent years. They differ from criterion referenced tests in that the latter involve assessment in comparison to an absolute standard or specific performance objective while in a norm-referenced test assessment is made in comparison to other students taking the same test. Standardized tests can be abused in some of the following ways: failing to recognize limitations within the testing situation that obscure the "true" level of competence; making decisions on the assumption that the score derived from the test tells all; making decisions on the assumption that reading and intelligence tests measure exclusive domains; assuming that a standardized test can give specific direction to an instructional program; interpreting results without reference to the composition of the norm group; making the assumption that anyone below the 50th percentile is a disabled learner; and treating a grade score on a reading test as a functional reading level. However, standardized tests do have many positive uses: as an accountability check, as a screening device to determine further diagnostic needs, and as a way to generate hypotheses regarding instructional needs. **Reading Skill and the Minimum Distance Principle: A Comparison of Sentence Comprehension in Context and in Isolation.**

Pub Date 75

Note—69p.; M.S. Thesis, University of Pittsburgh

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—\*Context Clues, Elementary Education, \*Language Development, \*Listening Comprehension, Masters Theses, \*Reading Comprehension, Reading Development, \*Reading Research, Sentence Structure

**Identifiers**—Minimum Distance Principle

The comprehension of the Minimum Distance Principle was examined in three experiments, using the "tell/promise" sentence construction. Experiment one compared the listening and reading comprehension of singly presented sentences, e.g. "John tells Bill to bake the cake" and "John promises Bill to bake the cake." The comprehension question asked for the subject of the infinitive complement clause, e.g. "Who bakes the cake?" Subjects were 96 third, fourth, and fifth graders. A significant positive relationship was found between reading skill level and performance on this task. Reading skill level was a

better predictor of "Promise" performance than were age or IQ. Experiment two investigated the effect of the composition of the experimental presentation list on performance by comparing comprehension when the list contained only "promise" or only "tell" sentences with that obtained when the list contained both types of sentences. For half the subjects, performance differed as a function of the list composition. In experiment three, the sentences were embedded in a paragraph context. Comprehension of "promise" sentences was better in context than in isolation. Implications of these studies for the assessment of the development of language competence are discussed. (Author)

An Investigation of the Role of Interest as a Factor in Reading Comprehension.

Pub Date Jun 75

Note—85p.; M.Ed. Thesis, Rutgers, The State University of New Jersey

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Grade 5, Intermediate Grades, Masters Theses, Reading Ability, \*Reading Achievement, \*Reading Comprehension, \*Reading Interests, Reading Research, \*Reading Skills, Student Interests

This study was an investigation into the relationships between reading interests and reading comprehension as demonstrated by a group of fifth-graders who rated reading passages for interest and then were checked for comprehension of these same passages. A seven-point rating inventory, ranging from a "liked very, very much" rating to a "disliked very, very much" rating, was used to measure the reader's interest. The mean reading achievement grade-level score for the 110 fifth-grade students participating in this study was 5.9 at the time of the study's testing program. It was concluded that expressed interest is not a factor which affects reading comprehension. Reading interest patterns do provide information as to what children will read, but are not significant in determining the level of reading comprehension. (Author/RB)

Identifiers—\*Prereading Skills Program

The Pre-reading Skills Program (PRS) was developed at the Wisconsin Research and Development Center for Cognitive Learning. Research on prereading skills was conducted from 1966 to 1969. The developmental period, 1970 to 1974, included piloting and field testing instructional materials, teachers' manuals, assessment instruments, and a management system. During 1972-73, a study was designed and carried out to investigate achievement associated with PRS. Taking part in the study were kindergarten children from (1) classes whose teachers were using PRS for the first time, (2) classes whose teachers had used PRS during the previous year, and (3) classes whose teachers were not using PRS; and first grade children who had not used PRS in kindergarten. The major result of the study was that kindergarten children who used PRS scored significantly higher on five prereading skills tests than children who did not use the program. The study also showed that there is a high percentage of retention of mastery or nonmastery status between the end of kindergarten and the beginning of first grade. (Author/TS)

Descriptors—Adult Learning, College Students, Consonants, \*Context Clues, Educational Research, \*Models, \*Predictive Measurement, \*Pronunciation, \*Vowels, Word Recognition

This study was designed to explore relationships between type and token frequencies and contextual position effects; specifically, the major question was whether or not vowel cluster pronunciation preferences of adult readers were more affected by frequency of occurrence than by graphemic environment. Two opposing hypotheses were tested regarding four vowel digraph spellings. Six synthetic words were constructed for each vowel cluster according to contextual and word position constraints. The subjects were 51 undergraduates whose task was to read the synthetic words and note how they pronounced the underlined vowel cluster. Three models were constructed to assess the hypotheses and to predict responses for each vowel cluster. The models were a final consonant model, a variant type-token model, and an invariant principal response model. Several data analysis techniques were used. The final consonant model was superior to the other two models, but it was found that other factors, not yet assessed, were present in the results. (Author)

Identifiers—\*Encoding (Reading)

This study presents an account of position saliency in terms of children's ability to utilize graphic information, and in particular the serial encoding of information from letters in a graphic pattern. By varying the number and position of the letters distinguishing graphic patterns (positive condition) in a short-term recognition memory (STRM) task, the relative use of information from different parts of the graphic pattern can be determined. Under STRM, the subject must analyze, remember, and utilize the graphic information from the Target (T) stimulus, in judging whether or not the Comparison (C) stimulus is the same as the T stimulus. In Experiment one, Exposure Time (ET) of the T stimulus, Retention Interval (RI) between T and C stimuli, and the Positive condition were varied. The results indicated that both second semester pre-reading kindergarten children and first graders are more likely to detect a difference between the T and C stimuli in the initial letter position than at the middle or final position. Experiment two used a similar paradigm with a fixed ET and RI. The results revealed neither a position effect nor any indication that entering kindergarten children's performance changed during the study. (Author/TS)

Sight word lists have been used since prior to 20 B.C. and have changed forms many times. Today sight word lists are numerous and are widely and variously used. They differ in source, intended purpose and/or audience, and criteria for including specific words. Despite the differences, there is much agreement that they do reflect the most basic words in our language and that there is a high degree of commonality among them. This report identifies the 100 sight words which appear in 16 major sight word lists, including "A Basic Word List from Basal Readers," "Gates Primary Reading Vocabulary," and "Thorndike-Lorge Reading Vocabulary." The systematic study of reading dates form the beginnings of experimental psychology in the late nineteenth century. Cattell measured reaction times for naming letters and words, investigated parallel processing, and compared legibilities of letters and printing types. From the end of the 1880s to the publication of Huey's 1908 text, reading processes were a central focus of experimental psychology. After this period, however, the influence of behaviorism turned experimental psychologists away from the investigation of mental processes, while educational psychologists became preoccupied with testing and measurement. A revival of experimental work occurred in the late 1950s. With the current rise in popularity of information processing, studies of reading once again occupy a central role in psychology. Almost all of the problems attended to by the first researchers remain unresolved today: control of eye movements, the strategies involved in word recognition, the amount and types of overlapping processes, the role of subvocalization, the nature of the eye-voice span and the optimal methods for reading instruction. How to translate research results into educational practice also still remains a problem. (Author/MKM)

A well established finding in the discrimination learning literature is that pictures are learned more rapidly than their associated verbal labels. It was hypothesized in this study that the usual superiority of pictures over words in a discrimination list containing same-instance repetitions would disappear in a discrimination list containing different-instance repetitions. The subjects were 120 volunteer college students, ranging in age from sixteen to twenty-four years, who were paid for their participation. Consistent with data obtained in an earlier frequency judgment experiment, and as would be predicted from the frequency theory of discrimination learning, the picture-word differences that were observed under the standard version of the task disap-

peared when the conceptual version was administered. (RB)

**Descriptors**—College Students, \*Discrimination Learning, \*Imagery, Reading Processes, \*Reading Research, \*Word Frequency, Word Recognition

This study consisted of two experiments. In the first experiment, 40 college students gave frequency ratings for concrete and abstract words which were equated on normative frequency. From the results it was concluded that abstract (low imagery) words, even though the two sets of words are of equal frequency. In the second experiment, different subjects learned verbal discrimination lists consisting of both abstract and concrete pairs. While the usual concreteness effect was obtained when abstract and concrete items differed widely on phenomenal frequency, it disappeared when these items were equated on perceived frequency. The finding that appropriate frequency manipulations can eliminate the concreteness/imagery effect, coupled with similar findings for other stimulus characteristics, lends strong support to the frequency theory of discrimination learning. **EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Discrimination Learning, Elementary Education, Imagery, \*Memory, \*Pictorial Stimuli, Reading Research

Previous research has demonstrated that requiring children to trace from memory the correct member of a pictorial discrimination pair markedly facilitates performance. The subjects for the first experiment in this study were 45 fifth grade students. The control group was given regular discrimination learning instructions. The image-trace group was told to note the correct item during feedback, and then with a picture of it in their minds, to turn their heads away and trace the outline of the picture in the air with their fingers. And the trace group was instructed to trace the outline of the correct item during feedback. The second experiment involved 63 kindergarten children and was based on an earlier observation that the ability to derive memorial benefits from self-generated imagery strategy seems to improve with age. On the basis of the evidence assembled in these experiments, it was concluded that copying a correct stimulus directly is not nearly as effective as is reconstructing it from memory and that imagery rehearsal is a skill which is more sensitive to age differences than is verbal rehearsal. Identifiers—\*Army

This report describes the development of an experimental program of job reading training designed to provide a level of functional literacy appropriate to minimal job task reading requirements in six major career clusters. Program effectiveness for both general and job reading training is described in data based on the reading performance of some 3,000 adult students at six Army Training Centers at which the program was implemented. Reading Training performance was measured by both a standardized test of general reading comprehension and an experimental measure of the job reading task skills required to learn and to perform a job. This research also investigated the feasibility of three alternative systems for providing job reading training concurrently with other components of job training, rather than as preparatory training. Major findings indicate that: (1) a substantial portion of job trainees are deficient in job reading skills; (2) six weeks of focused job reading training improved job reading skills to the seventh grade reading level (a gain of two reading grade level years specific to job reading skills); and (3) programs of integrated job reading and job skills training are feasible. **Descriptors**—\*Cluster Analysis, \*Cognitive Processes, Educational Research, Evaluation Methods, Higher Education, Measurement Instruments, \*Recall (Psychological), Retention, \*Statistical Analysis

Identifiers—\*Free Recall

A graph-theoretic paradigm is used to generalize the common measures of categorical clustering in free recall based on the number of observed repetitions. Two graphs are defined: a graph G that characterizes the a priori structure of the item set defined by a researcher, and a graph R that characterizes a subject's protocol. Two indices of clustering, denoted by gamma and omega, are obtained by evaluating the sum of the pairwise products of the weights on the corresponding edges of the two graphs. The gamma statistic is a direct generalization of the commonly used clustering indices and reduces to the number of repetitions whenever G represents a standard categorical decomposition of a stimulus list. The omega statistic, on the other hand, extracts more information from the protocol graph R than does gamma and incorporates a distance measured based on the number of intervening items in a subject's recall sequence. The "Epistle" is the publication forum of Professors of Reading Teacher Educators, which is a special-interest group of the International Reading Association. In this issue "Early Publishers: Characteristics of Graduate Students Who Publish Reading Material" by Catherine Scheader and Lee Mountain focuses on 29 graduate students who had published either in educational journals or with commercial publishers. Graduate students in reading who published their work tended to be experienced teachers, em-

ployed either full time or part time, and enrolled in doctoral programs rather than masters degree programs. Enrollment in a course which prepared graduate students to publish, also proved to be a significant factor. In "Doctoral Dissertation Abstracts Involving Reading and Reported During 1974," Robert A. Palmatier and Ronald Rood offer an analysis of doctoral theses topics, sources, populations, statistical methods, and designs as communicated through researcher-prepared abstracts. (College Instruction: The Old Do As I Say Not As I Do Game," by Deborah De Nicolo and Jane Domaracki, is a student comment on graduate instruction. Regular features are "Movers," "Exchange," and "For the Time Capsule." (MKM)

The "Epistle" is the publication forum of Professors of Reading Teacher Educators, which is a special-interest group of the International Reading Association. This issue explores the topic of careers for doctoral students in reading which are alternatives to the single goal of college teacher educator. Articles are "Wanted: Well Qualified College Remedial Reading Teachers" by M. Jean Hiler, "Doctoral Programs for College Reading Study Skills Teachers" by Gerald Parker and Barbara Ross, "Reading in Vocational-Technical Schools: Staffing, Training, and Curriculum" by Frederick C. Raetsch, and "Must Everyone Work in Teacher Education?" Regular features are "Movers," which endeavors to record the job choices of new graduates and the relocation of others; "Exchange," which offers a communication link between individuals who wish temporary locations; "Job Report," which lists positions available to doctoral-degree holders; and "Time Capsule," which contains notes of interest about reading. **Reading Comprehension and Regularized Orthography. Parts 1 and 2.**

Wisconsin Univ., Madison. Research and Development Center for Cognitive Learning.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Report No.—WRDCCL-TR-364

Pub Date Dec 75

Contract—NE-C-00-3-0065

Note—180p.

**EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage**

**Descriptors**—Graphemes, Morphemes, \*Orthographic Symbols, \*Phonetic Transcription, \*Reading Comprehension, Reading Research, Secondary Education, Visual Discrimination, Written Language

The purpose of this study was to compare mature readers' comprehension of text presented in traditional orthography with their comprehension of text presented in a regularized orthography, specifically, to determine whether, when traditional orthography is regularized, any loss of meaning is attributable to the loss of the visual dissimilarity of homophones or to the loss of visual similarity in morphemes. Subjects in the study were 97 upper track, twelfth grade English students in four classes of a Waukegan, Wisconsin, high school. Two weeks after pretesting ("Gates-MacGinitie Reading Tests," Survey F, Comprehension Section), two groups of subjects received four days of instruction and practice in regularized orthography and two groups received standard instruction. In the posttest situation subjects received alternate forms of the comprehension test and a test of morphemic relationships. Two groups received test forms in traditional orthography and two in regularized orthography. Tentative conclusions were that the loss of visual dissimilarity of homophones was not a factor affecting comprehension but the loss of visual similarity in morphemes related in meaning had a

negative effect on the establishment of meaning relationships between such morphemes. (Author/JM)

Attitude Formation, Novel Stimuli, and Exposure Effects.

Pub Date 75

Note—6p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, August 30-September 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Association (Psychological), \*Attitudes, \*Attitude Tests, \*Changing Attitudes, Measurement Techniques, Psychological Studies, \*Rating Scales, Response Style (Tests), Values

Ten Turkish words were used as stimuli in an exposure experiment. Twenty-five students from the University of Illinois subject pool were divided into five subgroups, differing only with respect to which stimuli occurred in which exposure conditions. After the stimuli were evaluated on 7-point "good-bad" scales, subjects completed a questionnaire which assessed variables connected with the various explanations of the mere exposure effect. The results showed that exposure increased the positive evaluations of the Turkish words and the summed positive evaluations of their associations. These parallel findings supported an attitude formation process which used Fishbein's attitude model to relate the evaluations of stimuli to the evaluations of their associations. Four other explanations of exposure effects were also tested, but their predictions were not confirmed. (MKM)

Preparing Teacher Educators in Reading.

Pub Date 75

Note—11p.; Unpublished study prepared at SUNY at Albany, Department of Reading; Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Doctoral Programs, Higher Education, Reading, Reading Instruction, Seminars, Summer Institutes, \*Teacher Education, Teacher Education Curriculum, \*Teacher Educator Education

One of the most frequent criticisms of doctoral preparation in reading is the lack of training and guidance in the area of teacher education. Often graduate students are assigned as teaching assistants, either initially assuming full responsibility for selected undergraduate sections with little preparation or else beginning by assisting a professor in a course, assuming primary responsibility for a section of the course later on. A couple of strategies which might be initiated to strengthen the teacher education component of doctoral preparation are the seminar, like the one developed and offered at the State University of New York at Albany in the summer of 1974, and a practicum which has yet to be initiated although selected components are operational. (Outlines of the seminar—with lists of references, sample modules, and audiotapes—and the practicum are included.) (JM)

Standardized Test Performance as Function of General Reading Ability.

Pub Date Oct 75

Note—66p.; M.Ed. Thesis, Rutgers, The State University of New Jersey

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Intelligence Quotient, Masters Theses, Race, \*Reading Ability, \*Reading Tests, Secondary Education, Sex (Characteristics), \*Standardized Tests, \*Verbal Ability

The purpose of this study was to determine whether there were statistically significant correlations among standardized test scores due to general reading ability and whether these correlations were affected by the factors of sex, race, and I.Q. Scores were collected for three different tests (Nelson-Denny Reading Test, Lorge-Thorn-dike I.Q. Test, and the verbal section of the SAT) taken by 154 senior students throughout their high school careers. Statistics resulting from computations indicated that all tests shared a large common variance, with reading ability more

closely related to verbal aptitude than to intelligence. To determine the key element most likely linking the three tests, reading ability and then intelligence were held constant for these correlations. Resulting partial-order correlations pointed to reading ability as the factor most highly related to standardized test scores. Sex accounted for insignificant differences while race is a far more significant variable as a predictor of verbal ability and test score results. It is suggested that inexpensive and easy to administer standardized reading tests can be used more efficiently by educators in the schools. (Author/JM)

Rupley, William H.

Relationship between Selected Areas of Teacher Emphases and Student Achievement in Reading.

Pub Date 75

Note—19p.; Synopsis of author's Ph.D. Dissertation, University of Illinois, Urbana-Champaign

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Educational Research, Elementary Education, \*High Achievers, \*Low Achievers, Reading Achievement, \*Reading Instruction, Student Motivation, Student Teacher Relationship, Teacher Evaluation, \*Teacher Influence, Teacher Role

This study compared (1) the mean reading instructional emphases reported by teachers associated with high achieving students of reading with the mean reading instructional emphases reported by teachers associated with low achieving students of reading, and (2) the mean reading instructional emphases reported by third grade teachers with the mean reading instructional emphases reported by sixth grade teachers. Samples of third and sixth grade teachers who taught reading in a self-contained classroom were classified as high achieving teachers of reading or low achieving teachers of reading through the use of a least squares prediction line. The teacher's responses to each item on "The Survey of Teacher Emphases in Reading Instruction" were totaled for each of seven categories and data were collected on the summated scores for each subcategory. Significant differences were found between grade levels for reading instructional emphases in the areas of oral reading, word attack, and double categories. No significant differences were noted for instructional emphasis between the reading achievement levels of classes. Further exploration of these data were conducted and an argument against methodological incarceration was deemed appropriate. (Author/JM)

Reading as a Thinking Process; Proceedings of the Annual Reading Conference (5th, Indiana State University, Terre Haute, June 12-13, 1975).

Indiana State Univ., Terre Haute. Curriculum Research and Development Center.

Pub Date 75

Note—71p.; Charles D. Hopkins, Director, Curriculum Research and Development Center School of Education, Indiana State University, Terre Haute, Indiana 47809 (Write for price)

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Abstract Reasoning, Conference Reports, \*Creative Reading, Creative Thinking, \*Critical Reading, Critical Thinking, \*Decoding (Reading), \*Interpretive Reading, Poetry, Reading Skills, Recall (Psychological), Teaching Techniques, \*Thought Processes

Thinking skills in children, effectively developed through reading, were emphasized at this reading conference. Three types of thinking skills linked to reading are: decoding symbols from the printed page, seeking factual meaning through recall; reading interpretively, understanding cause and effect reasoning or seeking the main idea of sentences; and creative-critical reading, examining the author's intent or language or feeling the mood of a story. In this booklet, the techniques and ideas for developing thinking skills and abilities are described in the following presentations: "Personkind, Meaning Maker" by William H. Hoth; "What Is Poetry? Who Cares?" by Sheron Dailey Pattison; "Private Logic in Children's Behavior and Thinking" by Reece Chaney; "Readiness Is a Thinking Process" by Jessica Welch; "The Think Tank of Reading or Is the Barrel Full?" by Robert Pabst; "Thinking

Skills and Reading" by Richard Biberstine; "Systematic Approach to Reading Improvement (Sari)" by Geneva Ross; and "Language and Thought: Contributions to the Reading Process" by Eldonna L. Evertts. (JM)

Assessment of Reading Activities Funded under the Federal Program of Aid for Educationally Deprived Children, Office of Education, Dept. of Health, Education, and Welfare. Report to Congress.

Comptroller General of the U.S., Washington, D.C.

Report No—MWD-76-54

Pub Date Dec 75

Note—58p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Disadvantaged Youth, Elementary Secondary Education, \*Federal Programs, \*Program Effectiveness, \*Program Evaluation, \*Reading Achievement, Reading Improvement, Reading Instruction, \*Reading Programs, Reading Research, Reports

Identifiers—\*Elementary Secondary Education Act Title I, ESEA Title I

The overall effectiveness of the Title I program is questionable, according to this report to Congress. Title I of the Elementary and Secondary Education Act authorizes federal financial assistance for programs designed to meet the special educational needs of educationally deprived children living in areas with high concentrations of children from low-income families. In spite of recent criticism of reading achievement tests, the Office of Education believes it is fair to regard change in reading achievement as the best indicator of program effectiveness because most of the objective evidence from state educational agencies and local educational agencies is from reading test scores. Two recent OE funded studies, which attempted to synthesize the findings from local, state, and federal evaluations, concluded that a positive program impact was evidenced in a few states and in scattered projects in other states. However, because there were no accepted criteria for determining what constitutes a successful program, it was not concluded whether the overall program was successful. (RB)

Marzano, Robert J.

In Search of the Major Skill of Comprehension.

Pub Date 75

Note—9p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Elementary Secondary Education, \*Readability, \*Reading Comprehension, Reading Research, \*Reading Skills, Semantics, Sentence Structure, \*Structural Analysis, Syntax

The purposes of this study were to identify the best predictor or predictors of paragraph comprehensibility and to attempt to interpret that predictor as a skill. Forty-two passages of differing readability (ranging from grade 2.5 to 10.0) were analyzed for within word, within sentence, and between sentence characteristics. The measures used for quantifying these characteristics were: index 1, average semantic load per word; index 2, average depth of within sentence modification; and index 3, average depth of between sentence modification. Each index represents a hypothesis as to the nature of the major skill of comprehension. A multiple regression analysis was conducted using indexes 1, 2, and 3 as predictor variables and passage readability as the criterion. Results show that index 2 was the only significant predictor of the criterion, that index 2 accounted for 76 percent of the variance in comprehension levels of the passages, and that indexes 2 and 3 are highly correlated with each other. Thus, the major skill of reading comprehension can be described as one of identifying main and subordinate ideas within and between sentences. An empirical test of this single skill model should be conducted. (JM)

The Reading Curriculum in the St. Louis Public School System Regarding Instructional Methodology, Legislation and Personalities (1821-1973).

Pub Date 75

Note—186p.; Ph.D. Dissertation, Saint Louis University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-26,265; MFilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

**Descriptors—Curriculum Design, Doctoral Theses, \*Educational Strategies, \*Elementary Education, Instructional Design, \*Legislation, Personality, Public Schools, \*Reading Instruction, \*Research Methodology, Superintendents, Teaching Methods**

The purpose of the study was to trace and document by means of historical research methods, the organization of the St. Louis Public School System's elementary reading curriculum in regard to instructional methodology, legislation, and influential personalities. Chronologically, the study covered the period 1821-1973. The reading curriculum of the St. Louis Public School System developed along trends similar to those that emerged on a national basis. The school system witnessed early concentration on "phonography," the art of learning sounds through the medium of unique graphic character. A slow transition was made from instructional stress on oral to that of silent reading. Legislation was reported that had a relation to instructional methodology, and although there have been few statutes passed with reading as their stated emphasis, legislation has been enacted regarding curriculum requirements in which reading has been an incorporated component. The aspect of the research concerned with personalities focused on three individuals recognized as having had a major role in the development of the school system's instructional program: William T. Harris, Susan E. Blow, and William A. Kottmeyer. (Author/LL)

**Descriptors—\*Association (Psychological), \*Associative Learning, \*Cognitive Processes, Educational Research, Elementary Education, Learning Processes, \*Recall (Psychological), \*Verbal Learning, Verbal Stimuli**

**Identifiers—Free Recall**

The primary purpose for conducting the present experiment was to assess the effects of an associative-attribute—for example, stimulus meaningfulness (m) on the learning rates of different age group children. An attempt was also made to assess the effects of age and m on a measure of subjective organization. This research consisted of two studies: in study one information was obtained on m values for 40 consonant-vowel-consonant words employing children in grades K, 2, and 6. Study two was concerned with the interrelationship between stimulus m and ontogeny on free recall learning rates and subjective organization. It was hypothesized that learning would be more rapid for older relative to younger children when word lists were identical, that is, stimulus m was allowed to co-vary with age. The findings indicated that increasing stimulus m had a within age facilitating effect on free recall learning. (RB)

Note—27p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—Adult Basic Education, \*Listening, \*Reading Comprehension, \*Reading Improvement, \*Reading Speed, \*Remedial Reading, Speech Compression, Teaching Techniques**

Using time-compressed speech methodology, a program was developed which attempted to improve the reading rate and comprehension of U.S. Navy personnel with low reading ability. Four groups of trainees were tested. One group read training text while simultaneously listening to a speeded auditory version of the same text. A second group listened to speeded text without concurrently reading the material. The third group simply read material silently, with no auditory input. The fourth group was a control group which took pretests and posttests only. All groups except the control group showed sizable but comparable increases in unaided reading rate and comprehension performance. Thus, it appeared that the salient aspects of all procedures provided trainees with specific learning goals and precise feedback on their progress, coupled with teacher encouragement to improve. **Descriptors—\*Association (Psychological), Associative Learning, \*Auditory Discrimination, Auditory Perception, Cognitive Processes, Kindergarten, \*Memory, Primary Education, \*Recall (Psychological), Retention, \*Socioeconomic Status**

False recognition responses of high and low SES kindergarten subjects to associatively and acoustically related words were measured. Acoustic attribute dominance for all subjects, and relatively greater acoustic attribute dominance for low SES subjects was predicted. Results indicated that subjects encoded on both attribute dimensions, with low SES subjects producing significantly more recognition errors. The importance of the results for the developmental shift hypothesis of attribute dominance was discussed as well as the importance of SES as a variable in future memory attribute research. (Author)

**Episodic and Semantic Aspects of Memory for Prose.**

Pub Date 75

Note—18p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, August 30-September 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—\*Cognitive Processes, Higher Education, Learning Processes, \*Memory, Models, \*Reading Comprehension, Reading Research, \*Recall (Psychological), \*Retention, Semantics**

This report describes research on Bartlett's theory of constructive memory. In experiment one, schematic retention is related to Tulving's distinction between episodic and semantic memory. With the passage of time, memory for prose reflects decreasing output from episodic memory and increasing output from semantic memory. In experiment two, Bartlett's theory is related to Craik and Lockhart's levels-of-processing framework. Comprehension of prose involves the creation of multiple codes which are forgotten at different rates. Bartlett's schema is

interpreted as a higher-level code that is exceptionally durable over long intervals. The research supports the validity of Bartlett's theory. (Author)

**The Minority Image in Children's Books.**

Pub Date 75

Note—11p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (65th, San Diego, California, November 26-29, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—American Indians, \*Childrens Books, Childrens Literature, Cultural Awareness, \*Cultural Images, \*Minority Groups, Negroes, Spanish Americans, \*Stereotypes**

The minority image presented in the majority of children's books is too often a stereotype of a particular minority. Blacks are seen as ludicrous or unnaturally good, as ghetto bound, and—when portrayed in a group of characters—as the only dialect speakers in the group; American Indians are portrayed with depersonalization and ridicule; and Spanish American characters (including Mexicans and Puerto Ricans) suffer from the perpetuation of negative myths and the failure to define them as persons. Not only is it necessary to eliminate stereotypes in children's books, but it is also essential to bring minority group members into all phases of writing and publishing. In addition, teachers should select nonstereotyped reading materials, teach critical reading skills, and emphasize an understanding of other people through book discussions and role play. (JM)

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors—Elementary Secondary Education, Instructional Materials, \*Reading Materials, Sex Discrimination, \*Sex Role, \*Sex Stereotypes, \*Textbooks**

Sex role stereotypes in children's reading materials limit life options. They prevent girls from realizing that all occupations and careers are open to them, and they present a man's role in the world as quite different from that of a woman. Sexual bias in reading material (both text and trade books) may be seen from the frequency of use of masculine and feminine proper names and pronouns (masculine appeared more than twice as often as feminine) and a disparity in the scholastic understandings of girls aged nine (equal to that of boys of the same age) and girls aged thirteen (beginning a decline which continues into adulthood). In order to avoid sexual bias and to encourage girls to reach their full potential, educational materials should reflect the reality of the past and the contributions made by women in history and politics, present both boys and girls in exciting adventures, avoid the stereotyped portrayals of both boys and girls, and emphasize both sexes engaging in similar activities and making responsible decisions. The material in this monograph is based on the idea that science content and the reading and reasoning processes for learning may be taught simultaneously in the science classroom. Topics

of the six chapters are: distinguishing between content and process, developmental and functional reading; diagnosis in teaching science; preparatory activities for teaching science; the use of guided material in teaching science; the reinforcement of vocabulary and comprehension in teaching science; and evaluation in the teaching of science. Two appendixes include an informal study skills inventory on a physical science textbook and an extensive statement to students about learning to think. (JM)

Gray, Lois A. Guthrie, Larry F.

**The Effect of Variations of the Metropolitan Reading Readiness Test upon Scores of Culturally Disadvantaged Children.**

Pub Date May 75

Note—33p.; Indiana University Northwest

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Culturally Disadvantaged, Grade 1, Primary Education, \*Reading Readiness, \*Reading Readiness Tests, Regional Dialects, Urban Education, \*Verbal Development, \*Vocabulary Development

Identifiers—\*Metropolitan Reading Readiness Test

The Word Meaning section of the Metropolitan Reading Readiness Test, Form A, was questioned as a true measure of the capabilities of culturally disadvantaged children. Therefore, an attempt was made to compare the Metropolitan Reading Readiness Test with a test in which as many objects as possible were renamed to coincide with the language of the students being tested. In order to test this two alterations were made to the Metropolitan Test. First, nine items on the original test were modified to reflect greater cultural relevance. Second, a test in which all items were redesigned was constructed. Both were administered to 180 first grade students by their individual teachers and scores were compared with initial scores on the original Metropolitan. The two modified tests were administered to the same students a second time as a check for reliability.

Scores were significantly higher for the culturally modified tests. These results seem to support the statement that use of regional or colloquial language expressions of children will increase children's scores on a reading readiness test. Both the partially and completely modified tests are included in the appendixes. (Author/MKM)

**The Effect of Listening Drills Utilizing Compressed Speech and Standard Speech upon the Listening Comprehension of Second-Grade Children.**

Pub Date Jun 75

Note—64p.; M.Ed. Thesis, Rutgers The State University of New Jersey; Appendix 1—Durrell Listening Test Form EF removed due to copyright restrictions

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—\*Educational Research, Grade 2, \*Listening Comprehension, \*Listening Skills, Primary Education, \*Speech Comprehension

This study was designed to investigate whether the listening ability of second-grade students could be improved using compressed-speech training as compared to normal listening training. The subjects were 95 second-grade pupils in a low-to-middle class suburban community in central New Jersey. The plan was to expose an experimental group to fourteen stories presented at 200 words per minute over a period of five weeks. The control group listened to the same stories presented at the normal rate of 140 to 150 words per minute. Both groups answered comprehension questions which immediately followed each story. Pretest instruments were the Goodenough-Harris Draw-A-Man Test and the Durrell Listening Test. The posttest instrument was another form of the Durrell Listening Test. Some of the findings were that no evidence was observed which would indicate that a gain in listening skills will result when a faster rate of presentation is used as compared to a normal speaking rate of presentation and neither the control nor the experimental group improved their listening skills. **Reading Comprehension and the High School Graduate, Panel 7; Conference on Studies in Reading** (Washington, D.C., August, 1974)

National Inst. of Education (DHEW), Washington, D.C.

Pub Date Sep 75

Note—38p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Higher Education, \*High School Graduates, Instructional Programs, Intervention, \*Reading Comprehension, \*Reading Research, Reading Skills, Testing, Underachievers, Writing Skills

Identifiers—\*National Conference on Studies in Reading

The problem of this conference panel was to develop a research and development agenda to improve the reading and writing proficiencies of high school graduates. This panel report consists of four approaches to the problem: studies of the problems of ill-prepared high school students; surveys of the reading and writing tests used by colleges and universities; analysis and description of intervention programs implemented at the college level, including positive and negative results; and exploration of new instructional strategies in order to understand the pedagogical directions of successful experiences and the ways of encouraging commitment to new approaches. A bibliography is included. (JM)

Descriptors—\*College Freshmen, Composition (Literary), Curriculum Design, \*English Instruction, Instructional Materials, \*Interpersonal Relationship, Language Skills, Literature, Marriage, Oral Expression, Reading, Teaching Guides, \*Thematic Approach

Identifiers—\*Love

One of a series of volumes containing units on specific themes designed for use in college freshman English courses, this particular volume considers various aspects of love and its emotional impact on people. This sequence is designed to help students improve in reading, writing, and oral expression by exploring the theme of love through a variety of literary works, films, recordings, music, and art. The first of four sections, "Love, Sacred and Profane" provides a general discussion and overview of the various aspects of love. Section 2, "Passion," introduces works illustrating the difficulty of, and problems involved in, expressing love, using the male-female relationship as a model. "Love and the Family" moves from the consideration of love on a strictly interpersonal basis to love within the smallest social unit, emphasizing the different perspectives on reality afforded different members of the family group. The final section, "Love and Society," examines how the society in which one lives not only shapes, and sometimes perverts, the expression of love, but also determines the validity of love as a basis for marital alliance. One of a series of volumes containing units on specific themes designed for use in college freshman English courses, this particular volume considers people and their responsibilities, through the use of recordings, cartoons, satire, modern and ancient drama, modern fiction, and contemporary essays. The sequence is divided into four sections. Section 1, "Humor and Satire," juxtaposes ancient and modern satires written in formal and informal styles in order to provide the student with an awareness of satire as an effective vehicle for protesting the evils of society. Section 2, "Language and Speech—Drama," emphasizes the spoken word through an examination of two plays and of Greek mythology. Section 3, "Language and Speech—Fiction," stresses the use of drama techniques for analyzing fiction. Section 4, "Ideas and Their Expression," investigates philosophies and themes concerning civil disobedience, and draws attention to written styles and effective devices. (LL)

**The English Linguist and the Real Linguist.**

Pub Date 75

Note—14p.; Paper prepared at University of Maryland

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*College Role, \*English Departments, Higher Education, \*Linguistics, School Responsibility, School Role, Teacher Responsibility, \*Teacher Role

**Identifiers**—\*Linguists

This paper discusses the roles and responsibilities of the linguist in the English department and also the roles and responsibilities of the English department in relation to the linguist. Discussed are such topics as the exclusivity of some English departments, linguists' grievances against some English departments, linguists' expectations for professional advancement, the teaching conditions imposed by some English departments on linguists, and the difference between conditions imposed on linguists who work in English departments and linguists who work in linguistics departments. It is suggested that English departments review their treatment of linguists and that linguists examine their status within their departments and encourage fair treatment for both literacy and literature professors. This language arts curriculum guide for grades 10-12 begins with a statement of the language arts goals of knowledge, skills, and values to be addressed in each section. The instructional components are sequenced according to objectives, and most of them are keyed to present resources in the Shawnee Mission (Kansas) school district. The following components are covered: sentence organization, paragraph organization, composition organization, parts of speech, sentence analysis, colons and semicolons, capitalization, utilizing language as a means for expanding and ordering, paragraph development, metaphor, revising notes, figurative language, and vocabulary development. Also included in this document are specifications for criterion-referenced testing related to the instructional components. (TS)

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

**Descriptors**—\*Composition (Literary), \*Criterion Referenced Tests, \*Curriculum Guides, English Curriculum, \*English Instruction, Junior High Schools, \*Language Arts, Language Skills, Listening Skills, Reading Skills, Test Construction, Vocabulary Development

The Shawnee Mission Unified Studies curriculum is designed as a synthesis of language arts skills with social studies concepts. This document is a language arts curriculum guide for grades 7-9. Five major areas are delineated: composition, study of language, listening and viewing, literature and reading, and speaking. The instructional components of each major area are sequenced according to objectives, and most of them are keyed to present resources in the Shawnee Mission (Kansas) school district. The instructional components include such skills as recognizing and using the four kinds of sentences; evaluating appropriate composition elements; recognizing and using communication words, phrases, and clauses; recognizing figurative language; and recognizing tone. Also included in this document is a goal component assessment system for criterion-referenced tests in the five major areas. (TS)

**Communications in Agriculture: The American Farm Press.**

Pub Date 74

Note—264p.

Available from—Iowa State University Press, South State Ave., Ames, Iowa 50010 (\$6.95 paper)

**Document Not Available from EDRS**

**Descriptors**—Agricultural Education, Agricultural Trends, \*Agriculture, \*Farmers, \*Periodicals, Press Opinion, \*Publications, Publishing Industry, Research, Research Methodology

This book studies communications in agriculture, focusing on the American farm press. As defined here, a commercial farm periodical is directed to farmers and supports itself through the sale of subscriptions or advertising. It includes local as well as regional and national periodicals. A 90-year analysis, from 1880 to 1970, was chosen because 1880 was a pivotal point in American agricultural history. Part 1, "Upward and Westward (1880-1920)," examines the shape of the growth of farm periodicals, external incentives, shifting information channels, and incentives from the farm press. Part 2, "Fighting Stagnancy (1920-1940)," examines elements of the depression, a source of growth for the farm press, and erosion of the editorial base. Part 3, "Peaks and Growing Pressures (1940-1970)," examines readers as assets, readers as liabilities, and the new marketing mix. Part 4, "A 90-Year Perspective," examines various forces in farm publishing

and includes four appendixes which offer notes on the methods of analysis used for this study, figures, tables, and variables used in time-series analyses. (TS)

**Newsmaking.**

Pub Date 28 Oct 75

Note—160p.

Available from—The University of Chicago Press, 5801 Ellis Avenue, Chicago, Illinois 60637 (\$10.00 cloth)

**Document Not Available from EDRS**

**Descriptors**—\*News Media, Newspapers, \*News Reporting, \*Press Opinion, \*Social Factors, \*Social Influences, Social Problems, Social Responsibility

This book attempts to show how the relationship between the American daily press and other social institutions determines the press's definition of news, where it seeks news, and how that news is presented. Chapter 1 discusses news as a force of information, examines news as a sociological problem, and describes the difficulty of defining news. Chapter 2 discusses the evolution of news content in the American daily press and examines the difference between reprinting and reporting and the diverse meanings of "objective" news. Chapter 3 discusses newsmaking as a social process and examines the basis for selecting news beats and news sources and "being a news source vs. becoming a news source." Chapter 4 discusses news content as a social product, examines the effect of social values on news values, and measures the limits of media competence. (TS)

**Grammar and General-Principles-of-Language Instruction for Secondary-School English Teachers.**

Pub Date 75

Note—372p.; Ph.D. Dissertation, University of California

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-25,188, MFilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

**Descriptors**—College Curriculum, Doctoral Theses, Educational Research, English Instruction, \*Grammar, Language Instruction, \*Linguistics, \*Preservice Education, Secondary Education, \*Secondary School Teachers, Student Teachers, \*Teaching Models

This study examines the amount and level of general linguistics and grammar that are required of secondary English teacher candidates; investigates the opinions of secondary English teacher candidates regarding the value of formal grammar instruction; explores the level of pre-existing knowledge among college English majors, junior-level, regarding general principles of language, and investigates the learning of general language theory that can occur with college English majors by exposing them to one of three grammar-model instructional units. College English majors in their junior year at California State Polytechnic University—Pomona were randomly assigned to one of the three instructional units. Findings indicated that no one grammar teaching model proved to be statistically superior to any other, but all three groups of students scored significantly better than did the uninstruced group. It was concluded that the curriculum for the English major should place a much heavier emphasis on general principles of language and grammars of English. (Author/RB)

**Semantic Fission through Dialect Fusion.**

Pub Date 75

Note—14p.; Paper presented at the Annual Meeting of the American Dialect Society (December 27, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—American English, Etymology, Geographic Regions, \*Linguistics, \*Pronunciation, \*Regional Dialects, \*Semantics, Verbal Communication

**Identifiers**—\*Linguistic Atlas of the Upper Midwest, Semantic Fusion

The linguistic atlas projects have provided much information on the regional distribution of pronunciation, vocabulary, and syntax and have

given important evidence for a greater understanding of problems involved in semantic change, particularly in pointing out transition areas where dialects become fused. In a study supplementary to that originally conducted by Harold B. Allen for the atlas of the upper mid-west, Gary Underwood interviewed two generations of three farm families in rural South Dakota to determine if later generations have resolved any of the semantic confusion in that area. Data collected from the study show that when dialects fuse and there are two or more terms for the same referent (as with "comforter" and "quilt"), one term either drops out of use in the area (as with "fried cake" for "doughnut") or semantic fusion takes place with one term becoming a generic term ("quilt") and the other becoming a specific term ("comforter"). (JM)

**A Comparison of the Written Language Performance of Pupils in Four Fifth Grades in Schools Varying in Racial Composition.**

Pub Date 75

Note—101p.; Ph.D. Dissertation, Kent State University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-27,824; Mfilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

**Descriptors**—Composition (Literary), Doctoral Theses, Educational Research, \*Elementary Education, Language Styles, \*Language Usage, Nonstandard Dialects, \*Racial Composition, \*Racial Factors, Sex Differences, Standard Spoken Usage, \*Written Language

The main research hypothesis of this study stated that when the universal characteristics of language evaluation are applied to the written language of the students in four fifth grades of varying racial composition, no significant differences would be reported. Two instruments were used: a composition and a series of six paragraphs modified by a cloze procedure. A multivariate analysis of variance was employed to examine the data across the four schools representing different language environments (96 percent black, 62 percent black, 30 percent black, less than one percent black). The data was contrasted across the two sexes and then across the eight subsamples defined by the cross of sex with school. The population sample consisted of 120 students, 30 randomly selected from each school, with equal numbers of boys and girls. The main effect of the research hypothesis was rejected. Some differences were reported. A secondary hypothesis that the mean scores in all four schools would fall within the normal range of language performance reported by special educators was supported. Differences between the scores of males and females did not reach levels of significance. (Author/LL)

**First Graders' Spelling of Vowels: An Exploratory Study.**

Pub Date 75

Note—207p.; Ed.D. Dissertation, Harvard University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-26,907; Mfilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

**Descriptors**—\*Beginning Reading, Child Language, Doctoral Theses, Educational Research, English Instruction, Grade 1, Phonics, Primary Education, Reading Materials, \*Spelling, \*Spelling Instruction, Teacher Attitudes, \*Vowels, Writing Skills

This study examined first grade children's spelling of vowel sounds in relationship to the spellings these children were taught in their reading series and to the phonological aspects of the sounds. The subjects for the study were 12 first graders, six boys and six girls, in a public school in a Boston suburb. Written work done in school was collected; at least 300 words were written by each child. The spelling of each vowel sound in every word was tabulated, with separate tabulations made for words spelled conventionally (correctly) and for words spelled unconventionally (incorrectly). With few exceptions, the children spelled whole words conventionally only if the words were common words. The children spelled certain vowel sounds as the sounds are spelled in

common words. Even though the children repeatedly practiced filling in missing vowels, they did not carry these spellings over into their own writing. The children also represented phonological features of the sounds in their writing. Encouraging young children's spelling in the classroom is discussed, with reference to the kinds of activities that were used in this study and the teacher's attitude toward spelling. (Author/TS)

**The Role of the English Teacher in Encouraging Recreational Reading.**

Pub Date 75

Note—152p.; Ed.D. Dissertation, State University of New York at Albany

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-27,013; Mfilm \$7.50, Xerography \$15.00)

**Document Not Available from EDRS**

**Descriptors**—Doctoral Theses, Educational Research, English Instruction, Literature Appreciation, \*Reading Materials, \*Recreational Reading, Secondary Education, \*Student Attitudes, Student Characteristics, \*Teacher Role

This study describes the role of the ninth grade English teacher and the use of classroom resources in promoting recreational reading. The range of recreational reading and the reading interests of 2,255 ninth grade pupils in nine high schools near Albany, New York, were identified, and the factors which appear to be associated with pupils' recreational reading were inferred. Thirty-four ninth grade English teachers participated in structured interviews and responded to a questionnaire. A jury of experts on literature for young adults and on methods of teaching English teachers rated the teachers on their encouragement of recreational reading. A major finding of the study was that elements of pupil background (sex and father's education and occupation) appear to exert more influence on pupil interest in reading than does the teacher. When the interest in reading does exist, however, the teacher does promote increased recreational reading. Other findings were that recreational reading ranks last among leisure time pursuits for boys and next to last for girls and that the books which pupils read for class did not make them want to read more of the same kind of book for pleasure. (Author/TS)

**5 Readers Reading.**

Pub Date 75

Note—409p.

Available from—Alpine Press, Inc., Alpine Dr., South Braintree, Massachusetts 02185 (\$15.00 cloth)

**Document Not Available from EDRS**

**Descriptors**—\*Cognitive Processes, Educational Research, Experience, Literary Criticism, \*Personality, Personal Values, Psychological Characteristics, \*Psychological Studies, \*Reading Interests, \*Reading Processes

This book examines how personality, in the sense of character development and identity, affects the way in which we read and interpret information. The first chapter deals with the question of who reads what and how they read it. The second chapter uses "A Rose for Emily" as an example of what people read. The third chapter discusses the conditions under which five particular readers read some short stories. The fourth chapter discusses four principles of literary experience: style seeks itself, defenses must be matched, fantasy projects fantasies, and chapter transforms characteristically. Chapter 6 deals with the evidence gathered in an experiment with five readers. Chapter 7 deals with the terms of subjectivity. Chapter 8 is concerned with the transformation from subjectivity to collectivity. Chapter 9 discusses the cognitive processes. (TS)

**Document Not Available from EDRS**

**Descriptors**—Creative Writing, Drama, Elementary Secondary Education, \*English Curriculum, \*English Instruction, Fiction, \*Instructional Aids, Learning Activities, Listening Skills, Poetry, \*Teaching Methods

This book attempts to present a consensus about the teaching of English in junior high and middle schools (students aged 8-13). The book is concerned with presenting a theoretical framework and an indication of where to begin and how to proceed with the teaching of English. Chapters deal with various aspects of English, including poetry, fiction, creative writing, drama, listening, and talking. Each chapter begins with a discussion of why these various aspects should be taught, how they can be introduced, what the teacher might hope to achieve, and suggestions for the type of work which will meet the different needs of the child at each stage of the middle years. A final chapter, entitled "Organization and Resources," deals with overall problems in coordinating the various activities, integrating English with other aspects of the curriculum, planning the year's work, and using audiovisual materials. The four appendixes list books for the teacher's reference. (TS)

**Identifiers**—\*Feature Writing

This book is designed to teach students and professionals how to write features for newspapers. The author defines the basic elements of feature writing and explains the specialized techniques that have evolved through years of trial and error. Samples of newspaper feature articles are included, and realistic reporting situations are presented to give the writer a feel for gathering material. Some of the points stressed include informational accuracy in presenting the facts, researching and preparing the feature story, writing different types of leads, telling the story with anecdotes and quotations, finding subjects for a feature story, and polishing the story for print. Suggested exercises at the end of each chapter provide practical review materials for sharpening students' news reporting skills. (RB)

**Identifiers**—Game of Dark, Owl Service, Seal Singing

There is a wealth of material in the oral tradition of fantasy which can be used in creating gripping fiction for young readers. One way of employing a tale from the oral tradition to produce a modern fantasy is to superimpose the old story on a new one in such a way that it is tightly interwoven in the action and meaning of the new story. This technique may be seen in three recent novels. "The Owl Service" by Alan Garner, "The Seal-Singing" by Rosemary Harris, and "A Game of Dark" by William Mayne. These books exhibit three different ways of combining the old and the new story so that each novel provides a double perspective and is a fantasy of unusual fascination and depth. (JM)

**Identifiers**—Illinois, \*Speech Communication

The purpose of this study was to determine how well today's students are being trained to deal with the persuasive messages which they receive through the mass media. The study involved two questionnaire surveys: the first a survey of 235 chairpersons of departments of speech and English in institutions of higher education in the state of Illinois—132 responded—and the second a survey of 315 teachers of persuasion in departments of speech and English in Illinois institutions of higher education—102 responded. Although 83 percent of the responding teachers said they attempt to prepare students as both senders and receivers of persuasion, 43 percent of these emphasize the role of sender and only 15 percent emphasize the role of receiver. Teachers mentioned using 68 different texts in their teaching of persuasion, but only one of these was used by as many as 10 respondents. Supplementary materials from the mass media were used frequently by only 25 percent of the English teachers and 33 percent of the speech teachers responding. Conclusions and recommendations for improving the training of students at all educational levels in the reception of public persuasion are provided, as are suggestions regarding the training of teachers of persuasion. **Descriptors**—Academic Freedom, Adolescent Literature, \*Censorship, \*Literature Appreciation, Moral Issues, Moral Values, Secondary Education

The quiet, but determined, censorship crisis in Virginia is a good example of the attitudes that produce censorship protests and of the damage that can be done. Although the criticisms have been sincere, they are based on total misinterpretations of the works involved. As may be seen from the excerpts taken from five books under fire, the objections may be to sexual references, obscene and profane words, the general tone, improper life styles, or religious sensitivities. However, in an atmosphere conducive to censorship, objections might be made to almost anything in a book. It is essential, therefore, that English teachers equip students to understand and to respond to literature and to resist being persuaded by the rhetorical skills of any writer. (JM)

This paper describes an approach to teaching writing through design. Students were asked to design the following items: a dance, an outfit, a toy, a game, and a recipe. As these designs were completed, they were then presented to an audience and time was provided for the students to write about their experience of the process of producing. A number of calligraphic projects are described, including cutting out the letters of a favorite word and arranging them on a construction paper background, shaping a name with colored yarns on cardboard, and formulating the letters of a name and designing a graph over it in order to create shapes. It was concluded that most students enjoyed this approach, and that the students became involved in the process of creating. (TS)

**Descriptors**—\*Fiction, Learning Processes, \*Literary Analysis, Literary Conventions, \*Literature, Secondary Education, Teaching Methods

This paper describes an approach to teaching students to become more sensitive to voice, audience, and meaning in fiction. Examined are several passages of monologue, including a passage spoken by a character named Mr. Tyler in the opening of E.M. Forster's "The Story of a Panic." The rhetorical triangle made up of speaker, audience, and subject is discussed, and it is recommended that students become close observers of these factors in fiction. (TS)

**What Our English Majors Lack Most: or, The Old "New Criticism" Reapplied.**

Pub Date 75  
 Note—8p.; Study prepared at the University of Maine, Farmington; Poem by James Tate omitted due to copyright restrictions

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*English Instruction, Higher Education, Literary Analysis, Literary Criticism, \*Literature Appreciation, \*Teacher Education, \*Teaching Methods

This paper argues that the prevailing tendency in the teaching of literature today is to rely too heavily on secondary material. An approach to training English majors to explicate and evaluate literature on their own is described. Students should understand that literature is not often au-

tobiographical, that the writer's original intent is not fundamental to the understanding of a work, and that writers are most often intelligent. Exercises that focus discussion on explication and evaluation should be offered to give students the challenge of spontaneous thinking and solving a given problem as a group. James Tate's poem "Dark Street" is used to illustrate the value to the approach described. (TS)

Gladstein, Mimi Reisel

Some Fictional Stereotypes of Women in 20th Century American Fiction.

Pub Date 75

Note—8p.; Study prepared at the University of Texas at Austin

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*American Literature, \*Characterization (Literature), \*Females, Fiction, Literary Criticism, \*Novels, Sex Role, \*Sex Stereotypes, Twentieth Century Literature Identifiers—Faulkner (William), Hemingway (Ernest), Steinbeck (John)

The three last American writers to win the Nobel Prize represent American male novelists who have been unable either to come to terms with the "Otherness" of the female or to draw convincing portraits of women. As a result, women in their works are presented as female stereotypes of one kind or another. Hemingway shows a split attitude toward women, depicting realistically only those women who are either destructively or docile. Faulkner presents women in a vicious manner, revealing a definite misogyny, and Steinbeck portrays very few women, giving those few subordinate roles while the plot usually centers on the relationships of men. Unfortunately, the influence of these novelists on other American writers has been strong. (JM)

Creative Editing: An Approach to Peer Criticism.

Pub Date 75

Note—18p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (65th, San Diego, California, November 26-29, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Composition (Literary), \*Composition Skills (Literary), \*Editing, \*Peer Teaching, Rhetorical Criticism, Secondary Education, \*Student Writing Models, \*Teaching Techniques

Identifiers—\*Peer Editing

The purpose of a five-week pilot project in composition at a Manhattan inner city high school were to test a methodology for teaching the nonnarrative essay and to determine if students could provide informed editorial guidance to other students in regular peer criticism sessions. The assumptions underlying the approach are that the central instructional task is the idea toward which the writer must adopt an interpretive posture, that the idea sentence (an analogic assertion) then becomes the thesis statement, that writing competence can be increased through

acquisition of editorial skills, and that rhetorical instruction is best provided in an editorial context. Students first learned to identify analogic assertions and to recognize unity, coherence, and emphasis (without using these terms). The method was comparative and inductive. The students then progressed through a series of editorial activities, helping one another through their editorial efforts and increasing their own writing (and reading) skills. Results of this project show that if written discourse is considered as thought that is shaped and designed, directed and controlled, there is no child who lacks the conceptual resources to engage in the task. (Examples of student essays are included.) (JM)

Descriptors—Child Language, \*Creative Activities, \*Creative Writing, Educational Games, \*Educational Resources, Elementary Education, Grammar, \*Language Arts, \*Learning Activities, Poetry, Sentences, Teaching Guides, Writing Skills

The two volumes of this sourcebook are designed for elementary teachers to help encourage children's creativity. The volumes offer activities and suggestions for language arts teachers who are interested in a variety of approaches to helping children appreciate poetry; do elaborate thinking; understand generic and specific words; understand sentence patterns, sentence expansion, and sentence order; and ultimately transfer these disciplines to their own creative writing. The volumes are divided into sections which deal with grades 1-6. The activities include writing to music, descriptive writing, writing about pets, choral reading, listing similes, reading poetry, illustrating poems, and rearranging sentences. (TS)

Document Not Available from EDRS

Descriptors—\*Class Activities, Creative Writing, Drama, Early Childhood Education, Language Development, \*Language Skills, Listening, Literature Appreciation, Music Activities, \*Self Concept, Speaking, \*Teaching Techniques, Verbal Ability

The program outlined in this document has been based on the premises that the communication skills form the basis for achievement in other areas and are interwoven with personal development and self-concept, and that working on language development involves increasing children's abilities to use sounds, the structure of the language, grammatical markers in the language, and the words, meanings, and concepts of the language. The contents are divided into three parts; using language to build self-concept; setting the stage for language experiences (speaking, cognitive thinking, drama, listening as a language skill, creative writing, literature, and musical improvisation); and a checklist for evaluation of speech, language, and cognitive thinking. For each of the sections in the first and second parts, teaching techniques and classroom activities are suggested. A selected bibliography lists items according to five categories: books for the teacher, books to use with children, books for children, music books, and phonograph records. (JM)

Children Learn to Communicate: Language Arts through Creative Problem-Solving.

Pub Date 76

Note—457p.

Available from—Prentice-Hall, Inc., Englewood Cliffs, New Jersey 07632 (\$10.95 cloth)

Document Not Available from EDRS

Descriptors—\*Communication (Thought Transfer), \*Communication Skills, Composition Skills (Literary), Concept Formation, Conflict

Resolution, \*Creative Thinking, Elementary Education, \*Language Arts, Listening, Oral Expression, \*Problem Solving, \*Teaching Techniques, Thought Processes, Verbal Ability

The methods for teaching language arts presented in this book are based on the premises that creative problem solving is the key motivation to the mastery of language and that when teachers and children work at mastering communication skills through solving problems creatively, they use basic mental skills—attentiveness, fact recall—or skills of associative, inferential, creative, and critical thinking. The first part emphasizes developmental bases of language, thought, and listening; the second part centers on oral language and the use of language, including literature for children; and the third part deals with children's imaginative composition and modern perspectives on the subskills of writing (punctuation, spelling, handwriting, grammar, and usage). The last chapter focuses on assessment and accountability. (JM)

A Study of the Theme of War in Selected Literature for Junior High Readers (1940-1975).

Pub Date 75

Note—176p.; Ph.D. Dissertation, The Ohio State University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-26610; MFilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Adolescent Literature, \*Conflict, Content Analysis, Doctoral Theses, Educational Research, Junior High Schools, \*Student Attitudes, \*Thematic Approach, \*War

The primary purpose of this study was to examine juvenile books on the theme of war. An attempt was made to analyze the characteristics of earlier works on World War II, and to compare and contrast recent publications treating current conflicts. While emphasis was on fictional material, many true-life accounts were also included. Chapter 1 described the junior novel as an effective vehicle for conveying human relations concepts to adolescents. Chapter 2 surveyed the results of more than 30 years of research on students' attitudes toward war and peace and their knowledge in these areas. Chapter 3 examined the attitudes that earlier writers took toward war and discussed significant changes that have occurred in recent adult war fiction. The fourth and fifth chapters analyzed in detail a selected group of recent junior novels and personal accounts of World War II and recent armed conflicts. It was recommended that schools emphasize study at the junior high level of the causes and effects of war and alternative solutions to intergroup conflicts. (TS)

Descriptors—Commercial Art, Higher Education, \*Journalism, Layout (Publications), Merchandising, \*Publicize, \*School Newspapers, \*School Publications, Secondary Education, Student Publications, \*Yearbooks

The primary purpose of this booklet is to offer suggestions which will help alleviate some of the burdens involved in producing a school's publications, so that journalistic endeavors will not be damaged by economic difficulties. The first section discusses newspaper advertising and examines such topics as selling advertisements, sales approaches, establishing advertising rates, advertising contracts, billings, designing advertising, graphics, displaying advertising, and printing methods. The second section discusses yearbook advertising and examines such topics as planning the yearbook advertising campaign, staff incentives, establishing advertising rates, billing, record-keeping, a demographic survey of student spending patterns, designing the advertisements, graphics, displaying advertising, and getting the most for your money. Both sections contain a portfolio of exemplary advertisements. (TS)

**Descriptors**—\*Child Language, Elementary Education, \*Environmental Influences, Family Influence, Language Research, \*Language Styles, \*Language Usage, \*Language Variation, Oral Communication, Parent Influence

The purpose of the study reported in this document was to examine the oral language and some of the influences on oral language of students from five to nine years old. Six students in each of 13 classes were selected randomly and were taped in three different situations: a monologue by the student when alone in the room, a dialogue with another student selected by the first student, and a dialogue with the class teacher and two students of the original six. Approach to the data obtained was nonquantitative. Instead, a limited number of tape units were analyzed in depth to uncover the factors affecting language use. In addition, background information on individual students and a comparison of students' performances were analyzed. As a result, it can be suggested that students with a particular background may be subject to a particular language difficulty. This document reports and discusses the variety of findings and contains samples of materials used in the study. (JM)

**Descriptors**—Engineering, \*Engineering Education, \*Engineers, Expository Writing, Higher Education, Job Skills, \*Opinions, Surveys, \*Technical Writing, Writing Skills

The survey reported in this document was undertaken to determine the experience and opinions concerning written technical communications of prominent and successful engineers in a wide variety of engineering fields. A questionnaire sent to 245 engineers asked 11 specific questions, 8 of which dealt with the respondents' own experiences and the writing necessary in their positions (the amount done, its importance, and its effect on their own and others' advancement) and 3 of which dealt with the respondents' opinions about courses in technical writing in scientific and engineering curricula. Replies were received from 73.6 percent of those surveyed and indicated that respondents spend 24 percent of their time writing, the writing is very important to their positions, and the ability to write effectively has helped them in their own advancement. In addition, 80.5 percent feel that technical writing (clear, direct, and logically developed) should be required of all engineering students, while 16 percent feel it should be an elective course. **The Great American Blow-Up: Puffery in Advertising and Selling.**

Pub Date May 75

Note—345p.

Available from—The University of Wisconsin Press, Box 1379, Madison, Wisconsin 53701 (\$11.95 cloth)

**Document Not Available from EDRS**

**Descriptors**—Communications, \*Consumer Education, Consumer Protection, \*Federal Legislation, Laws, \*Mass Media, \*Merchandise Information, Propaganda, \*Publicize, Public Relations, Television Commercials

**Identifiers**—Public Doublespeak, \*Puffery

Puffery refers to advertising statements which are not illegal, though they cannot be proven to be true. By legal definition, puffery is advertising or other sales representations which praise the item to be sold with subjective opinions, superlatives, or exaggerations, vaguely and generally, stating no specific facts. This book examines the history of puffery in advertising and selling, its present uses and effects on the consumer, its legal ramifications and governmental controls, and some recommendations for the eradication of false puffery. Such topics are discussed as falsity without deception, the roots of sellism, misrepresentation, avoiding the facts, the Federal Trade Commission, and puffery. Numerous examples of puffery are given and discussed. (TS)

This book is intended for teachers, prospective teachers, language arts supervisors, designers of curriculum, and others interested in the teaching of English in the elementary school. Subjects covered include reasons why literature should be part of a child's education, what it means to "teach" and "study" literature, the foundation necessary for the development of learning sequences that can lead to significant literary understandings, the translation of educational and literary theory into practice, and procedures useful in helping children compose stories and poems on their own. Numerous examples of teaching strategies are offered. These include specifics related to planning lessons designed to foster literary understandings; details as to procedures, such as discussion techniques; and suggestions for suitable content to use in learning sequences. An annotated list of selected professional references and a bibliography of all poems and stories cited in the text concludes the book. (TS)

**Identifiers**—Free Press Fair Trial, \*Pretrial Publicity

Findings from the behavioral sciences suggest that prejudicial publicity can in some cases influence the outcome of a trial. Studies directed at the jury trial situation yield ambiguous results but provide some evidence that potential jurors can be prejudiced by pretrial publicity. However, the question "Does pretrial publicity bias the verdict?" has only begun to be addressed. In the jury situation, in order to influence the verdict, prejudicial information must survive a series of steps in the trial process: from the initial call as a juror, when the individual's role changes from that of private citizen to that of impartial observer, through deliberation and decision. Each step in the proceeding should make bias less likely to survive. The likelihood that prejudicial information will survive the trial and deliberation process is unknown, although evidence now exists to indicate that it can survive both. (RB)

**Identifiers**—\*First Amendment

As journalism teacher-advisors become better trained and better organized professionally, they are more often following the lead of student journalists of the 1960s and clarifying their rights in court. Only two cases relevant to the advisor's First Amendment rights have been decided. Although both decisions were adverse to the advisors concerned, considerations other than First Amendment rights were of primary importance to the courts in each decision. Several out-of-court settlements have supported a trend toward granting advisors the same constitutional rights given students, and two pending cases should serve to further clarify the issue. However, taking a case

to court may not always be the wisest resolution. Litigation is costly and time-consuming, and a compromise may be much more effective if reached out of court instead. The key element in any compromise is that the groups concerned should be well informed about what the high school press may and may not do, how those rights are supported by the First Amendment, and why such an amendment must be exercised in a free, democratic society—even on the high school level. (RB)

Descriptors—\*Censorship, Financial Needs, \*Freedom of Speech, \*Journalism, National Surveys, School Publications, School Surveys, Secondary Education, \*Student Publications, Teacher Education

Identifiers—\*Captive Voices

This paper investigates the problems faced by the scholastic press, specifically, two of the charges leveled by the Commission of Inquiry into High School Journalism: those of censorship and the low priorities of journalism in the high school, as manifested by inadequate funding and training for advisers, teachers and students. Questionnaires were sent to 175 schools, selected through stratified sampling, with 94 responding. From the information gathered in this survey, it was concluded that the report contained in "Captive Voices" is guilty of sweeping generalizations and over-simplification. Further, there appears to be general agreement on the charge that censorship is widespread, but there is little agreement on other charges lodged in the report. Generally, respondents indicated that journalism in the schools has an equal priority with all areas in the school except sports. A majority of the advisors responding said they were not assigned to the press against their will, although they indicated that they were not well compensated for their time and added responsibilities. **MADD About Good Books.**

Pub Date 75

Note—9p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (65th, San Diego, California, November 26-29, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Art, \*Childrens Books, Childrens Literature, \*Creative Activities, Dance, Drama, Elementary Education, \*Enrichment Programs, \*Literature Appreciation, Music, Summer Programs

Identifiers—\*Arts Impact Program, Ohio (Columbus)

The MADD (music, art, dance, and drama) About Good Books program is a summer Arts Impact program for students in grades 3-6 offered by the Columbus, Ohio Public Schools. Conducted by two literature teachers, the 1975 summer program got under way as the children set the stage by constructing a large tree, for reading and chatting under, and erecting a white picket fence, for advertising favorite books with graffiti. Books were then introduced, discussed, and read. An arts focus helped the entire group to share books through slide making, dance interpretations, character portrayals, and musical representations of characters and themes. The process can easily be adapted to a single teacher classroom. (A list of popular book titles is included.) (JM)

**Spelling: A Psycholinguistic Rationale for Teaching.**

Pub Date 75

Note—11p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (65th, San Diego, California, November 26-29, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Deep Structure, Elementary Education, \*Learning Processes, \*Psycholinguistics, \*Psychomotor Skills, \*Spelling, \*Spelling Instruction, Structural Linguistics, Surface Structure, Syntax, Teaching Methods

Two crucial factors in teaching spelling are the teacher's understanding of the material to be learned and the teacher's understanding of the nature of the learner. Psycholinguistics is relevant to both the material and the learner. In teaching spelling, it is possible to draw insights from behavioral and cognitive psychology as well as from Noam Chomsky's theory that language has both deep and surface structure. The English spelling system which reflects the underlying abstract meaning of words is discussed in its relationship to students' syntactic maturity. Teachers must select words and ideas within the possible range of students' understanding. It is concluded that English spelling patterns are definitely related to sound sequences. (TS)

Note—12p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Autoinstructional Programs, \*Composition (Literary), \*Evaluation, Independent Study, Individual Instruction, \*Measurement Techniques, Narration, Secondary Education, Teaching Techniques, \*Writing

The purpose of this article is to suggest the value of a research tool which has rarely been used in studies in instruction in writing: baseline measurement of group and individual performances. This approach was used in examining the results of a study of a self-instructional program in narrative writing which was prepared for and tested by secondary school students. During instruction, a process approach to writing, students were taught to use a set of questions to systematically and sequentially select a subject for a narrative, to develop a rough draft, and to make additions to expand the narrative. The goal of instruction was that students would achieve and/or maintain control of the structure of the narrative while learning to expand their narrative for the sake of completeness, development, and interest. An instrument was designed to measure three qualities indicative of control of structure and three characteristics of expansion. Of the 27 students who completed the program, the majority showed positive pretest-posttest changes in the variables related to expansion and demonstrated control of structure on both pretests and posttests. The baseline measures were found to be very useful. (JM)

**Editing the Small Magazine. 2nd Edition Revised.**

Pub Date 19 Jan 76

Note—218p.

Available from—Columbia University Press, 562 West 113th St., New York, New York 10025 (\$10.00 cloth, \$3.95 paper)

Document Not Available from EDRS

Descriptors—Content Analysis, \*Editing, Higher Education, Journalism, Layout (Publications), \*Periodicals, \*Publicize, \*Publishing Industry, \*Reading Interests, Writing

Designed for the aspiring journalist and the professional editor, this revised second edition serves as a standard reference work as well as an ideal means of keeping abreast of new trends and developments in the editing of small magazines. It describes the latest technological developments in type-setting and production; discusses and evaluates new trends in the style, design, and format of the small magazine; and contains suggestions on how to use photographs, artwork, and color both effectively and inexpensively. A new chapter added to this second edition reviews the current state of the magazine world in general, highlighting the key topics of reader interest and commercial viability. (RB)

**Development of Linguistic Comprehension and Production in Lower-Class Black Children.**

Pub Date 75

Note—19p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, Illinois, August 30-September 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Elementary Education, \*Language Development, \*Language Research, Linguistic Competence, Lower Class Students, \*Negro Dialects, \*Nonstandard Dialects, \*Oral English, Social Factors

This study attempted to assess the linguistic competence of black lower-class speakers within each of two language systems: standard English and Black English. The subjects were 72 black kindergarten, third-, and sixth-graders in a predominantly black community in Toledo, Ohio. All children attending the school were considered lower-class, since 90 percent of the children's families were on ADC and 100 percent of the children were eligible for the federal school lunch program. A variation of the Fraser, Bellugi, and Brown test of imitation, production, and comprehension of grammatical contrasts was used. The following categories were used to generate four practice items: affirmative/negative, change in noun, and prepositions. Eight categories were used to generate 24 sentence pairs for the test itself. Sentence pairs were in both Black and standard English. A speech production task was also used. The results showed that production of Black English decreased significantly with age. This finding suggests that, at least in a school setting, older black children have the ability to respond orally to a language task in standard English if they perceive the situation to be one in which they should do so. **The Adolescent in Literature.**

Pub Date 75

Note—19p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (65th, San Diego, November, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Adolescence, \*Adolescent Literature, Course Content, \*Course Descriptions, Course Objectives, \*English Instruction, Literary Genres, Secondary Education, \*Thematic Approach

This paper describes a one-semester high school course which introduces students to well-written contemporary novels in which the main character is an adolescent. Eight novels are read, and five of these are the core of the course: "The Catcher in the Rye," "A Separate Peace," "The Temple of Gold," "The Man Without a Face," and "Night." The students discuss these books in terms of various literary concepts such as plot, conflict, setting, tone, style, symbolism, characterization, point of view, and theme. A number of writing assignments are eventually based on these terms. Students also read and report on a novel of their choice. Other aspects of the course, such as writing assignments, class discussions, creative projects, short and feature-length films, and student-written evaluations of the course are discussed. (TS)

**Communications and Public Opinion: A Public Opinion Quarterly Reader.**

Pub Date 75

Note—629p.

Available from—Praeger Publishers, Incorporated, 111 Fourth Avenue, New York, New York 10003 (\$7.95 paper)

Document Not Available from EDRS

Descriptors—\*Behavior Patterns, Communication (Thought Transfer), \*Communications, Higher Education, Journalism, \*Mass Media, \*Measurement Instruments, Media Research, Political Issues, \*Public Opinion, Research Methodology, Social Change

The phenomenon of the close relationship between communication and public opinion is shown in this book to have played a major role historically in the measurement of support for political policies, officials, and candidates. The communications media influence public opinion and are subject to it; yet the precise nature and definition of public opinion, the methods by which it can be identified, the extent of its influence on behavior all have produced widely diverse viewpoints. Comprised of selected articles from the "Public Opinion Quarterly," the book includes work from more than 40 leading scholars in the field of communications research. (RB)

Translating Poetry: Seven Strategies and a Blueprint.

Pub Date 75

Note—122p.

Available from—Humanities Press, Incorporated, Atlantic Highlands, New Jersey 07716 (\$12.00 paper)

Document Not Available from EDRS

Descriptors—\*Comparative Analysis, Creative Writing, Evaluation Methods, Greek Literature, Higher Education, Literary Analysis, \*Literature, \*Poetry, \*Translation

Identifiers—Catullus, \*Comparative Literature

This book investigates the problems and possibilities in the translation of literature, especially poetry. The investigation is based on a comparison between Catullus' sixty-fourth poem and English translations of it published between 1870 and 1970. Several strategies for translating are analyzed, and their comparative merits and faults are discussed. The book also tries to describe the position translation and translation studies should occupy in the wider context of the study of comparative literature. Some of the topics discussed are metrical translation, translating poetry into prose, rhyme, blank verse, imitation, tradition, society's attitudes, assumptions about literature, and translation and the study of literature. The book is in part intended to provide guidelines for translating poetry and literature in general. (TS)

Literary Research Guide.

Pub Date 76

Note—361p.

Available from—Gale Research Company, Book Tower, Detroit, Michigan 48226 (\$18.50 cloth)

Document Not Available from EDRS

Descriptors—American Literature, \*Annotated Bibliographies, Educational Research, English Literature, Higher Education, Indexes (Locators), Literary Analysis, \*Literature, \*Literature Guides, \*Research Reviews (Publications), \*Resource Guides, World Literature

Primarily an evaluative, annotated bibliography of reference books and periodicals on American and English literature, this research guide also lists useful sources for research in other national literatures, and more than 300 reference books in literature-related subject areas. The introduction includes a key to abbreviations and instructions for use of the guide, as well as a short-title table of contents. The twenty-one sections include general guides to reference books and research procedures, bibliographies of bibliographies, annual bibliographies, monthly bibliographies, abstracting services, indexing services, English literature, Irish literature, Welch literature, Scottish literature, American literature, comparative literature, and world literature. Also included are a reference section which lists resources related to abbreviations and acronyms, anonymous literature and pseudonyms, autobiographies, awards, books in print, computer research, and library collections; a description of the Dewey Decimal Classification System; and a glossary of bibliographical terms. Explorations in the Teaching of Secondary English: A Source Book for Experimental Teaching.

Pub Date Apr 75

Note—265p.

Available from—Harper and Row Publishers, 10 East 53rd Street, New York, New York 10022 (\$7.95 paper)

Document Not Available from EDRS

Descriptors—\*Composition (Literary), Creative Dramatics, Creative Teaching, Educational Problems, \*English Instruction, Experimental Teaching, \*Learning Activities, \*Literature Programs, Mass Media, Oral English, Secondary Education, \*Teaching Methods

This book contains ideas and numerous practical examples for instructors interested in designing their own method for teaching secondary English. Each chapter focuses on a single issue or problem, practical or theoretical, which English teachers face in today's schools. An introductory essay on each topic surveys the dimensions of the problem and suggests some ways in which it can be approached. At the close of each chapter are activities to think about, talk over, and do. Discussed are such topics as language, experience, and the teaching of English; a history of the teaching of English; standards and structure; the process of composing; writing; personal engagement with literature; literature programs; the classroom environment; classroom drama; mass media and English; alternatives to the study of grammar; and evaluation and grading. Publication Management: Journalism Education's Stepchild?

Pub Date 75

Note—12p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (Ottawa, Canada, August, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Administrator Education, College Curriculum, \*Course Content, Higher Education, \*Journalism, \*Management Education, National Surveys, \*Newspapers, \*Publications

Identifiers—\*Journalism Education

This study was undertaken to get an overview of the status of publication management courses and programs in journalism education. A one-page questionnaire containing eight questions was mailed to the deans, directors, and department heads and chairpersons of all U.S. journalism departments and schools listed in the January 1974 issue of "Journalism Educator." The survey results showed that management-type courses are taught at slightly less than half the journalism schools and departments, and about seven percent of those schools have a structured major or sequence for those who anticipate a career in print media management; most journalism educators personally feel there is a need for these kinds of courses in the journalism curriculum; and journalism schools and department are hard pressed these days to keep up with demands to offer sufficient sections of basic offerings. Deception Detection: An Educator's Guide to the Art of Insight.

Pub Date 75

Note—154p.

Available from—Beacon Press, 25 Beacon Street, Boston, Massachusetts 02108 (\$8.95 cloth)

Document Not Available from EDRS

Descriptors—Body Language, Consumer Education, Creative Writing, Higher Education, Logic, Mass Media, \*Nonverbal Communication, Perception, \*Persuasive Discourse, \*Propaganda, \*Publicize, Secondary Education, \*Visual Literacy

This book argues that developing insight into the ordinary is a major part of education. Each of the five chapters contains ideas and activities designed to help students and teachers sharpen their perception of their day-to-day physical and social environment. "Survival Skills in a Consumer Society" examines the way people are persuaded to consume. The emphasis is on analyzing the language of advertising and on corporate control of the marketplace. "Nonverbal Communication" examines the uses of body language and

gestures (kinesics), the arrangement and use of space (proxemics), and the message of the immediate physical environment. "A Primer in Mind Management" focuses on media deception and the messages presented by entertainment programming, news as propaganda, and pseudo-events. "Creativity Training" discusses the educational obsession with logic and explores non-logical ways to approach problems, with an emphasis on creative writing. "Visual Awareness" explores the assumption that seeing is a natural habit learned early in life that needs no conscious development. (TS)

A Handbook for Using the Newspaper in the Classroom.

Rocky Mountain News, Denver, Colo.

Pub Date 75

Note—91p.; Some pages may not reproduce due to small type

Available from—Rocky Mountain News, P.O. Box 719, Denver, Colorado 80201 (\$2.50 paper)

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Elementary Secondary Education, \*Instructional Materials, \*Instructional Media, \*Journalism, Language Arts, \*Learning Activities, News Media, \*Newspapers, Publicize, Social Sciences

This book is a guide to using the newspaper as an instructional tool in the classroom. The objectives are to help students become informed about and interested in what is happening in the world; to learn to read the newspaper intelligently; to help students realize the impact of newspapers on the public; to develop within the students a lasting interest in the reading of newspapers; and to increase and strengthen the skills acquired in other subject areas, especially those in the language arts and social studies. The handbook includes information about how the newspaper is constructed, the function of different newspaper sections, newspaper terminology, propaganda and the newspaper, news reports, editorials, sports, comics, freedom of the press, and the history of the "Rocky Mountain News." Also included are various activities for social studies, language arts, non-readers and beginning readers, science, math, foreign language, and art. (TS)

"TOPOI" and the Generation of Discourse: A Critical Analysis.

Pub Date Dec 75

Note—17p.; Paper presented at the Annual Meeting of the Speech Communication Assn. (61st, Houston, Texas, December 27-30, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Analytical Criticism, \*Communication (Thought Transfer), \*Discourse Analysis, Educational Research, Information Theory, Literature Reviews, \*Rhetoric, Rhetorical Criticism, \*Speech, Theories

Identifiers—Speech Communication, \*Topoi

Literally defined, topoi are places in the mind where items of information (ideas, arguments, etc.) may be stored. The purpose of this paper is to conduct a critical analysis of a number of studies which have appeared in communication literature on the concept of topoi and to discuss the function of topoi in communication. Utilizing the Aristotelian concept of topoi, a number of writers, including Bacon, Wilson, and Arnold, have developed topical systems of their own. All systems are based on the fundamental principle that topoi can provide one with a procedure for searching one's memory in order to discover material appropriate to any particular subject. The studies discussed in this paper affirm that topoi do seem to facilitate the generation of discourse for a variety of communicative contexts and a number of communicative tasks. It is concluded that topoi provide an area for additional investigation, one with great practical and theoretical implications. What is needed is to build on the possibility that topoi can improve the generation of discourse by looking more closely at what topoi do, how well, and in which forms in various communicative contexts. **Descriptors**—\*Cultural Factors, \*Females, Literary Analysis, Reference Books, \*Sex Differences, \*Sex Role, Sex Stereotypes, \*Speech Habits, Speech Instruction

**Identifiers**—\*Etiquette Books

This paper examines etiquette books as repositories of cultural beliefs about the differing ways men and women should talk and the beliefs about the differing ways men and women actually talk. Etiquette books published in the past 150 years are examined to measure consistency or change in these beliefs, and the implications of the study for actual conversations between men and women are briefly discussed. Some of the conclusions reached by this study are that according to etiquette books women should not gossip but men can; men should not discuss politics in the company of women; women are advised to talk little but smile a lot; men are sometimes advised not to yell, but women at all times should be serene; while men are advised not to use too much slang, women should never use slang; and swearing or profanity should not be practiced by either sex but especially not by women or by men in the company of women. It is concluded that etiquette rules have changed little over the years and that these rules do have an impact on our speech behavior. (TS)

**Rhetorical Sensitivity and Communicative Competence.**

Pub Date Dec 75

Note—43p.; Paper presented at the Annual Meeting of the Speech Communication Assn. (61st, Houston, Texas, December 27-30, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Audiences, Behavior Patterns, \*Communication (Thought Transfer), Educational Research, Higher Education, Human Relations, \*Interpersonal Competence, \*Interpersonal Relationship, Literature Reviews, \*Models, \*Social Relations

**Identifiers**—\*Rhetorical Sensitivity

In this essay, the authors explore rhetorical sensitivity and the behaviors that characterize the rhetorically sensitive person as defined by Hart and Burks in a paper entitled "Rhetorical Sensitivity and Social Interaction." Rhetorical sensitivity is viewed as an attitude toward encoding information obtained in social situations. After briefly summarizing the principles of rhetorical sensitivity, the authors detail the means employed to assess the features possessed by rhetorically sensitive individuals, the theoretical worth of the construct, and the directions for future research in the area. Recent research on rhetorical sensitivity is reviewed and some of the data is included in this paper. At the present time, the principles of rhetorical sensitivity are not viewed as behavioral guidelines useful for measuring interpersonal competence. (RB)

**Descriptors**—Aesthetic Education, \*Cognitive Processes, \*Color Presentation, Communication (Thought Transfer), Educational Research, Eye Movements, Measurement Instruments, \*Pictorial Stimuli, Semantic Differential, \*Slides, \*Visual Perception

**Identifiers**—\*Frame Theory

The purpose of this study was to determine if the reversal (i.e., mirror image) of a two-dimensional visual image would affect viewers' perceptions of selected aesthetic dimensions, using semantic differential scales as criterion measures of visual meaning. One hundred-twenty-five students who were enrolled in a basic introduction to mass communication class at the University of Utah were randomly assigned to two experimental treatments. While caution must be taken in generalizing the results of this preliminary study to other visuals and other populations, there appears to be little doubt as to the potential value of semantic differential scales for future visual communication research. This study suggests that a more ambiguous visual presentation may facilitate the measurement of responses to aesthetic elements. It may be necessary to eliminate color, at least initially, since there is little known about the possible interaction of various colors with other visual dimensions. (RB)

**Observations on the Theory of "Movement."**

Pub Date 75

Note—27p.; Paper presented at the Annual Meeting of the Speech Communication Association (61st, Houston, December 27-30, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Analytical Criticism, Cultural Background, Higher Education, Historical Reviews, Persuasive Discourse, \*Rhetoric, \*Rhetorical Criticism, \*Sociocultural Patterns, \*Theories

**Identifiers**—\*Movement Theory

The purpose of this essay is to examine philosophy, history, sociology, and rhetoric with an eye toward demonstrating that the rhetorician is at least as well equipped to deal with the concept "movement" as other writers with different training. Rhetoricians have been preoccupied with moving men and not societies. A "macrorhetoric," in other words, seems possible by abstracting to a social or cultural level the traditional principles and operations of audience-oriented "microrhetoric." There is no difficulty in deciding what moves in society and history—arguments move. Rhetoricians also are symbolists and thus can beg the ethical problem of determining what progress really is or ought to be. Speculations about movement can be documented, giving rhetoricians a clear indication of which documents produced by which advocates seem to be most important in terms of producing or accommodating social and historical movement. Rhetoricians should not be bothered by problems of meaning; the rhetorician studies events in the past only as they have already been mediated by advocates—politicians, statesmen, and other historical figures—who had the power to legislate a movement in society with the arguments they made. **Broadcasting Student Internships: Put Them in Writing.**

Pub Date 75

Note—10p.; Paper presented at the Annual Meeting of the Western Speech Association (Seattle, November, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Broadcast Television, \*Contracts, Educational Programs, Higher Education, \*Internship Programs, Learning Experience, \*Radio, \*Television

A written broadcasting internship contract has proved to serve the best interests of the intern, the school, and the radio or television station. Among other things, such a contract can specify the commitments of the intern and the advisors, the hours and times of station work, the academic credit to be earned, and the learning experiences to be encountered. The binding nature of the written contract compels the fulfillment of the obligations of all parties and the quality of learning is superior to that in a no contract situation. (An appendix contains a modified sample of an internship contract with a radio station.) (JM)

**Debate as a Paradigm for Demonstrating Skills in Argumentation and Logic.**

Pub Date 74

Note—16p.; Paper presented at the Annual Meeting of the Speech Communication Association (60th, Chicago, December 26-29, 1974)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Debate, Evaluation Methods, Higher Education, \*Logic, Models, \*Persuasive Discourse, Secondary Education, \*Speech

This paper argues that the judge who uses argumentation and logic as the sole criteria for determining the winner of an academic debate sees debate as an intellectual contest with speech being only an incidental element. A paradigm for judging is presented and discussed in terms of the following core concepts: analysis, investigation, evidence, reasoning, refutation, and rebuttal. Analysis is the arriving at an understanding of the proposition and the discovering of the inherent issues. Investigation is the process of accumulating information about a proposition. Evidence is an informative statement believed by the listener and employed by an arguer to secure belief in another statement. Reasoning is the process by which we infer a conclusion from premises. Refutation is the attempted destruction of the opponent's argument. Rebuttal is the attempted rebuilding of an argument once it has been attacked. It is concluded that this paradigm is an excellent one for judging an academic debate. (TS)

**Descriptors**—\*Communication Skills, \*Debate, Evaluation Methods, Higher Education, Models, \*Persuasive Discourse, Secondary Education, \*Speech

This paper presents a paradigm based upon four premises: persuasion is any means employed to make someone respond in a predetermined manner; persuasion is at its best in formal debate; debate should encourage judges to place confidence in debaters' credibility; and debating is an art in which the participants must be fully aware of their role as individuals communicating with other individuals. A figure of the paradigm is presented and contains the following elements: audience or judge, communication skills, persuasion skills, formal debate, and persuasion syndrome. The paradigm illustrates that debate is primarily a persuasive process within a larger persuasive syndrome; it is an arena for the exhibition, utilization, and application of interpersonal communication skills. The standards which a judge should adhere to when judging a debate utilizing this paradigm are discussed. (TS)

**The Community College and Career Communication: An Unlimited Opportunity.**

Pub Date 75

Note—11p.; Paper presented at the Annual Meeting of the Speech Communication Association (61st, Houston, December 27-30, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Career Awareness, \*Career Education, \*Communication (Thought Transfer), \*Community Colleges, Educational Problems, Junior Colleges, Speech Curriculum, \*Speech Education, Speech Instruction

This paper argues that career education should blend "vocational education," "general education," and "college preparatory education" into a new curricular design. Career education should not be thought of as "vocational technical education," nor should career education be looked upon unfavorably, as it sometimes is. Some of the problems of speech communication and career education are discussed. Robert Pirsig's novel "Zen and the Art of Motorcycle Maintenance" is examined in terms of career education and speech communication, and it is concluded that students and teachers must start taking advantage of the unlimited opportunity career education offers. **Descriptors**—\*Audiences, \*Content Analysis, Higher Education, \*Information Dissemination, \*Mass Media, Media Research, Newspapers, Radio, Television Viewing

**Identifiers**—\*Alienation

Several studies in media viewing have examined the hypothesis that alienation correlates with the consumption of escape-type content from the mass media. In order to interpret this result, alienation was considered as a process beginning with difficulties in situation definitions. It was assumed in this study that heavy information of the mass media offers such definitions. In the beginning of the alienation process people thus feel difficulties in defining the situations and assumedly react in such a situation compensatively, with heightened intake of heavy information. If this does not help in defining situations, a second reaction, restriction of or withdrawal from heavy information is plausible. Some results supported this interpretation, but there were conflicting results, too. (Author/RB)

**Sex Differences in Nonverbal Behavior.**

Pub Date 75

Note—33p.; Paper presented at the Annual Meeting of the American Psychological Association (83rd, Chicago, August 30-September 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Behavioral Science Research, Behavior Patterns, Body Language, \*Interpersonal Relationship, \*Nonverbal Communication, Sex (Characteristics), \*Sex Differences, Sex Stereotypes

This study was designed to evaluate the effects of both sex of subject and sex of partner with respect to a wide variety of nonverbal behaviors. The subjects were 44 men and 44 women graduate professional students at the University of Chicago. The behaviors were coded from videotapes of 88 dyadic conversations where each subject participated in one conversation with a stranger of the same sex and one conversation with a stranger of the opposite sex. A total of 54 behavioral variables were derived from the ratings and grouped into eight general categories: behaviors related to speaking turns, back channel behaviors, filled pauses, laughing and smiling behaviors, gazing behaviors, postural shifts, hand movement, and foot movement. It was concluded that sex of subject, but not sex of partner, had a significant effect on many of the nonverbal behaviors displayed during the conversations. Sex differences in the correlation between subjects' scores on the behavioral measures and their scores on several personality measures on a post-conversation questionnaire were used to generate hypotheses linking specific behavioral differences between the sexes to more general differences between interpersonal styles. What is meant by "accountability" varies a great deal. It is not, however, the tools such as merit salary plans, voucher plans, and management techniques that are used to achieve accountability. Accountability has from its earliest days been tied to testing. In discussing testing, it

is necessary to discuss the pros and cons of standardized, or norm-referenced, tests and of criterion-referenced tests; to consider the numerous against testing in general; and to examine the suggestions for alternatives to the usual methods of assessing student achievement. An administrator faced with the decision of what methods of evaluation to use for accountability will find that there are no easy answers. Most authorities on testing seem to agree that traditional standardized testing is not adequate. Yet there is still a great deal of disagreement about which other methods can do the job best. It seems clear that, for the time being at least, all the best methods of assessment and evaluation are going to involve a great deal of time and money. The method of evaluation chosen depends on one's definition of accountability, which in turn depends on one's idea of what good education is. (Author/IRT)

**Identifiers**—\*Busing

To understand the controversy over busing, it is necessary to understand the relationship between busing and the issues that are actually at the root of the controversy: desegregation and freedom of choice. Much of the political activity surrounding busing is a subtle transfer of attention away from the basic issue of desegregation. Other opponents to busing see it as another needless restriction on the freedom to choose one's residence and, concurrently, to choose the school to which one's children go. Because the Supreme Court has not rendered an absolute verdict on busing, school decision-makers are forced to live with the frequently fuzzy guidelines available. Congress and the President have adopted a wait and see stance that offers no leadership on the question. Social science research on busing is not helpful either as the research is not definitive in its findings. It is clear, however, that the attitudes of school officials and community leaders help to shape the attitude of the community and that the ultimate failure or success of busing and its goals, true integration and equality of educational opportunity, depends on the local community and its school leaders, not on Washington. **The Use of the Power Structure in the Attainment of Educational Goals.**

Pub Date [75]

Note—11p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Community Control, Community Leaders, \*Community Organizations, \*Conceptual Schemes, Decision Making, \*Educational Policy, Elementary Secondary Education, Group Dynamics, \*Policy Formation, \*Power Structure, School Community Relationship

Acceptance or rejection of school policy hinges on the role played by formal and informal groups within the community power structure. Kimbrough's research suggests that formal groups are subordinate to the informal power structure in establishing policy, though formal groups make important contributions to decision-making. Some researchers support the view that important policy decisions are made by a few people in the informal power structure. Other scholars argue that the power is not monopolized by a small group but is diffused among many competing groups. This paper accepts both views; however, only one type of power structure can exist in a community at a given time. In the monolithic power situation, the informal power structure holds a complete monopoly of power. Where power is diffused among competing groups, the decision-making process seems to be much more complex; action will probably not occur until a policy has been widely considered by a number of subsystems within the community. The task of the school administrator is to identify the power structure in his community and to respond accordingly as the decision-making process progresses from one stage to another. (Author/JG)

This publication summarizes the major themes and ideas expressed by 14 scholars who participated in an April 1975 symposium on current trends and developments in school board research. The report is intended primarily to enhance the awareness of school board members and other interested citizens about the history of school boards, about boards' relationships with other groups and agencies, and about how boards behave and the reasons for their behavior. Separate sections of the report focus on different areas of research that were discussed during the symposium, including historical development of the school board, school board behavior and decision-making, educational governance, and future prospects for school boards and school board research. This publication summarizes the findings of a national survey conducted by the Gallup organization in December 1974 to investigate public awareness and perceptions of school boards. Approximately 1,500 adults throughout the nation were interviewed to gather data for the survey. The sampling procedure was designed to produce a statistically representative sample of the adult civilian population living in the United States. Respondents' views are summarized in numerous statistical tables that focus in turn on public attitudes toward school boards and school board members, the public image of school board members, public knowledge about school boards and their role, and how different segments of the public differ in their view of school boards. Also included are a detailed explanation of the sampling techniques used for the survey, as well as a copy of the survey questionnaire. (JG)

**Identifiers**—Decision Oriented Evaluation System, DOES

According to the latest federal guidelines, all projects requesting funding must include the following program features: a systematic plan to eliminate existing sex bias and sex-role stereotyping and to avoid introducing these elements, a third-party objective evaluation of the program's learner benefits, and a strong emphasis on sex-fair guidance, counseling, placement, and follow-up services. Three articles that can help prepare educational leaders to deal with the federal guidelines include "The Role of the Responsible Leader in Developing Teacher-Prepared Research in Educational Technology," "The Role of the Responsible Leader in Evaluation Based Upon Counting Learner Benefits," and "D.O.E.S.—Decision-Oriented Evaluation Systems." According to these articles, three concerns emerge for responsible leaders: programs should be cost-effective, programs should be modularized, and programs should be transportable. The responsible leader provides input that stresses the values of these three program attributes. A Decision-Oriented Evaluation System (D.O.E.S.) looks at these three criteria as important yardsticks for measuring the success of any program. (Author/JG)

The Democratic System of Leadership.

Pub Date 75

Note—14p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Administrative Principles, Administrator Role, \*Decentralization, Decision Making, \*Definitions, \*Democratic Values, \*Leadership, \*Leadership Styles, Policy Formation

Different researchers have suggested a variety of definitions for democratic leadership. As there is no one generally accepted definition, it is difficult to categorically characterize a style as democratic. Democracy in a pure form is based on the assumption that no member of the group is superior to other members. In operation, no organization exists as a pure democracy and no leadership can exemplify pure democracy. Society and organizations recognize the person with superior judgment and special skill. People may discuss and agree on directions of action, but detailed activities are left to those to whom authority over these activities has been delegated. In considering leadership styles, there is a question of how much focus will be attached to the leader. Decentralization is an extension of delegation. Delegation refers mainly to the granting of authority and the creation of responsibility. Decentralization is the situation that results from a systematic delegation of authority. Decentralization of leadership increases opportunity for development of leaders; it does not preclude centralization of goal-setting, funding, and policy-setting. (Author/JG)

Identifiers—MASCD, Minnesota Assn Supervision Curriculum Development

This book discusses the need for organizational planning in a rapidly changing society and examines how a systems approach to needs assessment can meet that need. In the foreword, futurologist Earl Joseph discusses the phenomenon of social change and need for systematic planning to anticipate and direct change. In chapter 1, the authors present an argument for empirically based planning and offer a six-step model of scientific planning. Chapter 2 describes in detail a 10-step needs assessment model developed by the Minnesota Association for Supervision and Curriculum Development (MASCD), focusing in turn on the purpose of each step and offering a strategy for implementing it. Chapter 3 suggests a number of additional resources and alternative strategies for accomplishing certain steps in the needs assessment model described in chapter 2. The appendix contains copies of various documents that were used by MASCD during the implementation of its needs assessment model. (JG)

Descriptors—Administrative Policy, \*Administrator Guides, Court Cases, Educational Legislation, Elementary Secondary Education, \*Personnel Policy, School Administration, \*School Law, State Legislation, \*Teacher Dismissal, \*Teacher Employment, Tenure

Identifiers—\*Illinois

This handbook is designed to help Illinois school administrators and school board members achieve fairness and legality in teacher dismissal proceedings. In their discussion, the authors focus entirely on the procedures to be followed once it appears that dismissal is warranted; they make no attempt to define the legitimate causes for dismissal or to deal with the ways in which administrators can compile evidence to support their charges. Frequent references and citations refer to provisions of the School Code of the 1973 Illinois Revised Statutes and to relevant decisions of Illinois and federal courts. Because of this heavy emphasis on Illinois state law, the value of the handbook to school officials in other states will be somewhat limited. (Author/JG)

Identifiers—\*Illinois

This publication presents data gathered in a survey of the impact of collective bargaining on Illinois school districts. In September 1974, the Illinois Association of School Boards mailed a three-part questionnaire to the superintendent of each of its 932 member school districts. Completed questionnaires were returned by 739 districts, representing 71 percent of Illinois' 1,045 districts. The questionnaire produced three kinds of information, which are reported in three separate publications. This report deals with the impact of collective bargaining on school management decision-making, as indicated by responses to 46 key items that are common teacher union proposals in collective bargaining. The survey findings presented in this volume are organized in six chapters. Chapter 1 summarizes chapters 2-6 relative to key questions concerning teacher involvement in decision-making; the other five chapters focus in turn on decisions related to direct teacher benefits, decisions related to implied teacher benefits, decisions related directly to teacher security issues, decisions related to implied teacher security issues, and other decisions found in teacher proposals. Within each chapter, tables present data separately for districts in the Chicago area, districts outside the Chicago area, and for the state as a whole. (Author/JG)

An Analysis of Senate Bill 170, Ohio's Plan to Equalize School Finance.

Pub Date 75

Note—24p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Assessed Valuation, Educational Finance, Elementary Secondary Education, \*Equalization Aid, \*Finance Reform, Nonpublic School Aid, Property Appraisal, Property Taxes, Resource Allocations, School Taxes, State Aid, \*State Legislation, State Programs, \*Tax Allocation, \*Tax Effort, Tax Support

This document analyzes specific provisions of the Ohio bill that attempts to revise the state's system of school finance. The bill attempts to resolve differences in valuation, tax rate, and wealth while providing basic educational services as well as services to nonpublic schools and to handicapped and special students. On the negative side, the bill does little to solve the inherent inequalities of the property tax itself, does not address the problem of the cities that have to spend an excessive amount of their tax revenues on services other than education, does not resolve the differences in expenditures between rich and poor districts, does not keep pace with inflation, and does not address the question of how much per pupil expenditure is needed to provide a good education. On the positive side, the bill does allow low property valuation districts as much choice as more wealthy districts in deciding how much money to provide for their schools, does provide incentive for poor property wealth districts to increase their tax rates, does compensate for economic and enrollment changes, and does facilitate longer range planning. A Study of Special Education Directors in Minnesota.

Minnesota Univ., Minneapolis. Dept. of Educational Administration.

Pub Date Sep 75

Note—18p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Administration, Administrative Personnel, Administrator Education, Administrator Qualifications, \*Administrator Responsibility, \*Educational Administration, Elementary Secondary Education, \*Job Analysis, Managerial Occupations, \*Occupational Information, Regular Class Placement, \*Special Education, Special Programs, Task Analysis

Identifiers—\*Minnesota

This study undertook a systematic analysis of the position of special education director in Minnesota. Position analysis allows for a detailed cross-section analysis of a position in terms of authority and responsibility within an organization. The current study was conducted to determine the special education director's current operations tasks, his necessary behaviors, skill, knowledge, and attitudes. The task analysis revealed the main areas of the position fell under the following headings: procedures and policy making, program planning, research, and evaluation.

tion; organization and pupil services; personnel administration; school operations; office work; relations with the community; and budgeting/accounting. The analysis indicates that the position should include a master's degree in educational administration and/or special education, experience in public school administration, and training in program design and certification as required by the Minnesota State Department of Education. Also suggested is a basic understanding of the special education system; child development; laws, regulations, and guidelines pertaining to special education; local school organization; and community resources. **Designing and Implementing a Mainstream Course for Regular Early Educators.**

Pub Date Aug 75

Note—11p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Course Evaluation, Early Childhood Education, Educational Objectives, Exceptional Children, \*Handicapped Children, Program Content, Program Descriptions, \*Program Design, \*Regular Class Placement, \*Teacher Education, \*Teaching Methods, Teaching Techniques

Identifiers—\*Minnesota

The University of Minnesota and the Minnesota State Department of Education joined forces to design and implement a course to prepare regular educators to work with handicapped children. The purposes of the course were to present a rationale and philosophy for integrating special needs children into mainstream settings and to offer a variety of intervention strategies to accomplish mainstreaming in the classroom. The course content was selected by a modified goal analysis method. The following areas were designated as important and served as the content units in the course: normal child development, issues in integrating handicapped children into mainstream settings, parent involvement and training, attitudes and myths concerning handicapped children, identification and assessment techniques, behavior management, and programming skills with handicapped children. Students were exposed to a variety of teaching methods in the 10 sessions that made up the two-week course. The students evaluated each session and made recommendations. In the future, students could be clustered by background and need, topics could be organized into more palatable units, and course continuity could be assured by encouraging the instructor to play a more dominating role in instruction and selection of lecturers. **Task and Employee Oriented Styles of Behavior in Selected Minnesota School Administrators.**

Pub Date Aug 75

Note—73p.; Thesis submitted in partial fulfillment of the requirements for the Specialist degree at Mankato State University

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Administrative Personnel, \*Administrator Attitudes, Administrator Characteristics, Bibliographies, Data Analysis, Educational Administration, Elementary Secondary Education, \*Leadership Styles, \*Occupational Surveys, Tables (Data), \*Teacher Administrator Relationship, \*Teacher Morale

Identifiers—Minnesota

This study investigates the effect of different leadership styles on the group morale of school employees. The author bases his analysis on data collected from 304 randomly selected Minnesota school district administrators. Administrators were classified as either task-oriented or employee-oriented, according to their responses on the Least Preferred Coworker scale, a 16-item semantic differential scale. Employee group morale was rated by subjects on the 10-item Group Atmosphere scale. Analysis of the data showed a significant difference in group atmosphere between employees under task-oriented administrators and employees under employee-oriented administrators. In addition, administrator orientation appeared to change with increasing years of administrative experience; employee-oriented elementary principals had significantly more years administrative experience and more years in their

current position than did task-oriented elementary principals. (Author/JG)

Descriptors—\*Administrator Guides, Board of Education Role, \*Boards of Education, Civil Liberties, \*Court Cases, Elementary Secondary Education, Federal Legislation, Insurance Programs, Legal Problems, \*Legal Responsibility, \*School Law, Student Rights

Identifiers—Texas, \*Tort Liability, Wood v Strickland

This booklet examines the liability of school board members in light of the United States Supreme Court ruling in Wood v. Strickland and the provisions of Title VII of the 1964 Civil Rights Act. It was prepared specifically to inform Texas school board members of their legal rights and responsibilities; however, since Texas government officials are liable only under provisions of federal law, most of the discussion will be useful to school officials in other states as well. Different sections of the booklet examine the potential liability of board members, suggest how a school board should operate to avoid liability problems, discuss possible steps a school district can take to protect its board members from personal financial loss, and consider the pros and cons of purchasing liability insurance coverage for school board members. Identifiers—\*Elementary Secondary Education Act Title III, ESEA Title III

This report on Title III of the Elementary and Secondary Education Act (ESEA) is the eighth in a series of Title III reports prepared by the National Advisory Council on Supplementary Centers and Services since 1967. This is the council's final report, which was released just prior to its official termination in June 1975. The first section of the report presents and discusses seven recommendations by the council for improving the federal government's contribution to education, particularly that part of the federal effort involving Title III and Title IV of the ESEA. The second section lists a total of 77 additional recommendations that were made by the council in its earlier reports and indicates whether or not each recommendation was adopted by the appropriate federal agency. The third and final section of the report lists all the various handbooks and reports published by the council from 1968 to 1975. (JG)

Descriptors—\*Adoption (Ideas), Bibliographies, Community Involvement, Community Role, Diffusion, Educational Assessment, Educational Change, \*Educational Innovation, \*Educational

Research, Elementary Secondary Education, Evaluation, \*Experimental Schools, Readiness, \*Research Utilization, School Community Relationship

In essence, the Policy Institute has explored the contributions that tested educational research (including reputedly viable educational innovations not based on formal research and development) might make to actual school and classroom practice within the context of the Experimental Schools Program's planning. The Policy Institute set itself three tasks—to construct a "research-readiness" spectrum, a "criteria-of-importance" typology, and a "host-readiness" synopsis. A highly eclectic applied-social-science research method was used. This method included commissioning two independent papers, conducting interviews, and searching the literature. What emerged was a reexamination of assumptions about the innovative process. It seems that emphasis on the suitability for implementation of research results and innovations, in an abstract sense, reflects an unconscious prejudice, favoring the perspective of the researcher over that of the practitioner. As a result, the group has been led to place greater emphasis on the characteristics of the potential host. The major outcome of this discussion is a set of questions intended to be used by an evaluator as a means of focusing his judgment of the suitability of potential Experimental Schools grant recipients. Numerous appendixes are included. (Author/IRT)

Descriptors—\*Educational Finance, Elementary Secondary Education, \*Equal Education, Equalization Aid, \*Finance Reform, \*Foundation Programs, Property Taxes, School Districts, School District Spending, State Aid, \*State Programs, State School District Relationship, Tax Allocation, Tax Effort, Tax Rates

Identifiers—Rodriguez Case, \*Texas

This study examines the current Texas school finance plan, the finance plans and proposals of other states, national school finance research, and the results of a survey of Texas leaders and educators before presenting alternative revenue and distribution plans, their effects and costs, and possible revenue sources. The study was conducted under the assumption that any new plan should achieve equalization of access to educational opportunity and equity in taxation. The committee concluded that the following factors should be reflected in the revised plan: ad valorem taxes should continue to be a major source of revenue, ad valorem tax reform is necessary to assure equity, local enrichment above the statewide program should be limited, taxpayer burdens should be equalized, and school districts should have equal access to education program funds. The preferred new plan improves support levels for most school districts, allows some local flexibility in setting tax rates, limits enrichment prerogatives, increases local control by allowing districts to determine staff composition, provides an improvement in the equity of taxation, uses ad valorem tax collections in the districts in which they are collected, and continues to distribute Available School Fund proceeds on a per capita basis. This manual presents guidelines for planning, monitoring, and controlling the development and operation of volunteer assistance programs. The materials included address questions related to both the process of establishing a volunteer program and the administration of a volunteer management system. The manual is not intended to provide a blueprint for establishing a specific volunteer program, but rather to offer a compilation of methods and materials that can be adapted to the differing circumstances and needs of individual school systems. Various sections of the manual offer an overview of the volunteer services system, discuss the administration of the overall volunteer services system and the management of different volunteer services subsystems, and describe models for the operation of the volunteer services system. The appendix offers guidelines for developing volunteer job descriptions and presents sample forms for training and monitoring volunteer personnel. (Author/JG)

Because of such societywide factors as fewer first marriages, couples opting not to have children, a rise in the divorce rate, and a decline in the remarriage rate, the school population is, and probably will continue, declining. The effects of this decline will be greater than most people anticipate. Because conditions vary so much from district to district, it is up to the local district to search out information about local trends. Private industry has provided some positive examples of adaptive behavior that the schools should examine. One approach to declining enrollment is that taken by the Salt Lake City schools where the student population has dropped from 43,000 to 27,000 in 10 years. The district has closed 24 schools in an orderly and systematic way that takes into consideration community views as well as educational and economic necessities. Declining school enrollments are going to make inservice education more important and challenge the field to develop a new generation of school administrators who are skillful at the process of adjusting a school to a decline in growth. A team theoretic model that establishes a criterion (decision rule) for a financial institution branch to report exceptional loan requests to headquarters for action was compared to such choices made by graduate industrial management students acting as financial vice-presidents. Results showed that the loan size criterion specified by subjects was typically greater than the optimal criterion when the optimal criterion was small relative to the maximum loan size, and less than the optimal criterion when the optimal

criterion was large relative to the maximum loan size. That is, subjects specified criteria that would result in the reporting of too few exceptions (a case of informational overdecentralization) and too many exceptions (a case of informational overcentralization) when the optimal criterion was relatively small and large respectively. The behavior exhibited was attributed in part to a subject's utility function, which was inferred to have a Friedman-Savage double inflected structure. (Author)

Education should help students engage in intelligent action. In spite of considerable rhetoric on this topic, the relationship between action and education has not been closely examined in statements of educational aims, in designs for curriculum, in the daily experience of students, or in teacher education programs. This book builds a conception of education for competent action in one area of human concern—public affairs. It is deliberately written for a variety of readers: social studies educators; university students and faculty; administrators; persons with interests in alternative schools, experiential education, student volunteer programs, or the general topic of community involvement; and anyone interested in helping public education take a more vigorous part in improving the system of consent of the governed in the United States. The book's purpose is to offer a systematic rationale for exerting influence in public affairs as a central priority in secondary schools, to outline a general conception of student competencies implied by this goal, and to anticipate issues in the program and environment of secondary schools that must be faced if the proposed curriculum were to be implemented. Details of actual curriculums, successful teaching strategies, or evaluation devices are not included. (Author)

Note—451p.

**EDRS Price MF-\$0.76 HC-\$23.48 Plus Postage**

**Descriptors**—Administrative Personnel, Curriculum, Curriculum Development, \*Curriculum Planning, \*Curriculum Research, Decision Making, Educational Research, Elementary Secondary Education, \*Information Needs, \*Information Seeking, Information Sources, Information Utilization, Research Methodology, Simulation, Supervisor Qualifications, \*Supervisors, Supervisory Methods

The purpose of this study was to determine the topics of information sought by curriculum supervisors when they are considering curriculum-related decisions. In addition, the relationships between the topics of information demands and selected background factors and psychological characteristics of the supervisors were examined. The topics of information demand were determined by recording the title of reports read by supervisors during a simulated curriculum decision-making task. It was concluded that when supervisors consider curriculum-related decisions, their information demands (1) are multidimensional; (2) include the topics of general information about the subject areas of the curriculum decision, specific information about the content of the subject area, the views of the school situation held by teachers and other interest groups, resources of the schools, student ability, the

strength of present curriculum offerings in areas related to curriculum decision, and information about the background of the community and community views of school issues; (3) are not completely consistent with the information needs implied by either the comprehensive/prescriptive decision model or the incremental/remedial decision model; (4) are not related to the background of the supervisors; and (5) are not related to the personality of the supervisors. **The Impact of Principal Involvement in Instructional Planning with Teacher Teams on Academic Achievement of Elementary School Pupils.**

Mississippi State Univ., State College. Bureau of Educational Research.

Pub Date 75

Note—11p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Academic Achievement, Administrator Role, Educational Innovation, \*Educational Planning, Elementary Education, \*Instructional Innovation, \*Principals, Teacher Participation

Elementary students recorded large gains in academic achievement in the two years their school was involved in an intensive instructional improvement project that employed team teaching, flexible scheduling, open classrooms, and individualized instruction. A study was done to determine if the achievement gains would continue through a third year if the principal was not involved in instructional planning and to determine if the return of the principal to extensive involvement in planning in a fourth year would result in another upward surge in achievement. Although there were some losses when the principal was absent from the planning, the scores in all areas in two of the three grades surveyed continued to be significantly higher than the scores obtained in the base year and the Hawthorne effect was dismissed as a major factor in the original increases. The return of the principal to team planning sessions resulted in additional achievement gains in all the areas at all the grade levels except second grade arithmetic. The extensive involvement of the principal in instructional planning with teacher teams can make a positive contribution to the success of the faculty in improving academic achievement of pupils. **Discipline in Secondary Schools in Western Australia.**

Western Australia Education Dept., Perth.

Pub Date Dec 72

Note—384p.; Report of the Committee enquiring into discipline in secondary schools in Western Australia under the chairmanship of Mr. H. W. Dettman, Perth, December, 1972

**EDRS Price MF-\$0.76 HC-\$19.67 Plus Postage**

**Descriptors**—Administrator Attitudes, \*Discipline, Discipline Policy, \*Discipline Problems, Parent Attitudes, Questionnaires, \*School Surveys, Secondary Education, Student Attitudes, \*Student Behavior, \*Tables (Data), Teacher Attitudes

**Identifiers**—\*Australia (Western)

This report reviews and discusses the results of an extensive year-long study of school discipline in Western Australian secondary schools. Through its investigation, the committee attempted to determine the nature and extent of disciplinary problems, to ascertain the factors contributing to these disciplinary problems, and to recommend measures for their resolution. Data for the study was compiled from case study reports on 73 "extremely deviant" students and from four separate questionnaires that were distributed to all secondary school teachers in Western Australia, administrators at all secondary schools in Western Australia, a randomly selected sample of secondary students, and a random sample of secondary students' parents. Detailed data from the case study reports and questionnaire responses are presented in numerous tables and graphs throughout the report, and a sample of each of the survey forms is included in the Appendix. Western Australia Education Dept., Perth.

Pub Date Feb 69

Note—191p.; Report of the Committee on Secondary Education appointed by the Minister for Education in Western Australia under the chairmanship of Mr. H. W. Dettman, Perth, February, 1969

**EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage**  
**Descriptors—**\*Educational Improvement, \*Educational Needs, Educational Policy, \*Educational Practice, Educational Trends, Graduation Requirements, Organizational Change, School Role, \*Secondary Education, \*State Surveys

**Identifiers—**\*Australia (Western)

This publication reports the results of an extensive study of the characteristics and needs of secondary education in Western Australia. In its investigation, the committee was instructed to examine educational developments outside Western Australia, to assess the educational needs of Western Australia, and to recommend changes in the future organization, structure, and curriculum of secondary education in Western Australia. In developing its recommendations, the committee discussed evidence and statements submitted by 31 organizations and 25 individuals, examined previous reports on education in Australia and other countries, and considered the findings of special investigations into current educational research. The first three chapters of the report describe the study and discuss present educational structures and trends in Western Australia, while the remaining chapters deal with future educational developments in Western Australia and present the committee's recommendations. **Identifiers—**\*California (Marin County)

The purpose of this practicum was to develop and implement a pilot project combining school and public transit services in Marin County, California. To accomplish this aim, it was necessary to gain approval from several public agencies, obtain funds to finance part of the study, gather and analyze data on school transportation and public transit services, develop alternatives for consolidating and combining transportation services, select one alternative for development into a pilot project, and gain approval from various public agencies to begin implementation of the pilot project. Volume 1 of the report describes in detail how each of these steps was accomplished and discusses each of the nine alternatives considered for pilot implementation. Volume 2 consists of appendices that present maps and other data on transportation in the demonstration area and provide information on the various studies and surveys that contributed to development of the pilot project. **Descriptors—**\*Administrative Personnel, \*Educational Finance, \*Educational Trends, Elementary Secondary Education, Expenditure Per Student, \*School District Spending, \*School Statistics, School Supervision, State Surveys, Supervisors, Tables (Data)

**Identifiers—**\*Louisiana

The purpose of this study was to gather data and test the hypothesis that the number of constant dollars expended for educational supervision by Louisiana public school systems increased during the decade from 1963 to 1974. To facilitate comparison of expenditures from different years, all financial data are expressed in terms of "constant dollars" computed on the base year 1967. Analysis of the data show that the number of supervisors increased 139.9 percent from 1963 to 1974, compared to a 6.8 percent increase in the number of students, a 30.5 percent increase in teachers, and a .1 percent increase in principals. In terms of constant dollars, expenditures for educational supervision increased approximately 700 percent, while total expenditures per student increased 131 percent and average teachers' salaries rose approximately 9 percent. The data also indicate a recent downward trend in total educational expenditures; in constant dollars, expenditures per student declined from a peak of \$644 in 1971-72 to \$616 in 1973-74. **EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**  
**Descriptors—**\*Alternative Schools, Curriculum Development, \*Dropout Programs, Dropouts, Educational Alternatives, \*Evening Programs, \*Evening Students, Models, \*Night Schools, Secondary Education, Student Enrollment

The purpose of the practicum described here was the development of a model for an alternative night high school. The plan called for a curriculum aimed at student interest and graduation requirements, a profile procedure for identifying potential candidates, and the operation of a prototype evening program during the summer of 1975 to test the feasibility, practicality, and desirability of a program of this nature. Plan development is documented and the prototype action, survey, research, and implementation are fully described. The evening program was implemented for the summer of 1975, found to be successful, and installed for the 1975-76 school year. (Author/IRT)

This report presents a system-by-system listing of extra pay for athletic and nonathletic extracurricular teacher activities. The data is drawn from the information supplied in connection with the Educational Research Service "National Survey of Salaries and Wages in Public Schools, 1974-75." Table 1 shows the number of school systems reporting scheduled annual supplements; Table 2 shows the mean and range of low and high maximum scheduled supplements for both athletic and nonathletic activities by enrollment grouping; Table 3 shows the mean of maximum scheduled supplements for both athletic and nonathletic activities ranked from the largest to the smallest; Table 4 shows distributions, means, medians, and ranges of low and high maximum scheduled supplements for 13 selected extracurricular sports activities by enrollment grouping; and Table 5 gives the same information for the 10 selected nonathletic activities. Tables 6 and 7 give system-by-system listings of the maximum supplements for the 254 systems that reported information relating to athletic activities and the 233 systems that provided data on nonathletic activities. Examples of salary supplement schedules for 16 districts are also provided. (Author/IRT)

**Descriptors—**Administrative Personnel, \*Administrator Guides, Administrator Role, Educational Administration, Educational Planning, Elementary Secondary Education, Guidelines, \*Planning, Professional Associations, \*School Districts, School Law, Teacher Militancy, \*Teacher Strikes

The purpose of this report is to help school administrators develop their own strike contingency plans or evaluate the plans already in existence in their districts. The report comprises four sections: (1) a review of the educational literature regarding strike contingency planning; (2) state board guidelines for strike contingency planning; (3) results of the Educational Research Service survey of local school district strike contingency plans; and (4) sample local guidelines for strike contingency plans and sample forms used by local school administrators during a teacher strike. The material in the section on sample guidelines is divided into categories on legal considerations, district-level planning, building-level planning, communications, security, and restoring working relationships. **Descriptors—**\*Bus Transportation, Computer Programs, Computer Science, \*Delivery Systems, Education Vouchers, Free Choice Transfer Programs, Information Processing, Open Enrollment, Scheduling, \*School Buses, \*Student Transportation, Supervisors, \*Systems Approach

This study was commissioned to investigate the special transportation problems in parent-choice school districts and to prepare a handbook to assist transportation supervisors in overcoming these problems. Intended for school districts that have alternative schools, open enrollment plans, magnet schools, or other kinds of parent and student choice programs, the handbook is a summary

ry of the information gathered on transportation planning in both parent-choice and neighborhood-centered school districts. Elements of the traditional neighborhood-school-centered transportation system and those unique to the parent-choice transportation system are described. Methods are suggested for developing the information files and routing skills required to meet the needs of the new system. The characteristics of commercial services offering computerized transportation planning services are presented and compared. The concluding section presents "rules of thumb" and criteria for judging what levels of automation and what service might be most valuable for a specific district. (Author/MLF)

Descriptors—\*Accountability, Cost Effectiveness, Costs, \*Economic Factors, Economics, \*Educational Accountability, \*Educational Research, \*Efficiency, Elementary Secondary Education, Evaluation, Higher Education, Management, Models, \*Productivity, Systems Approach

While concern for efficiency and productivity and the use of systems terminology are not new, the intensity with which the jargon is used is relatively new. Unfortunately, the technological terms have frequently become distorted and value-laden through attempts to apply them to compelling economic and political issues. As a result, administrative attempts to implement processes associated with the terms as well as attempts to increase teacher productivity have been perceived by teachers as an unreasonable demand to provide more service for less money. This paper relates the terms "accountability" and "productivity" to the educational context, identifies criteria presently used for the measurement of productivity, reports on some of the current practices used to increase productivity, and proposes some directions for future research. The proposed research efforts are concerned with defining productivity, defining programs, adopting more efficient record-keeping systems, understanding the teaching process, examining employee motivation, investigating successful strategies to implement innovative practices, and increasing the activity of teacher organizations in developing strategies for improvement of education. The purposes of the project described in this report were to train curriculum specialists and to develop and test curriculum design training materials. The first phase of the project included the development of training materials and their use to train a small group of students. During the training of the pilot group of students, an effective design model was identified and a format developed for self-instructional materials. The design was a structured-curriculum model supplemented with additional elements and procedures suitable for complex subject matter, called the process model for individualization of curricular (PIC). This model became the bases for design of the curriculum course, and the PIC procedures were taught as a design model. This phase of the project ended with a revision of the materials based on the experiences and results encountered with the students. The second phase of the project was a series of field tests of the materials and their revision based on formative evaluation procedures. (Author/MLF)

Casey, Edwin R. And Others

Developing a Model for Reorganizing Traditional School Plants for Individualized Instruction.

Pub Date 16 Jun 75

Note—476p.; Photos may reproduce poorly; Submitted in partial fulfillment of requirements for Doctor of Education, Nova University

**EDRS Price MF-\$0.76 HC-\$24.75 Plus Postage**

Descriptors—Cost Effectiveness, Facility Case Studies, Facility Guidelines, Facility Requirements, Facility Utilization Research, Flexible Facilities, \*Individualized Instruction, \*Models, \*Practicums, \*School Improvement, School Planning, \*Traditional Schools

Identifiers—Georgia (Atlanta)

The purpose of this practicum was to develop and field-test a model for reorganizing traditional school plants to accommodate and support individualized instruction. The model was implemented in five areas of eight traditional buildings in the metropolitan Atlanta area. Results demonstrated that reorganization could be accomplished at considerable savings over new construction. The practicum results suggest that the model may be useful to administrators for evaluation of similar school situations. (Author)

Descriptors—\*Administrator Evaluation, Elementary Secondary Education, Management by Objectives, Models, Personnel Evaluation, \*Program Descriptions, \*State Surveys, \*Superintendents, Trend Analysis

Identifiers—\*Michigan

Intended primarily for Michigan administrators, this document presents a variety of information on administrator evaluation. A survey of Michigan superintendents revealed, among other things, that there is a very high interest in administrative evaluation, that 45 percent of the responding districts have no formal evaluation system, that 36 percent have a formal evaluation system, that 19 percent have no formal or informal administrator evaluation system, that 30 percent base administrator evaluation on a job description, and that 46 percent include an appraisal conference in the evaluation process. Along with the results of the survey, the document presents a listing of the types of evaluation, an outline of strategies for implementing an administrator appraisal system, an argument for using facts rather than opinions in evaluation, an overview of four sources of information, and nine

models of administrator evaluation programs. (Author/IRT)

A key issue in educational administration in England at present is the interrelationship between professional responsibility and public acceptability, and between professional responsibility and political control. These papers show how the conference focused on this issue and the question, Should the education service in the future continue as an integral part of local government? Two conference participants responded to each of two papers presented at the conference, "Local Government and the Education Service" and "Institutional Autonomy and Public Accountability." The concluding presentation, "The Specifics of Autonomy and Accountability: A Simulation Exercise," involved participants in solving nine simulated problems. (Author/MLF)

The Louisiana Public School Superintendent: 1975. Research Report, Vol. 6, No. 1.

Louisiana State Univ., Baton Rouge. Bureau of Educational Materials and Research.

Pub Date Jan 76

Note—13p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Administrative Personnel, \*Administrator Characteristics, Chief Administrators, Educational Administration, Elementary Secondary Education, \*Occupational Surveys, Questionnaires, \*School Superintendents, \*State Surveys, \*Statistical Data

This paper reports the findings of a 1975 survey of Louisiana school superintendents that was intended to develop a data profile of the typical Louisiana superintendent. Fifty-eight of the 66 Louisiana superintendents completed and returned the survey questionnaire. Survey responses are discussed and compared with data from a 1969 national survey of superintendents conducted by the American Association of School Administrators, a 1968 Louisiana study, a 1969 Mississippi study, and two Arkansas studies conducted in 1971 and 1973. The appendix presents an item-by-item report of responses to the 1975 survey questionnaire and summarizes data on college degrees held by Louisiana superintendents. (JG)

Identifiers—\*California

The commission was charged with drafting a framework for overhauling education in California's 1,600 intermediate and secondary schools. The Superintendent of Public Instruction asked the commission to envision an educational system that could respond continually to changing needs in the next quarter century; to identify the skills and competencies individuals will need to survive and function effectively in the next 25 years; to chart ways to make school more effective, more enjoyable, and more conducive to a continued interest in learning; to identify the goals California's schools should be meeting now and through the year 2000; and to recommend immediate and long-range changes to bring about the desired results. The commission was not charged with designing methods of implementation. In this document, the commission presents its philosophy of reform, together with its recommendations and rationale for changes. The recommendations are grouped by subject—the new learner, the new learning environment, the new emphasis on learning, the new educator, and new resources and responsibilities. In a special section the commission deals with concerns for the early adolescent. Numerous appendixes are included. (Author/IRT)

Intended for teachers, administrators, students, parents, counselors, professors, and consultants, this book provides a practical framework for the work of adults and young people who should improve the schools. It deals with different ways to use different viewpoints to generate new options for resolving conflict. It demonstrates how the same aggression aroused by conflict can be the wellspring for creative resolutions of it. Chapter 1 is introductory and describes the condition of the high school. Chapter 2 discusses the classroom and curriculum conflict. Chapter 3 and 4 contain student descriptions of conflict and apply these descriptions to the democratic rights or constitutional principles students consider most relevant. Chapters 5 and 6 deal with anger, verbal threats, and the violence and vandalism that surround school conflict. Both chapters are based on new affect codes derived from psychoanalytic dynamic theory of aggression. Chapter 7 describes conflict and shows how students and school adults depict the various parties to conflicts and the differences and similarities between their points of view. Chapters 8 and 10 extend the data analysis. Chapter 9 describes how to resolve school conflicts. (Author/IRT)

**Descriptors—**Academic Achievement, \*Behavioral Objectives, Class Attendance, \*Class Management, Educational Innovation, Elementary Education, Program Descriptions, Student Attitudes, \*Student Behavior, Student Interests, Student Motivation, \*Teacher Behavior, Teaching Methods

The research reported on here was conducted to evaluate the initial introduction of innovative classroom management techniques in selected classes of four elementary schools. The evaluation phase was conducted during the 1970-71 school year following a series of summer inser-

vice workshops on instructional objectives, learning modules, and contingency management. The primary emphasis was on introducing and evaluating contingency management concepts and techniques for eliminating problems commonly experienced by elementary teachers. Data were also collected for reading and mathematics achievement, school attendance, and indicators of interest and attitude. Contingency management practices were more widely implemented by the program teachers than were the instructional objectives. All the teachers in the program implemented the general procedures using approval, praise, and learning success and eschewing scolding, punishment, and learning failure. Although the emphasis was on student behavior rather than on achievement, students of teachers who met a substantial portion of the program objectives showed small, but clear, gains over the other students. This publication is a compilation of five papers presented at the 1975 Personnel Management Institutes held by the New York State School Boards Association. Although the meeting was intended to provide useful information about personnel matters specifically for school board members and school administrators from New York, much of the content of the various papers applies to other states as well. The individual papers include the following: "New Rules Affecting School Boards and School Administration," by Bernard T. McGivern; "New and Emerging Problems in School Administration," by Richard E. TenHaken; "Social Security—Its Application to Negotiations," by S. B. Hinman, Jr.; "Productivity and Disciplinary Rules—How to Negotiate Them and Make Them Work," by Melvin H. Osterman, Jr.; and "Current Court Decisions, PERB Decisions, Commissioner's Decisions, Arbitrators' Decisions," by Raymond G. Kuntz. (JG)

School districts are increasingly squeezed between increasing operating costs and the growing difficulty of raising new revenue. Most causes of this situation are beyond the control of school officials; they can only control staffing and educational programs. Because 80 percent of most school budgets go for salaries and related expenses, any major cut in spending must be in the area of salaries. Moves in this direction will inevitably cause confrontations with teachers' unions. Other roadblocks include state laws governing teacher tenure, seniority, and retirement plans. To meet these challenges, school officials must actively seek public support and input. Only with active support from a majority of taxpayers can school officials effectively oppose costly new state mandates, oppose changes in labor laws that limit the bargaining strength of school districts, oppose liberalization of retirement benefits, keep schools open during teacher strikes, keep state aid flowing during teacher strikes, and put pressure on school employee unions to share the responsibility for maintaining a decent educational program. This paper examines a number of problems facing school board members and educational administrators today and suggests some possible approaches to addressing those problems effectively. In considering each problem area, the author emphasizes its impact on the activities and responsibilities of school officials and discusses concrete steps they can take in response. Nine specific problems are discussed, including the impact of declining school enrollments, the repercussions of federal requirements banning sex discrimination in education, conflict between school board members and administrators and teachers, financial problems, energy problems, increasing government involvement in school decision-making, the impact of a changing economy and job market on education, changing public attitudes toward schools, and lack of effective communication between school personnel, students, and the public. Many school boards are paying for certain fringe benefits that could be utilized to offset some of the costs of other fringe benefits. Perhaps the best example of this is the disability portion of Social Security. Persons disabled for more than one year may collect Social Security benefits equal to what they would receive on retirement at age 65. Yet many school district contracts grant sick leave accumulations in excess of one full school year. Districts should consider offsetting accumulations of more than a year with Social Security disability payments or any state disability payments. Further, each school district should inventory all the fringe benefits it provides to determine if there are any instances of double payment for the same type of benefit. (Author/JG)

Identifiers—\*New York

Public school collective bargaining will no work unless management approaches negotiation as a two-way street and demands from the union

what it requires to protect its own interests. With today's surplus of available teachers, management has the opportunity to reclaim prerogatives it has abdicated through past negotiations. In particular, school officials should use the collective bargaining process to make significant improvements in the areas of disciplinary procedures for school employees and negotiated productivity agreements. New York now permits school districts to negotiate discipline procedures for noninstructional personnel as an alternative to existing statutory requirements. School officials should seek similar legislation covering instructional personnel and then take advantage of the opportunity to negotiate simple, effective procedures for employee evaluation and discipline. Similarly, collective bargaining can contribute importantly to gains in productivity. However, effective productivity bargaining requires careful preparation and technical expertise on both sides of the bargaining table and a complete commitment to the concept by both management and the union. **Identifiers—\*New York**

This paper examines a large number of recent court cases, state commissioner of education decisions, and public employee relations board rulings dealing with the employment and dismissal of school employees in New York. Since the discussion focuses almost entirely on New York cases, it will be of limited value to readers in other states. In his discussion, the author attempts to integrate related cases and to illuminate any unifying legal principles that can guide school board members and educational administrators in matters related to tenure, collective bargaining, teacher dismissal, and other issues involving school employees. This handbook provides help and direction in minimizing the impact of a teacher strike on the local community. It is, in essence, a management plan to deal with work stoppages on as high a professional plane as possible. Modification must be made to meet local and state circumstances. Each school district must write a plan in line with its own philosophy and the board of education policies and state statutes. The point is that each school district in the nation must have such a readily available plan of action. A brief historical review of work stoppages by employee groups is included to give a greater understanding of the development of the more militant stance of school employee groups across the country. The scope and causes of strikes are also discussed, but the major portion of the handbook is devoted to

what the administrative team should do before, during, and after a strike. An appendix contains a checklist on the operation of the school, a prestrike questionnaire, a school report form and a strike checklist. (Author/IRT)

**Identifiers—\*Canada**

Power, or influence, in educational governance is increasingly becoming diffused. Everyone in education now feels relatively powerless. A political model of decision-making, emphasizing consultation with representatives of interest groups is now appropriate. In this model, the school board functions as "meta-mediator." This modifies the role of senior administrators. The pluralistic power structure, characterized by interest group politics, is now the most common kind. In such systems activist educators are likely to cause and encounter conflict. The skillful exercise of influence in coping with conflict in pluralistic environments is a vital skill for senior administrators. Conflict occurs when groups perceive a divergence of interests, as opposed to a commonality of interests. The chances of peaceful adjustment are maximized when a degree of shared interests exists and when some other conditions, including the existence of institutional arrangements for negotiation, are met. Conflict between the organization and clients is increasingly common and can be extremely difficult to deal with. Two common strategies, attitude change and power, can be used alternately. Conflict management is increasingly a common activity and an essential skill of senior administrators. Training or experience in it is thus an increasingly important qualification for leadership roles. (Author/IRT)

The main purpose of this book is to draw attention to a subject which is, or should be, of concern to virtually every citizen—judges, legislators, school officials, teachers, pupils, and parents. The school is not immune to the "sex revolution" that is going on in society, and is therefore obligated to keep abreast of developments. The main thrust of this investigation is to draw attention to the legal principles derived from decisions of school cases, involving sex, that have been brought before the courts for adjudication in recent years. Chapters cover the trend and legality of sex instruction in the public schools, the alleged sexual misbehavior of teachers, the meaning of "obscenity," the litigious aspect of the marital status of teachers, regulations concerning the marital status of students, and the early attempts by women to win equal rights. The early seventies were strikingly similar in some ways to the early forties. In both periods strong forces operated to reform education. These pressures arose in the main from a pervasive sense of crisis and threat to the culture. A major purpose of this study is to shed some light on the nature and impact of the forces of change that affect education. The method employed is to take an earlier corresponding period as the main point of reference. The forties thus serve as a "rear vision mirror" in the sense that an analysis of the reformist movement of those years helps create an understanding of the current landscape of education. As a result, it is easier to distinguish the familiar from the new factors at work. The analysis inevitably goes well beyond the field of education itself. Political, economic, and social factors bear heavily on education policy and price. The viability of proposed innovations is also linked with the cultural context. The advocates of structural change in the seventies enjoy a more favorable context for action than did their counterparts in the forties. The question has become not whether but how much change will take place. (Author/IRT)

 tion, \*State Departments of Education, Voca-  
 tional Education, Vocational Rehabilitation

This report contains tabulations of responses to  
 a questionnaire sent to the persons in each state  
 education agency responsible for coordinating the  
 programs of Special Needs in Vocational Educa-  
 tion. Each respondent was asked to identify one  
 program serving Special Needs in his state. The  
 questionnaire also asked whether the state had  
 held a cooperative conference involving voca-  
 tional education, vocational rehabilitation, and  
 special education, and whether the state had an  
 organized program of inservice training for ad-  
 ministrators of Special Needs programs jointly in-  
 volving the three agencies. A final question was,  
 "In order to help you to better administer your  
 program at the state level, what are your needs in  
 such areas as information, training programs, and  
 administration?" The report of this survey closes  
 with a number of conclusions and recommenda-  
 tions. (Author/MLF)

 LSNA

The implications of the 1968 federal Voca-  
 tional Education Amendments have prompted  
 local programs to create the position of Local  
 Special Needs Administrator (LSNA). The in-  
 vestigation reported here was carried out as the  
 basis for proposing that a training program be  
 developed for Special Needs Administrators. The  
 coordinator or administrator for Special Needs  
 Programs in each of the 50 state education ag-  
 encies was asked to designate one local program  
 and administrator who could be contacted for  
 this study. Questionnaires were returned by 43  
 local administrators. The respondents reported  
 their organizational structures, job titles, job du-  
 ties, and certain opinions about the competencies  
 required in their work. (Author/MLF)

 Court Litigation

School regulations concerning hair have been  
 successfully defended in appellate courts in about  
 half the country. The most recent decision of a  
 federal circuit court upholding a school's rules  
 was decided in 1975. In this instance, the court  
 reversed the position it held only three years  
 earlier. There are some guidelines that should be  
 kept in mind if a school has hair regulations or is  
 considering their adoption: rules should be drawn  
 as narrowly and specifically as possible and  
 should be clearly related to the educational pur-  
 poses of the school; the strongest legal basis for  
 hair and grooming regulations are the protection  
 of health, safety, or educational performance of  
 the students; if the rule is based on the need to  
 prevent disruption of the educational process, the  
 school should be prepared to meet the test out-  
 lined in the Tinker decision; it should be made  
 sure that the rule is not grounded solely on sexual  
 stereotypes or other presuppositions that cannot  
 be defended against charges of sex discrimina-  
 tion; and the rule should be spelled out,  
 preferably in writing, and made known to every-  
 one it will affect, before it is enforced against  
 anyone. (Author/IRT)

**Do School Organizational Patterns Make a Dif-  
 ference?**

Pub Date 75  
 Note—12p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors**—\*Academic Achievement, \*Cocur-  
 ricular Activities, Elementary Secondary Educa-  
 tion, \*Grade Organization, \*Instructional  
 Program Divisions, Organization, Schools, So-  
 cial Adjustment, Socioeconomic Influences,  
 \*Socioeconomic Status

In order to determine the effect of school or-  
 ganizational patterns on learning and school ad-  
 justment, the author conducted a study that com-  
 pared twelfth-grade students who attended self-  
 contained schools on a K-8 pattern with students  
 who attended self-contained schools on a K-3, 4-  
 6 plan and then a 7-8 departmentalized school.  
 All the students attended the ninth grade in one  
 school and then went to one that used a 10-12  
 pattern. The results showed that (1) achievement  
 as measured by grade point average was not  
 statistically significant on the T-test at the .05  
 level; (2) there were few differences in the stu-  
 dents' perception of school experiences and those  
 that were found were more related to  
 socioeconomic status and sex rather than to  
 trends that could be attributable to previous  
 school organizational structure; (3) there was no  
 meaningful difference between the students in  
 stability of socioeconomic aspiration level; (4)  
 there were no inhibitory effects of organization  
 patterns in participation in extracurricular activi-  
 ties; and (5) there was stability of performance  
 within each socioeconomic status classification.

 ism, \*Educational Administration, Educational  
 Change, \*Educational Policy, \*Educational  
 Research, Elementary Secondary Education,  
 \*Federal Programs, Minority Groups, Public  
 Policy, School Law, State Programs

Policy is developed at many levels in the edu-  
 cational bureaucracy and is influenced by many  
 agencies and groups. Few policies or delibera-  
 tions, however, are related to any other policies  
 or agencies, and most policies are developed to  
 speak only to a particular goal or problem in a  
 particular educational setting. There is no agree-  
 ment on the definition or characteristics of an  
 educational policy, and in the everyday world of  
 school boards and administration, there is no  
 clear distinction between an educational policy  
 and an administrative rule or regulation. Because  
 of the need for clarification of the basic elements  
 of policy-making and of policies, this symposium  
 was held. Leaders in the field were invited to  
 share their knowledge and their thought concern-  
 ing the major areas of policy development in  
 order to bridge the gap between academic studies  
 providing socio-philosophical insights and the  
 day-to-day policy problems of schools faced with  
 increasing social pressure for financial and other  
 accountability. Topics considered include an ex-  
 amination of what educational policy is, new  
 directions in federal policy, the effect of research  
 on policy, constitutional issues and policy, and  
 the role of community and minorities in educa-  
 tional development. (Author/IRT)

 \*Curriculum Evaluation, \*Curriculum  
 Research, \*Educational Research, Elementary  
 Secondary Education, \*Literature Reviews, Ob-  
 jectives, Social Factors, Systems Analysis,  
 Teachers, Teaching Methods

The literature on curriculum comprises three  
 areas. The first is made up of the articles that ad-  
 vocate, describe, criticize, discuss, or pontificate.  
 These articles contain little by way of discerning  
 theoretical analysis and nothing by way of persua-  
 sive empirical evidence and are not considered  
 here, though their influence on actual school  
 practice may well exceed that of the materials  
 that are covered. The second area deals with the  
 problem of analysis, the problem of developing a  
 body of curriculum theory that will help in the  
 understanding of curriculum policy as well as the  
 development of evaluation of curriculum prac-  
 tices. The third area of the literature seeks,  
 through a wide variety of empirical studies, to  
 provide data regarding the consequences of vari-  
 ous curriculum choices. The latter two groups are  
 discussed here under the headings of curriculum  
 theory and analysis, curriculum structure, subject-  
 area curriculum research, curriculum and  
 teaching method, noncognitive outcomes in cur-  
 riculum, and curriculum research and curriculum  
 decisions. The fundamental question is still that  
 of purpose. Curriculum researchers can no more  
 remain indifferent to the value questions implicit  
 in choices of objectives than can any other group  
 of scientists. (Author/IRT)

This publication contains selected data from the 1970 Census of Population Fourth Count, summarized for school districts. The data are intended to fulfill, in part, the information needs of those individuals and organizations concerned with education who lack access to computer-based information processing facilities. National summary tables are presented that show the distribution of (1) school districts with enrollments of 300 or more for 13 selected social and economic indicators, and (2) public school pupils according to the community characteristics of their school district. These distributions are further broken down by region, urban status, and school district enrollment size. A detailed school district data table gives the values for 36 selected community social and economic indicators for each U.S. school district with an enrollment of 25,000 or more. (Author/MLF)

**Identifiers**—Pennsylvania (Philadelphia)

This study documents the legal, political, economic, and managerial constraints in the Philadelphia Public School System and traces their impact on the policies and practices of the system. Specifically, the study focuses on collective bargaining relationships and on their impact on the system. The first section outlines the basic constraints that have historically shaped decisions about the compensation and utilization of human resources. This is followed by a discussion of the procedural implications and substantive by-products of collective bargaining in the system. The next three chapters examine the substance of current contracts and the agreements that preceded them. The concluding chapter attempts to place collective bargaining in proper perspective within the larger legal, political, economic, and managerial context and to appraise the prospective significance of collective bargaining for the ability of the schools to meet their basic mission. **Descriptors**—\*Architectural Barriers, Construction Costs, \*Facility Guidelines, \*Facility Improvement, \*Handicapped Students, Higher Education, Institutional Research, \*Needs Assessment, Physically Handicapped, School Community Relationship, School Surveys, Standards, State Legislation

**Identifiers**—Colorado

The procedures, assumptions, and recommendations of a statewide plan for the elimination of architectural barriers in all Colorado institutions

of higher education are detailed. The first sections of the report concern the number and nature of those having physical disabilities, available statistical data on a national and a state level, and arguments for the removal of architectural barriers. Text and illustrations show the accepted national standard relating to barrier-free design of buildings. The major section of the work contains the results of building-by-building surveys to identify architectural barriers on each of the campuses in Colorado. Recommendations for each campus consist of building survey results, recommendations, and estimated costs of barrier removal. Also included in the recommendations for each campus is a summary sheet of campus-wide priorities. The appendixes contain correspondence and forms related to development of the statewide plan, and the Colorado Architectural Barriers Statute. (Author/MLF)

**1975 School Vandalism Survey.**

New Jersey School Boards Association, Trenton.

Pub Date 14 Oct 75

Note—11p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Costs, Police School Relationship, \*Prevention, Questionnaires, School Districts, \*School Vandalism, \*Security, \*State Surveys, Tables (Data)

**Identifiers**—New Jersey

A survey instrument to assess the statewide impact of school vandalism was sent to every public school district in New Jersey. Information was requested on (1) vandalism costs by categories; (2) comparisons on the costs and incidents of vandalism for the years 1972-73, 1973-74 and 1974-75; (3) location and occurrence of vandal acts; (4) methods, techniques, and devices used to reduce the costs of vandalism; (5) security cost data for exterior building lighting, security equipment, break resistant windows, and security personnel; and (6) vandalism and school security policies. The survey results are presented in a table format preceded by a narrative summary and conclusion from the data within the tables. (Author/MLF)

**Identifiers**—\*Illinois

The Illinois Task Force on Declining Enrollments, created by the State Superintendent of Education, was charged with developing recommendations to aid in solving some of the economic problems that the state and local boards face in this era of declining enrollments. This publication provides a summary of the task force's research and outlines its recommendations. It is organized in five sections: enrollments in the past, present, and future; fiscal considerations; staffing considerations; surplus space and program opportunities; and school closing. Educational Facilities, Educational Finance, \*Educational Planning, Elementary Secondary Education, Enrollment Influences, Enrollment Projections, \*Enrollment Trends, Job Layoff, School Buildings, \*School Closing, Shared Facilities, State Aid, Student Enrollment, \*Teacher Supply and Demand

**Identifiers**—\*Illinois

The Illinois Task Force on Declining Enrollments was formed in response to the need for more information about the process of planning and management in the public school system in a period of declining enrollment. The task force had five major purposes: to stimulate greater awareness of the problems and opportunities associated with declining enrollments; to outline some of the major issues and options; to set forth some practical suggestions to local districts; to generate greater planning efforts at the state and local levels; and to develop recommendations for state-level study and action. This report is an edited and integrated version of the reports of the task force subcommittees on enrollment projections, economic issues, the use of unneeded facilities, school staffing, and the effects of reduced enrollments on instructional programs. Four themes run through the discussion—the need for planning; the importance of community involvement in the planning process; constraints, reductions, and barriers; and the opportunities associated with declining enrollments. **Identifiers**—National Diffusion Network

This sourcebook provides brief descriptions of a number of innovative programs that have been approved for dissemination by the Joint Dissemination Review Panel within the Education Division of the Department of Health, Education, and Welfare. The first section presents an array of programs that were being supported as Demonstration Projects during the 1975-76 school year by the U.S. Office of Education. The second section presents shorter descriptions of projects that are also approved for diffusion but, in view of scarce resources, could not be funded during the particular school year. The back of the book contains a list of state facilitators, with names, addresses, and phone numbers. Each facilitator serves as a matchmaker within that state to assure that local education agencies obtain information about and access to those validated innovations that fit identified needs of particular schools, regardless of where in the nation the original program happened to have been launched. The demonstration projects deal with a wide variety of areas: alternative/secondary education, early childhood and parent readiness, the environment, reading/language/mathematics, specialized curriculum/special interests, special education, and training/organizational arrangements. **Identifiers**—\*Planning Programming Budgeting System, PPBS

Educational finance policies have such a critical influence on every educational service and program, on the national economy, on the welfare of individuals, and even on the welfare of the nation itself, that educational finance cannot be studied adequately in isolation from our total social system. Therefore, the authors have used the systems approach in presenting much of the present knowledge of educational finance and many of the major problems and issues in that area. This approach involves an extensive analysis of the economics of education and of the effect of education on the national economy. It implies utilization of the planning-programming-budgeting system or the educational resources management system. Modern fiscal policies for education require long-range educational planning, an essential component of this approach. The study of school finance and business management involves systems analysis and operation research to maximize educational return per unit of financial input. Both administrative policies and the structure of district organization must be appraised in terms of financial efficiency and effectiveness in providing needed educational services. The effects of alternative educational finance models on the equalization of educational opportunity and on equity to taxpayers must be given careful consideration. (Author)

Comparison of Average Salaries of Male and Female Administrators in Michigan Public Schools (1973-1974).

Pub Date 15 Sep 75

Note—10p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

**Descriptors**—\*Administrative Personnel, Administrator Background, \*Comparative Analysis, Equal Opportunities (Jobs), \*Females, \*Males, \*Salaries, School Systems, Tables (Data), Work Experience

**Identifiers**—Michigan

A comparison of the average salaries of male and female administrators was made in relation to assignment, highest degree earned, and professional experience. In the group of 8,071 administrators, there were 6,701 (83 percent) males and 1,370 (17 percent) females. The general pattern is a preponderance of males employed with average salaries substantially higher than those of their female counterparts. (Author/MLF)

The following questions are elaborated on in this speech: (1) Is the discretionary power of local boards of education being eroded? (2) If so, has some of that power been shifted upward to the state and federal legislative branches of government? (3) What is the current status of involvement of the judiciary in the making of educational decisions, particularly as related to the running of schools and the local level? and (4) Is the involvement of the judges, given the present social setting in which educational decisions are being made, out of proportion with the proposition that the three coequal divisions of government (executive, legislative, judicial) are supposed to act as a checks-and-balance system at all times? This is the report of a conference on accountability that was sponsored by the U.S. Office of Education and administered by the Cooperative Accountability Project with the advice and assistance of the National Education Association and the American Federation of Teachers. The purpose of the conference was to provide a meeting place in which teachers, other education professionals, and laymen could enter into substantive dialogue on accountability. It was hoped that those concerned could discuss their similarities and differences and find a means of having a dialogue about those differences. Four principal topics were covered: the goals and objectives of accountability, the means by which the objectives can be accomplished, assessment and evaluation, and the question of who should be accountable, to whom, and for what. Two speakers, one representing teachers, addressed each of the topics and then the participants divided into small groups to attempt to find their areas of agreement and disagreement on the topics. The report is made up of summaries of the speakers, the small-group discussions, and the related events. Also included is an evaluation of the conference and of the positions of those who attended. **Identifiers**—\*Fiscal Neutrality

The United States Supreme Court decision in the Rodriguez case does not make unequal educational opportunity between students any less of a moral injustice. It is immaterial whether these students are in different school districts in the same state, or in different school districts in different states. There is a role for the federal government in reducing the permissible variance of educational expenditures between states. This interstate comparison of permissible variance cannot be easily accomplished without agreement on criteria and increased sophistication of statistical techniques. Several methodologies and criteria that might aid in the measurement of interstate permissible variance are suggested. (Author)

**Identifiers**—Project Common Unity

Presented are 12 readings related to the Common-Unity program for providing recreation or leisure services for the handicapped within the local community. Introductory papers present the philosophical basis of the project (Larry Neal) and summarize the conference proceedings and program (Ted Gordon). Four papers on community education have the following titles: "Community Education—Perspective and Potential" (Edward Olsen), "Community Education and the Handicapped" (Jack Minzey), "Community School" (Alan Baas), and "Community Education and Community Schools" (James Cox). Special education needs and trends are focused on in three papers: "Trends and Issues in Leisure Education for the Handicapped Through Community Education" (Steve Brannan), "Mainstreaming—Fad or Fact? Implications for Community Educators and Recreation Specialists" (Mel Weishahn), and "Concept Normalization" (Jean Edwards). The final section includes three readings on recreation: "Special Community Education for the Handicapped—A Proposed Model to Meet the Total Life and Leisure Needs of the Handicapped Child and Adult" (John Nesbitt), "Leisure and Recreation Services in the Future" (Doug Sessions), and "Therapeutic Recreation Information Center" (Fred Martin). Also included are the conference group reports, a list of participants, a conference summary and evaluation, and a listing of community education regional and cooperating centers. (DB)

**Descriptors**—\*Aurally Handicapped, \*Cognitive Development, \*Deaf Children, Early Childhood, \*Environmental Influences, Exceptional Child Research, Intervention, Maturation, Mothers, Parent Child Relationship, \*Social Influences, Stimulation

**Identifiers**—Piaget (Jean)

Sixteen preschool-age hearing-impaired children were studied to explore the general nature

of their cognitive development and to identify relationships between environmental processes and cognitive development. Data were obtained from administration of the Infant Psychological Development Scale and the Inventory of Home Stimulation (when Ss were 23- to 38-months old); and from administration of the Home Inventory, the Utah Test of Language Development, a structured mother-child interaction task, and a classification task (when Ss were 36- to 54-months-old). Findings revealed that the early cognitive development of deaf children through what J. Piaget terms the sensori-motor stage proceeds quite normally, but that cognitive development which is more clearly dependent on verbal interaction with the environment, or what Piaget terms social transmission, does show a discrepancy when deaf children are compared to hearing children on the classification task. Results suggested that early intervention programs with deaf children need to focus on improving communication abilities and developing curriculum materials which better teach those concepts usually transmitted through social interaction with the environment. **Descriptors**—Aurally Handicapped, \*Deaf, Deaf Children, Early Childhood, Exceptional Child Research, Expressive Language, \*Interaction Process Analysis, \*Language Development, \*Maturation, Nonverbal Communication, Parent Influence, \*Sign Language

Videotapes of a deaf child of deaf parents were used to study the developmental stages and underlying processes involved in the child's acquisition of negation from age 28 months to age 41 months. The S was videotaped in spontaneous interaction with her mother or the experimenter for approximately 1 hour each month, and the films were transcribed into an English gloss notation by a team of deaf adults. Use of the negative headshake, a linguistic component of sign language, was the primary focus of study. Results revealed that the S acquired negation through stages comparable to those involved in hearing children's language acquisition. Findings suggested that the deaf are fully capable of learning to understand and use negation, and that a deaf child of deaf parents should not be considered to be communicating in a primitive or gestural manner if he negates sentences by using only a headshake. **Descriptors**—Anxiety, Dyslexia, \*Emotional Problems, \*Etiology, Exceptional Child Education, Hypnosis, \*Learning Disabilities, Psychotherapy, \*Teaching Methods, \*Theories

Learning disability is suggested to be a dissociative reaction (school shock) similar to shell shock in wartime requiring appropriate theoretical and remedial approaches. Psychoanalytic and learning theory viewpoints are applied to the nature of learning disabilities. Also considered are the relation of anxiety to achievement and hypnosis to dyslexia. It is proposed that the concept of minimal brain damage be replaced by "minimal dissociative reaction." Suggested are such teaching methods as tachistoscopic presentation of reading material, encouragement of anxiety-reducing psychomotor activity (such as gum chewing) during intellectual effort, hand pacing while reading, and male/female teaching pairs. **Descriptors**—\*Auditory Perception, Early Childhood Education, Exceptional Child Research, \*Learning Disabilities, \*Learning Modalities, Primary Education, \*Psycholinguistics, Statistical Data, \*Visual Perception

In an attempt to clarify the phenomena of psychological "process" variables, as applied to children with learning disabilities, a study was made of sensory modality preferences in 64 kindergarten and 64 first grade children. Ss were

given a battery of seven measures grouped under the following four headings: standardized test approach; controlled laboratory approach; classroom-oriented approach; and teacher observation. For each of the seven measures, both a visual and an auditory mode were presented to each child. A series of four analyses was performed. The first series generated descriptive statistics on 81 variables in kindergarten and on 79 variables in first grade. The second series studied the standard z discrepancy scores between auditory and visual performances in the context of several complex factorial designs. The third series used the standard z scores of the second to study the incidence and nature of various types of sensory modality profiles. The fourth series used percentage correct (mastery) scores embedded in complex factorial designs to examine various types of auditory-visual comparisons. (Author/DB)

Identifiers—Neuropsychology

Seventy-five children (mean age of 7.3 years) were referred for evaluation of learning or behavioral deficits. Each child was administered the Reitan Indiana Neuropsychological Test Battery or the Halstead Neuropsychological Test Battery for Children, depending upon age. Intellectual, academic, developmental and social assessments were performed. Parents of the children were provided training in curricula and strategies designed to intervene and remediate in areas of assessed disabilities. The parents were taught behavior management principles and kept records as to their participation. Home visits by the investigators were made on a regular basis. Children were reevaluated on all instruments at the end of a 12-month period. Data derived from this study will provide information as to the effect of intervention programs on neuropsychological functioning. (Author)

Aiello, Barbara, Ed.

Making It Work: Practical Ideas for Integrating Exceptional Children into Regular Classes.

Council for Exceptional Children, Reston, Va.

Spons Agency—Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C.

Report No.—Pub-120

Pub Date 75

Note—112p.

Available from—Council for Exceptional Children, 1920 Association Drive, Reston, Virginia 22091 (\$5.50, Publication Number 120)

Document Not Available from EDRS

Descriptors—Criterion Referenced Tests, Definitions, Elementary Secondary Education, Exceptional Child Education, \*Handicapped Children, Interviews, \*Program Descriptions, \*Program Planning, \*Regular Class Placement, \*Resource Teachers, Teaching Guides

Intended for special education and regular teachers, the guide contains brief articles on the nature of mainstreaming handicapped children; mainstreaming models at the preschool, elementary school, and secondary school levels; specific suggestions for setting up mainstreaming programs, and interviews with five persons involved in mainstream education. The definition, development, and characteristics of mainstreaming are discussed by Jack Birch. Specific programs are described by Eleanor Lewis (Lexington Nursery and Kindergarten School), Robert Prouty (the diagnostic/prescriptive teacher), and Maxine Coumihan (Mark Twain Programs). Readings providing practical information on setting up mainstreaming programs include "How to Set Up a Resource Room with No Money, No Materials, No Nothing" (Barbara Aiello); "Juggling and a Resource Teacher's Time" (Aiello); "Managing Your Instructional Material Dollar" (Sandra Boland); "Preparing Children for a Handicapped

Classmate" (Elizabeth Pieper); "A Collection of Criterion-Referenced Tests" (Joan Knapp); and "The Case for Integrated Schooling" (Lisa Blumberg). Also included are transcripts of interviews with five persons involved in mainstream education: an administrator, a resource teacher, a regular classroom teacher, the parent of a mainstreamed child, and a mainstreamed child. Walton, Wendel K.

A Tympanometry—ASHA Model for Identification of the Hearing Impaired. Project TAMI.

Capitol Region Education Council, Windsor, Conn.

Spons Agency—Connecticut State Dept. of Education, Hartford. Bureau of Pupil Personnel and Special Education Services.

Pub Date May 75

Note—155p.

EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage

Descriptors—Audiology, Audiometric Tests, \*Auditory Tests, \*Aurally Handicapped, Elementary Education, Exceptional Child Research, Guidelines, \*Identification, \*Models, \*Screening Tests

Identifiers—Project TAMI, \*Tympanometry

A model for identification of hearing impairment which combined tympanometry and the puretone procedures outlined by the American Speech and Hearing Association was tested with 8,528 elementary age children from six Connecticut towns. The nine goals of the project included obtaining pass/fail ratios for puretone audiometry within minus 1 percent and plus 3 percent of national prevalence statistics, obtaining a normative data base for a combined puretone-tympanometry model representative of the various populations within Connecticut, and determining the reduction of false positives resulting from a rescreening of all initial screen failures. All goals were met except the goal of having the model adopted in at least two of the participating towns. It was concluded that routine inclusion of tympanometry in hearing conservation programs for schools is both practicable and desirable, and that nursing and hearing personnel can be taught quickly to operate the equipment and obtain reliable data. (Appendixes to the document include statistical findings from the screening, guidelines for puretone testing and tympanometry, and various forms for recording information and for referral.) (LS)

Principles for Collection, Maintenance, and Dissemination of Pupil Records; Operational Guidelines: Department of Pupil Records.

Montgomery County Intermediate Unit 23, Blue Bell, Pa.

Pub Date Sep 75

Note—136p.

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—Exceptional Child Education, \*Guidelines, \*Handicapped Children, \*Information Dissemination, Information Utilization, Parent Role, \*Parent School Relationship, Records (Forms), \*Student Records

Presented are the Montgomery County Intermediate Unit 23 (Pennsylvania) 1975 policy statements and subsequent clarification on collection, maintenance, and dissemination of pupil records in special education. Outlined are procedures for information collection, data classification and maintenance, administration of security, and information dissemination. Sample consent forms are also provided for parents of children in 10 different special class programs. The second pamphlet contains clarifications on such matters as information request procedures, inactive folders, and release of student records. Among 18 appendixes are sample forms for completion by record collections supervisors, parental release of information and a listing for parents of outside agency documents. (CL)

Identifiers—Final Reports

Presented is the final report of a 1974-75 program of home instruction which involved nine preschool hearing impaired children. Described are activities which were conducted under 10 project objectives such as providing speechreading and auditory training, providing language activities, gaining parental interest and involvement, and developing and distributing brochures for parents of exceptional children. Program evaluation procedures and results are discussed. A major portion of the document consists of 10 appendixes which contain materials such as the brochures developed for parents, sample lesson plans, sample preschool program reports (records of daily activities with individual children), end-of-year reports on each of the nine participants, and a weekly and daily time schedule. Descriptors—Adolescents, \*Blind, Childhood, \*Cognitive Development, Cognitive Processes, \*Conduct, Congenitally Handicapped, \*Ethics, Exceptional Child Research, Maturation, \*Moral Development, Visually Handicapped

Identifiers—Piaget (Jean)

The performance of 75 congenitally blind and 75 sighted subjects (6- to 18-years-old) was compared on 32 Piagetian measures of reasoning, moral judgment, and moral conduct. Among major findings were that blind Ss did not achieve the reasoning processes characteristic of concrete operational thought with the facility or completion that would be expected for persons of their age and IQ (an average delay of 8 years was noted) and that few significant differences occurred between the blind and sighted groups on measures of moral judgment and moral conduct.

Deficiencies found in the reasoning of blind Ss indicated a need to provide these persons with opportunities to interact and reason in ongoing situations. (Author/LS)

Described is the 4-year development of a prototype program to train teachers competent in both the academic areas related to the visually handicapped and in orientation and mobility. Teachers with dual competencies were needed to fulfill the educational needs of visually handicapped children in public day school programs in rural, sparsely populated areas. The major portion of the document consists of a detailed discussion of three phases of program development (planning, a pilot model, and a prototype model) and includes lists of competencies and course requirements and results of program evaluation after each phase. Also included are a summary of the current employment status of 22 program graduates and brief descriptions of the 22 final prototype courses. (LS)

**Identifiers**—Token Economy

A program for modifying classroom behavior of emotionally disturbed and other children (in grades 3 through 7) based on modeling is described, and specific behaviors and evaluation items for the program are provided along with their rationale. Research is reviewed in Part I and topics are covered, such as: the three effects of modeling (acquisition of a novel response, inhibition or activation of an already learned behavior, and stimulation of an observed behavior); four processes involved in observational learning (attentional, retention, motor reproduction, and incentive and motivational processes); the use of a token economy; and pre-entry skills necessary to participate in modeling behaviors (auditory acuity, visual acuity, and ability to decode English words into appropriate syntax and literal meaning). For each behavior specified in Part II, information is usually given on what the child is observing, the level of development involved in the activity, and examiner observations used to evaluate the behavior. **Identifiers**—Louisiana State University Baton Rouge

In order to compose a picture of the typical master's level graduate of special education programs at Louisiana State University (Baton Rouge), a follow-up study involving 52 recent graduates was conducted. Each graduate was mailed a questionnaire designed to gather data in five areas: personal information, employment status, financial information, professional and educational information, and student evaluation of the curriculum. Conclusions from survey results included the following: 79 percent of special education graduates were working full time in programs for exceptional children; graduates were working with a variety of children in numerous types of settings; graduates were generally active in professional organizations that serve exceptional children; graduates reported that preservice training contributed positively to job competency; and recommendations for program changes were made such as adding coursework in such areas as remedial reading and counseling. An introductory overview of the Information System for Adaptive, Assistive and Recreational Equipment (ISAARE) is accompanied by the locator index containing information on 666 types of equipment for physically handicapped students. It is explained that the federally funded program was designed to improve the information base with which school personnel select, locate and purchase adaptive and assistive equipment. Components of the system are said to include a glossary, outline index, and locator. Provided is a description of setting up and implementing the system, including acquiring manufacturers' catalogues and updating information. In the locator, an alphabetic, outline, and manufacturer's cross index are presented for each of six functional categories: existence (including feeding, elimination and protection of body surfaces); communication (including verbal and nonverbal expression); insitu motion (including static positioning and movement); travel (including nonambulatory horizontal and vertical transfer); adaptation to, and of the environment (including indoor and outdoor conditions); and rehabilitation (including testing, exercise, and training). Listed are the names and addresses of 237 manufacturers and distributors. (CL)

Described as part of the Information System for Adaptive, Assistive and Recreational Equipment are equipment items for physically handicapped pupils in the functional areas of existence, equipment and adaptation. Reviewed in the existence section are such items as assistive food containers and container stabilizers, feeder accessories, bowel and bladder appliances, bathtub equipment, special clothing and dressing aids and sleeping accessories. Included among communication equipment described are telephone centered devices, speech producing devices, and nonvocal writing aids. Considered are such adaptation devices as powered grass and hedge clippers, special automobile controls, furniture adaptations, and cooking devices. Each category is outlined and tabbed, and individual items are summarized, illustrated, and cross referenced according to manufacturers information in the Locator book (EC 080 752). (CL)

In a continuation of the Information System for Adaptive, Assistive and Recreational Equipment, described are aids for physically handicapped pupils in the functional areas of insitu motion, travel, and rehabilitation. Insitu motion equipment items are seen to include static positioning devices (such as tilt tables, stand-in tables, and protective aids) and movement devices to stabilize and support as well as to provide motive power. Included among travel aids described are ambulators, crutches, walkers, canes, motorized and nonmotorized wheelchairs, and devices for elevating and transferring the individual. Reviewed are such rehabilitation aids as evaluation instruments, active and passive exercise aids, balance and ambulation training equipment, and therapy items such as mats and treatment tables. Each category's components are outlined and systematically tabbed; and individual items are summarized, illustrated, and cross referenced according to manufacturers information in the Locator book (EC 080 752). **Identifiers**—Wisconsin

Described in the handbook is the Merrill Area (Wisconsin) Public Schools program to prepare handicapped youth for occupations in recreational-environmental vocations. In Part I, a school forest summer curriculum workshop already tested with handicapped children is outlined in terms of purpose and philosophy (to increase the special vocational education opportunities for handicapped youth through job training in the outdoor laboratory environment), 25 objectives (such as to understand and respect the need for ecological controls), curriculum sequence, format, methods, evaluation, and resources. Included in Part II on developing programs and services for the handicapped are brief sections on the classification, incidence, and educational provisions for mentally retarded, hearing impaired, speech impaired, visually impaired, emotionally disturbed and socially maladjusted, crippled and health impaired, and specifically learning disabled children. The remainder of the document is devoted to information necessary to filling out such forms as program applications, vocational education applications, expenditure and travel reimbursement reports, and encumbrances reports. Sample forms and applications are also provided. (SB)

**Descriptors**—Educational Alternatives, \*Emotionally Disturbed, Exceptional Child Education, Handicapped Children, \*Social Attitudes, \*Theories, \*Trend Analysis

Presented in the fourth volume in a series are a discussion of critical issues related to child variance and predictions for how society will perceive and respond to child variance in the future. Reviewed in an introductory chapter are the contents of the first three volumes which deal with conceptual models, interventions, and service delivery systems. A chapter entitled "The New Multirealist" explores such concepts as divergent views of reality, authentic being and the normal man, and theoretical concepts of intervention. Included in a chapter on "Counterinstitutions" are discussions of free clinics, alternative schools and

radical mental health care. Final chapters contain a summary of concepts examined throughout the book and predictions for trends such as an erosion of the belief in "normality" as used in the area of child variance. (LS)

Identifiers—Elementary Secondary Education Act Title III, Elementary Secondary Education Act Title IV, ESEA Title III, ESEA Title IV, \*New Jersey

Contained in the catalogue are descriptions of 16 New Jersey public school regular and special education programs which have been shown to be successful, cost effective, and exportable. Considered are such aspects as essential program elements, goals, evaluation design, costs, dissemination services, and contact information. Among programs described are an individualized adapted physical education program for handicapped children, a diagnostic-prescriptive reading program for grades K-3, a high school government course, a humanities program for grades K-6, an educational and health program for pregnant students, and a learning center approach and prescriptive teaching workshop regarding mainstreaming of special education students. Among four appendixes is a list of projects funded for national dissemination in states other than New Jersey. (CL)

The Deaf Child as a Linguistic Minority.

Pub Date 75

Note—16p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Achievement, Aurally Handicapped, Cultural Factors, \*Deaf, Early Childhood Education, \*Educational Methods, Elementary Secondary Education, Exceptional Child Education, Intelligence Level, \*Language Development, \*Minority Groups, Oral Communication, Sign Language

Identifiers—\*American Sign Language

The author offers support for viewing the deaf child as a member of a linguistic minority and considers how this situation affects education of the deaf. Deaf persons are discussed in terms of their intellectual abilities, educational achievement, English competence, and the sociolinguistic factors which point to the existence of a deaf community. American Sign Language (ASL) is seen to have its own grammar and to be the native language of the deaf. Use of ASL (rather than the oral approach) is advocated in the education of deaf children, and procedures similar to those used in bilingual educational programs are recommended. (LS)

Identifiers—Minnesota (Saint Paul)

Described is a regional program in post secondary vocational training for deaf students established at the St. Paul Vocational Technical Institute (TVI) to demonstrate that deaf students can be successfully trained in an environment normally serving the hearing. Included is background information on the problem of providing post secondary opportunities for the deaf, St. Paul TVI, the host facility, and the staff. Supportive services for the deaf discussed include elements of the preparatory program (such as mathematics and auditory training), and services within the regular program (such as counseling, interpreting and tutoring). Related programs such as in career media for the handicapped are reported, and the 420 deaf students matriculated since 1969 are viewed in terms of admissions, demographic data, a communication survey, and job placement and followup. Dissemination of information about the program and staff travel are also reviewed. Appendixes include a form used to survey students' communication, a form for evaluation of the preparatory program by students, and a list of additional forms available on request. (LS)

**Using Art to Evaluate and Develop Cognitive Skills: Children with Communication Disorders and Children with Learning Disabilities.**

Pub Date 75

Note—27p.; Paper presented at the American Art Therapy Association (6th, Louisville, Kentucky, November 13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**\*Art, \*Cognitive Development, Elementary Secondary Education, Exceptional Child Research, \*Learning Disabilities, \*Mentally Handicapped

**Identifiers—**\*Communication Disorders

Described are two studies which used art therapy to improve cognitive and language abilities in a total of 45 children with learning difficulties or communication disorders. The art procedures focused on the development of three types of concepts: the concept of a class or group of objects, concepts of space, and concepts of sequential order. A case history is provided of a 13-year-old S of the first study, a boy with language impairments, severe hearing loss, and an IQ of 43, who showed significant improvement on nine cognitive skills after nine art lessons. In the second study using 11 children with learning disabilities the children improved significantly in the three focal areas of cognitive development. Also included are a sample teacher evaluation form, a summary of results of the second study, a summary of responses by 14 parents of children in the second study, and teaching suggestions. (DB)

**Document Not Available from EDRS**

**Descriptors—**Abstracts, Administration, Educational Programs, \*Educational Trends, Exceptional Child Education, Financial Policy, \*Financial Support, \*Handicapped Children,

Program Budgeting, Program Effectiveness, Research Reviews (Publications), \*Special Education, \*State Aid

Presented is a report which reviews and evaluates existing literature and current state practices in financing special education for handicapped children. For each of the four major issues—programming, cost determination, level of funding, and funding formulas—selected research is reviewed, implications of the research are analyzed, and suggestions for additional research are given. Abstracts of 65 relevant documents are provided in a separate section of the document. It is noted that the report can be useful to policy makers in making special education finance decisions by identifying the key policy decisions in funding programs for the handicapped, delineating relevant considerations for each decision, and providing criteria to evaluate the effectiveness of special education delivery schemes. **Public Policy and the Education of Exceptional Children.**

Council for Exceptional Children, Reston, Va.

Pub Date 76

Note—378p.

Available from—Council for Exceptional Children, 1920 Association Drive, Reston, Virginia 22091 (\$13.95, Publication No. 123)

**Document Not Available from EDRS**

**Descriptors—**\*Child Advocacy, Court Cases, Due Process, Educational Accountability, Elementary Secondary Education, \*Equal Education, Exceptional Child Education, Federal Legislation, Guidelines, \*Handicapped Children, \*Legal Responsibility, \*Public Policy, State Legislation, Trend Analysis

Intended for persons concerned about public policies for exceptional children and those engaged in creating public policy, the book provides guidelines and examples of appropriate policies for exceptional children. Considered in Section 1 are the varying rights that advocacy groups have won for exceptional children in the legislatures, courts, and administrative agencies including the right to education, due process, least restrictive alternative, nondiscriminatory testing, and confidentiality. Current developments in public policy at the federal, state, and local levels are examined in Section 2 with significant federal laws provided or digested. Trends in state law are reviewed, a model state law is provided, and the issue of financing special education is analyzed. Discussed in Section 3 are the varying avenues of change: statutory law, administrative policy, attorneys' general opinions, and litigation. Section 4 provides information on advocate needs to effect change including techniques of political action, the problem of priority setting, and the impact of time and circumstances on policy decisions. Professional rights and responsibilities are discussed in the final section including such questions as whether a professional is solely an employee of a system or whether he is also an advocate for children, and the positive and negative impact of collective bargaining on exceptional children. **Identifiers—**California

Described in the booklet are program guidelines for serving trainable mentally retarded

students in California public schools. Considered are the effects of changing public attitudes and legislation on program development, and reviewed are legal provisions regarding financing, identification, assessment, and placement of trainable mentally retarded students. A section on physical facilities covers such aspects as location and building characteristics. Analyzed are general characteristics of trainable retarded pupils, and suggested are criteria for instructional grouping. Discussed are essential training goals, including development of personal and social competency, and specific curriculum planning areas, such as self-help and communication skills. Program evaluation components are said to include assessments of products and the delivery system. (CL)

**Programs for the Educable Mentally Retarded in California Public Schools.**

California State Dept. of Education, Sacramento. Bureau for Mentally Exceptional Children.

Pub Date 74

Note—96p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors—**\*Educable Mentally Handicapped, \*Educational Programs, Exceptional Child Education, \*Guidelines, Mentally Handicapped, \*Program Design, Program Evaluation, State Legislation, State Programs

**Identifiers—**California

Prepared by the California State Department of Education, the booklet reviews program components for the educable mentally retarded (EMR). Legal provisions cited include identification, assessment, and reevaluation procedures. Such administrative aspects as financing and supervision are considered. The characteristics and learning styles of the EMR and the implications for curriculum are reviewed. A section on instructional models, goals, and objectives contains information on administrative and teaching models as well as on development of curriculum goals and behavioral objectives. Program evaluation is seen to involve product evaluation and curriculum validation. (CL)

**A School Psychologist's Perceptions of Learning Disabilities in Three-Year-Old Children in an Early Childhood Center.**

Pub Date Oct 75

Note—20p.; Paper presented at the Illinois Council for Exceptional Children (Chicago, Illinois, October 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Case Studies, Exceptional Child Education, \*Identification, \*Learning Disabilities, Preschool Education, \*Screening Tests

Discussed are issues in screening children for potential learning disabilities at the nursery school level. Definitions and incidence estimates of learning disabilities are evaluated, and present screening programs are reviewed. Three teacher administered screening tests are described: Peabody Picture Vocabulary Test, Beery Developmental Test of Visual Motor Coordination, and Caldwell Preschool Inventory. A child study is given in which a 3-year-old child suspected of having a learning disability turned out to be at high risk because of lack of opportunity to develop personal social skills. Strongly recommended are the reviewing of test manuals before undertaking a screening project; gaining the cooperation of parents in remediation of and home management techniques; increasing cooperation among pediatricians, schools, and parents; and encouraging teachers to grow professionally. **Descriptors**—Exceptional Child Research, \*Handicapped Children, Post Secondary Education, \*Social Adjustment, \*Teacher Attitudes, Universities

**Identifiers**—Attitude Toward Handicapped Individuals Scale, Is Of Identity Test

A study involving 60 university students in teacher training investigated the difference between individuals with high and low attitude acceptance toward the handicapped in relation to social adjustment. Ss were administered the Is of Identity test (IOI) to obtain measures of social-personal adjustment and the Attitude Toward Handicapped Individuals scale (ATHI). Although findings showed that there was significant difference between high and low scoring ATHI groups in social adjustment, both high and low ATHI groups scored high on the IOI. Evidence suggested that the notion of maladjustment for rejecting Ss (low ATHI scorers) could not be sustained, and further research should use both handicapped and nonhandicapped samples and should consider different criteria for measuring adjustment. The Cottage A Ward Behavior Modification Project at the Orient State Institute was designed to implement behavior modification techniques with 67 retarded child residents. Major project objectives included developing self-help skills (such as toilet training); eliminating undesirable behaviors (such as head banging); teaching behavior modification training skills to the institutional staff; developing an evaluation system for the programs; and developing an administrative structure for implementation and maintenance of the program. Methods for attaining these goals included individualized self-help programs for residents; structured hours for practice of residents' social skills; lecture-discussion sessions and a practicum for trainers; a training proficiency scale to evaluate trainers; and use of a comprehensive behavioral checklist to evaluate residents. Presented is a curriculum guide for teaching basic life skills to students with exceptional educational needs (primarily the moderately to severely retarded). Separate sections deal with the following persisting life needs: communicating ideas, understanding one's self and getting along with others, traveling and moving about, adapting and functioning in one's physical environment, keeping healthy, living safely, contributing to one's financial maintenance, assisting in homemaking, using desirable recreation sources for leisure time, and developing creativity through art and music. Each life skill area is analyzed in terms of content areas, developmental levels and curriculum items; curriculum items are broken down into skill descriptions and instructional activities with information on appropriate equipment and materials. It is explained that the guide's format is designed to serve as a functional assessment and record keeping device to aid individualized programming. (CL)

**Descriptors**—Early Childhood Education, Exceptional Child Education, \*Handicapped Children, Home Instruction, Infancy, \*Interdisciplinary Approach, Occupational Therapy, \*Parent Education, Physical Therapy, \*Program Descriptions, Stimulation, Student Evaluation, \*Teaching Methods

Presented is the guide to the Illinois project entitled "An Inter-Disciplinary Approach to Early Education of Handicapped Children Ages 0 - 3 Years" which includes information on funding and public awareness, diagnosis and evaluation, child development-home program, speech and language, structuring the day program, job descriptions and training, and parent involvement. It is explained that physically handicapped, developmentally delayed or retarded, speech and hearing impaired, behaviorally or emotionally disturbed, and multiply handicapped children are provided complete evaluation services and the following program options: 0-3 homebound program, public school early education programs, nursery schools, other agency day programs, allied agency's developmental training program, out patient occupational therapy, and out patient physical therapy. Reported are statistics showing rises in mean percentage of functioning (functional level divided by chronological age) between first and last testing for program participants. Provided are charts, forms, outlines, and diagrams for such program components as personnel, developmental evaluation, hearing tests, observational guidelines, behavioral objectives, developmental tasks, vocabulary lists, language evaluation tools, language definitions, guidelines for class organization and management, job descriptions, summaries of inservice training experiences, and outlines for parent groups. **Descriptors**—Dyslexia, Early Childhood Education, Elementary Education, Exceptional Child Education, \*Identification, \*Learning Disabilities, Perceptual Development, \*Prevention, \*Program Descriptions, Program Evaluation, \*Remedial Instruction, Summer Programs

Reported are the final 2 years of a program which provided identification and remediation services for 60 potentially dyslexic preschool children and 45 dyslexic elementary grade children. Described for the preschool program are materials and evaluative devices and methods of remediation which stressed development of perceptual motor skills, applied skills, gross motor skills, and free play. Detailed are findings showing that the experimental group made 44 positive gains (out of 50 possible test scores) over the control group, 27 of which were significant, especially in such areas as the Wechsler full scale IQ, letter discrimination, word discrimination, copying, and figure ground perception. It is explained that methods of remediation in the 6-week program for elementary grade dyslexic students included daily instruction in reading, perceptual motor skills, gross motor skills, English composition, mathematics as well as weekly field trips. Reported are conclusions showing that experimental students gained significantly over control students in such areas as figure ground perception, arithmetic computation, reading accuracy, and visual tracking. An additional section provides subjective observations and interpretations on such program aspects as teacher qualities, pupil attitudes, test anxiety and overloading, self esteem, professional and public awareness, and problems such as failure to properly mainstream pupils. **Descriptors**—Behavior Problems, Elementary Secondary Education, \*Etymology, Exceptional Child Research, \*Followup Studies, Infancy, \*Intelligence Level, \*Learning Disabilities, \*Nutrition, Physical Development

**Identifiers**—\*Pyloric Stenosis

Explored were the effects of starvation during infancy on the learning abilities of 50 children when evaluated between 5 and 14 years of age. All Ss had suffered from pyloric stenosis, a condition which prevents passage of food from the stomach, in infancy for periods ranging from 2 days to 3 weeks. Ss were given five tests of various learning abilities, were evaluated for physical development, and were rated by parents and teachers for social maturity and school behavior. Scores of Ss were compared with those of 44 siblings and 50 control Ss (matched for age, sex, and parental education). Significant correlations ranging from .25 on the Vocabulary Test to .43 on the Auditory Memory Test were found between severity of starvation and scores on all tests of learning abilities with Ss who had had a greater than 20 percent weight deficit in infancy showing significantly poorer scores. Analysis of individual tests suggested that starvation within the first 3 months of life has a long lasting effect on short term memory and attention. Starvation onset between 21 and 30 days of age was significantly related to school problems. Physical development was not found to be affected by early starvation. (Author/DB)

**Academic, Behavioral, and Psychological Responses of Hyperactive Children to Stimulant Medication.**

Pub Date Aug 75

Note—78p.; Master's Thesis, Northeastern Illinois University

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—Academic Achievement, \*Behavior Change, \*Drug Therapy, Exceptional Child Education, \*Hyperactivity, Learning Disabilities, Psychological Characteristics, Research Methodology, \*Research Reviews (Publications), \*Stimulants

The paper reviews educational, medical, and psychopharmacological research concerning the academic, behavioral, and psychological responses of hyperactive children to stimulant medication. In Chapter 1 on the problem and plan of study, brief sections are included on the educational community's lack of knowledge regarding stimulant medication, the procedure used for collecting data, and research methodology in psychopharmacological studies (including guidelines for studies with groups of children and individuals). Covered in Chapter 2 are the academic, behavioral, and psychological responses to stimulant medication, and responses (such as unorthodox interpersonal relations) which need treatment other than drugs. Among conclusions presented in Chapter 3 are that many hyperactive youngsters show positive academic, behavioral, and psychological responses to stimulant medication; that if the child has experienced much school failure, he will need guidance in thinking of himself as a successful person; and that parents of hyperactive children find counseling helpful in relieving guilt and improving their relationship with their children. Appended are a list of seven distinct patterns of performance with their characteristic drug effects, a graph of the effects of stimulant drugs on psychological tests, Conners' Teacher Rating Scales, position papers from the American Academy of Pediatrics and the American School Health Association, and the Report of the Conference on the Use of Stimulant Drugs in the Treatment of Behaviorally Disturbed Young Children. **A Comparison of Visual and Auditory Channels in Learning Disabled and Control Children.**

Pub Date 75

Note—17p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., April 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Auditory Perception, Elementary Education, Exceptional Child Research, \*Learning Disabilities, \*Learning Modalities, \*Paired Associate Learning, \*Visual Perception  
Visual and auditory paired-associate learning tasks were presented to 125 fourth grade children (45 learning disabled, 39 border line learning disabled, and 41 nonlearning disabled). The visual task produced a greater number of correct responses than did the auditory task. There were no differences among groups on either task. Scores on the Illinois Test of Psycholinguistics were analyzed both between and within learning classifications and were correlated with scores from both paired associate tasks. It was hypothesized that the nonlearning disabled children rely on an auditory mode of processing information, while the learning disabled children rely either on a visual or a mixed auditory-visual mode. Vellutino, Frank R.

Psychological Factors in Reading Disability.

Pub Date Apr 74

Note—28p.; Paper presented at the American Educational Research Association meeting (Chicago, Illinois, April 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Dyslexia, \*Etiology, Exceptional Child Research, Learning Disabilities, Linguistics, Perception, Remedial Reading, \*Research Reviews (Publications), Sensory Integration, \*Theories, \*Verbal Ability

Reviewed are three types of etiological theories of dyslexia: theories of visual perceptual deficit, theories of difficulties with sensory integration, and theories of verbal deficiencies. The author concludes that recent findings weigh heavily against perceptual deficit theories of reading disability as suggested by S. Orton and others; that the equivocal findings relating to the sensory integration theory of H. Birch suggest the need for further research; and that the author's research and that of others support the verbal or linguistic deficit theory. Noted are practical implications of the findings such as the importance of including all (graphic, phonologic, semantic, and syntactic) aspects of words and sentences in remedial reading instruction. Descriptors—\*Daily Living Skills, \*Educable Mentally Handicapped, Exceptional Child Research, \*Home Economics, Institutional Environment, Mentally Handicapped, \*Program Effectiveness

Presented is the final report of the Home Life Program, a demonstration project (1971-74) designed to teach basic academic and homemaking skills to 100 educable mentally retarded institutionalized persons. The project is noted to have been successful in teaching new skills and in improving self-help skills and appropriate behavior. It is explained that skills learned in school led to increased work responsibility acceptance, decision making, and acceptable social behavior. Also described is the change in institutional philosophical orientation from a medical to a more socially oriented model. (Author/CL)

Presented is the fifth in a series of reports on a 4-year longitudinal evaluation of preschool programs for hearing impaired children. It is explained that the seven programs studied emphasize either an oral-aural, Rochester (oral-aural plus finger spelling), or total communication method of instruction; and that the current report focuses on the characteristics of the sample (60 Ss) as a whole. Included in the report are a brief review of literature on preschool programs for the deaf, and descriptions of the programs and subjects studied. Reported are results of the following types of evaluation: Illinois Test of

Psycholinguistic Abilities, academic achievement, communication battery, articulation, cognitive development measures, Matching Familiar Figures Test, regular class subjects, Brown Parent Attitude Scale, Semantic Differential, and classroom observation. Major study findings are summarized such as that reading skills were comparable to those of hearing peers, and that there was an overall lack of improvement in articulation scores across the 3 years. Appendixes include examples from some assessment instruments used in the study, the Parent Information and Attitude Scale, and longitudinal test data for Ss with unique class placement. (LS)

Identifiers—Informal Assessment

Presented is a guide designed to provide information on 27 perceptual-motor and psychomotor tests and scales for use with handicapped children so that valid and informed decisions can be made in selecting test instruments for prescriptive and diagnostic purposes. The guide is comprised of one section on motor ability, perceptual-motor development, and psychomotor tests and another section on locally developed assessment devices. Included are a brief discussion of the concepts pertaining to perceptual-motor testing and activities; background information to help in selecting tests and in devising instruments based on the best individual components of standardized batteries; brief summaries of various psychomotor and perceptual-motor tests and scales (including information on test availability, what and how the test measures, administrative considerations, and general comments); and representative samples of locally-designed testing instruments with samples of how school districts have devised their own methods of scoring, recording, and tabulating both individual and group results of various measuring devices. It is noted that selective use of summary charts can be helpful in devising items and batteries to evaluate specific strengths and weaknesses of handicapped individuals, and that information provided in the publication can be used to plan hundreds of physical education activities. College Courses: One Method of Facilitating the Intellectually Talented.

Pub Date 75

Note—17p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., April 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Achievement, Acceleration, \*Educational Programs, Exceptional Child Research, Followup Studies, \*Gifted, \*Mathematics, \*Program Effectiveness, Secondary Education, Social Adjustment, Student Characteristics, \*Universities

Identifiers—Study of Mathematically Precocious Youth

A followup study involving 2,021 students identified as academically gifted by the Study of Mathematically Precocious Youth (SMPY) was conducted to determine the effectiveness of college courses for facilitating the education of intellectually talented junior and senior high school students. Advantages of a college course over acceleration, student requirements for participation in the college course program, and college enrollment procedures were considered when advising a student eligible for college courses. Of the 1,510 students returning the College Information

Questionnaire, 83 students had taken college courses. Among findings were that students' grade-point average (GPA) for the college courses taken was 3.57 (on a four-point scale) and that SMPY students rarely encountered social difficulties in the college classroom. (SB)

An Analysis of Perceptions and Attitudes Toward the Concepts "Disabled" and "Handicapped" and the Effects of Pre-Structured Definition Upon the Concepts.

Pub Date Nov 75

Note—12p.; Paper presented at the Annual Meeting of the California Educational Research Association (54th, San Diego, California, November 12-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Attitudes, \*Concept Formation, \*Definitions, Exceptional Child Research, Handicapped, \*Handicapped Children, \*Semantic Differential, Special Education, Undergraduate Study

The semantic differential technique was used in a study involving 40 undergraduate trainees in the area of special education to analyze the concepts "disabled" and "handicapped" and the effects of structured knowledge or definition on the participants' perceptions of and attitudes toward the concepts. The Semantic differential consisted of bipolar adjectives scaled to measure the semantic space of the concepts "handicapped" and "disabled" in terms of three factors (evaluation, potency, and activity). Ss were divided into two groups: during assessment, group 1 was given predetermined and differing definitions of the concepts measured, while group 2 was administered only the assessment instrument. Among results were that there was a significant difference between the three factors of evaluation, potency, and activity, regardless of concept; that group 1 (definition of concepts) was slightly more positive in response than group 2 (no definition of concepts); and that the concept "handicapped" was received more favorably than the concept "disabled," although the difference was not significant. (Author/SB)

Creative Imagination and What We Can Do to Stimulate It.

Pub Date Oct 75

Note—19p.; Paper presented at the National Association for Gifted Children (22nd, Chicago, Illinois, October 24, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Creative Ability, \*Creative Thinking, Exceptional Child Education, \*Gifted, \*Imagery, \*Imagination, \*Teaching Methods

Suggested are ways to stimulate imagination, creativity, and imagery in children. Recommended for developing imagination are the thinking strategies of breaking away from the usual and commonplace, restructuring familiar elements, and synthesizing elements. Discussed are the production of creative analogies (such as personal, direct, symbolic, and fantasy analogies). The use of figures of speech (such as simile, metaphor, and personification) is seen to foster imagery. Implications of imagery research and creative thinking strategies for teachers are noted. (DB)

Identifiers—Final Reports

Presented is the final report of a demonstration project in Child Advocacy operated in a rural area of a large suburban county. A discussion of the project's history focuses on such topics as the formation of an interagency task force for emotionally disturbed youth, funding possibilities, needs assessment, and the introduction of a local family service program. Use of the systems approach in the program is described and evaluated, and application of the approach towards development of programs for emotionally disturbed children, child care, and therapeutic services is detailed. Among major project accomplishments reported are the establishment of two early childhood programs (day care centers), two nonprofit citizen corporations (health services and child care), a ministerial association, and a proposal for a community resources center for children and adolescents. Summarized are the perceptions of target area residents and agency personnel regarding the external and internal accomplishments of the Child Advocacy project. Eight final recommendations are listed including the need for sharing of responsibilities among agencies and with parents. Appendixes include a child advocacy system flow model and a prospectus for a community resources center for children and youth. (LS)

Report No.—DHEW-OHD-75-69

Pub Date 75

Note—48p.

Available from—U.S. Government Printing Office, Washington, D.C. 620-047-2125-31

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Child Abuse, Exceptional Child Services, \*Guidelines, \*Health Personnel, \*Identification, Interdisciplinary Approach, \*Intervention, Medical Evaluation, Medical Treatment, Nursing, Physicians, Prevention

Identifiers—Neglected Children

Provided for physicians and nurses is information on the diagnostic process and treatment programs for abused and neglected children and their families. An overview of the diagnostic and treatment process is outlined and general principles, such as the importance of early diagnosis, are discussed. The remainder of the book focuses on four phases: the emergency room or office phase, the diagnostic assessment phase, the acute treatment phase, and the long term treatment phase. Topics covered include the members and functions of a hospital or community-based child protection team, factors involved in the child abuse or neglect pattern, the special problem of failure to thrive, and the role of the juvenile courts. Long term treatment guidelines focus on five stages of the World of Abnormal Rearing cycle including unrealistic expectations of children and missed childhood. (LS)

Descriptors—Day Schools, \*Educationally Disadvantaged, Educational Objectives, Elementary Education, Exceptional Child Research, \*Learning Disabilities, \*Program Effectiveness, \*Program Evaluation, Public Schools

Presented are procedures and selected results from an evaluation and audit of the Special Day Program for elementary level educationally handicapped students in a California school district. It is explained that the purpose of the three special day classes was to provide an intensive remedial program for students with severe learning disabilities. Described are three alternative program evaluation services, the reasons for selection of an educational program audit approach, and the seven stages in the audit process. Provided for selected program objectives are examples of interim and final evaluation and audit report statements. Among findings reported are that individual instructional activities were prescribed for each student in the program and that objectives were met regarding student gains on the Metropolitan Achievement Test and the Gilmore-Oral Reading Test. Suggested references for an educational program evaluation and audit are listed. Appendixes include a social adequacy scale and examples of objectives from the audit plan. (LS)

Identifiers—\*Developmental Disabilities, Piaget (Jean)

Many preschool children with developmental delays in cognition and language are in the preoperational stage as defined by Jean Piaget's theory of cognitive development. The preoperational stage is divided into the preconceptual and the intuitive phases. During the preconceptual phase, the preschooler is unable to form true concepts and often reasons in the form of unrelated judgement without logical organization. In the intuitive phase, the child's reasoning is tied to his perceptions and therefore his thinking is often distorted. Implications for parents and teachers are that in a special preschool class, activities should be of a wide variety and should include exploring with all the senses (such as imitating the actions of people, animals and objects); that at home, parents can emphasize real experiences (including planting seeds and cooking); and parents and teachers should use language related to what the child is experiencing as well as to his general level of language functioning. Descriptors—Adolescents, \*Body Image, Childhood, Demography, \*Diseases, Exceptional Child Research, Questionnaires, \*Self Concept, Special Health Problems

Identifiers—\*Kidney Disease

As part of a larger study of pediatric and chronic disease and the family, 124 children (10-18 years old) who were chronically ill with kidney disease (n#72) or were a year or more post-transplant (n#52) were included in a study focusing on the effects of chronic kidney disease and transplantation on children's psychosocial development. Ss along with their mothers and the "normal sibling" closest in age were interviewed with a survey questionnaire. The major difference revealed between the chronically ill, the transplanted children, and the controls involved body image, specifically satisfaction with looks. Compared to controls, the ill children were significantly less satisfied and the transplanted patients most dissatisfied because of growth retardation and the cushingoid appearance which results from steroid therapy. External ratings of disease severity reported by the physician and mother (including seriousness of condition, number of hospitalizations, and frequency of symptoms) were correlated with various aspects of the self; and in general, objective severity of the disease does seem to have disadvantageous effects, although the tendency to hide one's feelings is most significantly and consistently affected. Findings showed that the child's own perception of the disease as a significant problem seems to have a more pervasive effect on adjustment than objective ratings of disease severity. A set of background demographic factors was investigated, and it was found that variables generally affect sick and normal Ss similarly with urban children having higher self-esteem than rural children. Report of a Study of the Special Education Program in the Montgomery County Public Schools.

Montgomery County Board of Education, Rockville, Md.

Pub Date Mar 70

Note—156p.; Best copy available

EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage  
Descriptors—Administration, Ancillary Services, Attitudes, Community Resources, Educational Facilities, Exceptional Child Education, \*Handicapped Children, Home Instruction, Organizational Communication, Parent School Relationship, Program Budgeting, \*Program Evaluation, \*Special Education, Special Education Teachers, Student Evaluation

Identifiers—\*Maryland (Montgomery County)

Presented is a report on a study to evaluate the special education program in Montgomery County (Maryland) Public Schools and to make recommendations for future program planning. An introduction to the study is provided in Chapter I which covers background information on Montgomery County (such as demographic data), a brief review of the development of special education in the U.S., and the history of Montgomery County's Department of Special Education. Sections in Chapter II include a brief program history, a statement on the method of data collection, the major findings of the evaluations, and recommendations for each of the eight programs of special education: auditory handicapped, emotionally handicapped, mentally retarded, orthopedically handicapped, home instruction, speech and hearing handicapped, special learning disabilities, and visually handicapped. Reported in Chapter III are the findings from consultants' responses to questions in the areas of instruction, organization, staff, pupils, auxiliary personnel and services, housing and physical facilities, budget, community resources, parents, communication, attitudes, and research. Among conclusions on each of the twelve categories presented in Chapter IV are that while some curriculum guides had been prepared and distributed to teachers, their use was limited; and

that one of the program's deficiencies was the almost complete lack of programs for inservice education. (SB)

Identifiers—Final Reports

Presented is the final report of a project which investigated the current status of 1711 Anglo, Black, and Spanish-surnamed California educable mentally retarded (EMR) students reassessed by court order in 1969-72. It is explained that Ss were matched on sex and ethnicity with regular class and non-decertified EMR students. Attempts to identify differences at EMR placement of those later decertified vs. those not are said to have produced no results, forcing a conclusion of educational equivalence at that time. It is noted that regular class means on current Metropolitan Achievement Test scores were highest, EMR lowest, but regular class and decertified distributions greatly overlapped; both were several grade levels below nominal placement. Among results reported are little ethnic difference and little difference between regular class and decertified Ss on teacher ratings of citizenship and achievement, and the same broad range in social acceptance and adjustment for decertified Ss as regular class matches on teacher questionnaire responses (both means tending to be under average for their classes). It is concluded that while decertification did not make the students average, the students nevertheless tended to succeed nearly as well as regular class matches. (Author/CL)

Identifiers—Project PRICE

The bibliography developed by Project PRICE (Programming Retarded in Career Education) lists approximately 150 instructional materials and 50 publications regarding career education for educable mentally retarded students. Materials are arranged according to each of 22 competencies identified by Project Price in the areas of daily living skills (such as managing family finances and utilizing recreation and leisure time), personal-social skills (including obtaining a positive self concept and achieving independent functioning), and occupational guidance and preparation (such as selecting and planning appropriate occupational choices and developing the necessary manual skills and physical tolerances required in the competitive labor market). Listings usually provide age level designation, cost, name of publisher or supplier and a brief annotation which includes suggested uses, populations, and reading or grade level. The section on publications contains annotated citations for general career education, career education for handicapped persons and educable retarded persons, relevant journals, retrieval sources and career exploration and work sample packages. Described are the construction and analysis of three play learning centers for preschool mentally retarded and cerebral palsied children, and pre-adolescent and adolescent emotionally disturbed children. Section I of the report provides an introduction on the importance of play, research on playground equipment, considerations in designing play learning centers, and existing playgrounds designed for the handicapped. Presented in Section II is information on such construction aspects as framing materials, surface coverings, materials for fastening, and recommended tools. The following three sections discuss the design process, construction and construction costs, recommended materials, and descriptive data on facility use for each of the three play learning centers: United Methodist Preschool Play Learning Center for mentally retarded children, United Cerebral Palsy Play Learning Center, and the Residential Treatment Center for emotionally disturbed children. A brief section on recommendations for further research is also included. Appended is the program for information dissemination associated with the play learning research and demonstration project, a playground design checklist, and detailed construction plans for each of the three play learning centers. Identifiers—Frequency Contours, Speech Recognition, Syntactic Boundaries

This report covers research conducted between July 1972 and March 1973. Experiments were conducted on the automatic detection of constituent boundaries and location of stressed syllables by analysis of fundamental frequency and energy contours, for recordings of six talkers reading the Rainbow Script, two talkers reading a paragraph composed of monosyllabic words, and ten talkers involved in speaking sentences pertinent to man-computer interaction. A program was implemented which successfully detects over 80 percent of all boundaries between major syntactic constituents, by the use of fall-rise valleys in fundamental frequency contours. A panel of three listeners provided judgments of which syllables were stressed, unstressed, or reduced in the speech texts. Questions yielded more stress level confusions than declaratives or commands. An algorithm was devised for locating stressed syllables as high energy portions of speech with rising or nonfalling fundamental frequency. This algorithm succeeded in locating 85 percent of all syllables that had been perceived as stressed by two or more listeners. Further work will involve implementation of the stressed syllable location algorithm, refinements of syntactic boundary predictions and detection procedures, further tests with designed speech texts, and applications to distinctive features estimation and syntactic parsing. **Some General Characteristics of Interrogative Systems. Working Papers on Language Universals, No. 1.**

Stanford Univ., Calif. Committee on Linguistics. Pub Date Nov 69

Note—26p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Intonation, Language Patterns, Language Research, \*Language Universals, Linguistics, Linguistic Theory, Modern Languages, Morphemes, \*Morphology (Languages), \*Sentence Structure, Suprasegmentals, Surface Structure, \*Syntax

Identifiers—\*Interrogation (Language), Questions, Tags, Word Order

This paper discusses interrogative structures, based on the results and conclusions derived from comparing the interrogative systems of 79 randomly selected languages. The paper begins by listing a number of generalizations about interrogative structures based on disparate observations in the field. These generalizations constitute the basis for undertaking the systematic research reported here. The paper is divided into the following sections: (1) Classification of Q(Question)-features, reflected in the organization of the rest of the paper; the classification is followed by a list of questions which the rest of the presentation attempts to answer; (2) Intonation (including other suprasegmentals)—among clause-level Q-features, intonation holds the first rank although it may be accompanied by some other Q-marker; (3) Inversion (and word order in general)—of one or more constituents of the sentence with respect to their normal declarative order, (4) Tags—another clausal type interrogative device, always clitic, usually enclitic to a sentence, (5) Interrogative Particles—the most widespread device after intonation, (6) Interrogative Words—such as WH words in English, and (7) Summary Statements—a recapitulation of the findings on interrogative systems. The statements are valid for the language samples used in the study. Three appendices give summaries of findings and research methodology information. (Author/TL)

**Identifiers**—Quebec French

This study relates the suffix “-age” to “-able,” “-eux,” “-ment,” “-Xtion,” and “-ure” in Quebec French. Morphologically, some “-age” suffixals which can be denominal in Quebec French can only be deverbal in European French. Semantically, “-age” deverbals are subdivided into “factive” and temporally relevant suffixals. In this latter class the temporal relationship can be anteriority, simultaneity, and posteriority. Nouns ending in “-ure” are most often resultative, whereas nouns in “-age” designate results only if they also designate actions. “-Xtion” and “-ment” are more direct rivals. Where “-age” designates the entire process or duration of an action, “-ment” designates the individual acts making up the process or a singular act. The suffix “-age” has become specialized for action, and “-ment” and “-Xtion” for result of an action. Deverbals in “-eux” usually have a corresponding noun in “-age,” which often has a pejorative connotation. Adjectives in “-able” are more productive in Quebec French than in European French. Deverbals in “-age,” “-eux,” “-able” have the same surface stem as that of the present participle of the base verb. This mode of formation is common to standard and Quebec French. The productivity of the “-age,” “-eux,” and “-able” deverbals is correlated with the simplicity of their formation. (Author/CLK)

**Descriptors**—Descriptive Linguistics, Form Classes (Languages), Indo European Languages, Language Research, Linguistic Theory, Morphology (Languages), \*Persian, \*Semantics, \*Sentence Structure, \*Syntax, \*Transformational Generative Grammar, Verbs

This study is concerned with the description of compound sentences, relative clauses, and complement clauses in Standard Persian within a generative-transformational grammar. Compound sentences are divided into conjunctive, disjunctive, and adversative types on the basis of the semantic relations they express. A conjunctive clause is either non-emphatic or emphatic, a disjunctive clause is either alternative or ultimative, and an adversative clause is either contrastive (oppositive) or exceptional. Relative clauses are divided into attributive (restrictive) and appositive (non-restrictive) relative clauses with the conclusion that an attributive relative clause modifies an antecedent which has a multiple referent [-unique], while an appositive relative clause modifies an antecedent which has a unique referent [-unique]. Both relative clauses result from the reduction of a non-emphatic conjunctive compound with a coreferential noun. Ezafé constructions (Adjectival and genitive) are shown to be formed by the reduction of a non-emphatic conjunctive compound with a coreferential noun in which the second clause contains the verbs “budan” (“be”), or “dastan” (“have”). The complement clauses are analyzed as sentences that serve as an argument (supplement) to a specific class of impersonal, intransitive, and transitive verbs. (Author) intransitive, and transitive verbs. (Author)

The Teacher's Manual of “Methodology for Teachers” was written for two purposes: (1) to provide Korean English teachers with a simple, yet complete guide to methodology appropriate for teaching English in Korea; and (2) to serve as a methodology text for those Korean English teachers who study methodology in inservice training programs with Peace Corps/Korea TESOL volunteers. The Teacher's Manual, written in Korean, is used with the Volunteer's Manual, which is written in English for these inservice training programs. The Teacher's Manual is divided into nine Units: Introduction, Pattern Practice, Utterance/Response, Dialogue, Reading, Visuals, Sounds, Testing, and Writing and Homework. The Introduction contains a set of exercises that communicate to the teachers the objectives of the inservice training program and how they will study methodology during the program. The other Units contain one “Process” each, i.e., one approach for teaching a pattern practice, utterance/response, dialogue, etc. Each Unit also contains a “Rationale” and a “Notes” section. The Rationale introduces the Unit and the Notes section gives more detailed information about the Process in the Unit. (Author)

**Descriptors**—Indo European Languages, Language Research, \*Language Usage, \*Language Variation, \*Mauritian Creole, Phonology, Sociolinguistics, Speech, Structural Analysis, \*Syntax, \*Vocabulary

**Identifiers**—Bhojpuri, Language Contact, \*Linguistic Borrowing

A situation of linguistic contact often produces various degrees of change in at least one of the

languages involved. It is shown that the syntactic, as well as the phonological and the lexical, components are the locus of interference from one language on the other. Features of interference are described as part of a systematic pattern build on a strict hierarchy of occurrence. The study takes as an example two languages spoken in Mauritius. Bhojpuri, an Indo-Aryan dialect, appears to be undergoing a rapid evolution under the influence of the island's dominant language, Creole (French based). An implicational scale is set up, based on speech samples, to show which features of Creole interference in Bhojpuri imply others: in the variety of Bhojpuri which is the least influenced by Creole, only lexical items naming modern concepts are found. The variety of Bhojpuri which is the most influenced by Creole contains syntactic transfers, phonological borrowings, and words belonging to the 100-word list of the lexico-statisticians. The in-between varieties are specifically defined by the order in which innovations appear on the scale. In this way, the scale of interference represents the systematic pattern of change which Bhojpuri appears to be undergoing. (Author)

**Identifiers**—\*Hungary

This paper explores the differences between the understanding or knowledge of certain social rules, and their use, as seen in pronoun selection, by children in two different social settings within the same culture area. Different philosophies concerning the interdependence of social, cognitive, and linguistic development are reviewed. The specific study described involved three age groups of Hungarian children living in two different locations. They were required to complete a multiple-choice test and a role-playing test, designed to examine the interrelationships between the acquisition of social and linguistic rules, and the development of logical structures, based on the complexity of the Hungarian personal pronoun system. It was assumed that different social environments affect both the acquisition of sociolinguistic knowledge and role-taking ability, so that the two areas chosen differed in the areas of the adult role system and the amount of verbal and social interaction to which the children were exposed. Results indicate that though there are noticeable differences in the overall performance of the two groups, both groups performed better on the multiple-choice test than in role playing. Social environment has limited effect on knowledge of appropriate forms, while it definitely influences ability to use proper forms. (CLK)

**What Languages Do Bilingual Children Use with Whom? Research Evidence and Implications for Education.**

Pub Date Mar 75

Note—14p.; Paper presented at Meeting of Teachers of English to Speakers of Other Languages (Los Angeles, California, March 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Academic Achievement, Bilingual Education, \*Bilingualism, \*Bilingual Students, Cubans, English (Second Language), Language Patterns, Language Proficiency, \*Language Usage, Mexican Americans, Puerto Ricans, \*Social Environment, Sociolinguistics, \*Spanish Americans, Spanish Speaking

There is wide variability in the type and degree of bilingualism exhibited by persons from the

various Spanish-speaking groups in the USA. Within particular subcultural groups, there is significant variability among individuals in the use of language patterns. An empirical study investigated the use of language pattern in specified social contexts among two generations in three distinct Spanish-speaking groups: New York Puerto Ricans, Central Texas Mexican-Americans, and Miami Cuban-Americans. A total of 295 families participated in the study. The Central Texas Mexican-Americans showed the greatest degree of displacement of Spanish by English as well as by "Spanglish," and the New York Puerto Ricans the greatest degree of "mother tongue" maintenance. Previous research suggests that language use is positively related. Contextual language use is an important factor which interacts with language learning and with academic achievement. It behooves teachers of persons from Spanish-speaking backgrounds to assess the language proficiency and the contextual use of language patterns of their students and to gear their curriculum accordingly. Contextual language use may be assessed by teachers through interviews and by behavioral observations, and the resulting data may be used to individualize instruction. (Author/CLK)

Descriptors—\*Bilingual Education, Bilingual Teachers, Chinese, \*Chinese Americans, Civil Rights, \*Educational Discrimination, Educational Legislation, Educational Policy, English (Second Language), \*Equal Education, Language Instruction, Language Planning, Second Language Learning, \*Supreme Court Litigation

Identifiers—\*Lau v Nichols

This document reviews the arguments and the ruling in the Lau v. Nichols case, and the general legal foundation for bilingual education. On March 25, 1970, a suit was filed by 13 non-English-speaking Chinese students in the District Court in San Francisco, on behalf of nearly 3,000 Chinese-speaking students, against the San Francisco Unified School District. The complaints were: (1) non-English-speaking students were being denied their rights to education because they couldn't function in the medium of instruction; and (2) these students were being doomed to becoming dropouts, and to unemployment, as a result of their language problems. Basic issues were whether the San Francisco school district should be required to provide special instruction in English, and whether instruction should be handled by bilingual Chinese-speaking teachers. While the school district and the federal court argued that the school district had no responsibility to rectify the situation, the Supreme Court ruled that the failure of the school system to provide English-language instruction to non-English-speaking students constitutes denial of opportunity to participate in the educational program. Furthermore, it was recognized both at the federal and state level that to be effective, the instruction must be bilingual. (CLK)

Some Aragonese Morphophonemics. Colorado Research in Linguistics, No. 2.

Colorado Univ., Boulder. Dept. of Linguistics.

Pub Date Oct 72

Note—50p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Consonants, Descriptive Linguistics, \*Generative Phonology, Linguistic Theory, \*Morphophonemics, Phonetic Analysis, Phonological Units, \*Regional Dialects, \*Spanish, \*Stress (Phonology), Suprasegmentals, Syllables, Vowels

Identifiers—\*Aragonese

The stress patterns of Aragonese are examined within the framework of generative phonology, based on data taken from the traditional works of Haensch, Badia Margarit, and Alvar Lopez. Stress placement is shown to be regular. Two sets of

rules which account for the data are compared. In the preferred solution, a penultimate stress rule, a rule of stress shift, and other independently motivated rules account for the various stress patterns in Aragonese. Dialectal differences in stress placement are shown to result from rule reordering. (Author/KM)

Systematic Performance Analysis in Foreign Language Instruction.

Pub Date Aug 75

Note—24p.; Paper prepared for the World Congress of AILA, the International Association of Applied Linguistics (4th, Stuttgart, August 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Computer Assisted Instruction, Diagnostic Teaching, \*Educational Diagnosis, \*Error Patterns, Evaluation Methods, German, Individualized Instruction, \*Language Instruction, Language Learning Levels, \*Linguistic Performance, Models, Second Language Learning, Student Evaluation, Verbal Communication

Identifiers—\*Error Analysis

This paper reports on the development of an error-coding instrument and a computerized continuous feedback system for the diagnostic evaluation and remedial treatment of unstructured second-language performances and the use of such a system in an instructional setting. The system does the following: it allows quick, objective, accurate, and detailed evaluation of "creative" written and spoken German; it provides student performance files in the structural and phonological elements of the language that can be updated as required; it allows accurate performance-to-performance comparisons of progress; it permits the instructor to determine quickly the learning status of an individual student, a group of students, or the entire class, and subsequently to design appropriate exercises for that particular target group; and it allows students to judge their performance from the same criteria which were available to their instructor for marking. Feedback procedures and a tabulation of errors for three levels of German language instruction are presented and their systemic implications for the design of pedagogical grammars are discussed. A Pragmatic Approach to Language Acquisition.

Pub Date [75]

Note—18p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Child Language, Deep Structure, \*Intonation, \*Language Development, Language Learning Levels, Language Patterns, Language Research, Linguistic Theory, Morphology (Languages), \*Psycholinguistics, Sentence Structure, Syntax, \*Transformation

Generative Grammar

Identifiers—\*Pragmatics

An extreme view of language acquisition sees base structures as innate, and acquisition of the grammar of a particular language as a process of learning the transformation rules needed to get from base structures to surface structures of adult native speakers. Base structures are understood to most resemble simple-active-affirmative-declarative sentences (SAADs) on the surface level. This has resulted in the treatment of SAADs as basic and normative, and other surface forms as derivative. This paper challenges this approach from a pragmatic standpoint, and attempts to explain units of linguistic expression as instruments to fulfill intentions. The propositional interpretation for linguistic description is not considered to be a norm for acquisition. Work done by Tonkova-Yampol'skaya defines intonation as the beginning of speech development, the crux of that approach being the distinction between natural and intentional sounds. This natural/intentional distinction is drawn on the basis of relaxed as opposed to controlled articulation. The conclusion is that intentional articulation begins at the onset of the babbling stage and that request-demand and interrogation intonemes increasingly dominate infant speech in the second year. Suggestions as to how the transition occurs from initial speech patterns to SAAD forms are made, with specific reference to focus. (CLK)

Identifiers—\*National Defense Education Act Title VI, NDEA Title VI

This report presents the results of the ninth survey of foreign language entrance and degree requirements in United States colleges and universities that grant a bachelor of arts degree. The survey was conducted in 1974 by the Modern Language Association, and was directed at foreign language department chairmen. Responses were received from 98.8 percent, or 1,285, of the 1,300 departments to which questionnaires were sent. The study offers an innovation in that chairmen were requested to indicate which specific fields at their institutions require a language for a B.A. major. Table I summarizes changes in institutional requirements between the fall of 1970 and the fall of 1974, while table II summarizes the status of entrance and degree requirements at the 1,285 institutions. Table III outlines departmental foreign language requirements for the B.A. major, while the fourth and fifth tables outline foreign language entrance and degree requirements for the B.A. degree for the years 1957, 1966, 1971 and 1975. A directory of the institutions, listed by state, follows the tables. The supplements to the directory provide information concerning changes in foreign language entrance and degree requirements in colleges and universities since 1971. A sample survey questionnaire is also included. (CLK)

This supplement to the previous Prince George's County Schools Career Education Guide -- Foreign Languages is intended to help teachers accomplish the purpose of the Guide, which is to re-orient the material of lessons in basic texts toward career education concepts, when applicable. The intrinsic cultural goals of foreign language education should be continually reflected, and the career education focus contributes another dimension to the material to be learned. The guide urges interdisciplinary cooperation between foreign language instructors and other teachers and should help teachers in all disciplines to expand students' awareness of foreign languages and their importance in career education. Whereas the Guide itself documents the possible relationship of each French and Spanish textbook unit to career education, this supplement presents actual exercises for French and Spanish which may be substituted for specific exercises in the texts, or may be used to comple-

ment such exercises. For both French and Spanish: (1) a number of units were selected from certain basic texts; (2) certain exercises in the units were chosen for re-orientation without changing the grammatical structures to be drilled, and a few paragraphs were re-written with a career education focus; (3) supplementary vocabulary is provided for occupational names; and (4) classroom activities are suggested after each unit. If children in a bilingual education program are to be equally competent in Spanish and English, there is a clear need for teaching Spanish. This can be done indirectly, by presenting curriculum material such as math, science and art bilingually or in Spanish, by telling stories in Spanish, and by using Spanish for various classroom and playground activities. The indirect method should be supplemented by a direct one, with Spanish language lessons. The present curriculum presents a set of 75 lessons designed to provide three years' work in Spanish as a second language and to be started in kindergarten or in the first grade. A language pattern for each lesson is provided and the outline for each lesson consists of the language patterns to be covered, materials needed, and teaching procedures. Various kinds of oral exercises are described, including repetition drills, substitution drills, chain drills and dialogue drills, along with suggestions for carrying them out. Record sheets are designed to record the evaluation of a child's performance, and review lessons are incorporated in the curriculum. The curriculum is designed to include the participation of bilingual students and monolingual Spanish speakers. Reading and writing activities are included more frequently as the curriculum progresses. (CLK)

Current publications do not cease to stress the unfortunate fact that language enrollments are declining; this paper is an exception to the prevailing pessimistic trend. Its aim is to describe the success of the first and second year German language courses taught at Middlebury College during the summer of 1975. This was an intensive program with at least four hours of formal instruction per day. It exposed the students to various cultural aspects of contemporary Germany by drawing on the expertise of the regular undergraduate faculty and the visiting faculty members from Europe of the German graduate school, and by showing the students current TV material taped at the University of Mainz as well as using films of the "Guten Tag" and "Guten Tag-wie geht's" series. Because of budget cuts and copyright restrictions, it would be difficult to duplicate the program in all its details at another institution; the following description can, however,

serve as an example of a successful total immersion program. (Author)

This paper discusses the growing dissatisfaction with language laboratories for foreign language instruction, and suggests that more lively materials should be developed for laboratory use. A contextualized approach is suggested, whereby an anecdote, song, essay or poem is used as the basis for a variety of exercises. Calendars upon which important dates are indicated can also be used with accompanying tapes. The paper provides samples from tapes made for adult students of English at the intermediate level, and describes how the tapes can be used to the best advantage. Exercises include repetition drills, question answering, substitution drills, and memorization. There are also exercises geared for developing writing skills. (CLK)

**Identifiers**—\*Esperanto, Europe, Interlanguage, United States

Second language instruction in the U.S. and Europe is in difficulties. The choice of a second language is arbitrary and the motivation dubious. In Europe and now also in the U.S., attention has turned to the planned interlanguage Esperanto, which offers a maximally regularized structure, is considered "easy" by learners, and has the motivational factor of politicoethnic neutrality. Bernateinian educational reformers in Germany have suggested the adoption of Esperanto, which appears only to have an elaborated code, to help extend the linguistic repertoire of pupils whose native German is largely the elaborated code. The morphology, syntax and especially orthography of Esperanto are also a more useful in-

troductory to general language principles than the complex, aberrant, atypical English and French. Recent and current experiments in Europe and proposed experiments in the U.S. are described here. The subject is of significance for second language acquisition theory, learning motivation, and language pedagogy. (Author/KM)

**Descriptors**—\*Communication (Thought Transfer), \*Context Clues, Descriptive Linguistics, Language Patterns, Language Research, Language Usage, Linguistic Theory, Morphology (Languages), \*Nominals, \*Semantics, Sentence Structure, \*Swahili, Syntax

This paper defines the grammatical role of a particle in Swahili in terms of the semantic information which it contributes to all utterances in which it occurs. The particle -A occurs in the syntactic configuration Noun 1 -A Noun 2 and has been traditionally described as reflecting relations of possession and attribution between the two nouns in construct. By identifying the meaning-carrying function of this particle in communication, it becomes possible to understand how speakers are able to employ a single linguistic form to convey a wide variety of messages. In explaining these possibilities, context is crucial. A premise of the paper is that the differences observed in the various contexts of -A enable speakers to communicate different messages with the single form. "Context" in this usage may be linguistic or non-linguistic. According to differences in context, the meaning of -A is manipulated to express what initially appears to be totally different relationships between the two nouns linked by -A. However, it is shown that the form has essentially one communicative value,

meaning, and that the different messages result from inferences on the part of speakers and hearers alike about the precise nature of the message conveyed by -A in a given context. (Author/CLK)

Identifiers—\*Hong Kong

This article describes an undergraduate course in creative writing offered by the Department of English at the University of Hong Kong. Most students in the course have Chinese as a native language and have received their secondary education in English. They have had extensive practice in writing English in connection with their studies. The course is offered during the last two years of a three-year degree program, and the actual writing instruction is preceded by exposure to various literary styles and by analysis of contemporary English writings. The student is allowed to concentrate on one genre or experiment with several. This paper specifically deals with prose works, and focuses on the special problems faced by the students as a result of having to write in a second language. Many of these problems are directly related to the setting, the characters and the themes that the students choose, which can be grouped into the western-oriented, the traditional Chinese-oriented, and the present-day-oriented. The language necessarily varies according to a number of factors, including age, sex, educational level, social status, and geographical origin. Students experience more problems in capturing the language of situations unfamiliar to them than with technical writing details. (CLK)

Identifiers—\*Micronesia

This article reviews the history of bilingual-bicultural education in the Trust Territory of the Pacific Islands. The U.S. government has administered the area since 1945. The original educational policy called for bilingual education with use of the local languages at the elementary level, but implementation was hampered by budget limitations. Native Micronesians also felt they were being discriminated against by not receiving sufficient English instruction. Other problems included the choice of an orthography for the native languages (each of which is briefly described), development of extension materials, the fact that not all native languages belonged to the same language families, and resistance on the part of the American staff to learning the local languages. Despite arguments in favor of native language literacy, English was eventually introduced in the first grade. The local languages were reintroduced into elementary education in 1967, and the arrival of the Peace Corps volun-

teers in 1968 markedly affected both attitudes toward local languages and implementation of the policy. The 1968 Pacific Language Development Project helped develop dictionaries, orthographies, and grammars. Increased Trust Territory administration budgets and federal legislation in support of bilingual-bicultural education finally led to the implementation of policies that had existed since 1945. (CLK)

Identifiers—\*Alaska

The purposes of this paper are to: (1) describe the general linguistic situation in Alaska, (2) describe the bilingual education situation, and (3) discuss the effectiveness of the bilingual education programs and give an idea of the potential of bilingual education as a social force in Alaska. Much of the information is summarized in a number of tables. Table 1 is a classification of the 20 distinct Alaskan languages into major linguistic families, with an approximate number of living speakers per language. Three basic types of language communities are distinguished (table 2): (1) monolingual native, including fluent native language speakers of all ages; (2) bilingual, having few or no native language speakers under age 10; and (3) monolingual English, with few or no native language speakers under age 30. A short history of the development of bilingual education programs in Alaska is provided, and statistics are presented and discussed concerning the numbers of school-age children receiving bilingual education and the relative proportions of bilingual programming for the three types of communities (tables 3 and 4). Various tools used for evaluating the effectiveness of the program, including assessment of literacy, numerical, and linguistic skills, are discussed and summarized in four additional tables. Children in bilingual programs appear to perform significantly better than children in non-bilingual programs. (CLK)

Identifiers—Asia

This paper presents an overview of the English teaching situation in Asia, with particular emphasis on Hong Kong, Indonesia, Japan, Korea, Malaysia, the Philippines, the Republic of China, Singapore, and Thailand. A distinction is drawn between ESL countries, in which English instruction begins at the elementary level and is frequently used as the medium for other subjects (Hong Kong, the Philippines, Singapore), and EFL countries, in which English is taught as a foreign language, usually beginning at the secondary level, and where the medium of instruction is the national language (Indonesia, Japan, the Republic of China, and Thailand). The common

objectives of English instruction are: (1) helping students to develop cultural awareness of people in countries where English is a native language, (2) helping students see the necessity of studying English as a medium of international communication, (3) enabling students to use English for communication, (4) developing the desire to increase one's knowledge of English, and (5) enabling students to continue study at higher levels of education. Unofficial objectives include enabling students to pass college and university entrance exams, and enhancing employment possibilities. Problems in the areas of teacher training, teaching methods, and materials development make for large discrepancies between these objectives and the actual situation. (CLK)

Identifiers—\*India

This article discusses the language planning problems that India faces. The distribution and usage of the various languages are outlined. There is considerable linguistic heterogeneity, with 80 languages currently being used as media of instruction at least at an elementary level, and 14 languages being used at the secondary level. Since language has become a political issue, there is a need for legislation determining the role of language in public spheres of communication such as education and administration. The main problems revolve around a confrontation between tradition and modernity concerning the role of language in education. The basic issues concern: (1) the objectives of education, (2) the role of language in education, (3) the choice of the medium of instruction, (4) requirements qualifying a language as a medium of instruction, and (5) the pace of change. The established elite generally opposes the use of regional languages and mother tongues as media of instruction; it fears a lowering of standards and wants languages of wider communication for international interaction. Defenders of the use of regional languages are in favor of cultural regeneration and cohesion at a national level. It is suggested that the implementation of bilingual education at the secondary level would contribute to the solution of India's language problems. (CLK)

Speech of Mentally Disabled Children.

Pub Date 24 Oct 75

Note—13p.; Paper presented at Mid-American Linguistics Conference (University of Kansas, Lawrence, Kansas, October 24-25, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Child Language, Grammar, Language Development, \*Language Handicaps, Language Research, Mentally Handicapped, \*Neurolinguistics, Psycholinguistics, \*Retarded Speech Development, Syntax, \*Verbal Development

The study summarized in this paper deals with the grammatical analysis of the spontaneous speech of approximately 150 children who are classified as mentally disabled; educable (I.Q. range 50-80). The performance of these mentally disadvantaged children is compared with the performance of 200 normally developing children by using a clinical procedure for estimating syntactic development in children's spontaneous speech. The analytical procedure followed is that presented in Laura Lee's "Developmental Sentence Analysis" (1974). At the present time the knowledge concerning dysfunctions of auditory language is based primarily on data from adults who have acquired language and subsequently lost a portion of it. Most of the literature speculates that mentally disabled children undergo a "

delayed" language development and have a linguistic system that corresponds to younger normal children. The findings discussed in this paper indicate that there are significant linguistic differences between the speech of mentally disabled children and the speech of younger normal children. The two groups are paired by means of a developmental sentence score which determines overall sentence complexity. A four-year longitudinal study of a subgroup of these mentally disabled children indicates that there is a developmental plateau beyond which these children did not progress. (Author)

This guide is addressed to teachers and/or school administrators who may have non-English-speaking Vietnamese and Cambodian children in their classrooms. The guide describes certain interference problems involved in learning a second language, as well as a number of psychological and cultural factors affecting the learning process. A suggested schedule and organization of instruction and specific activities and techniques for teaching English as a second language at the kindergarten level are also presented. (TL)

The sequence in which sounds, structures, and vocabulary are presented is important in teaching a second language efficiently. The guidelines given here for the teaching English pronunciation and grammar in the kindergarten are based on that premise. The guidelines are given in four sections: (1) general, for all direct language instruction; (2) how to teach the sounds of English, including suggestions for drills; (3) various structured activities for teaching the sentence patterns of English; and (4) language drills and games for the teaching of pronunciation difficulties specific to Vietnamese students. (TL)

Proficiency, Language Skills, \*Language Tests, Measurement Techniques, Preschool Education, Refugees, Second Language Learning, Student Evaluation, Syntax, Test Bias, Test Construction, \*Testing, Test Validity

This guide first points out the difficulty and the lack of reliability involved in using tests to evaluate the abilities of children from linguistically and culturally diverse backgrounds. Suggestions are then given for using existing evaluation techniques to test the English language proficiency of children at kindergarten level. The following are the main points emphasized: (1) keep tests short, (2) keep them simple, (3) keep them pleasant, (4) test in small groups, and (5) tape record all speech samples. Suggestions for testing the recognition of contrastive sounds, grammatical structures, and sound production in English conclude the guide. (TL)

Oral language development in early childhood education is concerned with conceptual development as well as with skill formation. There seems to be an order in which most children learn to verbalize basic concepts. This guide lists classroom activities that may be used to facilitate and enhance the conceptual development of kindergarten children in heterogeneous groups which include children who are just learning English. The activities are grouped in the following main categories: (1) naming people and objects; (2) following directions; (3) describing actions in progress; (4) describing positional relationships; (5) describing objects; size, color, shape and texture; (6) making comparisons; (7) identifying groups; (8) giving bases for grouping; and (9) telling stories. ism, \*Bilingual Education, Cambodian, \*Curriculum Guides, Curriculum Planning, Educational Administration, \*English (Second Language), \*Indochinese, Language Instruction, \*Refugees, School Administration, Social Integration, Vietnamese

This guide is intended to assist school administrators in their initial planning for meeting the needs of Vietnamese and other Indochinese refugees entering their schools. To insure that the students can participate in the activities of the school and community as rapidly as possible, teaching the English language must be given high priority, and at the same time the students' cognitive development must be monitored. The guide answers the following questions: (1) Can the school expect Indochinese children to adjust to the school without special provision? (2) How much English can we expect Vietnamese students to know when they come to the school? (3) What models exist for organizing instruction in English for speakers of another language? (4) How much time should be budgeted for the teaching of English? (5) What pitfalls should a school avoid in attempting to meet the English needs of Indochinese students? (6) Where can a school turn for help in teaching English to Vietnamese students? An annotated bibliography follows the text. (Author/TL)

This guide addresses itself to elementary school teachers who may have Vietnamese and/or Cambodian children in their classes. The guide gives pointers on how to establish and maintain communication with the children and emphasizes the important role the teacher will play in the children's happiness and success in this country. The following suggestions are made: (1) use the services of a Vietnamese-speaking teacher or teacher aide, if one is present in the school; (2) use peer group instruction in the child's language wherever possible; (3) both English-speaking teachers and students in class would do well to learn a little Vietnamese or Cambodian; (4) use simple and basic English in talking with the child; and (5) teach him English as a second language as efficiently and as rapidly as possible. An annotated bibliography follows the text. (Author/TL)

Descriptors—\*Cultural Background, Cultural Context, Curriculum Design, Curriculum Guides, \*Educational Counseling, \*Educational Principles, Elementary Education, \*Elementary School Curriculum, Guidance Counseling, Indochinese, Refugees, Relocation, \*Student Placement, Vietnamese

Identifiers—\*Vietnam

This guide reconstructs the curricula taught in Vietnam at the elementary level. It includes the underlying educational principles and lists the subjects along with the number of hours they are taught. The curriculum for each of the first five compulsory grades is presented separately, and four charts give overall statistics. The intent of the summary is to familiarize American educators with the national educational system of Vietnam so that they will better understand the background of Vietnamese children. This understanding will facilitate the difficult job of student counseling and placement. (TL)

The purpose of this bulletin is to give the American with no prior experience in teaching English as a Foreign Language (EFL) some idea of the range of EFL textbooks, and what they are like. It points out that most EFL texts published in America in the last 15 years are based on the audio-lingual method and that they are developed with one of the following categories of students in mind: (1) elementary students, (2) junior high or high school students, or (3) adults. The bulletin discusses such topics as: (1) what the EFL textbook does for you, the most important things being the sequencing of materials and the selection of vocabulary; (2) materials specifically geared to Vietnamese; and (3) language materials developed for other problems. (Author/TL)

Identifiers—\*Khmer

The purpose of this bulletin is to provide the American educator or sponsor with a set of reading passages in Khmer (the language spoken in Cambodia), so that he will have some means of determining whether or not his Cambodian students can read Khmer. Three short passages have been selected, each given in the Khmer alphabet and in its romanized translation: (1) a passage from an elementary school textbook; (2) a passage from a secondary school textbook; and (3) for adults, a passage from a Cambodian newspaper. Instructions, to read the passage slowly out loud, are also given in Khmer. The American educator or sponsor can give the appropriate passage to his Cambodian student or friend, and can follow the transliteration as the Cambodian reads the passage. In this way he can determine whether the Cambodian can read, and also get a rough idea of his speed and fluency. Notes on the Khmer alphabet and on the transliteration are also provided to aid in the use of this guide. (Author/TL)

ing, \*Teaching Guides, Teaching Methods, Tone Languages  
Identifiers—\*Black Tai

The purpose of this guide is to: (1) point out those differences between Black Tai and English which will cause difficulties for the Black Tai-speaking students of English, and (2) outline the most effective ways of helping the student overcome these difficulties. The first section is a contrastive analysis of the phonologies of Black Tai and English, presented in three parts: (1) sounds which occur in similar patterns in both languages, (2) sounds which occur in English but not in Black Tai, and (3) sounds which pattern differently in Black Tai and English. A note on intonation follows this analysis. The guide ends with suggestions and advice about how to teach English pronunciation. This includes suggestions for class preparation and for the adaptation of existing ESL materials. (Author/TL)

**Modern Arabic Literature 1800-1970: A Bibliographical Survey of Works in English. Final Report.**

Spons Agency—Institute of International Studies (DHEW/OE), Washington, D.C.

Bureau No—1-1042

Pub Date Dec 75

Contract—OEC-0-71-3577

Note—84p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Arabic, Authors, \*Bibliographies, Doctoral Theses, Drama, \*Fiction, \*Literature, Middle Eastern Studies, Nineteenth Century Literature, \*Nonfiction, Poetry, Resource Materials, Translation, Twentieth Century Literature

This bibliographical survey of modern Arabic literature, 1800-1970, has two main purposes: (1) to assess the manner in which Arabic literature is received, viewed or evaluated in Western (primarily English) sources, and (2) to determine the gaps, points of emphasis or directions which characterize Western scholarship in the field. The 891 entries include both general and scholarly works in the form of articles, books, dissertations, and translations. The major headings are: (1) bibliographies; (2) cultural background; (3) general works on modern literature; (4) drama; (5) fiction; (6) poetry; (7) authors, with the sub-headings (a) playwrights, (b) novelists and short story writers, (c) poets, (d) others; (8) Mahjarite (Syrian/Arab-American) writings, with three sections concerning three major writers, Gibran, Naimy, and Nihani; (9) North African literature, (10) Palestinian themes and Arab-Jewish relations, and (11) Dissertations. **Non-Participle "Done" and Non-Productive Classification.**

Pub Date Oct 75

Note—26p.; Paper presented at Colloquium on New Ways of Analyzing Variation in English (4th, Washington, D.C., October 24-25, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*American English, Descriptive Linguistics, Dialect Studies, Form Classes (Languages), Language Classification, Language Research, Language Usage, \*Language Variation, \*Regional Dialects, \*Semantics, Southern States, Syntax, \*Verbs

Identifiers—\*Appalachian English

"Done" occurs outside of the participle paradigm in several varieties of English particularly those associated currently or historically with the South. This feature is also found in Appalachian English. Grammatical classifications have been proposed, including that of quasi-modal, pre-verbal form, and adverb. None of the labelling attempts successfully explains the non-participle "done" paradigm. Clearer understanding of non-participle "done" emerges in the light of its semantic and pragmatic characteristics. Scott treats the non-participle "done" in Black English as "a focus-marker, to emphasize the completion" of the accompanying verb phrase, and points out its semantic incompatibility with certain verb forms. An expansion of this approach can be supported for the "done" in Appalachian English. Data are presented to argue that: (1) the semantics of "done," as a marker of completion or perfective aspect, explains its co-occurrence restrictions with other verb forms; and (2) the functional aspects of its use determine its general incompatibility with clause types other than assertions where it is used to add emphasis. It is argued that syntactic classification alone is not sufficient. The proposal made here is that "done" has the semantic content that indicates the perfective aspect, or completion, and that its pragmatic function is to add emphasis or to intensify an assertion. **Guia Bibliografica del Bilinguismo (Bibliographic Guide for Bilingualism).**

Pub Date Jul 75

Note—11p.; In Spanish

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Annotated Bibliographies, Bilingual Education, \*Bilingualism, Bilingual Students, Education, Language Research, Linguistics, Periodicals, Psychology, Reference Books, \*Resource Materials, \*Spanish

This paper presents a comprehensive, annotated guide to bibliographic materials related to bilingualism, with a particular focus on Spanish-English bilingualism. It is written in Spanish, to meet the needs of the student of language and literature who approaches the study of bilingualism with little prior contact with the research and literature sources outside his/her own field. Useful material from linguistics, education, psychology, and other fields is covered. Included in this document are reviews of general resources (RIE, CIJE), specialized indices, current bibliographies, and additional sources. A list of relevant journals is appended. Items are referenced by call number according to the University of Massachusetts-Amherst Main Library catalogue. (Author)

Descriptors—\*Discourse Analysis, English, \*Error Patterns, Interaction Process Analysis, Language Research, \*Language Usage, Language Variation, Linguistic Performance, Models, Phonology, \*Semantics, Structural Analysis, Syntax

Identifiers—\*Error Analysis

Speech errors have been used in the construction of production models of the phonological and semantic components of language, and for a model of interactional processes. Errors also provide insight into how speakers plan discourse and syntactic structure. Different types of discourse exhibit different types of error. The present data are taken from interviews concerned with domestic tasks, such as routines for preparing family dinners and dinner parties, getting the family off to work, the organization of a baby-sitting pool, and the layouts of apartments. There are almost no phonological errors, and few syntactic errors. The most common type of corrections are of semantic errors or errors of discourse ordering. Four major types of semantic errors are discussed: (1) semantic error involving the correction of potential ambiguity, if both interpretations would be plausible in the context; (2) the correction of the level of lexical specificity; (3) the correction of memory or fact; (4) the correction of the ordering of the discourse components, which provides crucial insights into the process of planning discourses. Cases not marked as errors by speakers, but which current syntactic models do not consider well-formed sentences are also discussed. (Author/CLK)

**Languages for the World of Work: Implications of a Recent Study.**

Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date 29 Nov 75

Note—40p.; Paper presented at the Meeting of the American Council on the Teaching of Foreign Languages (Washington, D.C., November 27-29, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Business Education, \*Career Education, \*College Language Programs, \*Curriculum Development, Employment Opportunities, Higher Education, \*Interdisciplinary Approach, Job Skills, \*Language Instruction, Modern Language Curriculum, Modern Languages, Second Language Learning

This paper concerns languages for career training at the post-secondary level, with implications for FLES and secondary programs. The student desirous of utilizing a foreign language in a career other than literature and linguistics has very limited opportunity for adequate training in college. The job market for literature majors is, and will remain, depressed. A study by Olympus Research Corporation indicates promising job possibilities in government and industry. Needs analysis indicates that priority languages for business and industry are: (1) Spanish, (2) French, (3) German, (4) Portuguese, and (5) Italian. Cross-training is in demand for: (1) business administration/management, (2) marketing/sales, (3) engineering, (4) secretarial and (5) finance. Various government positions also require language skills. Colleges must break with tradition to accept languages for non-humanities applications. Language Departments must team with other academic specialties to provide relevant programs, with priority assigned according to job demand and local resources. Non-academic resources in government, business and industry

should be utilized in implementing such cooperative cross-training in language and other disciplines. (Author/CLK)

**Liberal Arts: Education and Employability.**  
Pennsylvania State Dept. of Education, Harrisburg.

Pub Date 73

Note—43p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Career Choice, \*Career Education, Counseling, Curriculum, \*Higher Education, Humanities, \*Job Skills, Law Instruction, \*Liberal Arts, \*Manpower Utilization, Paramedical Occupations, Sciences, Social Sciences, Teacher Education

The liberal arts have always been considered the purest form of education and its proponents have vigorously defended it against the encroachments of "practicalism." But if we can legitimately claim that liberal arts are truly an education for life, we must remind ourselves that work is the most significant ingredient of our post-educational experiences. We must re-open the liberal arts curriculum to its fullest extent. Six categories of study are used to examine the various options for liberal arts graduates; physical sciences, biological sciences, social sciences, humanities, education, and preprofessional. The student, in trying to fit himself into a particular job slot, should try to think in terms of interests, skills, strengths and weaknesses, likes and dislikes, and in what type of work setting he would be most comfortable. Ultimately the usefulness of the job hunting resources and techniques at your disposal will depend on three factors: (1) your background and qualifications, (2) the type of work you are looking for, and (3) the setting in which you will feel most comfortable. **The Future of the American Council on Education. A Report on Its Governmental and Related Activities.**

Alfred P. Sloan Foundation, New York, N.Y.; Syracuse Univ., N.Y. Maxwell Graduate School of Citizenship and Public Affairs.

Spons Agency—American Council on Education, Washington, D.C.

Pub Date Sep 72

Note—75p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Administrative Organization, Evaluation Methods, Federal Aid, Field Interviews, Governing Boards, \*Higher Education, \*Interinstitutional Cooperation, \*National Organizations, \*Organizational Effectiveness, Program Evaluation

Identifiers—\*American Council on Education

Beginning with an examination of how the ACE's federal relationships might be strengthened, the report evolved into a study of such broad questions as the overall role and objectives of the organizations. Attention is directed to the makeup of its membership, the composition of its board of directors and the functions of the board, relationships to the other higher education associations in Washington, and the ACE's own internal organization. Consideration is given to the operations of the commissions, governmental affairs, data and research, human resources development, political development, and communications and publications. A reappraisal of other ACE programs and their financial implications is also presented. It is concluded that, while considerable dissatisfaction and distress was found among those interviewed with respect to the present and recent roles played by the ACE, there was also virtual unanimity that this is an organization that is badly needed and that must function effectively. **Identifiers**—\*Florida

Cooperative efforts to meet the needs of state agencies in Florida are described. The state legislature earmarks university research funds specifically for projects related to state government in Florida, and the practice is growing throughout the South. Although most universities have public service programs, the real increase in state-university liaisons has been relatively recent. The emphasis on relevance and accountability is seen as a reason for the increased stress on public service as a function of the university. It is also noted that usually colleges and universities comprise the state's largest pool of expertise in many and diverse areas of thought, and the university resources include large, well-stocked libraries, computer capabilities and research facilities. Research studies are reviewed which have assessed the level of public service activities and funding. What a university does in the way of services for the state depends upon several factors, including the size and mission of the school. Certain subject matters also dictate involvement with the state or local community considerably more than others. (LBH)

**Identifiers**—Gross Regional Product, \*Ohio

The community impacts of the proposed higher education capital improvement appropriations for the State of Ohio for the period 1975-77 are identified. These impacts consist of increases in employment due to both direct and indirect effects, increases in Gross Regional Product (GRP) due to income effects, and increases in GRP due to inter-industry effects. The aggregate impact of the proposed \$248.5 million capital improvements proposal for higher education on the state

is conservatively estimated to be a maximum of \$302.3 million increase in GRP due to inter-industry effects, and additional \$365.7 million due to income-consumption effects, and 38,000 new jobs created. It was found that in each of the individual communities affected by the budget proposal, a positive impact on employment and income could be expected. The size of this impact is a function of, among other things, the number of dollars expended. The community impacts study is organized by county. Tables are included on employment effects, income multiplier effects, and inter-industry multiplier effects. (Author/LBH)

This seventh edition of the directory lists those cooperative arrangements in higher education which were reported by their chief administrative officers to satisfy five criteria. Each consortium is a voluntary formal organization with three or more member institutions; has multi-academic programs, is administered by at least one full-time professional; and has a required annual contribution or other tangible evidence of long-term commitment of member institutions. Two trends are identified: the movement to state regionalization where it becomes increasingly difficult to distinguish between voluntary and statutory systems; and a broadening of the base of participation to include the full range of the postsecondary community and related community/regional agencies in cooperative arrangements. The directory includes background and program descriptions for each consortium. It is indexed as to academic, administrative, community, and student activities. (LBH)

**Descriptors**—Activism, \*Administrative Policy, Campuses, \*College Students, \*Demonstrations (Civil), Educational Administration, Grievance Procedures, \*Higher Education, Ombudsmen, Student Behavior, Student College Relationship, Student Responsibility, Student Rights, \*Student School Relationship

To prepare for the possibility of further campus unrest and disorders, the American Association of State Colleges and Universities (AASCU) held a series of regional seminars in the summer of 1970. About 70 presidents and other administrators attended each of the seminars. Their major concern was not the repression of student dissent but finding ways of dealing with disorders so as to protect students' rights and lives and yet satisfy the need for order on the campuses. All seminar discussions were based on the premise that the maintenance of order is an essential obligation of the administration of colleges and universities. The participants discussed ways of preventing disorders before they occur and it was agreed that the most important step is student involvement in decisionmaking. Some specific suggestions included the creation of the office of ombudsman and improving internal communication with such measures as an administration newspaper. Discussion was also concerned with advance preparation for dealing with student disorders and cen-

tered on the formulation of clear policies on student rights and responsibilities and a detailed plan of action for handling disorders including the use of campus police and outside police, and the use of injunctions. (JMF)

**Descriptors**—\*College Faculty, \*Educational Administration, \*Educational Planning, Faculty Mobility, Faculty Promotion, Faculty Recruitment, \*Higher Education, Teacher Retirement, \*Tenure

Information about the current and projected tenure fraction is needed by faculty and administrators at the department level where tenure recommendations originate as well as by the central administration and key faculty-administrative bodies, such as the University Budget Committee where decisions are finalized and budgetary priorities are set. It is in the long-range interests of the university to educate its faculty and administrators on the ramifications of tenure policies. The data presented in this study of tenure at Louisiana State University are designed to assist in faculty planning for this university for the next five and ten year periods. The document presents an historical perspective of the development of tenure at LSU; the tenure policy from a statewide and national perspective; the economic perspective of tenure decisions; current and projected student faculty ratios at LSU; faculty turnover; distribution of tenured faculty by rank and age; and current projected tenure fractions. This study attempts to follow up students who were admitted to the Graduate School at Western Illinois University but failed to enroll. The study is designed to (1) evaluate present services to potential graduate students and (2) better predict what proportion of accepted applicants will enroll. The no-shows are compared for the Fall Quarters of 1971, 1972, and 1974 and are analyzed by sex, mean GRE scores, residence, and undergraduate rank in class. The reasons for not attending WIU are analyzed for those attending some other graduate school as well as for those not enrolled elsewhere. The most frequently cited reasons involved financial problems. A series of recommendations resulted from this study including improving correspondence with prospective students, and increasing financial aid. (JMF)

The Long Range Planning/Comprehensive Management Systems (LRP/CMS) program is an outgrowth of a consortium of 42 developing higher education institutions. The monograph is the result of a decade of experimentation and experience of the members of this group. As such, it is designed to present a detailed long range planning model which incorporates the unique features of educational institutions. The model attempts to offer a step-by-step series of understandable, well coordinated, quantitative targets that would give meaning to an institution's daily operations; and to translate a generic concept into a meaningful series of planned tasks for

everyone within the institution. This planning model attempts to identify that process and provides a methodology that an institution can employ to implement these tasks. (JMF)

**Identifiers**—IEP, \*Information Exchange Procedures, National Center for Higher Education

A major effort of the National Center for Higher Education Management Systems over the past few years has been the development of information Exchange Procedures (IEP) for a broad spectrum of colleges and universities. The motivation for this effort is the strong belief that

the exchange and comparative analysis of data will lead to better information for addressing planning and management functions. This document is designed primarily for an audience of those who are well acquainted with IEP data and procedures, and who have implemented all or part of IEP. The examples and analytic procedures described here, however, do not depend on the exchange of information or on the comparative analysis of data across institutions, but rather are designed to illuminate institutional processes and to address planning and management concerns through use of the institution's own IEP data. Three types of data use are described and illustrated: (1) general descriptive narrative of the institution; (2) more detailed and quantitative descriptive profiles of the institution's departments and student major programs; (3) data use directed toward explanation in addition to description, i.e., differences in costs and in student outcome measures across the departments and student major programs. **The Land-Grant Movement in American Higher Education. An Historical Bibliography of the Land-Grant Movement and the Individual Land-Grant Institutions.**

National Association of State Universities and Land Grant Colleges, Washington, D.C.

Pub Date Apr 62

Note—70p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—\*Agricultural Education, \*Bibliographies, \*Educational History, Engineering Education, \*Higher Education, \*Land Grant Universities

**Identifiers**—\*Morrill Act 1862

Following the Morrill Act of 1862, the Land-Grant institutions developed, keeping pace with the industrial, social and economic changes in our national life. It is the purpose of this bibliography to present sources containing information on this development, through general references and histories of the individual Land-Grant institutions. The items listed are in two parts. The first deals with the history of the Morrill Act of 1862 and the Land-Grant movement in American higher education. The second part provides information on the Land-Grant colleges and universities, not only as individual institutions but also as part of the growth of higher education in their separate states. The items were published between 1858 and 1962, and should prove useful to those who wish to survey these historical facts. (Author/JMF)

**A Study to Determine the Dental Needs in Ohio.**

Ohio Board of Regents, Columbus.

Pub Date Jun 75

Note—54p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—Dental Assistants, Dental Clinics, Dental Health, Dental Hygienists, \*Dental Schools, Dental Technicians, \*Dentistry, \*Health Personnel, \*Higher Education, \*Professional Education

**Identifiers**—\*Ohio

The objective of this study includes a determination of the need for additional dental service and an examination of the dental service delivery system in the state of Ohio. Recognizing that the question of dental manpower and the service it delivers is but one facet of the area of oral health maintenance, and that manpower needs are affected by other factors, the study investigated the following areas: (1) the need for dentists and dental auxiliary personnel in Ohio; (2) the distribution of such personnel in Ohio; (3) the changing role of auxiliary dental personnel; (4) the potential effect of third-party reimbursement upon dental services; (5) national trends in dental manpower and their overall effect on Ohio; and (6) other factors affecting the availability and utilization of dental care. **Descriptors**—Educational Administration, \*Educational Assessment, Educational Demand, \*Educational Finance, Educational Supply, Educational Trends, \*Enrollment Influences, Enrollment Trends, Family Resources, \*Higher Education, \*Resource Allocations, Resources

**Identifiers**—\*Kirschling Postweiler Plan

Higher education is exhibiting three trends or influences: (1) declining enrollments; (2) a low priority for postsecondary education relative to other demands on our public and personal budgets; and (3) scarce resources. The author expresses some skepticism about the strength of these influences. The birth rate is declining, but enrollments are influenced by population shifts, the cost of tuition, the types of programs offered, and the ability of the institution to attract the older, nontraditional student. The lack of public concern for postsecondary education is suspected to be relative to the supply of the services offered. As the supply decreases, public concern will rise. Resources may be scarce, but if people can be convinced they are getting a good buy for their dollar, the proportion of available resources dedicated to postsecondary education can be changed if the need is demonstrated. This involves identifying and assessing the benefits of postsecondary education both measurable and unmeasurable and, at the same time, improving management so that the best use possible is made of these resources. The Kirschling-Postweiler Plan for federal financing of postsecondary education is outlined as providing for tuition reductions, student grants, or general institutional grants to improve access. **Descriptors**—Career Choice, \*College Graduates, Demography, Employment Opportunities, Employment Potential, \*Employment Projections, Employment Qualifications, Employment Statistics, Employment Trends, \*Higher Education, Labor Economics, Occupational Surveys, \*Occupations

**Identifiers**—\*Southern Regional Education Board, SREB

This report presents findings on the supply of college graduates in 1980 in the Southern region as compared to openings in which they may become employed. The projections of the Southern Regional Education Board (SREB) indicate that for a range of 421 occupations (the Comprehensive Projection), there will be a deficit of college educated workers. These occupations extend outside the traditional professional, technical, managerial jobs. The supply/demand comparisons for individual fields of study indicate that health, engineering, accounting, computer science and business administration majors will find a favorable labor market. Education and law school graduates will find a saturated market. Humanities and social science majors will experience difficulty if they are seeking jobs that specifically relate to their educational preparation. (Author/JMF)

**Identifiers**—\*North Dakota

Besides their primary mission of providing education to the students of North Dakota, the 11 colleges and universities in the state represent an important "industry" which generates substantial income to the businesses and people of the state. Total college-related spending in North Dakota was \$76 million during the 1973-1974 school year. This included purchasing supplies, materials, equipment, buildings and services, spending by faculty, staff, students, and visitors. The state appropriated about \$36 million in support of higher education during the same period. Thus, for each \$1 the state contributed to higher education, the colleges and universities returned \$2.10 to the economy of North Dakota. Although limited, the financial analysis data indicates that college related sources are an important source of credit in the state. Time and demand deposits have expanded the credit base in commercial banks as well as savings and loan associations and credit unions. (JMF)

**Identifiers**—Inflation, \*Iowa

Information drawn from a number of different sources was combined through a technique known as aggregate need analysis to measure the unmet financial needs of different groups of postsecondary students. It was found that: (1) after consideration of parental contributions and student self-help, there is an aggregate need for assistance of nearly \$113 million, and there is \$92 million available, including federal aid and grants or scholarships; (2) because of distribution methods, nearly \$34 million in additional need-based student aid would be required to meet all students' need; (3) the need is greatest in the four-year private institutions; (4) families with incomes between \$9,000 and \$12,000 experience the most unmet need; (5) Iowa residents receive proportionally more aid at public institutions and proportionally less at private institutions. These findings are based on the characteristics of students, institutions, and aid programs during the 1974-75 academic year. Possible changes which might occur in the coming year are forecast as a basis for planning. Estimates were made of the impacts of shifts in the proportion of high school seniors going on to postsecondary education, of changes in institutional costs, and of the impact of inflation on student needs. The problems of Iowa residents attending institutions in another state were not addressed. (Author/LBH)

**Descriptors**—\*Adult Development, \*Adult Education, \*Adult Education Programs, \*Career Change, Counseling Services, Federal Legislation, Government Role, \*Higher Education, Program Descriptions, Research

The current economic outlook, including the prospectus of high unemployment rates, creates new objectives and new perspectives to the growing national phenomenon known as the mid-life career change. During the past five to seven years we have witnessed the growth and development of adult counseling centers, whose primary focus is to provide vocational and educational counseling for older individuals. While institutions of higher education have adapted their programs and curriculum to meet adult educational needs and have responded to the changing vocational and personal needs of individuals in their middle and older years, what remains to be tackled is the adoption of the world of work to the work needs of those in mid-life and later life through: (1) enforcement of existing state and federal legislation with respect to age discrimination in employment; (2) education and public affairs programs that demonstrate that older people are good workers; (3) research into the relationship between aging and intelligence; and (4) new policies from government and the private sector that provide meaningful options for the individuals in middle years and older. The major educational reforms enacted in Sweden during recent decades have been part of a general effort to broaden the content of democracy and to bring about a more equitable allocation of affluence, influence, and opportunities of cultural experience. The time has come for the fulfillment of the comprehensive school and upper secondary school reforms by the opening of higher education to new groups in society. Not only must admission requirements be revised, but also the content, organization, and geographical location must be planned with new objectives in mind. Priority must be given to the question as to how higher education is to be distributed between different groups, regions, and educational fields to care for the educational needs of individuals and of working life. **Identifiers**—\*Paul Sabatier University

The data system and its branches, computerized in 1970, provide information from the fol-

lowing: student records file, accountancy file, an experimental-stage personnel file, and a planning-stage facilities file. The files not only cope with the university's daily management duties but also supply the French Ministry with statistics. Two types of data are collected in the student records file: personal and sociological data and academic data. It is used primarily for day-to-day academic management. The accountancy file is primarily a management tool, administering 35 budgets representing teaching and research units and joint university and inter-university departments by recording the revenue and expenditure of over 700 teaching, research and miscellaneous departments. Problems associated with the data system in general are noted along with its overall effectiveness in meeting the original objective of helping to analyze the teaching system, evaluate costs, and ensure proper decision making. The development of information systems is described with regard to the roles of the system user and the data processing specialist. Institutional needs are best served by coordination efforts, usually handled by a management systems office, which is also responsible for the maintenance and production of an institutional data element dictionary and a uniform code manual. Consideration must be given to production processes dealing with data and files, and their management must report at a high enough level in the organization to accomplish coordinated development at the institutional level between various administrative information systems. A model for a user's group is presented. (LBH)

Some of the major elements of administrative information systems design as applied to higher education are described. Differences between the application of computer technology in the commercial environment and the educational environment are discussed. The major steps in systems development from problem definition through implementation are defined, including the differences among production, research, and art-form types of systems development. Traditional horizontal and vertical systems integration techniques are presented and the complexity of interrelating operational data systems in higher education are noted. To give the administrator an appreciation of the need for management of the technical side of system development, modular file structures and table-driven software techniques are used as examples. The relatively new technique of data base management systems is also covered. One definition of management information systems is presented, and the need for closely coordinated and supporting operational data systems is stressed. (Author/LBH)

Identifiers—HIS, NCHEMS

The components of an information system for institutions in higher education are described. The information produced from such a system will be that which is required not only for record keeping and operations but also for planning and budgeting. Technical details are not included, only an overview of the main components of the system as seen from the user's viewpoint. The need for a data bank and a strategy for developing it are examined, followed by a description of the set of models and instructions necessary for data processing. The use of the instructions regarding record keeping, planning, and budgeting is discussed. Specific cases are cited in the final section: one from Europe, HIS, and the other from the United States, NCHEMS. Detailed flow charts are included. (LBH)

Descriptors—\*Budgeting, \*Computer Programs, Conference Reports, Cost Indexes, Educational Finance, \*Educational Planning, Financial Policy, \*Higher Education, \*Mathematical Models, Organizational Effectiveness, Program Costs, Seminars, Systems Analysis

Identifiers—CAMPUS, HIS, RRP

Three models are examined in terms of their historical growth, structural similarities and differences, and their implementation and use. They are CAMPUS (Comprehensive Analytical Methods of Planning in University Systems), RRP (Resource Requirements Prediction Model), and HIS (Hochschule Information System). Their basic logics are explained with respect to level of detail and planning variables. Student flow modules, non-salary costs, and general costing are considered. Differences are cited among dimensions, revenue model, capital budget, output reports, capacity module, and development and implementation costs. Other planning modules are mentioned: CAP/SC/SEARCH, HELP/PLANTRAN, and TUSS. From the viewpoint of helping the user implement and use the model, none of the models provide help in formulating the support (non-salary) cost equations nor in calculating the cost coefficients. The models also do not help the user to calculate trade-offs directly. (LBH)

Based on personal experience of a non-university executive, suggestions are offered for management planning within the university. They include the premise that planning is essentially concerned with controlling and influencing the direction of change and that frustration often derives from difficulty in obtaining or influencing the direction of change. The model of the profit-making corporation is not appropriate to the university, but a systems approach is useful. It involves identifying activities undertaken, organization, constraints, and phenomena of decisions and behavior and explanations for them. An approach to planning is outlined which includes a model of decision making and policy formation. Procedures are given for changing decisions. Two additional views on management are also cited, those of Henri Fayol and Paul Drucker. For Fayol, managing means looking ahead, which makes the process of forecasting and planning a central activity. Drucker holds that management must always, in every decision and action, put economic performance first. (LBH)

#### The Concepts of PPBS and Approaches to Their Application.

Organisation for Economic Cooperation and Development, Paris (France). Centre for Educational Research and Innovation.

Pub Date Oct 74

Note—9p.; Paper presented at the Professional Seminar on Programme Budgets for University Management and Planning (Paris, France, October 1-5, 1973)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Budgeting, Conference Reports, Educational Accountability, Educational Finance, Educational Planning, \*Financial Policy, \*Higher Education, \*Management Systems, \*Operations Research, Program Planning, Seminars, University Administration

The basic concepts of the classic PPBS are summarized, and then attention is directed toward the process by which this has been modified by its collision with the values of the university. The form taken by the new modified PPBS is examined and its component concepts and techniques are identified. It is concluded that the new PPBS has limitations and will be based on deeper understanding of the university environment. If it can be welded to a participative planning process, it should escape the criticism of being purely technique-based. It can ensure that a university's planning process conforms to a logical discipline. (LBH)

Identifiers—Portugal, Programme Institutional Management Higher Educ

Three phases of the project are identified: (1) measuring the cost, per student for each course of study; (2) calculation of the cost per student per course of study in the new institutions and analysis of the sensitivity of the cost per student to the number of students involved and the

changes in the educational method; (3) measuring the return on investment in higher education, including the calculation of the internal rate of interest and the rate of return for the different courses. The conception and implementation of a management information system is described, including a definition of the administrative procedures, technical implementation, and staffing for the administrative tasks. A model is also described for forecast, simulation and resource allocation. This model, MSAR, includes a series of functional relationships connecting several submodels that make possible simulation of decision-making procedures applicable to an entirely new university. Identifiers—Programme Institutional Management Higher Educ, United Kingdom

The complexity of problems facing university administrators is examined, along with the confusion existing as to the role of research management within universities. Based on literature reviews, and discussions with administrators and researchers at various institutions, it is found that as university faculty move further away from pure or basic research supported by government grants toward development or applied work for outside sponsors, so the need arises for greater control of their activities, from an academic, organizational, financial, and other points of view. Each of these aspects of control is discussed, and the use of a management accountant is recommended. (LBH)

Identifiers—Lanchester Polytechnic, Loughborough University, Programme Institutional Management Higher Educ

The teaching function is examined to determine an improved budgetary planning and control system as well as comparisons across universities and polytechnics. The inputs, outcomes and processes of the teaching function are identified and defined, with available data collected and measured with reference to those defined variables and parameters. Institutional objectives of the teaching function are cited as optimization of the student intake potential, the pass rates, learning gain, and student employability. Teacher performance measures are identified as: (1) the average A level points score of enrollments compared with the average A level points score anticipated or some similar measures of the quality of client response; (2) the ratio of successes, failures and dropouts to enrollments; the learning gain; the relationship of each direct input (academic staff, teaching spaces, departmental administration and technician support, consumables and equipment) to enrollments, successes, and learning gain; and (3) feedback on graduates' initial employment and salaries. Statistical comparisons are given for the 1972-73 year, and projected research on such problem areas as measurement of learning gain is outlined. (LBH)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Accounting, Computer Programs, Conference Reports, \*Cost Indexes, Data Processing, Decision Making, Educational Finance, \*Higher Education, \*Institutional Administration, Management Systems, \*Unit Costs, Universities

Identifiers—Fribourg University, Programme Institutional Management Higher Educ, \*Switzerland

Costing principles are applied to a university by estimating unit costs and their component factors for the university's different inputs, activities, and outputs. The information system used is designed for Fribourg University but could be applicable to other Swiss universities and could serve Switzerland's universities policy. In general, it should improve forecasting, decision making, and the monitoring of results in the management of higher education establishments at local and national levels. It should especially lead to quantifying an important factor in university discussions: the cost of a place occupied by a student or research worker at the different levels of the different courses of study or lines of research. The system of analysis involves student record cards, time budget allocation cards, cards showing costs of elementary units of activity, and indirect costs—all used for computerized data processing. Identifiers—Catholic University of Louvain, Programme Institutional Management Higher Educ Principles are outlined that are used as a basis for the system of pricing the services of the Computer Centre. The system illustrates the use of a management method to secure better utilization of university resources. Departments decide how to use the appropriations granted to them and establish a system of internal prices that reflect the cost to the university community of the use of its various resources. This decentralized management method requires the university authorities to have rational criteria for determining the appropriations to be allocated to the various departments. The analysis of unit costs is seen as an essential stage in the introduction of a decentralized management method. It should serve as a basis for defining objective standards to be applied to departmental budgetary requirements. User reactions and problem areas are discussed, including planned jobs, time sharing, increase in volume of budgetary appropriations, and surpluses arising from external work. (LBH)

Identifiers—France, Programme Institutional Management Higher Educ

Methods of evaluating unit operating costs and the development of the services and departments of French universities are examined. After an initial phase devoted to working out a common methodology, it was decided that the latter should be put directly to the test and that devices would have to be found to bridge the gaps in existing data, as, and when, the necessity arose. Each of the universities associated in the research project conducted a number of studies and worked out numerical evaluations set forth in separate reports. It is emphasized that the evaluations are very provisional. The main results are covered in terms of inputs available to the universities (staff, capital operation), as well as the activity and output costs. It is noted in conclusion that the retrospective knowledge of costs is only a stage, not a goal itself, and to be meaningful must be placed in its true perspective, i.e., the improvement of the decision making and management procedures of the university system. **Descriptors**—\*Accounting, Budgeting, Conference Reports, \*Cost Indexes, Educational Finance, Glossaries, \*Higher Education, Institutional Administration, \*Money Management, Program Costs, \*Unit Costs, Universities  
**Identifiers**—France

Proposals for calculating unit costs are advocated that are based on a body of methods common to the member universities. Production inputs and cost components in French universities are studied in terms of resources at the disposal of the university, and staffing, capital, operating, and transfer costs. Identification of activities and calculation of activity costs is reviewed with consideration given to elementary units of activity (UEA) and cost centers, UEA activity indicators, accounting procedures for aggregate costs, and unit activity costs. Output costs are determined with regard to teaching, research, public service, and accessory outputs, student flow, and averaging methods. An approach to budget control is outlined, emphasizing ex-ante activity costs and determination of UEA cost functions. A glossary of terms is included. (LBH)

**Descriptors**—\*Directories, \*Educational Innovation, Educational Planning, Educational Research, \*Higher Education, Interscholar Communication, \*Management Systems, \*School Surveys, Tables (Data), University Administration

The result of a survey carried out within the framework of the Programme on Institutional Management in Higher Education, this directory is based solely on information collected from member institutions. A goal is to encourage member institutions to establish direct contacts among themselves. A list of planning, managerial, and administrative methods and procedures of each institution is compiled, along with a list of innovative practices likely to interest other institutions. Subject areas covered include: budgets and finance; organization and internal structure of the institution; physical facilities; personnel; students; teaching; research; services; management information systems; and other areas. Indexes by country and by subject are included. (LBH)

**Identifiers**—\*Catholic University of Louvain

The dangers in abstract management within the university setting are described and considered in terms of the development of techniques that would enable the university to fully comprehend the content of its activities. The "Report on Unit Activities" at the Catholic University of Louvain is reviewed, dealing with the two-yearly inventory of the Belgian science potential, an experiment in analytical accounting, and procedures for annual reports on research units. The computerized data files are detailed as they relate to activities, characteristics, personnel, budget, and auxiliary files. Practical results of the annual unit report collections include accessible documentation, inventory research, university records, index of disciplines and specializations, analysis of outside

appropriations, and breakdown of personnel time. The reports were chiefly used in the first two years to work out procedure, particularly for data control. Appendices are included in the original French. (LBH)

**The Bases for State Support of Independent Higher Education.**

Pub Date Jun 75

Note—20p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Educational Assessment, Educational Objectives, \*Government Role, \*Higher Education, \*Policy Formation, \*Private Colleges, \*State Aid

The history of governmental support for private higher education is a long one, and current pressures have led to calls for more support at both the state and federal level. Those calls have not been fruitless. Thirty-nine states now have some program of direct or indirect support for private colleges and universities. In many cases, programs seem to have been developed in response to specific needs, and once established with their own power base and natural lobby, continually increased. The ad hoc nature of much state support strongly suggests that it has been built in the absence of an adequately conceived and carefully analyzed policy base. It is important to think systematically about the relationship of state policy and private higher education. Issues involved are policy objectives for all institutions of higher education, whether or not the survival, quality, functions, purposes or outcomes of these institutions of higher education are a matter of state concern; the establishment of consistent outcome indicators; inducements for change; and policy alternatives.  Financing Postsecondary Education: Policy Development and Decision Making. A Series of Conferences. Conference Handbook.

Education Commission of the States, Denver, Colo.

Pub Date Sep 74

Note—161p.

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**

**Descriptors**—Comparative Analysis, \*Decision Making, \*Educational Finance, \*Higher Education, Models, Organizations (Groups), \*Policy Formation, \*Post Secondary Education, Questionnaires

This handbook attempts to improve policy development and decision making relative to financing postsecondary education. Sections cover: (1) descriptions and comparisons of selected reports relative to recommendations for postsecondary financing; (2) position statements and/or comments on postsecondary financing from certain cooperative sponsoring groups for the conference series; (3) descriptions and critiques of possible usage for models in assessing postsecondary financing plans. Also included is a set of questionnaires that might be used in assessing financing proposals and existing financing programs. (Author/KE)

Note—146p.; Paper presented at the Evaluation Conference on Institutional Management in Higher Education (Paris, France, October, 1971)

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

**Descriptors**—\*Comparative Education, \*Cost Effectiveness, \*Data Bases, Educational Planning, Expenditures, \*Higher Education, Management Development, \*Mathematical Models, Resource Allocations, Staff Utilization, Surveys, Universities

This comparative study is broadly divided into two parts. The first presents a simple approximate internationally data-based university overall mathematical resource model derived from an original analysis of a 15-university international sample from the CERI (Center for Educational

Research and Innovation) 1968/1969 Information Survey. It provides a method of estimation of staff and costs at departmental (or equivalent structure) level in terms of twelve broad subject areas and these are then used to derive staff, areas, recurrent and some capital expenditures at the overall university level. The results of a typical example are given. The second part presents a generalized conceptual/data-based methodology for the calculation of university departmental academic, supporting and administrative staff by broad subject area and geographical region. The methodology has been specifically formulated to accommodate different types of student programmes and the method is illustrated by example to a typical British University. Included are relevant observations on international university comparative data derived from the CERI survey. (Author)

**Forecasting Student Entrants, Flows and Success Rates. Technical Report. Studies in Institutional Management in Higher Education.**

Organisation for Economic Cooperation and Development, Paris (France). Centre for Educational Research and Innovation.

Pub Date 4 Nov 71

Note—48p.; Paper presented at the Evaluation Conference on Institutional Management in Higher Education (Paris, France, November, 1971)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Comparative Education, Cultural Differences, Demography, \*Enrollment Rate, Flow Charts, \*Higher Education, Information Systems, \*Socioeconomic Background, \*Success Factors

**Identifiers**—\*University of Novi Sad (Yugoslavia)

This document is concerned with an information system to study the internal dynamics of student flows, choice of subjects and success rates, taking into account different regional affiliations and the socioeconomic backgrounds of students. Among the external factors to be considered will be the demographic dimension in terms of changes in the number of potential entrants due to demographic influences. Equally important consideration is being given to technological developments in the country. Thus far, an inquiry covering 1,200 secondary school dropouts in the autonomous region of Voivodina came to the conclusion that eight high school pupils out of ten intend to continue their education at a university and that they are interested in studying law, arts, economics, engineering, and technology. A thorough investigation of student flows at the Faculty of Economics of the University of Novi Sad came to the conclusion that forecasting the number of incoming students must take into consideration the large variations in the number of entering students, the relatively small number of graduates, and the relatively large number of dropouts after the first and the second year of study. **Gaming Models in Higher Education. Programme on Institutional Management in Higher Education.**

Organisation for Economic Cooperation and Development, Paris (France). Centre for Educational Research and Innovation.

Pub Date Oct 74

Note—85p.; Paper prepared for the IMHE Seminar on Models and Simulated Decision-making for Institutional Management in Higher Education (Paris, November 25-27, 1975)

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—Bibliographies, Computer Programs, Conference Reports, \*Decision Making, Flow Charts, \*Game Theory, \*Higher Education, \*Management Games, \*Mathematical Models, Problem Solving, Simulation

The use of games and gaming, which are simulated decision making, is examined in a paper addressed to the manager and administrator in higher education. Focus is on the use of games in situations of resource allocation for budgeting and long-range planning. Basic definitions and concepts are presented, followed by a discussion of the scope and nature of games and their development. Two games are identified as being currently used in higher education: USG and RRP 1.6, each discussed in detail and evaluated

as to uses and limitations. For further study there is an annotated bibliography to complement specific footnote citations. Appendices include an annotated guide to the literature on RRP 1.6. A systems flow chart is provided along with a listing of the computer program to enable the reader to run USG, and a numerical solution is given to complement the discussion of the logic in the text. The games are mathematical and computerized but there are no prerequisites in mathematics or computer science required of the reader. All need concepts are developed from elemental and primitive terms used in higher education. These concepts are illustrated by means of block diagrams. (LBH)

**Descriptors—**Administrative Policy, \*Case Studies, Comparative Analysis, Conference Reports, Data Analysis, Departments, Glossaries, \*Higher Education, \*Management Systems, Organizational Effectiveness, Policy Formation, \*Questionnaires, Statistical Data, \*University Administration

A set of detailed questionnaires was developed to test a number of hypotheses related to the definition and measurement of practical measures of effectiveness of administration in institutions of higher education. The questionnaires served as the basis of a set of case studies undertaken simultaneously in 19 volunteer institutions during March-May, 1974. The questionnaires are presented, together with their instructions, dealing with departmental procedures and an information sheet providing data on basic statistics of the institution, its formal structure, its status relative to environmental constraints, the state of management technology, and the faculty and departments. An additional administrative questionnaire and one on contingency studies, which should provide some basis for direct objective comparison between the processes of administration at different level of higher education, are also provided. A glossary is included. (LBH)

**Study of the Comparative Effectiveness of Alternative Administrative Structures. Evaluation Report. Programme on Institutional Management in Higher Education.**

Organisation for Economic Cooperation and Development, Paris (France). Centre for Educational Research and Innovation.

Report No.—IMHE-GC-74.38

Pub Date 16 Dec 74

Note—23p.; Paper presented at the General Conference of Member Institutions (2nd, Paris, January 20-22, 1975). For related documents, see HE 006 932 and 934

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Administrative Policy, \*Comparative Analysis, Conference Reports, Departments, \*Educational Research, \*Higher Education, \*Management Systems, Organizational Effectiveness, Pilot Projects, Systems Approach, \*University Administration

The methodology is reviewed and recommendations offered regarding alternative administrative structures. A more systematic study of the literature is advocated, along with the establishment of a reference group of administrators to act as advisors to the research team. The research must be focused on more than one department. The systems approach should be preferred as a method, with the behavioral approach developed further before it can be used in a practical project. The next phase of the project has to be drafted in close contact and cooperation with the administrative reference group. The proposed project must be presented to the members of the IMHE program for comments, suggestions, and approval, and time for amendments

according to discussion of the project draft should be allowed. It is concluded that execution of the project can take place at the various universities, in cooperation with the administrative reference group members. (LBH)
